Recall some of the conspicuous and distinguishing features. (1) We have been for four years (really much longer than that, but for the four years during which the depression developing throughout the larger cycle culminated) doing almost nothing in the way of industrial expansion; it has been a period of forced economy of expenditures and of methods, in which we were recuperating and saving while awaiting an expected catastrophe through a 50-per-cent drop in our standard of values. (2) Now at length absolute relief from that fear has come. It has come, too, concurrently with two years of good crops and a demand at good prices in Europe for them. (3) This crop situation has enabled us as a further preparation for business revival to collect an immense favorable foreign trade balance, and that in turn has secured us a large amount of gold,—by keeping our own product at home and by imports from Europe.

In these ways we have strengthened our paper currency reserve and increased to an abnormal extent the total of the world's currency in circulation in the United States. This latter fact is not fully appreciated because the figures frequently quoted do not include the entire stock. For illustration, according to the Treasury statement the gold in circulation on the first of March 1899 was \$702,305,269; at the same date of previous years the same item was as follows: In 1898 it was \$553,884,882; in 1897 it was \$516,315,696; in 1896 it was \$445,293,591. That is to say, since March 1 1896 the gold in circulation has increased \$257,011,673. Adding the net gold in the Treasury at the two periods the increase will be found to have been \$353,407,156; the total net gold (coin and bullion) in Treasury and in circulation in this country March 1 1899 being \$966,396,746 and on March 1 1896 being \$612,989,590.

It thus becomes obvious that this enlargement of our stock of the world's money to the amount of 353½ million dollars, accumulated during the previous years of depression, was on hand ready to help carry on with ease our greatly increased business and exchanges that have been the outcome of our recent industrial development. We had no use for it up to that moment except to safeguard our paper currency. Its increase, then, as a factor in our money market was much the same as if the whole amount had been emitted at once and at the time when our quickened industries needed it—a preliminary to the requirements which business revival raised. Moreover it had

more than that effect, it likewise imparted absolute confidence at home and abroad in every dollar of our various kinds of paper money and gave greater efficiency to that class of currency; we may assume also that it brought out from their hiding places much gold and paper that had been secreted during the previous years of alarm. Also because of it we are to-day more closely in touch with the capital of Europe and are enjoying its use to a greater extent than ever before and the benefits which the moral influence of such closer contact confers.

As already stated, we have recently begun to experience better times. Bear in mind that the change is only in its incipient stage. That is, the buoyancy has not as yet become general by any means. Nevertheless our country has already made a wonderful leap; but if development is to go on and permeate the mass of enterprises in all parts of the country, we ought with the opening spring to see activities stimulated along the whole line of our industries. Perhaps one can get the best idea of the change that has already taken place by a comparison of clearings. Considered as they stand, without any allowances or eliminations for the increasingly large item taken out of the New York clearings by the Stock Exchange Clearing House, the annual figures present the following comparison for the last five years: \$68,883,918,580 in 1898, against \$57,321,973,206 in 1897 and \$45,545,110,059 five years ago in 1894; that is, the above shows an increase of over 23 thousand million dollars in five years and over 10 thousand million dollars in one year. Carry this comparison a step further. Note the contrast presented between the actual figures for January and the short month of February 1899 and the monthly averages for previous years.

AVERAGE MONTHLY BANK CLEARINGS.

	New York.	Other Cities.	Whole Country.
1893.....	\$2,605,086,478	\$1,913,522,523	\$4,518,607,001
1894.....	2,032,317,252	1,763,108,586	3,795,425,838
1895.....	2,486,816,410	1,952,541,208	4,439,357,618
1896.....	2,405,897,921	1,871,929,699	4,277,827,620
1897.....	2,767,585,822	1,991,245,478	4,776,831,100
1898.....	3,497,648,536	2,242,678,012	5,740,326,548
1899. { Jan.....	5,890,749,776	2,801,939,029	8,492,688,805
Feb.....	4,550,639,231	2,429,704,424	6,980,343,655

The foregoing results present in a forcible way the real change the business situation has undergone, and do not need elaborate comment. We would like to enforce by greater detail the single point as to the partial nature of the business buoyancy hitherto experienced. But that is unnecessary, as the fact is generally recognized, and it is likewise recognized that in all probability with the opening of spring the movement will be quickened throughout the country. Mindful, then, of this presumption and of the conditions as a whole that we have recited above, do we not find the situation unreliable as a basis for forecasting the future of money? We do not mean that there is any stringency in sight or monetary panic in prospect. Our contention is simply with reference to the continuance of extreme low rates so many are prognosticating. To be sure our banks start with substantial surplus reserves. But when we measure the large increase in the operations now in progress, the phenomenal deposits and loans being carried and the constantly increasing amount of business done, not only by the Clearing House institutions but also by non-member and near-by banks, by trust companies, insurance companies, etc., all dependent upon those reserves, is it not

true that this surplus is relatively no larger than a considerably smaller surplus was on any former occasion? We think, too, our Clearing House banks have been showing that such is their view of the situation and that this is the explanation of the little closer money and greater discrimination in loans which has been the feature for several weeks now notwithstanding the considerable surplus.

All the other facts we have brought out tend to confirm the same conclusion. Judging from the present outlook, it is unreasonable to expect that another year our foreign merchandise trade movement will show a favorable balance approximating the present. It seems likely, also, that our expenditures during the same time for army and navy purposes in the Philippines, Cuba, etc., will be large, and be a new offset against a favorable balance. Altogether the chances are that instead of gaining a net of \$59,334,000 gold (as we have thus far the current fiscal year), we shall export gold another winter; that instead of gaining probably \$150,000,000 net currency in circulation by the disbursements of the Treasury in excess of the receipts, which is the amount we shall probably gain in 1898-99 (the excess of disbursements has already been 103½ million dollars) it is not likely that the circulation will be added to in that way in 1899-1900 over 50 million dollars. When we consider these prospective changes and the greater and more general business activity presumably to be developed within the next twelve months, is it reasonable to forecast a money market working no closer or on no higher level than at present?

The buoyancy in the iron and steel markets continues and prices are now advancing "by leaps and bounds." Steel billets at Philadelphia have this week gone up another dollar and a-half per ton, raising the price to \$25 50 per ton. A month ago the quotation at the same point was \$19 50; last year at this time it was but \$17 30. At Pittsburg the price for billets is \$23 50, which compares with \$17 25 per ton a month ago and with \$15 25 a year ago. For foundry pig iron (No. 2) \$13 75 is being asked; a month ago it could have been bought for \$12 00 and in March 1898 for \$10 50. Southern foundry pig of the same grade (No. 2) commands \$13 25 per ton, whereas in February the price was \$11 75 and in March of last year but \$9 00. In fact, it may be stated that in the whole list of leading articles for which quotations are furnished, whether of raw material, or of old material, or of finished iron and steel, there is not a single one that does not record an important increase as compared with the quotation at the beginning of February, while as contrasted with the corresponding date in 1898 the appreciation in values reaches very large proportions. Moreover, the tendency is still upward, and the indications are that further advances may occur.

It is plain from the conditions here outlined that consumers of iron and steel are rapidly becoming scared. The demand has been for some time in excess of the current outturn. Now consumers are evidently apprehensive of an actual scarcity. And it must be admitted that thus far expectations of a great addition to the supply have not been realized. The monthly record of pig iron production kept by the "Iron Age" throws a great deal of light upon the situation in that particular. The "Age" finds that during the

past month there was a further reduction in the number of furnaces in blast and their weekly production, so that on March 1 the output was only 238,195 tons per week, against 237,639 tons February 1 and 243,516 tons January 1. Quite a number of stacks were stopped from various causes, while very few furnaces long idle were added to the list of active producers. At the same time the aggregate of stocks held, sold and unsold, underwent further contraction, the total being reported 416,473 tons March 1, against 462,904 tons February 1 and 621,728 tons October 1 last. The American Pig Iron Storage Warrant Company is likewise holding diminished amounts, its report showing only 126,300 tons of warrant iron March 1, against 135,200 tons February 1 and 215,600 tons last October. The bad weather seems to have been in part responsible for the falling off in production during the last month. Aside from this, however, the "Age" thinks events prove that new capacity cannot be made quickly available. It admits that preparations are going on in different parts of the country on an extensive scale, but consumers must reckon with the fact that it takes a good many months to get ready. The present lucrative prices it avers will bring "every old pot" into line, and yet time is required even to accomplish the feat of putting the cripples on their legs. We observe that the "Age" takes occasion to point out that notwithstanding the advance in prices "Southern makers have still been selling iron for export"—which, under present conditions, is certainly a very encouraging circumstance.

There have been a number of dividend announcements this week by leading corporations which had been looked forward to with considerable interest. Chief among these have been the dividends on American Sugar Refining stock and Milwaukee & St. Paul common shares. In neither case has any change been made, which thus accords with popular expectation. The declaration of the usual dividend on "Sugar" common indicates nothing as to the state of the war among the sugar refiners or the profits earned by the company. The concern is a close corporation, and the outsider is just as wise now as he was before. The action of the Milwaukee & St. Paul directors of course belongs in a totally different category. No railroad in the country has been doing better than the St. Paul. It has been making steady and large gains in earnings week by week and month by month. Moreover, the property is in excellent condition, both physically and financially. The question of increasing the rate was therefore solely a matter of policy, and the managers in determining to adhere to the old rate have simply continued the policy of conservatism for which the St. Paul board has been distinguished for so long. The Union Pacific is also a company which has determined to keep its dividend unchanged, having yesterday declared another dividend of 1½ per cent on the preferred stock, the same as last October. While on the subject of dividend distributions, it should be noted that the Chicago Indianapolis & Louisville has the present week declared a dividend of one per cent on its preferred shares. This company is a reorganization of the old Louisville New Albany & Chicago, and the present is the first payment made by the new company.

The activity in the market for money this week seems to have resulted in bringing into the market outside supplies to such an extent that previous conditions for call money have been restored. The easier tone to the call loan branch of the market on Thursday was distinctly traceable to the loaning of about \$5,000,000 of country bank money, this following the loaning of \$2,000,000 of such money on time on the previous day. A suggestion which may possibly in part explain the large offerings of call money on Thursday is, that the funds, amounting to about \$24,000,000, for payment for the Chicago & Alton stock on the 15th inst. are being accumulated, and that these are temporarily loaned. It is reported, however, that this money will not be collected by the syndicate until needed for payment and that it will be immediately returned to the market. Money on call, representing bankers' balances, has loaned at 4 per cent and at 2 per cent during the week, averaging about  $2\frac{3}{4}$  per cent. The higher rate was recorded on Monday, though the bulk of the business on that day was at 3 per cent. On the following day the rate did not rise above  $3\frac{1}{2}$  per cent, while on Wednesday the range was from 2 per cent to 3 per cent, with the bulk of the business at  $2\frac{1}{2}$  per cent. On Thursday the range was from  $2\frac{1}{2}$  per cent to 3 per cent, with loans chiefly at  $2\frac{1}{2}$  per cent, and on Friday rates were also  $2\frac{1}{2}$  to 3 per cent. Banks and trust companies quote  $2\frac{1}{2}$  per cent as the minimum, the majority, however, loaning at  $2\frac{3}{4}$  to 3 per cent. Rates for time contracts depend almost wholly upon the character of the collateral offered. On good mixed Stock Exchange security rates are  $3\frac{1}{4}$  per cent for ninety days and  $3\frac{3}{4}$  to  $4\frac{1}{4}$  per cent for four to six months, and the inquiry is chiefly for the shorter period. As above noted, \$2,000,000 of out-of-town money was placed on Wednesday, and this was loaned at  $3\frac{1}{2}$  per cent for four months on good Stock Exchange collateral. No quotations are reported for loans with an admixture of industrial stocks, these contracts being generally subject to special agreement, but as a rule the business done is at rates about 1 to  $1\frac{1}{2}$  per cent higher than those quoted for good mixed collateral, according to the character and degree of the admixture. There is a fair supply of commercial paper on the market and the demand is good, one feature being buying by some of the out-of-town banks, which are reported to be taking moderately large amounts of the best names. Rates are  $3\frac{3}{4}$  per cent for sixty to ninety-day endorsed bills receivable,  $4$  to  $4\frac{1}{2}$  per cent for prime and  $4\frac{1}{2}$  to  $5\frac{1}{2}$  per cent for good four to six months single names.

The bank statement, to be made public to-morrow, will probably be somewhat influenced by the payment by the Central Pacific syndicate to the Government of about \$12,000,000, one-half of which will be placed in the Sub-Treasury and the other half in the National City Bank as one of the Government depositories. The checks for the money passed through the Clearing House on Friday, making the Assistant Treasurer creditor to the amount of \$5,886,391 08. The transaction, occurring so near the close of the week, should have comparatively small influence upon the averages for this week. Our reports show that the interior movement during the week has not been very important, though Boston seems to have been drawing because of dearer money at that centre. About \$3,000,000 gold has been received

from California. Business conditions throughout the country are good, collections are prompt and mercantile borrowing is comparatively small.

There was some political tension in Europe this week, growing out of a new phase of the Russo-Chinese question, but it seemed to have only a slight influence upon the European financial situation. The Bank of England rate of discount remains unchanged at 3 per cent. The cable reports discounts of sixty to ninety-day bank bills in London  $2\frac{3}{4}$  per cent. The open market rate at Paris is  $2\frac{3}{4}$  per cent, and at Berlin and Frankfort it is  $4\frac{1}{4}$  to  $4\frac{3}{4}$  per cent. According to our special cable from London, the Bank of England lost £598,625 bullion during the week and held £33,144,052 at the close of the week. Our correspondent further advises us that the loss was due to the export of £343,000 (of which £330,000 were to the Argentine Republic and £13,000 to other South American countries), to shipments of £311,000 net to the interior of Great Britain and to £55,000 imported, of which £49,000 were bought in the open market and £6,000 from Australia.

The foreign exchange market has been only moderately active this week, influenced chiefly by the course of our market for money, and also by the hardening tendency for discounts in Europe. On Monday, for example, when money was active here exchange fell off fractionally, but later in the week when money rates on call grew easier and rates in Europe higher, exchange became firmer. Bankers continue to report a small supply of commercial bills, and especially those drawn against cotton, but at the same time there does not appear to be much of a demand, and the inquiry seems to be mainly in connection with the semi-monthly settlement in London, though possibly pending or perhaps completed bond negotiations may have some influence. The arrival of \$1,000,000 gold at San Francisco from Australia is reported. The arrivals of gold at this port during the week were \$308,519, of which \$288,500 were from Europe. The range for nominal rates for exchange has been from  $4$   $84\frac{1}{2}$  to  $4$   $85$  for sixty day and from  $4$   $86\frac{1}{2}$  to  $4$   $87$  for sight, though the majority of the drawers quoted the lower figures. Rates for actual business opened on Monday at a decline of one-quarter of a cent for long, compared with those at the close on Friday of last week, at  $4$   $83\frac{1}{2}$  to  $4$   $83\frac{3}{4}$ , while those for short and for cables remained unchanged at  $4$   $85\frac{1}{2}$  to  $4$   $85\frac{3}{4}$  for the former and  $4$   $86$  to  $4$   $86\frac{1}{2}$  for the latter. The tone was easy, influenced by more active money, as above noted, and it so continued on the following day, though then no change was made in quotations. The market was steady and rates were unaltered on Wednesday, but on Thursday the tone grew firmer, influenced by easier money on call here and slightly dearer discounts in London, and rates for actual business were advanced one-quarter of a cent all around to  $4$   $83\frac{3}{4}$  to  $4$   $84$  for long,  $4$   $85\frac{1}{2}$  to  $4$   $86$  for short and  $4$   $86\frac{1}{2}$  to  $4$   $86\frac{3}{4}$  for cable transfers, and Continental exchange was also firm. The market was easier on Friday at a decline of one-quarter of a cent all around, with rates for actual business  $4$   $83\frac{1}{2}$  to  $4$   $83\frac{3}{4}$  for long,  $4$   $85\frac{1}{2}$  to  $4$   $85\frac{3}{4}$  for short and  $4$   $86$  to  $4$   $86\frac{1}{2}$  for cable transfers. Commercial on banks  $4$   $83$  to  $4$   $83\frac{1}{2}$  and documents for payment  $4$   $82\frac{1}{2}$  to  $4$   $83\frac{1}{2}$ . Cotton for payment  $4$   $82\frac{1}{2}$  to  $4$   $82\frac{3}{4}$ , cotton for acceptance  $4$   $83$  to  $4$   $83\frac{1}{2}$  and grain for pay-

ment 4 83@4 83½. The following shows daily posted rates for exchange by some of the leading drawers:

The following statement gives the week's movement of money to and from the interior by the New York banks.

Week Ending Mar. 10, 1899.	Received by N. Y. B'ks.	Shipped by N. Y. Banks.	Net Interior Movement.
Currency.....	\$5,194,000	603,000	Gain. \$391,000
Gold.....	623,000	0 0,000	Gain. 230,000
Total gold and local tenders.....	\$5,817,000	\$5,003,000	Gain. \$811,000

With the Sub-Treasury operations and gold imports the result is as follows.

Week Ending Mar. 10, 1899.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.
Banks' interior movement, as above	\$5,817,000	\$5,003,000	Gain. \$811,000
Sub-Treasury operations.....	27,700,000	26,700,000	Gain. 1,000,000
Total gold and local tenders.....	\$33,517,000	\$31,703,000	Gain. \$1,811,000

The following table indicates the amount of bullion in the principal European banks.

Bank of	Mar. 9, 1899			Mar. 10, 1899.

PENNSYLVANIA RAILROAD REPORT.

The Pennsylvania Railroad in its report makes just such a showing as one would expect in the case of a property so excellently managed and which for years has been maintained at such a high standard of efficiency in every branch of the service. Possibly some disappointment will be felt over the fact that the income account does not reveal a larger surplus on the year's operations over and above the regular dividends paid. But considering on the one hand the conservative methods of bookkeeping employed by the company and the disposition on the part of the managers to make large contributions out of earnings each year for outlays which under a less far-sighted administration would be charged to capital account, and considering on the other hand the fact that the conditions prevailing were not altogether favorable, the results cannot be regarded otherwise than very satisfactory and very creditable.

It may perhaps be deemed strange that we should say the conditions were not altogether favorable. But such is very decidedly the fact. Bear in mind that though 1898 was a year of reviving trade, the Eastern half of the country, in which the lines of the Pennsylvania system are located, did not share in this to the same extent as the Western half. One or two leading industries, as is known, did not reveal evidences of activity until well towards the close of the

year. Furthermore, there were at least two occasions when trade throughout the whole country showed a lagging, halting tendency. One of these occasions was early in the year when the relations between the United States and Spain became so deeply disturbed, finally culminating in war. If this interruption did not last very long, at least during its continuance business revival ceased making very much headway. Later in the year there was another pause of temporary duration in the period preceding the November election, when there was a disposition to wait and see whether the silver forces, after their defeat two years before, would show a revival of strength.

Of course we do not intend to assert that trade and business in 1898 were not larger and better than they had been in 1897. The noteworthy increase in the tonnage and traffic of the railroads shows that there was a very decided betterment and enlargement. We only mean to say that there was not a full and free and continuous development, that hence while the expansion in the volume of traffic was large it was not as heavy as it otherwise would have been, and that as a consequence the addition did not suffice, so far as net revenue was concerned, to overcome the effects of certain depressing agencies which have played a very important part in the year's revenue results. These depressing agencies were mainly the demoralized rate situation and the unsatisfactory condition of the anthracite coal trade. With reference to the latter, the Pennsylvania is not, as is known, a distinctively anthracite coal road (that is, the anthracite coal traffic does not form a preponderating part of its tonnage); nevertheless, the anthracite traffic constitutes an important item of freight, and the fact that the trade was so much depressed—that the inquiry for coal was diminished and tolls were lower—necessarily operated to the disadvantage of the road.

As to the demoralization of rates, that was the most important adverse influence in the year's operations. The situation in this particular has improved so materially since the opening of the current year that one is apt to forget how totally different was the state of things during 1898. Hence, it seems important to repeat what we have said many times in these columns, namely that never before except at a time of actual war between the roads were rates in such a chaotic condition. Scarcely any attention was paid to schedule tariffs, and shippers were able to make practically their own terms. The blame for this hardly attached to any one road, and the stronger companies, like the Pennsylvania, which always are the last to yield to the general pressure, were powerless to check the evil, try how they might.

On every page of the report we find evidence to show the effects of the rate demoralization. In the first place there has been another important decline in the average rate received. On the lines east of Pittsburg and Erie this average has now dropped to below half a cent per ton per mile, having been for 1898 only 4.99 mills, which compares with 5.36 mills for 1897. If this were simply the rate for coal (of which the Pennsylvania has a large tonnage) or for some of the other low-grade and bulky freights, it would not be so important. As it is, it is the average on the company's entire freight traffic, and the Pennsylvania of course has a very large tonnage in the high-class freights. On what is called the "Pennsylvania Railroad Division," which forms part

of the lines east of Pittsburgh, the average for 1898 was but 4.34 mills, against 4.75 mills in 1897, and on the Philadelphia & Erie (also a part of the lines east of Pittsburgh) the average was less even than four mills per ton mile, being 3.98 mills against 4.20 mills.

Looking now at the gross revenues of the lines east of Pittsburgh, it is seen that the total was \$65,603,738 for 1898, against \$64,223,113 for 1897, the increase thus being \$1,380,625, or a little over two per cent. But on examination it appears that \$1,037,478 of this increase was in the passenger department, that freight revenues were added to only in the sum of \$169,599, or not much more than one-third of one per cent. On the other hand the tonnage mileage in 1898 was 678,302,041 ton miles greater (or 7.93 per cent) in 1898 than it had been in 1897. In brief, on account of the decline in rates the additional tonnage of 678 million ton miles brought with it an increase in freight revenues in the insignificant sum of \$169,599.

But the revenue accounts tell only part of the story. The expense accounts show the effect no less plainly. With \$1,380,625 addition to aggregate gross receipts, the augmentation in expenses was \$1,252,389, leaving a gain in net of only \$128,235. It frequently happens that augmented expenses are due to heavier outlays on maintenance account. In this case the increase has followed almost entirely from the larger cost of "conducting transportation," \$1,142,442 of the \$1,252,389 augmentation in expenses being explained in that way. This simply means that while the increased traffic yielded very little addition to gross receipts, it added very decidedly to the expense accounts. In other words, it cost more to do the increased amount of work. Yet it is a fact that the property was managed more economically than ever before and the transportation cost per unit of work was further cut down. The expense of transporting a ton of freight a mile on the lines east of Pittsburgh was only 3.55 mills, against 3.69 mills in 1897. But the saving here was proportionately so much less than the coincident shrinkage in rates that the profit per ton per mile fell to 1.44 mills, against 1.67 mills.

The experience for the lines west of Pittsburgh has been much the same. The *Pennsylvania Company*, with \$863,938 addition to the gross receipts, added \$1,369,741 to expenses, producing an actual loss of \$505,802 in net earnings. Doubtless, in this case heavier outlays on maintenance and betterment account have played their part in bringing about this unfavorable result. The *Pittsburg Cincinnati Chicago & St. Louis* in like manner suffered an augmentation of \$1,490,727 in expenses, with only \$1,170,709 increase in gross receipts, thus causing \$320,017 diminution in the net.

In these cases we have dealt only with the results for the lines directly operated east and west of Pittsburgh. The report contains a statement embracing *all* lines—owned, controlled and operated. Here we find an expansion of \$4,591,384 in gross receipts but a contraction of \$676,914 in net earnings. The *Pennsylvania* is of course a system of great magnitude, and the \$4,591,384 increase in gross revenues amounts to only  $3\frac{1}{2}$  per cent. The increase in the tonnage movement one mile however was 9 per cent and in the passenger mileage about 7 per cent. Perhaps the best way of indicating the effect of the great decline in rates which has been going on so

steadily for so long is to contrast the results for 1898 with some of the earlier years. With the increase in the late year the aggregate of the gross receipts in 1898 for the whole *Pennsylvania* system stood at \$132,869,470. But back in 1892, six years before, the aggregate was as high as \$139,133,660. At that time some income other than from traffic was included in the totals. Eliminating this the 1898 result would still fall over four million dollars below that for this earlier year. And yet in the meantime there has been a tremendous expansion in the traffic of the system. The passenger movement, it is true, was somewhat less in 1898, having been 1,619,986,095 passengers one mile in 1898, against 1,758,907,322 in 1892, but the freight traffic aggregated 16,169 million tons one mile in 1898, against only 13,457 million tons, the increase thus having been 20 per cent. In brief, such has been the decline in rates that even with an addition of 2,712 million ton miles to the traffic of the system, gross revenues still fall over four million dollars short of what they had been in this earlier year.

We have gone thus at length into this question of declining rates because, without a thorough understanding of it, the trying character of the conditions prevailing and the favorable nature of the results attained thereunder could hardly be fully appreciated. Aside from the small gain in net on the lines directly operated east of Pittsburgh, the rental charges of leased and operated roads were considerably heavier, so the net income above charges for 1898 was only \$10,228,728, against \$10,833,132 for 1897. The contributions on sinking fund account were a little heavier in the later year, but the extraordinary expenditures were somewhat less. Deducting these, the final result may be said not to have differed much in the two years, being \$9,108,089 for 1898, against \$9,346,637 for 1897. The call for the five per cent dividends was \$6,465,236; hence there was a surplus of \$2,642,852 over and above the amount required for the dividends. Out of this, \$1,800,000 was contributed to the Extraordinary Expenditure Fund, leaving \$842,853 as the surplus which was actually carried forward to the credit of profit and loss.

We may sum up therefore by saying that in a year of exceptionally great demoralization in rates the company earned its 5 per cent dividends and had left a surplus balance of \$842,853, after (1) providing \$673,857 for extraordinary expenditures in revising grades, alignments, etc., and (2) making a contribution of \$1,800,000 more to the Extraordinary Expenditure Fund. It deserves to be remembered too (3) that this result was attained without including any return from the company's investments in the stocks of its Western lines. No dividend was paid on the \$21,000,000 of *Pennsylvania Company* stock owned, nor was anything received on the holdings of *Pittsburg Cincinnati Chicago & St. Louis* shares. The payment of dividends by these companies is largely a matter of policy. The final net result of their operations was not as favorable in 1898 as it had been in 1897, and yet the aggregate net profit was large, being no less than \$1,800,744, which compares with \$2,336,598 for 1897. A dividend of  $1\frac{1}{2}$  per cent has just been declared on the preferred shares of the *Pittsburg Cincinnati Chicago & St. Louis*, but the *Pennsylvania Railroad's* direct holdings of these shares is small. A dividend on the *Pennsylvania Company* stock however would mean a large addition to the net income of the *Pennsylvania Railroad*.

# RAILROAD GROSS EARNINGS FOR FEBRUARY.

We presume no one looked for a very favorable exhibit of earnings for the month of February. The weather was so bad and was such an all-controlling factor in the situation that it was impossible that the returns should not reflect the fact. Last year the weather was very mild and the interruptions to traffic movements on account of adverse meteorological conditions hence were comparatively slight. The present year the conditions were about as bad as they could be. Out in the extreme West, in Colorado and Wyoming, many of the lines have been almost continuously blockaded with snow for some weeks.

In the eastern half of the country the trouble came from a double source. In the early part of the month intense cold was experienced, the temperature even here in New York dropping to below zero for several days. Then came the great snowstorm, or blizzard, culminating on the 13th in one of the worst disturbances of this kind with which we have ever been afflicted. In some respects the disturbance was worse than the memorable blizzard of March 12, 1888. It covered for one thing a much wider area, embracing in its sweep the whole of the territory from Texas to the Canadian border. In the South the mercury touched low points never previously known. What the effect on business and traffic on the Atlantic coast was is within the recollection of every one, the occurrence being so recent. Railroad traffic was for the time being almost entirely suspended, and it took many days to restore normal conditions. In somewhat smaller degree the whole eastern half of the country suffered.

Evidence of the disturbing nature of the occurrence is found in our summary statements of the earnings for the different weeks of the month. For the first week the results were still fairly satisfactory, our table recording 3-24 per cent gain. For the second week the statement showed \$319,235 loss, or 11-28 per cent, and 65 out of 77 roads reporting fell behind. For the third week there was a trifling increase, but 35 out of the 80 roads included in the statement still had losses. For the fourth week there is 2-76 per cent gain, with 30 roads reporting losses.

For the full month our compilation to-day, embracing 123 roads, records a small decrease in the aggregate—\$402,570, or 1-02 per cent. That must, all things considered, be regarded as a very satisfactory exhibit, especially as the showing last year was exceedingly good, our table recording almost five million dollars improvement, or nearly 14 per cent over February 1897. The following gives the February summaries for a series of years past.

	Miles.		Earnings.		Increase or Decrease.
	Year Given.	Year Preceding.	Year Given.	Year Preceding.	
February.	Miles.	Miles.	\$	\$

As far as the ordinary traffic influences were concerned, there was a very decided shrinkage in the cot-

ton movement in the South, due in large part to the adverse weather. The overland movement of the staple closely approached that of the previous February, the gross shipments amounting to 170,907 bales, against 191,316. But the receipts at the Southern outports aggregated for the month only 356,091 bales, against 667,534 bales, as will be seen by the following table.

RECEIPTS OF COTTON AT SOUTHERN PORTS IN FEBRUARY, AND FROM JANUARY 1 TO MARCH 1, IN 1899, 1898 AND 1897.

The grain movement in the West, notwithstanding the increase last year, made this year a further increase. Thus for the four weeks ending February 25 the aggregate of the receipts of wheat, corn, oats barley and rye combined was 53,650,919 bushels in 1899, against 45,350,572 in 1898 and 42,107,939 bushels in 1897. It is important to note however that in the present year the further gain was almost entirely at the spring-wheat points—Chicago, Minneapolis and Duluth—while St. Louis and most of the points in the Central West suffered somewhat of a decrease. This fact is manifest from the following table.

RECEIPTS OF FLOUR AND GRAIN FOR FOUR WEEKS ENDING FEB. 25.

If we treat Chicago by itself and take the figures for the even month, the advantage held by the spring wheat sections (and consequently the roads running through those sections) in the way of a larger movement becomes still more patent. The total of the

receipts at that point for the month was 24,702,627 bushels, against 19,914,883 bushels for February 1898 and 18,379,731 bushels for 1897. Annexed is our usual table, giving full details, and also showing some of the items of the live-stock and provisions movement. It will be observed that the receipts of live hogs were 724,998 head, against 690,656 head in 1898 and 709,538 head in 1897. We may add that in the live-stock movement as a whole there was a loss, the deliveries by the various roads aggregating 20,054 car-loads, against 22,170 car-loads in 1898 and 21,605 car-loads in 1897.

#### RECEIPTS AT CHICAGO DURING FEBRUARY AND SINCE JANUARY 1.

It is almost unnecessary to say that the roads reporting losses in earnings this time outnumber those reporting gains. Altogether our table covers 123 roads, and out of these 62 have fallen behind. Nevertheless, there are several companies that have quite fair-sized gains, the Canadian Pacific leading, with an increase of over a quarter of a million dollars. In the following we have brought together all the gains and losses in excess of \$30,000.

#### PRINCIPAL CHANGES IN GROSS EARNINGS IN FEBRUARY.

Increases.		Decreases.	
Canadian Pacific.....	\$257,403	New York Central.....	\$103,801
Chic. Mil. & St. Paul.....	179,158	Norfolk & Western.....	100,555
Gt. Northern System.....	183,207	Clev. Cin. Chic. & St. L.	93,287
Grand Trunk System.....	149,983	Illinois Central.....	91,442
Wabash.....	58,684	Oregon RR. & Nav.....	87,672
Mexican Central.....	51,575	Texas & Pacific.....	73,099
Bur. Ced. Rapide & No.....	48,015	Balt. & Ohio Southwest.	70,745
Chic. Great Western.....	32,935	Kan. C. Ft. S. & Mem.....	82,160
Kan. C. Pitts. & Gulf.....	30,904	Central of Georgia.....	53,708
Interoceanic.....	30,270	Northern Pacific.....	48,358
Total (representing 14 roads).....	\$1,005,132	St. Louis Southwestern.	45,139
Decreases.		Wisconsin Central.....	34,983
Mo. Pacific.....	\$218,000	Georgia.....	35,565
Chesapeake & Ohio.....	153,388	Internat. & Gt. Nor.....	84,797
Louis. & Nash.....	138,434	Total (representing 17 roads).....	\$1,445,133

\* For three weeks only.

The foregoing gives prominence to the fact that the roads chiefly distinguished for improved earnings are nearly all located in the spring-wheat sections, where, as we have seen, the grain movement was so full and free. The fact that these spring-wheat roads have done better than any others also appears when the roads are arranged in groups. This is done in the tables which follow, giving comparisons for leading roads in each group, and it will be noticed that the Northwestern group is the only one having a larger aggregate for 1899 than for 1898.

#### EARNINGS OF SOUTHWESTERN GROUP.

February.	1899.	1898.	1897.	1896.	1895.	1894.

## A FORMER MERCHANT BECOMES A LAWYER.

The Appellate Division of the Supreme Court, first department, last week admitted to the Bar of the State of New York, under its somewhat stringent requirements, with the endorsement as to character of ex-Judges Wm. G. Choate and Roger A. Pryor, and Howard Ellis, Esq., a man 57 years old, who was reared as a merchant, and began the study of law at the age of 54—Francis B. Thurber.

Mr. Thurber was born on a farm in Delaware County, New York, and was educated in the common schools and the Delaware Academy; began as a boy in commercial life in New York at \$2 a week, and in thirty years worked up to the first rank in the commercial world as partner, and then president of a great house, with branches in London and Bordeaux, and correspondents in all parts of the world. In 1892 he was a reputed millionaire, but the panic of 1893 left him a poor man.

He has been a student and a thinker; a contributor to the "press" and "reviews" on politico-economic subjects upon both sides of the Atlantic. While Chairman of the Committee on Foreign Commerce of the New York Chamber of Commerce, in discussing with a legal friend problems of international law involved in President Cleveland's message on the Venezuelan question, it was suggested that he had a logical mind and ought to study law. Although weighted with the cares of a family and their existence, he accepted the suggestion, studied in the University Law School of New York and the law office of Howard Ellis, Esq., burned the midnight candle in reading Blackstone and studying cases, and last week, as stated, was admitted to the Bar.

For many years he has been a figure in the commercial organizations of the country and an advocate of their interests before legislative bodies. He organized the New York Board of Trade and Transportation and the Anti-Monopoly League. He was an earnest advocate of the Inter-State Commerce Law; but he recognizes the fact that when circumstances change upon which opinions are based, that it is consistent to change with them, and he now advocates the right of contract for railroad and other corporations.

He is president of a publishing company and of the United States Export Association, and will probably never "practice law" in the usual sense; but in this highly specialized age there is need in the law of men with just such business experience, and Mr. Thurber ought to be very successful in Federal, departmental and corporation practice, with which his business experience has made him familiar.

## ITEMS ABOUT BANKS, BANKERS AND TRUST CO'S.

—The directors of the Hamilton Bank, a State institution with a capital of \$200,000 and a surplus of \$93,237, located at 278 West One Hundred and Twenty-fifth Street, have taken preliminary steps towards the establishment of a branch bank on Washington Heights, in the vicinity of Amsterdam Avenue and One Hundred and Forty-eighth street. The stockholders of the bank will meet on March 20 to take action in the matter. This will be the second bank in this city to take advantage of the recent law of the State permitting the organization of branch banks. In this case, however, it is proposed to establish an entirely new branch, while in the case of the Corn Exchange Bank the franchises of the Hudson River Bank and of the Astor Place Bank have been obtained through merger.

Stockholders and directors of the Mercantile National Bank, No. 191 Broadway, are among the principal owners of the stock of the Hamilton Bank, and directors of the former are also among the directors of the latter. Therefore the relations of the two banks are quite intimate, and the establishment of a branch of the Hamilton Bank in the vicinity of Washington Heights will most likely be beneficial to the Mercantile National Bank.

—The declaration of an extra dividend of 150 per cent on the capital of the First National Bank of Brooklyn was foreshadowed by the statement in the CHRONICLE last week. The stockholders of the bank will have the option of accepting cash for their dividend or of investing their dividend in stock of the new Williamsburg Trust Company. Transfer books of the bank will close March 17.

—The bid quotation for stock of the Hanover National Bank advanced on Tuesday from 525, the last previous bid price, to 600 bid, and on Wednesday twenty shares of the stock were sold at 615. The last previous sale was on December 14, 1898, when thirty shares were sold at prices ranging from 520 to 526. The sharp advance in the bid quotation on Tuesday gave rise to rumors of an intended consolidation of the bank with the City National Bank, but President Stillman of the last-named institution, declared that the rumor was entirely without foundation. Those interested in the bank think there are good reasons for the increased market value of the Hanover Bank stock in the excellent business which it is doing, and the same reasons will also very readily account for the recent appreciation in the market value of other bank stocks and of the shares of trust companies. Moreover, if the plan now under consideration by the Clearing House committee, which provides for remunerating banks for the cost of collecting country bank checks and which we have for several weeks referred to in this column, should be adopted, doubtless there will be a further advance in the price of bank stocks, for this plan will largely add to the revenues of banks having country accounts.

—The firm of J. & W. Seligman & Co. is organizing a bank to be located at Manila, which will probably be called the Anglo-American Bank. There seems to be a good field in the Philippine Islands for banking enterprises, controlled by Americans, for there has been a large increase in business there since the ending of the war with Spain. It is likewise reported that the Anglo-American Banking Company, agents in San Francisco for the Seligmans, are making arrangements to start an American bank in Honolulu in conjunction with bankers in New York, San Francisco and London. The bank will be organized under Hawaiian laws.

—The rates for money we give from week to week in our "Financial Situation" are apparently misunderstood by a portion of our readers. Not all the money of any bank is loaned at the rates we name and none of the money of many of the banks. Generally speaking, the New York City moneyed institutions (banks and trust companies) in what may be called the Wall Street zone (that is to say below Chambers Street) loan money in all the ways and at the rates we cite; they practically enjoy the monopoly of loaning upon securities dealt in at the Stock Exchange, though some of the banks even in that zone loan much less in those ways than others. The reason they have a monopoly is because they are more easily accessible to borrowers who require loans on call or on time. Dealers in securities would experience much inconvenience were they to borrow from institutions at a distance from Wall Street; the exigencies of their business often require Stock Exchange borrowers to substitute collaterals which they have deposited with the banks or trust companies. It is evident that such substitution would involve too much time and risk in transportation were the loans made with an up-town concern. There are, however, institutions within the zone named who likewise make a specialty of loaning upon warehouse receipts for merchandise, such for example as cotton, grain, provisions, tobacco, etc., obtaining rates much better than those ruling for stocks and bonds. The better rates are mainly obtainable for the reason that there is less competition for loans upon merchandise than there is for loans on Stock Exchange securities. Again, banks and trust companies in Brooklyn, Staten Island, Jersey City and in other places contiguous to New York, and institutions situated above the Wall Street zone in this city, serve special interests. For instance, banks in the dry goods district accommodate merchants in that line of business; those farther up-town have clients among tradesmen, large and small, in their respective localities. A small tradesman, a depositor in a bank with little aside from his good name and a fair average balance to recommend him, cannot of course expect to borrow as cheaply as a client who can offer substantial Stock Exchange security, well margined. Therefore not infrequently he is called upon to pay the legal rate of interest for the accommodation he may require, while money is quoted at extremely low rates on stock collateral or while notes bearing names better known than his own name are bought on the Street at considerably less than the legal rate of interest. Hence though banks outside the Wall Street zone may do a smaller business than institutions within this circle, they obtain better rates, are less expensively conducted and do

a profitable business, so that nearly all return good dividends to their stockholders.

It should be noted that the rates for commercial paper we quote from week to week represent all grades, from choice names to those which are good though less well known. Among the latter there may be names which an expert judge of paper would recognize as quite desirable at the rate for that class, while another buyer, to whom the name was unfamiliar, would be inclined to reject it. For example, there are bank officers who are especially expert judges of leather, others of tobacco, others of grocery paper, made by merchants engaged in those branches of trade; not infrequently directors are relied upon to check, for acceptance, special lines of paper with which they are especially familiar. Banks enjoying these advantages would be better equipped, so to speak, as a paper buyer than an institution having only a general knowledge of names, and therefore confining its purchases to the best known grades. There seems to be a disposition among paper buyers to select single in preference to double name paper, and consequently there is a greater necessity for familiarity with the standing of makers, and it will be noted that rates for the best single names rule on an equality with those for endorsements, except the choicest double names; the latter are almost always in urgent request and therefore they command the lowest rates. Occasionally, and indeed somewhat frequently, at intervals, what is known as Eastern mill paper is offered. This is not large in volume and it is so eagerly sought for that it is taken at exceptionally low rates. Another class of paper much in request is municipal paper, emitted in anticipation of the collection of taxes. This sells at figures much below the choicest commercial paper, though running for longer periods. It will be seen, therefore, that while normal conditions prevail the field for the employment of money is broad, embracing all kinds of security, from the choicest to the ordinary, and the rates range from the lowest to the legal limit.

#### CLEARING HOUSE BANKS AND COUNTRY CHECKS.

The New York Clearing House Association held a meeting on Thursday at which sixty-one out of the sixty-four members were present, and took important action in the direction of the adoption of a plan for reimbursing banks for the cost of collecting country checks. On Monday the Clearing House Committee considered the details of the subjoined plan. Subsequently the scheme was discussed with the Committee by officers of banks having large out-of-town collection accounts, and this conference resulted in a call for the meeting of the Clearing House Association which was held on Thursday as above noted. The Chairman of the Clearing House Committee at this meeting offered the following amendment to the constitution of the Association, which amendment, under the constitution, was referred for final action to a meeting of the Association to be held on Monday, March 13, at which meeting it is likely the amendment will be adopted. The subjoined is the amendment to the constitution above referred to:

Add to Section Eight as follows: The Clearing House Committee shall have power to establish rules and regulations regarding collections outside of the city of New York, by members of the Association or banks or trust companies or others clearing through such members, and the rates to be charged for such collections, and also providing for enforcement of the same. The Committee may from time to time make any additions to, or changes in, such rules and regulations as it deems judicious. After any rule or regulation upon the subject has been once established, it shall not, however, be altered or rescinded until it has been in force at least three months, except by majority vote of the Clearing House Association.

The following are the rules and regulations regarding collections outside of the city of New York, which, if the above amendment to the constitution shall be adopted by the Clearing House Association, will be promulgated by the Clearing House Committee and the rules will probably become operative on or about April 1:

Pursuant to authority conferred upon it by the Constitution of the New York Clearing House Association, the Clearing House Committee of said Association establishes the following rules and regulations regarding collections outside of the city of New York by members of the Association, or banks, trust companies, or others clearing through such members, and the rates to be charged for such collections, and also regarding enforcement of the provisions hereof.

SECTION 1. These rules and regulations shall apply to all members of the Association, and to all banks, trust companies or others clearing through such members. The parties to which the same so apply are hereinafter described as collecting banks.

SECTION 2. For items collected in the accounts, or in dealings with the governments of the United States, the State of New York or the

city of New York, and for items collected in the cities of Boston, Mass., Providence, R. I., Albany, N. Y., Troy, N. Y., Jersey City, N. J., Newark, N. J., Philadelphia, Penn., Baltimore, Md., the charge shall in all cases be discretionary with the collecting bank and the same shall not be governed by the provisions of these rules and regulations.

SECTION 3.—For all items from whomsoever received (except on those points declared discretionary in Section 2), payable at points in Connecticut, Delaware, Indiana, Illinois, Kentucky, Maine, Maryland, Massachusetts, Michigan, Missouri, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, District of Columbia, Vermont, Virginia, West Virginia, and Wisconsin, the collecting banks shall charge not less than one-tenth of one per cent (1-10%) of the amount of the items respectively.

SECTION 4. For all items from whomsoever received payable at points in Alabama, Arizona, Arkansas, California, Colorado, Florida, Georgia, Idaho, Indian Territory, Iowa, Kansas, Louisiana, Minnesota, Mississippi, Montana, Nebraska, Nevada, New Mexico, North Carolina, North Dakota, Oklahoma, Oregon, South Carolina, South Dakota, Tennessee, Texas, Utah, Washington, Wyoming and Canada, the collecting banks shall charge not less than one-quarter of one per cent (¼%) of the amount of the items respectively.

SECTION 5. In case the charge upon any item at the rates above specified does not equal ten cents (10c.), the collecting bank shall charge not less than that sum; but all items received from any one person at the same time and payable at the same place may be added together and treated as one item for the purpose of fixing the amount chargeable.

SECTION 6. The charges herein specified shall in all cases be collected at the time of deposit or not later than the tenth day of the following calendar month. No collecting bank shall directly, or indirectly, allow any abatement, rebate, or return for or on account of such charges or make any compensation therefor.

SECTION 7. Every collecting bank, trust company or other corporation not a member of the Association, but clearing through a member thereof, shall forthwith adopt by its board of directors a resolution in the following terms, and file a certified copy thereof with the Association as evidence as therein specified:

Whereas, This corporation has acquired the privilege of clearing and making exchange of its checks through the New York Clearing House Association, and is subject to its rules and regulations, Now, therefore, *Be it Resolved*, that this corporation hereby in all respects assents to and agrees to be bound by and to comply with all rules and regulations regarding collections outside of the city of New York, which may be established pursuant to the constitution of said Association, and that the President of this corporation is hereby instructed to file a certified copy of this resolution with the Clearing House Association as evidence of such assent and agreement on the part of this corporation.

SECTION 8. In case any member of the Association shall learn that these rules and regulations have been violated by any of the collecting banks, it shall immediately report the facts to the Chairman of the Clearing House Committee, or in his absence to the Manager of the Association. Upon receiving information from any source that there has been a violation of the same, said Chairman, or in his absence said Manager, shall call a meeting of the Committee. The Committee shall investigate the facts and determine whether a formal hearing is necessary. In case the Committee so concludes, it shall instruct the Manager to formulate charges and present them to the Committee. A copy of the charges, together with written notice of the time and place fixed for hearing regarding the same, shall be served upon the collecting bank charged with such violation, which shall have the right at the hearing to introduce such relevant evidence and submit such argument as it may desire. The Committee shall hear whatever relevant evidence may be offered by any person and whatever arguments may be submitted, and shall determine whether the charges are sustained. In case it reaches the conclusion that they are, the Committee shall call a special meeting of the Association and report thereto the facts with its conclusions. If the report of the Committee is approved by the Association, the collecting bank charged with such violation shall pay to the Association the sum of five thousand dollars, and in case of a second violation of these rules and regulations, any collecting bank may also in the discretion of the Association be excluded from using its privileges directly or indirectly, and, if it is a member, expelled from the Association.

*Resolved*, that the foregoing rules and regulations are hereby established and adopted and shall take effect upon ——— 1899.

This is the direct outcome of agitation begun by the publication in the CHRONICLE on February 4 of an article illustrating the extremely unprofitable character of country bank collections by New York banks. This publication seems to have aroused such general interest in the matter by bank officers as to have led them to take the steps necessary for the effective remedial action embodied in the above rules and regulations.

#### Monetary: Commercial English News

(From our own correspondent.)

LONDON, Saturday, February 25, 1899

The quietness with which the new President of the French Republic has been installed in office and the firmness with which, contrary to many threats, order was maintained during the Presidential funeral procession on Thursday, have made a very favorable impression all over Europe. Naturally people are inclined to think now that the generals are less disaffected to the Republic than previously had been supposed, or else that they know they cannot count upon the bulk of the army. In any case it is inferred that such an opportunity for military intervention will not soon occur again and consequently that the Republic is safe.

Moreover, the French press and the French public have received without excitement the news that a British squadron has compelled the Sultan of Muscat to cancel the agreement into which he had entered for leasing a coaling station to France. The French Government thus again shows its desire to maintain peace. And as negotiations are going on for a settlement of all disputes between the two countries it is hoped that they will be brought soon to a favorable conclusion. Indeed, it is evident that unless a settlement is ar-

rived at there is great danger that the Paris Exhibition of next year will be a failure. Foreigners who had intended to exhibit are refusing, in large numbers, to send their goods, not unnaturally being doubtful as to what may happen in the meantime. The general impression made in Paris by the new President's message is very favorable. And those who know him well appear convinced that he will rise to the height of his responsibilities and will prove a firm ruler as well as a loyal Republican.

As a result there is a much better feeling on the Stock Exchange here and on the bourses on the Continent. And the better feeling is strengthened by the general hope that money will be cheap and abundant, a hope which the reduction this week of its rate of discount by the Imperial Bank of Germany very much encourages. Trade, too, is good all over Europe. It is still improving here and is better than ever it has been before. It is exceedingly active in Germany and in the Scandinavian countries. And even in France, in spite of all the disturbances, it is fairly good.

Another circumstance which tends to revive confidence is the settlement of what appeared to be a deadlock in Hungary. And lastly it is thought that the rumored insurrection in Macedonia will not take place. It is believed that Russia and Austria are acting very energetically to prevent any disturbance.

The Stock Exchange here has been firm all through the week. But until Thursday evening the amount of business done was not very great except in the American and Argentine departments. On Friday morning business everywhere became more active, though it has not continued quite so good.

German buying here of American, Argentine and African gold shares more particularly is reported to be on a very great scale. It has been large in American securities for a considerable time past. Lately it has become very large in the mining and the Argentine markets likewise.

Partly the magnitude of the business done here rather than in Germany is due to the cheapness of money here and to the breadth of the market. But partly it is a result of the unwise German Bourse law. It is estimated by leading brokers here that the commissions earned by London brokers and the stamp duties paid to the Government on German purchases in this market at the present time are at the rate of about half a million sterling a year, or  $2\frac{1}{2}$  million dollars. This, of course, may be an exaggeration. But there is no doubt at all that the business being done here is on an exceptionally great scale. French buying was naturally much checked by the death of President Faure. It is, however, beginning once more.

There has been likewise a large business done both in copper and in copper shares. But on Friday morning there was a sharp fall from about  $9\frac{1}{2}$  to about  $8\frac{1}{2}$  in Anaconda shares, which disarranged the whole copper market for the time being. Generally the opinion here is that the fall is owing to a manoeuvre to get shares cheap. And the impression is that we are about to see another considerable advance in almost all copper shares. As a natural consequence of the rise both in copper and in copper shares, all the copper-mining companies are doing their utmost to increase the output, and at the same time new copper companies are being formed. For example, a syndicate or private company has been formed here for working a mine in Mexico, and the price has been run up to a premium of nearly 150 per cent. The Imperial Bank of Germany on Tuesday reduced its rate of discount from 5 per cent to  $4\frac{1}{2}$  per cent. The Bank is acting with great caution. It will be recollected that it refused to put down its rate even for the purpose of facilitating the placing of the German and the Prussian loans. Now, however, the increase in its reserve and the desire to disarm opposition in the Reichstag to the bill for prolonging the Bank concession has induced a reduction. It is thought probable that next month the rate may be lowered to 4 per cent. But the general opinion of bankers in Berlin and in London is that it will not go lower.

The Bank of England has made no change and neither has the Bank of France. In the case of the Bank of England trade here is exceedingly active. There is a good deal of speculation. There is a possibility that gold may go to the United States, Germany, Russia, Japan and India; while at the same time the collection of the revenue is now transferring such large sums from the outside market to the Bank

of England that the Bank is getting control of the market. That will only last for a few weeks. But while it lasts the Bank probably will not put down its rate.

In the case of the Bank of France there is no need for keeping up the rate so far as business in France is concerned. The general belief both in London and Paris is that the Bank maintains its rate partly because of the desire of the Government to increase the war chest and partly because of the decision of the Governor of the Bank that the other French banks must be compelled to withdraw a portion at least of the large sums employed by them abroad. He is credited with the belief that entirely too much French money is employed just now in Germany, Belgium and Austria Hungary.

Meantime the India Council continues to sell its drafts wonderfully well. It offered for tender on Wednesday 70 lacs and the applications amounted to nearly 921½ lacs. The whole amount offered was placed at a little over 1s. 4 1-32d. for bills and 1s. 4 1-16d. for telegraphic transfers.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols &c., compared with the last three years:

	1899. Feb. 22.	1898. Feb. 23.	1897. Feb. 24.	1896. Feb. 26.

Messrs. Pixley and Abell write as follows under date of Feb. 23:

Gold.—In consequence of greatly increased demand, both for the East and for the Continent, the Bank has received very little gold during the week. The total bought by the Bank is only £57,000, while £10,000 has been withdrawn for Santos. Arrivals—Bombay, £90,000; Australia, £159,000; Cape Town, £210,000; Chile, £2,000; total, £505,000. Shipments—Bombay, £40,000; Calcutta, £15,000; total, £55,000.

Silver.—The movements have again been extremely small. A slight rise to 27½d. was maintained a few days but has since been again lost in consequence of rather larger offerings. The Bombay price is to-day Rs. 70 per 100 tolahs. Arrivals—New York, £84,000; Australia, £2,000; Chile, £21,000; South Africa, £2,000; total, £109,000. Shipments—Bombay, £32,000; Calcutta, £20,000; Colombo coin, £11,850; total, £63,850.

Mexican Dollars.—There are no transactions to report.

The quotations for bullion are reported as follows:

WALL STREET, FRIDAY, MAR. 10, 1899.—3 P. M.

**The Money Market and Financial Situation.**—Except some depression during the early part of the week, owing to the firm condition of the money market, the tendency of the security markets has generally been towards higher quotations. This tendency was most noticeable in the bond department, the market for shares having been more or less irregular in movement. There was disappointment on the part of speculative operators because dividend rates were not advanced, especially in the case of St. Paul and American Sugar Refining. Some selling is reported to have taken place on that account, but we imagine no conservative holder participated in such sales. A further sharp advance in the anthracite stocks indicates that the coal industry is really or prospectively on a better paying basis. Interest in the newer industrial shares continues a feature of the market. This is not surprising in view of the rapid advance that some of these stocks have recently made. An extreme case in point is that of New York Air Brake, which sold to day at 172; it sold about six months ago at 55, and within a year at 14. The higher interest rates noted at the close last week caused an increase in the amount of funds offered, which in turn resulted in an easier market. It is quite possible, however, in view of the increased activity in all departments, that future rates in the money market will be higher than those which have recently prevailed.

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 2 to 4 per cent. To-day's rates on call were 2½ to 3 per cent. Prime commercial paper quoted 3¼ to 4½ per cent.

The Bank of England weekly statement on Thursday showed a decrease in bullion of £593,625, and the percentage of reserve to liabilities was 44.20, against 44.05 last week; the discount rate remains unchanged at 3 per cent. The Bank of France shows a decrease of 2,350,000 francs in gold and 925,000 francs in silver.

The New York City Clearing-House banks in their statement of March 4 showed a decrease in the reserve held of \$4,697,600 and a surplus over the required reserve of \$24,578,125, against \$30,344,900 the previous week.

**Foreign Exchange.**—There has been some fluctuation in the tone of the market for foreign exchange, due chiefly to an easier money market, but both the offerings and demand were limited, and actual rates remained nearly steady.

To-day's actual rates of exchange were as follows: Bankers' sixty days' sterling, 4 83½ @ 83½; demand, 4 85½ @ 4 85½; cables, 4 86 @ 4 86½; prime commercial, sixty days, 4 83 @ 4 83½; documentary commercial, sixty days, 4 82½ @ 4 83½; grain for payment, 4 83 @ 4 83½; cotton for payment, 4 82½ @ 4 82½; cotton for acceptance, 4 83 @ 4 83½. Posted rates follow:

Mar. 10.	Sixty days.	Demand.
Prime bankers' sterling bills on London.	4 84½ @ 4 85	4 86½ @ 4 87
Prime commercial.....	4 83 @ 4 83½	.....
Documentary commercial.....	4 82½ @ 4 83½	.....
Paris bankers' (franco).....	5 21½ @ 5 21½	5 19½ @ 5 21½
Amsterdam (guilder) bankers.....	39½ @ 39½	40 @ 40½
Frankfort or Bremen (reichsmark) b'krs	94½ @ 94½	95 @ 95½

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah,

buying 1-16 discount, selling 75c. per \$1,000 premium; Charleston buying par, selling ¼ premium; New Orleans, bank, \$1 00 premium; commercial, 25c. premium; Chicago, 30c. discount; St. Louis, 20c. per \$1,000 premium.

**United States Bonds.**—Sales of Government bonds at the Board include \$5,500 4s. coup., 107, at 112½; \$10,000 4s reg., 1907, at 111½; \$45,000 5s. coup., at 111½ to 112½; \$223,500 3s. coup., at 107 to 107½, and \$1,600 ditto (small bonds), at 106½ to 107. For yearly range see seventh page following.

Mex. Doublelons.	15 50	15 60	U. S. trade dollars	-	55 @ -
Fine gold bars... par	@ 4	prem.			

**State and Railroad Bonds.**—Sales of State bonds at the Board include \$34,000 Tennessee settlement 3s at 97½; \$121,000 Virginia 6s deferred trust receipts, stamped, at 6 to 8½; \$5,000 Virginia fund. debt 2-3s of 1991 at 84; \$25,000 Louisiana consol. 4s at 109½ and \$2,000 Alabama class A at 112½.

On a volume of business which averaged only a little more than \$3,000,000 par value per day, the market for railway bonds has been generally firm and in a few cases noteworthy advances were made. Chicago Terminal Transfer 4s, in sympathy with the shares, gained nearly 3 points on an increasing demand. Western New York & Pennsylvania general 3-4s advanced 6 points, the incomes about 2 points and Reading 4s over a point. Wisconsin Central trust receipts lost 1 point and a few issues fractionally declined. These, however, are more than offset by advances in other issues. Special activity is noted in only a few bonds, including Atchison, Central Pacific, Erie, Missouri Kansas & Texas, Missouri Pacific, Northern Pacific, Reading, St. Louis Southwestern, Southern Pacific, Texas & Pacific, Union Pacific and Wisconsin Centrals.

**Stock and Bond Sales.**—The following shows the volume of business in stocks and bonds on the New York Stock Exchange for the past week and since January 1.

Sales	Week ending Mar. 10.	Jan. 1 to Mar. 10.
N. Y. Stock Exch.	1899.	1898.
Government bonds	\$445,000	\$133,300
State bonds.....	149,000	9,000
A. & misc. bonds.	19,852,000	13,871,000
Total.....	\$20,446,000	\$25,213,300
Stocks—No. shares	3,202,019	2,092,967
Par value.....	\$997,745,050	\$202,944,300
Bullion, par val.	9,395	14,800
Total.....	\$1,007,149,445	\$202,959,100

We add the following daily record of the transactions:

Week ending	Shares.	Par value.	Bonds.	State Bonds.	U. S. Bonds.

Total...	307,153	256,485	\$609,225	213,602	179,387	\$260,656

**Railroad and Miscellaneous Stocks.**—Under various conditions the stock market has been decidedly irregular. Transactions at the Exchange still further diminished, averaging about 350,000 shares per day. The anthracite coal group and New York City traction stocks were conspicuous for activity. The former advanced from 5 to 10 points; the latter were erratic, in some cases fluctuating over a range of 20 points. Many of the granger shares were less prominent than usual and the lack of interest resulted in lower quotations. Pennsylvania advanced 4 points in sympathy with other coal-carriers. Chicago Indianapolis & Louisville preferred advanced over 5 points on rumors of an increased dividend rate. Owing to irregularity, as noted above, the highest quotations of the week have not been maintained in all cases.

The industrial stocks were heavily dealt in, American Sugar Refining taking the lead in this particular. The announcement of a quarterly dividend of 3 per cent was a disappointment to some operators, who had looked for an increase of the regular rate. General Electric advanced 5 points on its favorable business outlook. New York Air Brake sold up to 172, a gain of 22 points within the week. American Steel & Wire issues were active and strong.

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every **STEAM** railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

a These figures include results on leased lines. b Includes earnings from ferries, etc., not given separately. c Includes Des Moines & Kansas City for all periods. d Includes operations of the Ohio, Baltimore & Northern in both years. e Includes results on A. T. & S. P., Gulf Col. & S. P. Pacific (old Atlantic & Pacific) and So. Cal. Ry. f Includes the Pacific system, the Atlantic properties and the Houston & Texas Central system. g Beginning July, earnings of Memphis Division and Middleborough & Aiken branches are included for both years. h Results on Cin. Lebanon Northern are included from September 1 in both years.

\* Results on Kansas City & Independence Air Line are not included for either year.

f Includes Chesapeake & Ohio, So. Western, Ohio Valley and Chicago and Texas for both years. Results on Yazoo Branch exclude latter July 1, 1898.

h Mexican currency.

i Covers results of lines directly operated east of Pittsburg.

**Latest Gross Earnings by Weeks.**—The latest weekly earnings in the foregoing are separately summed up as follows:

For the fourth week of February our preliminary statement covers 82 roads and shows 3.76 per cent increase in the aggregate over the same week last year.

4th week of February.	1899.	1898.	Increase.	Decrease.

**Net Earnings Monthly to Latest Dates.**—The table following shows the gross and net earnings of STREAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained, is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of February 25, 1899. The next will appear in the issue of March 18, 1899.

a Net earnings here given are after deducting taxes.

b Net earnings here given are before deducting taxes.

c Gross earnings include other income.

d After deducting "reserve fund for repairs of steamers," balance in January, 1899, was \$95,111, against \$32,533, and from May 1 to January 31 \$99,080, against \$439,852. The reserve fund for depreciation and general and extraordinary repairs of steamers has been increased to the standard of the English companies, i. e., five per cent upon the value of the steamers.

e Thirty per cent of gross earnings.

**Interest Charges and Surplus.**—The following roads, in addition to their gross and net earnings given in the foregoing, also report charges for interest, &c., with the surplus or deficit above or below those charges.

# STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

	Week or Mo.	1898-9.	1897-8.	1898-9.	1897-8.

\* Includes Baltimore Traction and City & Suburban for both years

**Street Railway Net Earnings.**—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday) we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONICLE of February 25, 1899. The next will appear in the issue of March 18, 1899.

Roads.	Gross Earnings.		Net Earnings.	
	1898-9.	1897-8.	1898-9.	1897-8.
Columbus (O.) St. Ry. Feb.	52,697	48,151	24,831	24,813

Oct. 1 to Feb. 28....	116,517	111,500	46,846	49,032

**Interest Charges and Surplus.**—The following STREET railways, in addition to their gross and net earnings given in the foregoing, also report charges for interest, &c., with the surplus or deficit above or below those charges.

Roads.	Int., Rentals, &c.		Bal. of Net Earnings.	
	1899.	1898.	1899.	1898.
Waterbury Trac'n. Feb.	3,303	3,277	3,208	5,872
Oct. 1 to Feb. 28....	15,948	14,257	30,693	30,435

The following is a statement of the gross and net earnings of the Nashville St. Railway for the month of February and the ten months of the fiscal year from May 1 to February 25. Comparison is made with 1897 in case of 1898.

NASHVILLE STREET RAILWAY.			
	February.		May 1 to Feb. 28.
	1899.	1897.	1899.
Gross earnings.....	24,742	25,123	304,971
Operating expenses.....	12,614	14,297	143,950
Net earnings.....	12,128	10,826	161,021
Proportionate interest.....			95,139
" taxes.....			30,000
Surplus.....			35,882

## ANNUAL REPORTS.

**Annual Reports.**—The usual index is omitted this week, but that published in the CHRONICLE of March 4 covers all reports published to Feb. 25, inclusive.

### Pennsylvania Railroad.

(Report for the year ended Dec. 31, 1898.)

The text of President Frank Thomson's report will be found on pages 477 to 479. Remarks upon the report will also be found in the editorial columns

The earnings, general income account and balance sheet for a series of years, compiled for the CHRONICLE, are given herewith, presenting an interesting comparison.

EARNINGS ON ALL LINES BOTH EAST AND WEST OF PITTSBURG AND ERIE.

	1898.	1897.	1896.
Gross earnings.....	\$132,869,470	\$128,278,087	\$123,641,268
Operating expenses.....	92,009,329	87,641,032	88,329,320

Net earnings..... \$39,960,141 \$40,637,055 \$35,311,939

TRAFFIC ON ALL LINES BOTH EAST AND WEST OF PITTSBURG AND ERIE.

	1898.	1897.	1896.
Passengers carried.....	71,202,695	68,848,697	71,919,860
Pass'g's carried 1 mile	1,619,986,095	1,508,207,874	1,527,570,136
Freight (tons) carried.....	173,791,239	159,515,950	145,192,644
Frt. (tons) carr'd 1 mile	16,169,205,451	14,801,540,748	13,197,645,843

Below are given the results on the lines east of Pittsburgh and Erie, comprising the "Pennsylvania Railroad Division," the "United Railroads of New Jersey Div." (including the Del. & Rar. Canal), and the "Philadelphia & Erie Div."

TRAFFIC OF LINES EAST OF PITTSBURG AND ERIE.

	1898.	1897.	1896.
Miles oper., incl. D. & R. Can.	2,921	2,813	2,787
Passengers carried.....	35,962,566	34,997,524	36,170,220
Passengers carried 1 mile.....	745,962,679	693,279,336	699,799,213
Rate per pass. per mile.....	1.932 cts.	1.948 cts.	1.964 cts.
Tons carried.....	81,901,805	79,562,467	72,967,125
Tons carried 1 mile.....	9,233,924,353	8,555,622,317	7,727,923,814
Rate per ton per mile.....	0.499 cts.	0.536 cts.	0.564 cts.

—V. 85, p. 426.

### Commercial Cable Co.

(Report for the year ending Dec. 31, 1898.)

President Mackay says in part:

The net traffic earnings from cables and land lines increased \$107,410 over the previous year. There has been transferred \$350,000 to the reserve fund and also \$100,000 to the fund for insurance of stations, apparatus and repair steamer, and these sums will be invested in first-class securities. The reserve fund now amounts to \$3,037,103, and the insurance fund to \$200,000.

During the year there have been issued \$2,000,000 4 per cent first mortgage bonds. The proceeds from this issue have been partly expended in acquiring the property of the Pacific Postal Telegraph Cable Co. and further extensions of land lines, thereby adding to the company's land line system 3,449 miles of poles, 12,841 miles of wire and 468 offices.

Patents.....	1,000,000		
<b>Total assets.....</b>	<b>\$2,133,574</b>	<b>Total liabilities.....</b>	<b>\$2,133,574</b>

During the year the company acquired the National Switch & Signal Co., whose stock appears among the assets for \$375,000. Comparison with the balance sheet of Dec. 31, 1897 (in V. 66, p. 758), discloses the fact that the preferred stock issue has been increased \$100,000 and the first mortgage bonds have been decreased \$30,000, and that \$260,000 of second mortgage bonds have been issued.—V. 67, p. 1264.

## GENERAL INVESTMENT NEWS.

**Reorganizations, Etc.—Defaults, Reorganization Plans, Etc.**—The usual index is omitted this week, but that covering the items published to Feb. 24, inclusive, will be found in the CHRONICLE of March 4.

**American Automatic Weighing Machine Co.—Automatic Weighing Machines—Consolidation.**—The three companies controlling substantially all the penny weighing machines in the country have been consolidated and incorporated in England as "The American Automatic Weighing Machine Company, Limited." The capital is £135,000 in 6 per cent cumulative preference shares and £135,000 in common shares. The prospectus states that in the past 4 years 69,222,599 persons have been weighed on the 7,000 machines of the company, producing a gross income of \$992,226. The negotiations for the sale and consolidation of the properties were conducted by Messrs. Wilson & Stephens. The English Company is represented in this country by Messrs. Seward, Guthrie & Steele as counsel and Stephen Little, Esq., as Consulting Auditor. The American directors are Hon. Benj. F. Tracy, Hon. Wm. E. Curtis, Clement F. Griacom, Jr., and Wm. H. Male. The companies united are: The National Weighing Machine Co., the National Automatic Machine Co. and the American Automatic Weighing Machine Co.

**American Brick Co.—Incorporated.**—This company has been incorporated at Trenton, N. J., with authorized capital stock of \$10,000,000, of which \$6,000,000 is 7 per cent non-cumulative preferred. Incorporators:

Oakleigh Thorne of Mill Brook, Edward Thorne of Babylon, Raymond C. Knox, Fred W. Saunders, Charles Hanesel of New York, Edward Moss of Irvington and John M. Ferrick of Babylon.

The new company, it is stated, is designed to consolidate many of the important Eastern interests, notably those along the Hudson River, which supply the New York market.

**American Felt Co.—Consolidation.**—This corporation, formed under the laws of New Jersey with an authorized capital of \$5,000,000, has purchased, it is stated, the plants and businesses of the following concerns engaged in the manufacture of felts of various kinds:

Essex Mills, W. S. Taylor & Bloodgood, Jr.; Hawthorne Mills, Tingle, House & Co.; City Mills Company, Franklin, Mass., and the property of the late firm of Alfred Dolge & Son, recently operated under the name of the American Felt Manufacturing Co.

**Mortgage.**—The company on March 2 filed at Elizabeth, N. J., a mortgage for \$500,000 to the United States Mortgage & Trust Co., as trustee, to secure an issue of 500 six per cent \$1,000 bonds. The property conveyed is said to include the Alfred Dolge Felt & Lumber property at Dolgeville, N. Y., lands in Norfolk County, Mass., and the Essex Felting Mills in Clark Township, property in Greenwich Township, Conn., etc.

**American Maltting Co.—Purchased.—Sale of Treasury Stock.**—The company has purchased the malt houses of John M. Moser, Lockport and Phelps, N. Y., and of the Scott Maltting Co., at Lyons, N. Y., their aggregate capacity being about 375,000 bushels. These properties, it is stated, as well as those of Neidlinger & Sons of this city, were acquired without increasing the company's capital stock, its earnings and treasury stock having been applied to their purchase, thus strengthening the company's position.—V. 68, p. 185.

**American Shipbuilding Co.—Proposed Consolidation.**—According to advices from Cleveland, plans are being perfected for the organization of a company under this title and with capital stock of \$30,000,000, of which \$15,000,000 7 per cent preferred, to unite the shipbuilding and kindred interests of the Great Lakes. The Cleveland companies named as likely to enter the combination are the Globe Iron Works Co., the Cleveland Shipbuilding Co. and the Vessel Owners' Dry Dock Co.

**American Smelting & Refining Co.—Plan.**—It is proposed that this company, to be organized under the laws of New Jersey with authorized capital stock of \$65,000,000 (half preferred), shall consolidate the following smelting companies:

Consolidated Kansas City Smelting & Refining Co., Omaha & Grant Co., National Smelting Co., United Smelting Co., Colorado Smelting Co., Globe Smelting Co., Pueblo Smelting Co., Pueblo Smelting & Refining Co., Germania Smelting & Refining Co., Bimetallie Smelting Co. and the Pennsylvania Smelting Co.

It is proposed to issue at once \$27,000,000 of preferred and the same amount of common stock. Moore & Schley and Lewisohn Brothers have been concerned in the underwriting of the new company.—V. 67, p. 1003, 1010.

**American Tobacco Co.—Union Tobacco Co.—Exchange of Stock.**—Subscribers to Union Tobacco securities are to receive 135 per cent in American Tobacco new stock for the amount of their cash subscriptions. Assuming that the increased capitalization of the American Company will sell at half the price of the present stock, say 97, it appears that Union Tobacco subscriptions figure out about 180.—"New York Sun."—V. 68, p. 426.

**American Woolen Co.—Consolidation.**—This company is being organized under the laws of New Jersey. Its present issue of capital stock is \$16,000,000 of 7 per cent cumulative preferred stock and \$25,000,000 of common stock, and with this it has been arranged to acquire and finance the following:

Washington Mills, Lawrence, Mass.; Riverside Mills, Providence, R. I.; National Providence Mills, Providence, R. I.; Saranac Mills, Providence, R. I.; Blackstone Mills, Blackstone, R. I.; Fulton Mills, Oswego Falls, N. Y.; Baoli Mills, Fitchburg, Mass.; Fitchburg Worsted Mills, Fitchburg, Mass.; Valley Worsted Mills, Providence, R. I.

In case of the acquisition of plants which are under consideration in addition to those named herein, the outstanding capital will be: Preferred, \$20,000,000; common, \$30,000,000. The company will be authorized to issue capital stock up to \$25,000,000 preferred stock and \$40,000,000 of common stock; but it is not now contemplated to issue capital stock in excess of \$20,000,000 preferred and \$30,000,000 common stock, unless lines of manufacture other than those of the plants herein mentioned are united with it in the future.

The plants above named have been appraised by manufacturers at \$12,000,000 and the working cash capital to be provided will be \$10,000,000, making a total of \$22,000,000, against which the preferred stock issued is only \$16,000,000. Without allowance for economies and increased earnings on account of new capital put into the business, the average net earnings of the last two years (\$2,593,000) cover the dividend on the preferred stock and nearly 6 per cent on the common. To provide the \$6,000,000 to be paid on account of the plants and the \$10,000,000 working capital, \$16,000,000 of 7 per cent preferred stock and \$8,000,000 of common stock was offered by F. S. Smithers & Co. and associate bankers, and it is announced has been more than subscribed.

**Anthracite Coal Companies—New York Wyoming & Western RR.—Sale of Independent Coal Companies.**—All the coal companies controlled by Simpson & Watkins, who have been the largest individual coal operators at Scranton, and leading participants in the movement to construct the New York Wyoming & Western as an independent outlet to tidewater, have been acquired by and will be merged in the Temple Iron Co. The companies so acquired mine about 1,500,000 tons of anthracite yearly, and their sale to interests believed to be friendly to the existing coal roads removes a disturbing element and, it is thought, all likelihood of the independent line being built. The companies merged are the Forty Fort Coal Co., capital \$200,000; Babylon Coal Co., \$100,000; Edgerton Coal Co., \$200,000; Mount Lookout Coal Co., \$120,000; Northwest Coal Co., \$100,000; Sterrick Creek Coal Co., \$100,000; Lackawanna Coal Co., \$50,000.—V. 67, p. 221; V. 68, p. 283.

**Arcadian Copper Co.—Re incorporated in New Jersey.**—The Maryland Copper Co., which filed articles of incorporation recently at Trenton, N. J., with a capitalization of \$1,000,000, on March 3 filed an amended certificate changing the name to the Arcadian Copper Co., and increasing the paid-up capital to \$3,750,000 (par value \$25 per share), and reserving the right to increase this to \$50,000,000. Of the capital stock (150,000 shares, \$3,750,000), 100,000 shares are to be exchanged share for share for the stock of the Arcadian Copper Co. of Michigan and the remaining 50,000 are offered to the stockholders of the latter company at \$30 cash per \$25 share, on the basis of one-half share for each share held in the Michigan company. The reason for the re-incorporation is that the laws of Michigan do not allow a larger capitalization than \$2,500,000. The \$1,500,000 cash received will be applied as follows: \$600,000 to pay for the Highland St. Mary's Copper Co. and other properties, and \$900,000 for additional plant and developments.—V. 67, p. 72.

**Arizona Improvement Co.—Arizona Canal Co.—Plan Modified.**—Notice is given that certain modifications in the plans of reorganization have been made concerning the rights of depositing bondholders who have not paid their assessments. A statement of the modifications has been filed with the New York Security & Trust Co., depository.—V. 66, p. 1043.

**Atchison Colorado & Pacific RR.—Atchison Jewell County & Western RR.—Proposition Accepted.**—The depositing bondholders, at their meeting on March 1, voted unanimously to accept the offer of 75 per cent of the face value of their bonds in new 4 per cent bonds, secured by mortgage at \$12,000 per mile, and guaranteed, principal and interest, by Mission Pacific. As there are \$4,612,000 bonds in all outstanding, the exchange calls for the issue of \$3,459,000 of 4 per cents.—V. 68, p. 320.

**Atchison Topeka & Santa Fe Ry.—Terminals at San Francisco.**—Santa Fe Terminal Co. of California has been incorporated in California with a capital stock of \$1,000,000 to build terminals for the San Francisco & San Joaquin Valley line of the Atchison Topeka & Santa Fe at San Francisco.—V. 68, p. 426.

**Atlantic & North Carolina RR.—Proposition to Purchase.**—A syndicate has been formed to purchase the interest of the State of North Carolina in this road. W. J. Edwards, President of the Moore County Bank, of Sanford, N. C., it is understood, is at the head of the syndicate, which will offer \$300,000 for the line. A bill has been introduced in the Legislature to authorize the sale. One condition of the transfer is that the owners shall extend the line 100 miles to Charlotte, Concord or Salisbury, N. C.—V. 61, p. 470.

**Baltimore & Ohio RR.—Foreclosure Suits.**—At Baltimore March 5 judges Goff and Morris signed a decree in the

United States Circuit Court directing the foreclosure sale of the \$3,000,000 bonds of the Parkersburg Branch RR., which are pledged as security for the 6s of 1879.

On March 1 suit was instituted to foreclose the B. & O. Terminal mortgage of 1891 for \$3,500,000.—V. 68, p. 426.

**Brooklyn Rapid Transit Co.—New Stock on Unlisted Department of Stock Exchange.**—The \$9,500,000 of new stock issued in connection with the purchase of the Nassau Electric RR. was placed last week on the unlisted department of the New York Stock Exchange. Ex-Gov. Flower is quoted as saying that the entire amount was previously taken by private subscription, so that no portion would come on the market.

**Lease of Nassau Electric RR.**—It is generally expected that the Nassau Electric RR. will be taken over under lease on March 20.

**Rumors Regarding Possible Control of Long Island RR.**—The "Brooklyn Eagle" on Thursday said: "Negotiations for the control of the Long Island RR. and the Brooklyn Rapid Transit Co. have now been virtually completed, and a formal public announcement will be made next week." Roswell P. Flower is quoted as saying that he does not think the report that control has been acquired is true; he would not say whether negotiations were pending. He intimates there may be some news on March 20 affecting the Rapid Transit Co. [perhaps regarding the Nassau lease], but no statement, he says, can be made at present.—V. 68, p. 329.

**Brooklyn & Brighton Beach RR.—Foreclosure Sale March 21.**—This property is to be sold at the Real Estate Exchange Salesroom, 189 Montague Street, Brooklyn, March 21.—V. 68, p. 426.

**Brooklyn Wharf & Warehouse Co.—New Officers.**—Gordon B. Horton has been elected President in place of Thomas A. McIntyre, who because of the pressure of other business retires and becomes Vice-President and Chairman of the Executive Committee; William A. Nash, who retires as Treasurer in favor of his son, Warren B. Nash, Second Vice-President; Samuel Taylor Jr. was re-elected Secretary and H. A. Wheeling Assistant Secretary. Mr. Horton succeeds as director the late David Dows Jr.—V. 68, p. 437.

**Carolina Central RR.—Guaranty.**—All of the old first mortgage bonds, with the exception of \$65,000, and all of the second and third mortgage bonds, with the exception of \$22,400 of the former and \$62,833 53 of the latter, including scrip, have been deposited with the trustee under the reorganization agreement. Of the \$65,000 old first mortgage bond \$35,000 have assented to the plan, although the owners have not yet sent them in for exchange. The entire issue of \$3,000,000 new 4 per cent bonds is guaranteed by the following endorsement:

For value received the Seaboard & Roanoke RR. Co. and the Raleigh & Gaston RR. Co. hereby jointly and severally guarantee the punctual payment of the principal and interest upon this bond, at the time and in the manner therein specified, and covenant severally with the Farmers' Loan & Trust Co., on default in the payment of any part thereof by the obligor, to pay said principal and interest as the same shall become due. [Signed by President and Treasurer of each company.]—V. 68, p. 378.

**Central Union Telephone Co.—New Bonds.**—Of the \$6,000,000 new 5 per cent gold consols due Jan. 1, 1919, \$2,500,000 are reserved to retire the 1st 6s; \$1,000,000 are to be issued at once; and \$2,500,000 hereafter on vote of directors for actual cost of extensions and improvements. The bonds are subject to call at 105 on any interest day after Jan. 1, 1909, on thirty days' notice. The company operates in 55 towns in Illinois, 41 in Indiana and 76 in Ohio, a total of 172, or an increase of 55 in the last 2½ years.—V. 68, p. 379.

**Central Pacific RR.—Listed.**—Of the company's \$67,275,500 of capital stock, 393,918 shares have been deposited under the plan of readjustment, and Spyer & Co. engraved certificates of deposit issued therefor have been listed on the New York Stock Exchange.—V. 68, p. 427.

**Chicago Consolidated Traction Co.—Organization.**—This new company took over last week all the companies mentioned in the following table and will give its own stock (authorized issue \$15,000,000) in exchange for their stock, except in the case of the Chicago North Shore Street Ry. This will be operated under its lease to the North Chicago Electric Ry. Co., under which 6 per cent per annum is guaranteed on its \$650,000 stock, and its \$675,000 bonds are guaranteed, principal and interest. The Suburban Railroad will not be acquired at present. The following table gives official figures brought down to date as to mileage, funded debt and capital stock of the companies which will be operated together:

	Mileage (Single track).	Bonds.	Present Stock.
Chicago Electric Transit.....	35-20	\$1,097,000	\$1,500,000
Chicago & Jefferson Urban.....	7-74	208,000	2,000,000
Chicago North Shore (leased).....	14-90	675,000	650,000
Cicero & Provision.....	37-84	1,455,000	2,000,000
Evanston Electric.....	4-66	130,000	1,000,000
North Chicago Electric.....	38-40	868,000	2,000,000
North Side Electric.....	5-70	155,000	1,500,000
Ogden Street.....	35-00	576,000	2,000,000
Total.....	179-44	\$5,194,000	\$13,150,000

(† To be held under lease of North Chicago Electric Ry.)

The stockholders of said companies are to receive the following stock in the consolidated company: Evanston Electric Ry. Co. (\$50 for \$100), \$500,000; Chicago & Jefferson Urban Transit Co. (\$50 for \$100), \$1,000,000; North Chicago Electric Ry. Co. (\$175 for \$100), \$3,500,000; North Side

**Electric Street Ry. Co.** (\$200 for \$100), \$3,000,000; **Chicago Electric Transit Co.** (\$250 for \$100), \$3,750,000; **Ogden Street Ry. Co.** (\$50 for \$100), \$1,000,000; **Cicero & Proviso Street Ry. Co.** (\$50 for \$100), \$1,250,000. To effect the above exchanges will require the issue of \$14,000,000 of the new company's \$15,000,000 of stock.

The officers and directors of the new company are: Directors, J. M. Roach, D. H. Londerback, C. T. Yerkes, C. H. Marlowe; officers, President, John M. Roach; Vice President, W. F. Furbeck; Secretary, C. H. Marlowe.—V. 63, p. 330.

**Chicago Indianapolis & Louisville Ry.—First Dividend.**—The directors on Tuesday declared a first dividend of 1 per cent on the preferred stock.—V. 63, p. 281.

**Chicago Milwaukee & St. Paul Ry.—Chicago Railway Terminal Elevator Co.—Elevator Purchased.**—The Chicago Milwaukee & St. Paul Ry. Co. has purchased at Chicago from the Chicago Railway Terminal Elevator Co. the Fulton Elevator, with frontage of 147 feet on the river and a depth of 107 feet, for \$262,000, and the St. Paul Elevator, [on ground leased from the St. Paul road] for \$133,000. The purchase gives the St. Paul a river frontage of 330 feet at this point.

The Chicago Railway Terminal Elevator succeeded in 1894 the Chicago Grain Elevator Co. and issued \$1,330,850 common and \$1,492,920 preferred stock and \$2,400,000 first mortgage fifty-year 6s, subject to call at 110. A few months ago the company's large elevator near the North Western Railway Station was burned; the North Western is preventing its rebuilding by condemnation proceedings.—V. 63, p. 129.

**Chicago Street Railways.—Allen Law Repealed.**—At Springfield, Ill., on March 2, the State Senate almost unanimously passed the House bill repealing the Allen Law of last session, which authorized city councils to grant fifty-year franchises to Illinois Street car corporations. The bill has been duly signed by the Governor and is now in force.—V. 63, p. 330.

**Columbus Sandusky & Hocking R.R.—Determination of Indebtedness.**—Special Master H. M. Butler, Room 5, Foster Block, 35½ North High Street, Columbus, Ohio, gives notice that, under order of Court, he is taking account of the indebtedness of the company and that claims against it may be proved on or before April 5.—V. 63, p. 40.

**Consolidated Bay Cities Ry.—Deposit of Bonds Called—Possible Further Surrender of Coupons or Foreclosure.**—A Philadelphia committee, consisting of Michael P. Heraty, Chairman; Charles Platt, Lawrence Johnson and Frank K. Hipple, appointed at a meeting of the bondholders, say:

The needed improvements require a large expenditure of money, which primarily should be supplied by the stockholders. They are unable to do so, and the money must be supplied by the bondholders, either through the further surrender of coupons for a series of years or by direct contribution. Your committee therefore recommends that its position be strengthened by a deposit of bonds and by express authority not only to endeavor to make an arrangement with the railway company or its stockholders, but also to proceed to a foreclosure of the mortgage and a reorganization if deemed advisable. The mortgaged property can ultimately be made valuable but drastic measures may be necessary. The bondholders are therefore requested to deposit their bonds with the City Trust, Safe Deposit & Surety Co., 927 and 929 Chestnut Street, Philadelphia.

**Cumberland Telephone & Telegraph Co.—Increase of Stock.**—At the annual meeting on March 2 the stockholders authorized an increase of the capital stock from \$3,000,000 to \$6,000,000. The additional stock, it is said, will be sold at par, stockholders being allowed to subscribe in proportion to their present holdings. The annual report notes the completion of the line from Memphis to New Orleans, via Grenada and Jackson, Miss., etc., and satisfactory progress on the line via Vicksburg and Baton Rouge. The system thus reaches all of the principal points between Cairo, Ill., and Shreveport, La.—V. 67, p. 176.

**Denver City Tramway.—Consolidation.**—A press despatch from Denver says that on March 3 the consolidation of the electric and cable street railway lines of the city was effected under the name of the Denver City Tramway Co. A statement regarding the consolidated company and its securities appears in our STREET RAILWAY SUPPLEMENT. The officers are: Rodney Curtis, President; Wm. N. Byers, Vice-President; Wm. G. Evans, Secretary; George E. Ross-Lewin, Treasurer.—V. 63, p. 281.

**Des Moines Union Ry.—Chicago Milwaukee & St. Paul Ry.—Wabash Ry.—Leased.**—President F. C. Hubbell announces that the Des Moines Union Railway has been leased to the Wabash and to the Chicago Milwaukee & St. Paul for a term of 20 years from May 1.—V. 63, p. 1173; V. 63, p. 129, 130.

**Electric Vehicle Co.—Dividend.**—The directors on Wednesday "declared out of the net earnings of the year 1898 a dividend of 8 per cent upon the preferred capital stock of this company, payable April 1st. Also a dividend of 2 per cent on the common stock, payable April 1st," both to stockholders of record at the close of March 20, 1899. Norman Henderson is the company's Secretary.—V. 63, p. 429.

**Ft. Worth (Tex.) Street Ry.—City Railway.—Purchase.**—As to the reports of a pending consolidation, Col. Morgan Jones, Vice President of the Fort Worth Street Ry., says:

"For the present I am only willing to say for publication that we have bought the City Street Railway Company. Mr. W. P. Quigg has been selected as General Manager of the company, and as soon as the necessary papers are passed, which will be about the 1st of March, will assume his duties as such."

**Great Northern Paper Co.—New Enterprise.**—This company has been organized under a special charter granted by the State of Maine, and with a capital stock of \$4,000,000, all subscribed by leading capitalists in New York and Boston. The company proposes to begin immediately the construction of mills on the Penobscot River, with a capacity of 250 tons of news paper per day. About 260,000 acres of timber lands situated along the Penobscot River and the lakes tributary thereto have been acquired, and also a water power ample at all times for the operation of these mills. The management, it is said, will be in the hands of experienced men, all of whom are large contributors to the capital of the company. The product of the mills will be sold by the New York & Pennsylvania Co. of this city. Among the larger contributors to the capital stock are:

Col. Oliver H. Payne, Col. Augustus G. Paine, Meylert M. Armstrong, Augustus G. Paine, Jr., Walter S. Gurnee, John G. Moore and Grant B. Schley, of the banking firm of Moore & Schley, all of New York; and Garrett Schenck, Edward H. Haskell and the Messrs. Ames, of Boston.

**Havana Commercial Co.—Incorporated.**—This company, mentioned last week, was duly incorporated at Trenton, N. J., on March 4, by Isidore L. Carroll, James V. H. Lawrence and Charles L. Horton. The paid-up capital stock is \$30,000,000.—V. 63, p. 428.

**Indianapolis Street Ry.—Citizens' Street RR. of Indianapolis.—Organized.—New Securities.**—The Indianapolis Street Railway filed articles of incorporation with the Secretary of State at Indianapolis on Tuesday. The officers, it is stated, will be: President, Hiram P. Wasson, of Indianapolis; Directors, Henry Jameson, Harold Hibben, George Brown, H. P. Wasson and Julius A. Lemeke, of Indianapolis; Randall Morgan, of Philadelphia, and Hugh J. McGowan, of Kansas City.

The "Philadelphia Financial News" says the company will be capitalized as follows:

Capital stock (par \$50).....	\$5,000,000
New 4 per cent bonds (of which \$2,500,000 represents Citizens' Co. converted stock).....	3,750,000
Underlying securities—	
Citizens' Street Railway 6 per cents.....	300,000
Citizens' Street Railway 6 per cents.....	700,000
Citizens' Street Railway Consols 5 per cents.....	3,000,000

"Citizens' Co. stock (par \$100), receive 50 per cent in the 4 per cent bonds and 10 per cent in the stock of the new company." The paper quoted above says:

The Citizens' Co. does not publish its earnings, but good information is that the company has been earning rather more than \$400,000 net per annum. The new interest charges will amount to \$360,000 per annum for the first year, though this amount it is proposed to reduce by \$20,000 per annum by refunding the underlying Citizens' Co. 6 per cent bonds at 4 per cent, when they mature in 1900 and 1901. After the contract with the city has been actually signed, holders of Citizens' Company stock who have deposited their holding under agreement with the Guarantee Safe Deposit & Trust Co. will receive notice of the terms for exchanging their stock, as stated above. The firm of J. & W. Seligman & Co., bankers, of New York, it is stated, will have a large interest in the new company, and will take an active hand in its affairs.—V. 63, p. 427.

**Indiana & Lake Michigan Ry.—St. Joseph South Bend & Southern R.R. Property Transferred.**—At Terre Haute, Ind., March 1, Receiver Malott turned over the forty miles of road of the Indiana & Lake Michigan Ry. to the St. Joseph South Bend & Southern R.R., the new company organized by the old bondholders. This latter company is authorized to issue \$250,000 five per cent preferred and \$500,000 common stock. The stock issued will be held for five years by voting trustees, viz: Morgan G. Bulkeley, S. C. Dunham and Colgate Hoyt. The old first mortgage bondholders paid an assessment of 25 per cent, receiving par in new common stock and 25 per cent in preferred.—V. 63, p. 129.

**International Steam Pump Co.—Henry R. Worthington Co.—Steam Pump Consolidation.**—This is the company to be incorporated under the laws of New Jersey with a capital stock of \$27,500,000, of which \$12,500,000 6 per cent cumulative preferred stock, to consolidate:

Henry R. Worthington Co. of Brooklyn, N. Y., and Elizabethport assets, \$6,145,335. Blake & Knowles Steam Pump Works of East Cambridge and Warren, Mass.; assets, \$3,178,000. Deane Steam Pump Works of Holyoke, Mass.; assets, \$1,135,000. Laidlaw-Dunn-Gordon Company of Cincinnati, Ohio; assets \$800,000. Snow Steam Pump Works of Buffalo, N. Y.; assets, \$700,000.

The net earnings of the above companies in 1898 were over \$1,200,000 and it is estimated that they do 90 per cent of the steam pump business of this country, exclusive of high duty engines. Preferred stock at par will be set apart for the retirement of the \$2,000,000 7 per cent cumulative preference shares of Henry R. Worthington Co. and \$1,150,000 6 per cent debentures and \$500,000 8 per cent preference shares of the Blake & Knowles Co. The President of the new company will be Charles C. Worthington, Treasurer Max Nathan, and the proposed directors:

Charles C. Worthington, William L. Bull, Theodore F. Miller, Max Nathan, Charles L. Broadbent, Marcus Stine, Lewis E. Bellows, John G. Mackintosh, Robert Laidlaw, John W. Dunn, Daniel O'Day, James H. Snow, Philip Lehman and Edward E. C. Young.

Subscriptions are being received by Lehman Bros. at the rate of \$100 of preferred stock and \$75 common for \$100 cash.—V. 56, p. 234.

**Jacksonville Tampa & Key West Ry.—Assessment of 50 Per Cent on 1st 6s.—Notice to Dissatisfied Bondholders.**—Under a proposed amendment of agreement of deposit with the Pennsylvania Company for Insurances on Lines & Granting Annuities, a 50 per cent assessment is levied on the first mortgage 6s deposited.

The holders of the first 6s under the proposed amendment are to receive prior lien bonds for the assessment, and for the principal of their bonds 100 per cent in incomes and 50 per cent in new preferred stock. The prior lien bonds are to be part of an issue of \$1,000,000 of 5 per cents, of which the balance not given for the assessment will be reserved for the future acquisition of terminal or other needed property. The first 6s aggregate \$1,566,000 and there are liens recognized by the court as prior thereto amounting to \$400,000. The net earnings of the main line for the year ending Dec. 31, 1899 (January estimated), were \$43,486.

F. J. Lisman & Co. advise the bondholders not to pay the assessment, believing the road as an independent property cannot be made to pay. They recommend that the bonds be deposited under an agreement authorizing their sale at 50 per cent of their face value, or at less than that price with the sanction of the depositors, in the latter case those dissatisfied to be allowed to withdraw. The Philadelphia committee is not authorized to sell the bonds deposited with it at a price less than par. An opposition committee will be announced next week. See advertisement on another page.—V. 68, p. 380.

**Lake Ontario & Riverside Ry.—Foreclosure Sale April 10.**—The property will be sold at public auction April 10 by Sheriff Enos. It is estimated that it will cost \$100,000 to properly re equip the road.—V. 67, 1161.

**Lehigh Valley RR.—Packer Estate Stock.**—The report current that J. P. Morgan & Co. had acquired the 75,000 shares of Lehigh Valley stock held by the Packer estate is denied.—V. 68, p. 126, 132.

**Long Island RR.—Listed.**—The New York Stock Exchange has listed an additional \$350,000 (North Shore Branch) first consol. 5s, making total listed \$1,425,000.—V. 68, p. 380.

**Louisville Evansville & St. Louis RR.—Extension of Receiver's Certificates.**—Receiver Geo. T. Jarvis has been authorized by the court to refund the \$179,000 of receiver's certificates which expired March 1.—V. 67, p. 428.

**Manhattan Ry.—Municipal Assembly Has No Authority.—Railroad Commissioners to Be Asked to Act.**—Richard Croker, it is stated, has decided that the Municipal Assembly has no power to regulate the running of trains on the Manhattan Railway, which power, he says, lies in the hands of the Railroad Commissioners of the State. Mr. Croker believes that the Board of Health has power to bring about the various reforms which it was intended should be effected by the Coogan ordinances, and that the Park Department can require the removal of the structure from Battery Park.

At the meeting of the Aldermen on Tuesday the Railroad Committee presented two reports on the car-storage ordinance. The majority report, approving the ordinance, was presented by Mr. McCall (Tam.), who then moved that the reports be put on file, saying that the Corporation Counsel had given an opinion that the Municipal Assembly had no power over the railroads. He then presented this resolution:

*Resolved, That the Municipal Assembly of the city of New York hereby respectfully recommends that the Board of Railroad Commissioners of the State of New York compel the several elevated railway companies in the borough of Manhattan to cause their cars to be run and operated at intervals of not more than five minutes during the entire twenty-four hours of each and every day, in order that better transportation facilities may be afforded to the thousands who daily by day and night use the said elevated railroads.*

The resolution was adopted, 35 to 12. Mr. McCall offered another resolution recommending that the State Railroad Commissioners require all elevated railways in New York City to inclose their station platforms. Mr. Velton (Dem.) of Brooklyn wished to substitute Manhattan and the Bronx for the city, but his amendment to this effect was lost, 34 to 14. The resolution was sent to the Railroad Committee, as was one referring to the storage of cars.

**No Contract Yet.**—At the regular weekly meeting of the executive committee of the board of directors of the company on Tuesday, only routine business was transacted. The contract for the electrical equipment of the railway has not been let, and it is understood will not be until the issue of new stock has been floated.—V. 63, p. 428.

**Missouri Pacific Ry.—Sale of Bonds.**—A syndicate has bought \$6,000,000 5 per cent gold trust bonds of the issue of 1887 which were owned by the estate of Jay Gould. Goldman, Sachs & Co. effected the sale.—V. 68, p. 380.

**Montgomery & Chester Electric Ry.—Mortgage.**—This company has made a mortgage for \$100,000 to the Real Estate Trust Co. of Philadelphia, trustee, to secure bonds to be issued on the proposed line from Pottstown to Phoenixville, via Limerick Square, Spring City and Royersford. Construction, it is said, is about to commence.

**National Tin Plate & Stamped Ware Co.—National Enameling & Stamping Co.—Offer Reported Withdrawn.**—A press despatch from Chicago states that the National Tin Plate & Stamped Ware Co. has withdrawn its offer for the purchase of the National Enameling & Stamping Co. The National Enameling & Stamping Co., it is understood, includes the St. Louis Stamping Co., the Haberman Manufacturing Co., Kieckliefer Bros., Matthal, Ingraham & Co. and the American Stamping Co. Other factors in the trade are the Lalance & Grosjean Manufacturing Co., the Iron Clad Stamping Co., Keen & Haggerty, Bellaire Stamping Co. and the Cleveland Tool & Tinware Co.—V. 68, p. 187.

**New York Electric Vehicle Transportation Co.—Correct Name.**—This is the correct name of the company mentioned

last week as incorporated in New Jersey to operate electric vehicles in this city.—V. 68, p. 429.

**New York Ontario & Western Ry.—Bonds Listed.**—The New York Stock Exchange has listed \$3,456,000 refunding mortgage 4 per cent 100-year bonds, of which \$740,000 were issued for improvements, etc., and \$2,716,000 to retire 5 per cent bonds. The committee is also empowered to add to the list from time to time additional refunding mort. bonds when officially notified that said bonds have been issued in exchange for first consols, making total amount to be listed not to exceed \$15,437,000.—V. 68, p. 429.

**New York New Haven & Hartford RR.—Groton Extension.—Trackage Abandoned.**—The company, having almost completed its line between Norwich and Groton on the west side of the River Thames, has given notice that on April 1 it will cease the use of the Central Vermont tracks on the side of the Thames River, the use of the Union Station at Norwich, and the use of the wharf property in New London. A New York, Norwich, and Worcester, Mass., express-train service it is thought will follow. The change, it is said, will save the New Haven about \$50,000 annually.

**Terminals at Port Morris.**—The company, it is stated, has begun the work of establishing a new railroad terminus at Port Morris on Long Island Sound to serve for ferry connection with Jersey City and supplementary to the present yard at Willis Avenue.—V. 68, p. 332.

**New York Suburban Gas Co.—American Gas Co.—Consolidation.**—A certificate of consolidation of the East Chester Gas-Light Co., the Pelham Gas-Light Co., the Westchester Gas & Electric Co. and the Larchmont Gas Co., under the title of the New York Suburban Gas Co., was filed at Albany on Thursday. The capital stock is \$1,500,000. The five companies cover the whole territory extending northeast from the New York City line, between Long Island Sound and the Harlem Railroad, and it is said serve a population exceeding 50,000 and increasing 15 per cent to 20 per cent yearly. The constituent companies are reported to have sold 115 million feet of gas in 1897 at a net profit of \$72,767 and 126 million feet in 1898 at a net profit of \$33,785. Interest charge of new company is \$60,000.

**Bonds Offered.**—Kean, Van Cortlandt & Co., 33 Wall Street, New York and E. B. Smith & Co., The Bourse, Philadelphia, offer at 103 and interest \$1,200,000 of the company's \$2,100,000 1st mort. 50 year gold bonds, due 1949, redeemable at 105 and interest after March 1, 1909, guaranteed for principal and interest by the American Gas Co., which owns all the stock of the New York Suburban Gas Co. See advertisement on another page.

**Nicaragua Canal Co.—Action by Congress.**—At Washington on March 4 Congress passed the River and Harbor Bill, with its amendment appropriating \$1,000,000 for an investigation of both the Panama and Nicaragua isthmian canal routes, but making no provision for beginning work on the canal.—V. 68, p. 380.

**Ogden Gas Co.—Universal Gas Co.—People's Gas Light & Coke Co. of Chicago.—Extensions.**—The Chicago "Economist" on March 3 said:

The Ogden Gas Co. will let a contract next week for a 2,500,000-foot gas holder on the site of its present works on the North Side. The capacity of the present holder is 500,000 feet, and the proposed large increase in holder capacity is, of course, with a view to the future growth of the business. The company's business is growing steadily, although it is still a small affair compared with the People's Company. The relations between the two companies continue on the basis that was established two years ago. There is no positive guaranty that hostilities will not be renewed, but such an event appears scarcely likely in the near future, as each company is doing well.

The Universal Company, as stated some months ago, has let contracts for a 5,000,000-foot holder to be constructed on land adjoining the Ogden site on the North Side. Preliminary work on this holder, the largest in the city, has already begun, and the structure will be completed this year. This, however, does not necessarily foreshadow hostilities. If the Ogden Company should attempt to invade the West Side trouble might follow. There is no likelihood of its building in that division this year.—V. 65, p. 1116; V. 67, p. 179; V. 68, p. 327.

**Ohio Southern RR.—Transferred.**—The property was transferred to Superintendent Chas. F. Franklin, representing the first mortgage bondholders, on March 7. Mr. Franklin and the new General Manager, Benjamin Norton, were formerly with the Long Island RR.—V. 67, p. 1208.

**Oregon Pacific Ry.—Corvallis & Eastern RR.—Trust Company Sued.**—Bondholders of the old Oregon Pacific road have brought suit in the Supreme Court of this State against the Farmers' Loan & Trust Co., as the trustee under the \$15,000,000 mortgage of 1890, to determine whether that company fulfilled all its obligations under the mortgage or by failing so to do has rendered itself liable in damages to the bondholders. All, or nearly all, the \$15,000,000 of bonds were issued, but only 140 miles of track was constructed and this with the land grant sold at foreclosure sale for only \$100,000, or less than the amount due on receivers' certificates. The Corvallis & Eastern is the present owner of the property. General Benjamin F. Tracy is said to be one of the plaintiff's counsel.—V. 66, p. 573.

**Oregon Short Line RR.—85 per cent of Stock Deposited for Exchange—Option to Be Withdrawn March 15.**—It is announced that more than 85 per cent of the entire capital stock has been deposited for exchange under the offer of the Union Pacific RR. Co., previously published. Notice is given that after March 15 the privilege of making such exchange will be withdrawn.—V. 68, p. 430.

**Park Brothers & Co., Limited, of Pittsburg.—Incorporated.—Stock Offered.**—Baring, Magoun & Co. offer for subscription at par \$1,500,000 7 per cent cumulative preferred stock of the Park Steel Co., which was formed to acquire and carry on the well-known Merchant Steel manufacturing business of Park Brothers & Co., Limited, of Pittsburg. The business has been in continuous operation since 1850, and the present managers will remain in charge for at least three years and have agreed to retain their common stock in the new company for a like period unless authorized to sell by a unanimous vote of the board of directors. The capital stock of the Park Steel Co. consists of \$1,000,000 preferred and \$5,000,000 common stock. The real estate, plant, etc., of the company has been valued by experts at \$3,254,393, cash \$430,379, merchandise \$1,519,621, making a total of \$5,204,393. The company will start with no existing liabilities and with a cash working capital of \$1,950,000. It is provided that one third of the net earnings, after paying 7 p. c. dividends on the preferred stock, shall be invested as a reserve dividend fund up to \$350,000. A simultaneous issue will be made in London by Baring Brothers & Co., Limited. Application will be made to have the preferred stock listed on the New York Stock Exchange. The company was incorporated in New Jersey on March 6. See advertisement on another page.

**People's Gas Light & Coke Co. of Chicago.—New Stock Listed.**—The New York Stock Exchange has listed \$3,679,400 of the company's \$1,000,000 of new capital stock, making total amount listed \$28,679,400.—V. 68, p. 327.

**Peoria Decatur & Evansville Ry.—Suit to Re-open Foreclosure Case.**—Baldwin & Boston, representing New York stockholders, have filed a bill in the United States Circuit Court for the Southern District of Illinois asking the Court to reopen the foreclosure suit under the second mortgage of the company. The decree under this mortgage was entered in March, 1897.—V. 68, p. 188.

**Pueblo Traction & Electric Co.—Consolidation.—New Bonds.**—This company, it is stated, has been organized with capital stock of \$500,000 as a consolidation of Pueblo Light & Power Co. and Pueblo Electric Street Railway Co. The new company, it is said, will issue improvement bonds.—V. 67, p. 902.

**Rio Grande Western Railway.—Proposed Consolidated 4 Per Cent Mortgage.**—The directors have concluded, subject to ratification by the stockholders, to authorize a mortgage securing first consolidated mortgage 4 per cent gold bonds, running 50 years, with interest payable April and October. The \$1,500,000 bonds now to be issued have been sold to bankers; \$500,000 will cover the cost of 25 miles of branches to be built to coal mines, etc., and \$1,000,000 provide the funds needed to discharge all car trusts and other indebtedness for equipment to restore to current resources the amount expended in 1893 in building the last extension of the Sevier Railway to Balknap, and to provide additional equipment.

There will be reserved an amount equal to that of the present first mortgage, to be issued only to retire the same at maturity, or sooner. The \$3,550,000 branch line bonds now held in the treasury, and covering 110 miles, will be exchanged for \$2,300,000 of the proposed consols to be similarly held. The mortgage will also provide for the issue of bonds, at the rate of \$20,000 per mile, for the building or acquisition of future branches and extensions, or for exchange, at not exceeding that rate, for the whole of the underlying lien of other roads, of which the whole or a majority of the stock may be acquired by the Rio Grande Western Railway Co. This provision will enable the company to acquire first mortgage guaranteed bonds of the Utah Central R.R., whenever they may be acquired advantageously.

In addition to the above, the mortgage will authorize for equipment and other improvements of, or additions to, the property, the issue of \$10,000,000 consolidated bonds. Of these, \$1,000,000 are to be issued now, as above stated, and the remainder at the rate of not exceeding \$500,000 in any fiscal year, unless the consent to a larger amount shall be given in writing by the holders of two-thirds of the outstanding stock.

A circular contains the following as to the reasons for making the new mortgage:

The annual report for the year ending June 30, 1898, showed obligations outstanding for new equipment amounting to \$226,719, of which \$60,000 were thereafter liquidated from current resources. There has since been ordered of additional equipment about \$100,000 in value soon to be delivered, and the General Manager recommends that at least as much more be ordered. It is desirable that some additional branches and extensions should be promptly constructed. These immediately important are a branch up the Pecos River Canon, and extensions of the Pleasant Valley Branch to additional coal mines which are being opened in that field to supply the growing Far Western market—a total of 25 miles. The road occupies a new territory unusually rich in mineral and other resources, new discoveries or developments of which are constantly being made. The carriage of coal and coke and other minerals, and of live stock, already aggregates 60 per cent of our total tonnage. Our through traffic is also an important factor, and the recent concentration of the public mind on the prospects of the Pacific Slope has already tended to increase this business, the outlook for which was never more promising. There will be further and continuing demands for rolling stock and other enlargement and improvement of the property, and for additions thereto, to meet this inevitable growth; and opportunities will from time to time present themselves for securing the control of profitable interests bringing additional traffic or income.

The equipment to be forth with put under the consolidated mortgage as a first lien will, it is believed independently of the earnings from the new 25 miles, net to the company in the saving of car mileage now paid to other roads and from the command of additional busi-

ness, the bulk of the interest on the entire \$1,500,000 now to be issued. In addition the consolidated bonds will also be secured by a first lien on the existing mileage of the Sevier and Tintic railways, aggregating 110 miles of road, and on all new mileage to be constructed. The net earnings of the 110 miles alone amounted in 1898 to double the interest on the present issue.—V. 68, p. 283.

**St. Paul & Duluth—Consolidation.**—In accordance with the plan for absorbing the subsidiary lines the stockholders on Feb. 20 authorized the purchase of the Grantsburg branch from Rush City to Grantsburg, Minn., 17 miles, and also the two leased lines, the Taylor's Falls & Lake Superior, from Wyoming to Taylor's Falls, Minn., 20 miles, and the Stillwater & St. Paul from White Bear, Minn., to Stillwater, 12½ miles.—V. 63, p. 283.

**Schoenhofen (Peter) Brewing Co.—English Income Tax to Apply to Earnings of American Company.**—A cablegram from London says that the Court of Appeal has upheld the decision of the lower court ordering this English company to pay income tax on the entire profits of the American company and not merely on the portion remitted to England.

**Severy Process Co.—Incorporated.**—This company on Wednesday filed articles of incorporation at Trenton, N. J., with a capital stock of \$7,500,000 to acquire the patent rights of Melville L. Severy designed to do away with "make ready" in printing. The company, it is said, will also manufacture articles used in printing, engraving, etc.

**Sionx City O'Neill & Western—Foreclosure Decree.**—The United States Circuit Court of Appeals at St. Louis, on Feb. 21, affirmed the decree of Judge Caldwell at Omaha, ordering the foreclosure of a mortgage for \$3,340,000 on this road held by J. Kennedy Tol & Co. of New York as trustees.—V. 63, p. 86.

**Sionx City Terminal Co.—Mortgage Valid—Foreclosure.**—The United States Supreme Court on Feb. 20 pronounced valid a mortgage for \$1,250,000 made to the Trust Company of North America of Philadelphia as trustee and sustained the decision of Judge Shiras ordering foreclosure. The company owns the terminal lines and the union passenger station at Sionx City, Iowa.—V. 61, p. 431.

**Tacoma Land Co.—Reorganization Plan.**—A committee consisting of Samuel E. Kilner, Chairman, Daniel S. Lamont, Wm. Nelson Cromwell, John U. Brookman and Wm. T. Wright, with Sullivan & Cromwell as counsel, notifies the bondholders, stockholders and creditors that, in accordance with the reorganization agreement of July 29, 1898, the committee has prepared a plan of reorganization, dated Jan. 31, 1899, which plan has been approved by a majority of the shares deposited. The said plan is therefore declared effective and binding upon all the parties to said agreement of July 29, 1898, under which there have been deposited with the Atlantic Trust Co. over 94 per cent of the entire capital stock of the company. After March 15 no deposit will be received except upon such terms as may be imposed by the committee. Copies of the plan may be obtained from the chairman of the committee, 120 Broadway, New York, and at the office of the company, 142 South Third Street, Philadelphia.

The plan provides for the organization of a new company to issue \$350,000 common and \$750,000 7 per cent cumulative preferred stock (shares \$100 each), \$1,000,000 prior lien twenty-year 5 per cent gold bonds and \$150,000 general lien twenty-year 4 per cent gold bonds, these last bearing no interest for first three years. The old company was capitalized for \$1,631,850 of stock and \$1,000,000 of bonds.—V. 68, p. 331.

**Tennessee Gas Co. of Nashville.—Incorporated.**—This company has been chartered with an authorized capital of \$1,000,000, to build and operate a gas plant in Nashville and Davidson County, Tenn. Incorporators: Robt. M. Snyder, Michael M. Sweetman, Wm. L. Dudley, and others.

**Toronto Hamilton & Buffalo Ry.—Bonds Offered.**—Edward Sweet & Co. of New York and the American Loan & Trust Co. of Boston, offer at par and accrued interest, \$3,280,000 first mortgage 4 per cent gold bonds maturing July 1, 1946. These bonds are a first lien upon 85 miles of railroad extending from Welland to Hamilton, Ontario, and from Hamilton to Waterford. The road was built under a contract between the New York Central & Hudson River, the Michigan Central, Canada Southern and Canadian Pacific railway companies for the purpose of connecting the Vanderbilt system of roads with the Canadian Pacific. Besides serving as such a connection, the road, it is said, derives a large amount of local traffic from the country through which it passes. Of the company's stock 51 per cent is held by the New York Central and 19 per cent by the Canadian Pacific Railway. The four companies first mentioned practically guarantee the interest upon the bonds, for they agree to set aside, if necessary, up to 25 per cent of their entire gross earnings, upon the traffic delivered to and received from the Toronto Hamilton & Buffalo Railway, to meet the interest upon the bonds. It appears, however, that this fund is not likely to be drawn upon, for during the five months ending Dec. 31 the net earnings of the company were \$55,587, while the interest upon the bonds for that period was \$54,666. The guarantee fund for that period was \$75,784. See advertisement on another page.—V. 63, p. 359.

**Trenton Street Ry.—Listed in Philadelphia.**—The Philadelphia Stock Exchange has listed the company's \$1,000,000 common stock (par value \$50, full paid), and \$552,000 consolidated mortgage 5 per cent gold bonds due July 1, 1939.

both principal and interest payable in gold coin, free of tax, in Philadelphia and Trenton; Girard Life Insurance, Annuity & Trust Co. of Philadelphia, trustee.

The authorized issue of the consolidated mortgage 5s is \$2,000,000, of which there has been issued \$552,000 for stock of the companies consolidated in June, 1898; \$448,000 is reserved to be issued at the option of the board of directors, and \$1,000,000 to take up a like amount of Trenton Passenger Railway first mortgage 6s. There is in addition a \$20,000 purchase money mortgage on Spring Lake Park and floating debt \$60,000, consisting of bills payable.—V. 68, p. 284.

#### Union Bag & Paper Co.—Officers.—The directors are:

Samuel Cupples (President), St. Louis; Rodney B. Smith, Baltimore; Charles A. Dean, Boston; Albert H. Chatfield, Cincinnati; Lucius G. Fisher, Chicago; Lucius V. Walkley, Plantville, Conn.; Douglass W. Mabee, Ballston Spa, N. Y.; Nathaniel C. Pierce, St. Louis; Frank Washburn, Chicago; William H. Van Nortwick, Batavia, Ill.; D. S. Walton, East Orange, N. J.; John H. Derly, Sand Hill, N. Y.; Geo. R. Sheldon, N. Y.; William H. Moore and J. H. Moore, Chicago.—V. 68, p. 430.

**Union Pacific RR.—Dividend.**—The directors yesterday declared a dividend of 1½ per cent per share on the preferred stock, payable April 19, 1899. This is the same amount as paid last October. The dividend was based upon the following recommendation of the executive committee:

*Whereas*, The surplus income for the period of six months ending Dec. 31, 1898, justifies a distribution to shareholders; and,

*Whereas*, The present company has been in possession of all of its main lines of railway for a period of barely one year and of several of its branch properties for a much more limited time, and is, therefore, without a basis in experience for determining any fair average of results in unequal years; and

*Whereas*, It is not by this committee deemed advisable to make any present addition to the outstanding bonded debt by the use or sale of reserved bonds, or to create other obligations, but in the judgment of this committee the company should, for the present, continue the policy of liberal application of its surplus income to permanent improvements and additions to its property and generally to such uses as will secure economy of operation and increased earning capacity and thereby establish stable and permanent values for its securities and a reasonably safe minimum basis of regular dividends to its stock; and

*Resolved*, That this committee hereby recommends to the board of directors the declaration of a dividend at the rate of \$1.50 per share on the preferred stock, to be paid from the surplus income for the period of six months ending Dec. 31, 1898.

The Chairman of the Executive Committee states that there has been expended on the Union Pacific Railroad during the year 1898 and will be expended during the year 1899 amounts aggregating nearly \$9,000,000, equal, approximately, to 12 per cent on the outstanding preferred stock. The major part of this amount, he says, was for purposes other than those ordinarily charged to operating expenses, being such as new rolling stock, reduction of grades, relocation to shorten line, reduction of curvatures, improvement of terminals, new depot at Omaha, additional side tracks, new ballast and new and heavier steel rails. These expenditures, it is expected, will increase the net income of the company in the future, thereby placing its securities in a stronger position for permanent and regular returns.—

**Lands.**—On Monday at Omaha all the lands of the Union Pacific RR. Co. in Nebraska covered by the sinking fund mortgage of 1873 were sold at auction and bought in by the new Union Pacific Co. for \$868,514. The same company purchased also for \$900,000 the contracts of sale in force on other lands in Nebraska, Colorado, Utah and Wyoming, and on which payments are yet due from the purchasers. Prior to the sale a protest was filed by B. G. Burbank of Omaha City who alleged that he represents parties who desire to homestead said land, which they claim the company forfeited its right to, by not selling within three years after the completion of the road.—V. 68, p. 430.

**United Electric Co. of New Jersey—People's Light & Power Co. of Newark.—North Hudson Light, Heat & Power Co. of Hoboken—Suburban Electric Co. of Elizabeth.—Pending Merger.**—The United Electric of New Jersey Co., organized in the interest of the United Gas Improvement Co. of Philadelphia, filed articles of incorporation at Trenton on March 6. Its purpose is to unite the electric light, heat and power companies of Northern New Jersey. The capital stock of the new company is fixed at \$20,000,000, and a mortgage for \$20,000,000 is to be made to the New Jersey Title Guarantee & Trust Co. of Jersey City, and perhaps also the Fidelity Trust Company of Newark, as trustees, to secure an issue of 50-year 4 per cent gold bonds. These bonds will have their interest guaranteed for the first five years by the United Gas Improvement Co.

With a portion of the new securities the company proposes to acquire the People's Light & Power Co. of Newark, the North Hudson Light, Heat & Power Co. and the Suburban Electric Co. of Elizabeth. The People's company has outstanding \$5,000,000 of stock and is to issue at par for cash to stockholders an additional \$500,000. The total authorized issue was recently raised to \$20,000,000, and the par value of shares was to be reduced from \$25 to \$10. For the \$5,500,000 issued the United Electric Co., on payment by the holders of \$200 in cash per \$1,000 of stock, will give \$1,750 in new 4 per cent bonds. This exchange, if the entire issue is acquired, will take \$9,625,000 of the new 4s. An additional \$7,875,000, it is said, will be used to acquire the Elizabeth and Hoboken companies, which have outstanding capital stock of \$1,000,000 and \$2,000,000 respectively, and to retire their bonded debt for a like amount. The stock of the People's Company is paying dividends at the rate of 5 per cent per annum. The United Gas Improvement Co. is already the owner

of 17,007 shares. Judge Gottfried Krueger, holder of 5,774 shares, is opposed to the proposed merger.—V. 68, p. 131.

**United Railways & Electric Co. of Baltimore.—Organized.**—This company filed articles of incorporation at Annapolis on Saturday last and on the same day the last formalities were concluded transferring to it the various properties. Special meetings of the Consolidated Railway Co. and the City Passenger Railway Co. were held for this purpose. On the preceding day [March 3] the stockholders of the City Passenger Railway Co. and the Baltimore & Northern Electric Railway Co. had adopted resolutions to consolidate their two companies. The officers of the new company are:

President, Nelson Perlin; Vice-President, Col. Walter S. Franklin; General Manager, William A. House; Treasurer, Briggs C. Keok; Secretary, H. C. Medilton; Directors, Alexander Brown, E. L. Bartlett, Nelson Perlin, Henry A. Parr, Col. Walter S. Franklin, George R. Webb, George C. Jenkins, W. P. Harvey and Seymour Mandelbaum.

**New Mortgage.**—The directors on Monday authorized the execution of a mortgage in favor of the Continental Trust Co. as trustee to secure the proposed issue of \$33,000,000 of 4 per cent bonds, described below.

**Bonds Offered.—Description of Loan.**—Brown Brothers & Co., New York, Philadelphia and Boston; Alexander Brown & Sons, Baltimore, Md., and the Mercantile Trust & Deposit Co., Baltimore, Md., are offering for sale \$18,000,000 of the company's bonds at 102½ and accrued interest. The bonds are first consolidated mortgage 4 per cent 50-year gold bonds, dated March 6th, 1899, interest payable semi-annually, Sept. 1st and March 1st, at the banking house of Alexander Brown & Sons, Baltimore. They are bonds, \$1,000 each, c\*, payable principal and interest in United States gold coin of, or equal to, the present standard of weight and fineness, without deduction for any tax or taxes which the company may be required to pay or retain therefrom. They are secured by mortgage covering all the real estate, franchises and property of every kind now or hereafter owned by the company. They are not subject to call.

The capitalization of the company is as follows: 4 per cent cumulative preferred stock, \$14,000,000; common stock, \$24,000,000; first consolidated mortgage gold bonds, \$38,000,000. The bonds are to be disposed of as follows:

To be set aside to provide for the retirement, at or before maturity, of all underlying divisional bonds, debentures and certificates of indebtedness, about.....	\$15,366,000
To be set aside to provide for betterments, improvements, extensions and expenses of consolidation, about.....	4,634,000
To be sold at once to provide part of the cash required for payment for properties, about.....	18,000,000

**Road and Earnings.**—The company owns all the lines formerly operated by the Baltimore Consolidated Ry. Co., 207 miles; the Baltimore City Passenger Ry. Co., 56½ miles; the Central Ry. Co., 36¾ miles; the Baltimore & Northern Electric Ry. Co., 38½ miles, and all the bonds of the Baltimore Middle River & Sparrow's Point Railroad, 14½ miles, being all the passenger railways in the city of Baltimore and its vicinity. The earnings of the aforesaid properties, operated separately, for the year ending Dec. 31, 1898, were:

Gross earnings.....	\$4,062,358
Operating expenses, including taxes on real estate, gross receipts and licenses.....	2,304,826

Net earnings.....	\$1,757,531
The total fixed charges of the United Railways & Electric Co., including int. on all underlying bonds, will be about.....	1,500,000

Showing an actual net surplus on the basis of last year's earnings of about..... \$257,532

"A prominent railway expert, after careful examination, estimates that when consolidated under one management and the proposed changes and improvements are completed, the gross receipts for the first year should be \$4,500,000; operating expenses, \$1,392,000; net earnings, \$2,608,000; which would be sufficient to pay all fixed charges, 4 per cent dividends on the total issue of preferred stock, and leave a surplus of about \$548,000 applicable to dividends on the common stock." See advertisement on another page.—V. 68, p. 333.

**United Shoe Machinery Co.—Capital Stock.**—The company's capital stock is divided as follows: Authorized common, \$12,500,000; preferred 6 per cent, \$12,500,000; immediate issue to be, common, about \$8,625,000; preferred, about \$8,625,000. Listed to March 9 on Boston Stock Exchange, common, \$345,000; preferred, \$345,000.—V. 68, p. 430.

**United States Dyewood & Extract Co.—Incorporation.**—The certificate of incorporation of this company was filed Tuesday in the office of the County Clerk at Camden, N. J., for transmission to Trenton. The company is intended to effect a consolidation of the leading concerns engaged in the manufacture of logwood and dyewood extracts. Its capital stock is \$10,000,000, of which \$8,000,000 is 6 per cent cumulative preferred and \$1,000,000 common stock. The right is reserved to issue also a third class of stock, to be known as deferred debenture stock, which will be subordinate to the preferred and common stock, both as to dividends and principal. The incorporators are James B. Dill, of this city, counsel of the company; Henry T. Wills, of Boston, Mass., and Frederick W. Garvin, of Toronto, Canada. The consolidation has not yet been effected, and may never be brought about.

## Reports and Documents.

### PENNSYLVANIA RAILROAD COMPANY.

FIFTY-SECOND ANNUAL REPORT, FOR THE YEAR  
ENDING DEC. 31, 1898.

PENNSYLVANIA RAILROAD COMPANY, }  
GENERAL OFFICE, }  
PHILADELPHIA, March 7th, 1899. }

The Board of Directors submit herewith to the Stockholders of the Pennsylvania Railroad Company a synopsis of their Annual Report for the year 1898:

The gross earnings of the three grand divisions east of Pittsburgh and Erie, embracing the Main Line, United Railroad of New Jersey, and Philadelphia & Erie Railroad, and Branches thereof, were.....\$85,603,737 95  
Expenses.....44,510,015 85

Net earnings.....\$21,093,722 10  
To which add:  
Interest from investments.....\$4,861,687 36  
Rental of equipment, and other items.....604,958 57  
5,466,645 93

Gross income.....\$26,560,368 03  
Deduct:  
Rentals, leased and operated roads.....\$10,315,771 00  
Interest on funded debt.....4,263,458 74  
Interest on mortgages and ground rents,  
car trusts, taxes, &c.....1,752,407 39  
16,331,638 03

Net income.....\$10,228,728 00

From this amount the following deductions have been made:

Payments account Sinking and Trust  
Funds.....\$144,780 00  
Extraordinary renewals, &c.....673,857 91  
1,120,638 91

Dividend of 5 per cent.....\$9,108,089 19  
6,465,436 25

Deduct amount transferred to Extraordinary Expendi-  
ture Fund to complete work already authorized in  
revising grades, &c.....1,800,000 00

Amount transferred to credit of profit and loss for the  
year 1898.....\$842,453 04  
Add amount to credit of profit and loss Dec. 31, 1897..22,823,956 98

\$23,666,409 04

Reduction in valuation of securities, and amounts  
charged off in adjustment of old accounts.....1,220,913 30

Balance to credit of profit and loss Dec. 31, 1898...\$22,445,996 62

#### SINKING FUNDS.

Under the provisions of the consolidated mortgage of the Company, the annual amount set apart out of the net income for the redemption of the outstanding bonds secured by that mortgage was increased during the year to \$354,750, the sinking fund for the bonds issued May 1st, 1898, having become effective on the 1st of May, 1898. Under its provisions \$30,000 of these securities were purchased and canceled, and the funded debt was reduced by this amount. There are now \$5,861,084 10 in securities and cash in the fund for the redemption of these bonds.

Under the provisions of the four per cent Equipment Trust Gold Loan, there was paid to the trustees during 1898, for the sinking fund, the sum of \$136,409. The trustee was unable to obtain any of the bonds at the price fixed in the lease, and, in accordance with the terms thereof, the whole amount has been invested in additional equipment.

#### SECURITIES OF OTHER CORPORATIONS.

The entire cost of the securities of other corporations, now held by your Company, is \$117,338,885 79. The direct revenue received therefrom was \$4,626,056 71, which amounted to nearly four per cent upon the cost thereof, and more than provided for the interest on your funded debt.

#### CAR TRUSTS.

The outstanding certificates of Series "I" of the Pennsylvania Car Trust and Series "F" and "G" of the Pennsylvania Equipment Trust having matured during the year, were paid and canceled. These series cover 2,000 hopper gondolas, 450 box, and 50 refrigerator cars in service on the Pennsylvania Railroad; 1,000 gondolas subleased to the Pennsylvania Company, 500 subleased to the Northern Central Railway Company and 500 subleased to the Philadelphia Wilmington & Baltimore Railroad Company; 500 hopper gondolas subleased to the Pennsylvania & Northwestern Railroad Company; and 152 box cars subleased to the New York Philadelphia & Norfolk Railroad Company, representing in all 5,152 cars and a total cost of \$2,550,000. These cars have therefore now become the property of the respective lines which contributed to the cost thereof.

A further issue was made of these securities, consisting of Series "E," "F" and "G" of the Pennsylvania Rolling Stock Trust, aggregating \$3,000,000, and bearing interest at 3½ per cent per annum. There will thus be added to the

equipment of the Main Line 1,000 steel gondolas, 2,000 box cars and 1,946 long gondolas.

The total number of cars provided under the Car-trust system is 62,943.

Total amount of certificates issued therefor.....\$33,644,000 00  
Amount redeemed.....28,787,000 00

Balance of certificates outstanding Dec. 31, 1898.....\$4,857,000 00

The number of tons of freight moved on the three grand divisions east of Pittsburgh and Erie in 1898 was 84,801,805, an increase of 5,239,340, or 6·59 per cent; the number of passengers was 35,962,566, an increase of 965,042, or 2·76 per cent.

The other Railroad Companies east of Pittsburgh and Erie in which your Company is interested show satisfactory results. Detailed statements of their operations will be found in their respective annual reports, as well as in the pamphlet report of your Company.

#### LINES WEST OF PITTSBURG.

The following statement gives the results of the operation of the lines west of Pittsburgh by the Pennsylvania Company and the Pittsburgh Cincinnati Chicago & St. Louis Railway Company:

Earnings of the Pennsylvania Company on lines operated by it were.....\$21,099,608 64  
Expenses.....13,545,342 14

Net results.....\$7,544,266 50

From this deduct:  
Rental, interest, and liabilities of all kinds chargeable thereto.....6,878,605 72

Net profit on Pennsylvania Company's lines.....\$665,660 78

Earnings of the Pittsburgh Cincinnati Chicago & St. Louis Railway Company on lines operated directly by it were.....\$18,942,451 13  
Expenses.....13,604,760 09

Net results.....\$5,337,690 14

From this deduct:  
Rental, interest, and liabilities of all kinds chargeable thereto.....4,117,842 85

Net Profit on Pittsburgh Cincinnati Chicago & St. Louis Railway Company's lines.....1,220,047 29

Net profit on lines west of Pittsburgh.....\$1,885,708 07

The other lines west of Pittsburgh, on account of which your Company has assumed direct obligations, or in which it is largely interested through ownership of securities, but which are operated through their own organizations, show the following results:

The aggregate gross earnings of these roads were.....\$6,925,645 81  
Expenses.....5,108,054 28

Net earnings.....\$1,817,591 53

Deduct rental, interest, &c.....1,936,578 85

Loss.....\$18,987 32

Of this loss, your Company, under existing contracts, is responsible for.....\$4,963 02

Which, deducted from the profit shown in the above statement.....1,885,708 07

Leaves a net profit on all lines west of Pittsburgh.....\$1,880,744 15

These lines, while showing a material gain in gross earnings, show a greater increase in expenses, due to the outlay necessarily made to put them in condition to move the traffic promptly and economically at the prevailing low rates.

It will be noted that after meeting all charges and liabilities of every kind there was a net profit on your lines west of Pittsburgh of \$1,880,744 15.

#### FUNDED DEBT.

The \$2,600,000 of the Second Mortgage Bonds of the St. Louis Vandalia & Terre Haute Railroad Company which matured May 1st last were purchased by the Pennsylvania Company, and will be held until the relations of the lines embraced in the Vandalia System are further adjusted. The Terre Haute & Logansport Railroad, one of the lines of that system, having been sold under the mortgage securing \$1,000,000 of its six per cent extension bonds, was purchased in your interest on the eighteenth day of November, and has been reorganized under the name of the Terre Haute & Logansport Railway Company. The litigation in connection with these properties still continues, and they remain in the hands of Mr. V. T. Malott as Receiver.

The seven per cent Consolidated Mortgage bonds of the Erie & Pittsburgh Railroad Company, amounting to \$2,109,000, were paid at maturity, July 1st, 1898, through the negotiation of three and one half per cent bonds issued under its General Mortgage and reserved for that purpose. The only prior lien securities now outstanding are an inconsiderable amount of Equipment Bonds which fall due October 1st, 1900.

Under the terms of the General Mortgage of the Cleveland & Pittsburgh Railroad Company, a new series of \$3,000,000 was authorized by that company, bearing interest at three and one-half per cent, running for fifty years from November 1st, 1898, and designated Series C, to be used in payment for betterments to its road and in the redemption of prior lien bonds.

The Cincinnati & Muskingum Valley Railway Company having been sold under foreclosure proceedings June 29th, 1898, was purchased in your interest and has been reor-

ganized as the Cincinnati & Muskingum Valley Railroad Company. Under this reorganization the interest on its funded debt of \$1,500,000 has been reduced from seven to four per cent, and the operating results of the property are now quite satisfactory.

The number of tons of freight moved on the lines west of Pittsburg was 59,473,775, an increase of 7,678,719. The number of passengers was 16,370,011, an increase of 837,286.

The gross earnings of all lines east and west of Pittsburg for the year were \$132,869,470 02, operating expenses, \$92,909,329 26, and net earnings, \$39,960,140 76, an increase in gross earnings, compared with 1897, of \$4,591,343 16, and a decrease in net earnings of \$676,914 19. There were 173,791,239 tons of freight moved, being an increase of 14,275,289 tons, and 71,202,695 passengers carried, an increase of 2,853,998.

#### GENERAL REMARKS.

There has been paid by the Company to the Trust created October 9th, 1878, the sum of \$4,749,866 97 to December 31st, 1898; the total income therefrom has been \$7,009,182 30, and on that date securities amounting at par to \$9,276,550 were held in the trust. There was appropriated to the Trust for the year 1898 the sum of \$92,000 90, and the interest received on securities held in the Trust during the year averaged nearly 5 3-16 per cent on their cost.

In pursuance of the recommendation contained in the last annual report, due notice has been given to the shareholders that a vote will be taken at the annual election on the resolution approved by the Board of Directors December 14th, 1898, enlarging the scope of the Trust, so as to authorize the investment of its funds not only in the purchase of securities guaranteed by your Company, but also of the securities of the Pennsylvania Company, or of securities guaranteed by it, whether such guaranties have been or shall be made, or such securities issued before or since the creation of the Trust. As already explained, this modification is essential to its continued efficiency, by reason of the increasing difficulty in purchasing securities issued prior to the establishment thereof.

The assets of the Insurance Fund at the end of the year were \$4,069,835 19, being an increase, as compared with 1897, of \$183,471 54.

The membership of the Employes' Relief Fund of the lines east of Pittsburg and Erie continues to increase, and aggregated 45,141 at the close of the year, being the largest since its establishment, and an increase of over 1,400 members as compared with the previous year. During the year the members contributed \$766,231 77, while your Company and its affiliated lines, in addition to the payment of \$108,869 53 for operating expenses, contributed \$50,129 50 for extra benefits to members whose disability had continued for over 52 weeks, and who were, therefore, no longer entitled to regular benefits from the Fund. The total receipts of the Fund, including interest and other items, were \$938,714 02, which, with \$253,267 98, the balance on hand at the beginning of the year, made an aggregate of \$1,191,982, out of which \$274,070 46 were distributed as death benefits (being an average in each case of about \$551), and \$370,940 67 in cases of disability arising from sickness and accident. After meeting its obligations for the year, and providing for unadjusted claims of previous years, a balance of \$324,236 55 remained to the credit of the Fund, out of which must be paid unadjusted claims for benefits growing out of sickness or accident during the year 1898. In addition to this balance there is a surplus which has accumulated during the life of the Fund, amounting to \$635,970 29.

The number of depositors in the Employes' Saving Fund at the end of the year was 5,847, an increase of 578. The amount received from depositors during 1898 was \$609,838, and the balance in the Fund at the close of the year was \$2,303,328 15. Of this amount \$2,250,000 has been invested in securities bearing interest at an average rate of about four per cent.

It will be noted that there has been a further reduction in freight rates, the average rate received per ton per mile being but 4-99 mills. The tonnage movement, however, shows a material gain as compared with the preceding year, so that the gross earnings from that branch of your traffic are quite as large as in 1897, while through the use of heavier power and cars of greater capacity, and the improvements in your track and facilities consequent upon the extraordinary expenditures heretofore made in the revision of grades and alignment and improvement of the equipment, the cost of movement has been reduced to 3-55 mills per ton per mile. The net earnings have therefore been more than sufficient to pay your regular dividend of five per cent, and justify an appropriation to the Extraordinary Expenditure Fund of the sum of \$1,800,000, to be used as hereafter more fully explained.

The charges to capital account during the year amounted to \$1,181,961 79, as follows: Real Estate, \$197,880 36; Car Trust equipment, \$200,000; Additional Tracks, \$784,081 43.

The latter item represents the cost of an improvement which has largely added to the capacity of your line for the prompt and economical movement of traffic. The double track operated over the Allegheny Mountain and through the Gallitzin Tunnel had become inadequate to the demands of your constantly increasing traffic, and it was necessary to add materially to your facilities on that portion of the road. For that purpose the Portage Tunnel was rebuilt and the Portage Road double-tracked between Cresson and

Bennington on your Main Line, a distance of about five miles. Four tracks were also completed between Altoona and Kittanning Point, so that with the exception of a section about four miles in length between Kittanning Point and Allegrippus, where three tracks are in operation, there is a complete four-track system from Altoona, at the foot of the eastern slope, to Lilly, on the western slope of the mountain, a distance of about seventeen miles. Separate double tracks being thus provided for east and west-bound traffic, not only is additional safety insured, but an alternate route provided in case of accident occurring on the most exposed portion of your line.

Through the special appropriation of \$1,800,000 made out of the earnings of 1897, a large portion of the work of revising the grades and alignment of the Main Line that had been commenced in 1895, and temporarily suspended by reason of the business depression existing in the following year, has been substantially completed. This is notably the case on the western slope of the Allegheny Mountain between Lilly and Portage, where a saving in distance of about one mile has been effected, and sharp curvature eliminated, without increasing the maximum gradient on the Pittsburg Division. This work completes the reconstruction of the Main Line between Lilly and Wilmore, and by furnishing a three-track system between those points largely augments the usefulness of the improvement already referred to between Altoona and Lilly. The line between Conemaugh Furnace and Nineveh was further improved, and the track laid at Radebaugh, thus completing the new tunnel and line at that important junction. The new line between Kinzers and Gordonville, on the Philadelphia Division, was entirely completed, thus reducing the curvature on that section of the road. A large expenditure was also made in the equipment of freight cars with air brakes and automatic couplers, as required by the Inter-State Commerce legislation, and in otherwise improving your motive power and rolling and floating equipment.

Further revisions of alignment were made, pneumatic automatic block signals erected between Latimer and the junction with the South-West Pennsylvania Railway, and other extraordinary expenditures authorized, requiring, in addition to the fund set aside in 1897, an outlay of \$673,857 91, as stated above.

On the United Railroads of New Jersey Division one of the main items of extraordinary expenditure was the rebuilding and enlargement of the Jersey City Passenger Station, which had been damaged by fire on the twenty-first day of March last, and the extension of the train shed towards the river front, with the view of facilitating the ferry transfer at that point. The pneumatic automatic block signals were completed between Monmouth and Holmesburg junctions, additional sidings and yard-tracks provided at various points, and further outlay made for real estate and right of way and in the construction of bridges to eliminate grade crossings on the Philadelphia & Trenton Railroad.

It is proposed to apply the \$1,800,000 appropriated out of the income of 1898 toward the following extraordinary expenditures.

On the United Railroads of New Jersey Division the work on the passenger station at Jersey City will be completed, the new bulkhead wall at Desbrosses Street Ferry, New York, will be finished, and a new ferry house provided at that point. The pneumatic automatic signals will also be extended from Monmouth Junction to Rahway, thus completing that system on the New York Division.

It may be noted here that the sum of \$150,000 was expended during the year on your line between New York and Pittsburg in supplying this additional and important safeguard.

It will be necessary to increase your pier and other terminal facilities at Harsimus, to provide additional storage tracks at the Meadows and other points, and to elevate the tracks and the Kensington Yard on that portion of the Philadelphia and Trenton Railroad traversing the northern portion of the city of Philadelphia. Extensive additions are also needed to your terminal facilities at Brooklyn and Williamsburg, and to your floating equipment in New York Harbor.

On the Main Line the three points where the heaviest outlay will be necessary in the revision of alignment are Elizabethtown, on the Philadelphia Division; Spruce Creek, on the Middle Division; and Irwin, on the Pittsburg Division. The work at Elizabethtown will complete the straightening and double-tracking of the Harrisburg Portsmouth Mt. Joy & Lancaster Railroad, which is so important a link in your passenger line between Philadelphia and Harrisburg. At Spruce Creek the existing line is practically single track through the present tunnel, while the proposed improvement, involving as it does the construction of a second tunnel, will result in furnishing four tracks for the movement of traffic. The change at Irwin will eliminate the heavy curvature at that point, and result in greater safety and economy in the movement of your trains.

It is desirable that a suitable passenger station should be provided in the city of Pittsburg. The present structure, which was built in 1877 for temporary service, has now been in use for over twenty years, and the demands of your passenger traffic have far outgrown the facilities then provided. Not only this, but Pittsburg is one of the most important centres of traffic on your entire system, and the

same policy which dictated the erection of handsome and commodious stations at Jersey City, Philadelphia, Columbus, Indianapolis and other points, is equally controlling with that city. To erect an appropriate building with proper approaches and provide the necessary yard, train shed and other facilities for the accommodation of your traffic will eventually require an outlay of about a million and a half of dollars. In addition thereto the tracks of the Pittsburg Fort Wayne & Chicago Railway will have to be elevated to avoid the grade crossings at Penn Avenue and Liberty Street, and those of the Pan Handle east of the tunnel will have to be entirely readjusted. In order that this work should be properly done it is necessary that the city of Pittsburg should co-operate therein, and negotiations to that end are now progressing with its municipal authorities.

There were practically no charges to construction on branch and auxiliary lines during the year. The extraordinary expenditure thereon was mainly in the construction of the second track between the east end of the Delaware River Bridge and the connection with the West Jersey and Seashore Railroad at Haddonfield, the construction of the Beaver Branch of the South Fork Railroad, the purchase of additional right of way and real estate on the Pittsburg Virginia & Charleston Railway, and the extension of its double track between Allentown and Lucyville, and the change of line near Retreat Station on the North and West Branch Railway. These outlays were met out of the income of the several companies.

The ferry facilities on the Delaware River have been greatly improved by the reconstruction of the slips and station at Market Street Wharf. The passenger travel over your seashore lines to Atlantic City, Cape May, and adjacent points has been materially benefited thereby, while the double tracking of the West Jersey and Seashore Railroad between Camden and Atlantic City, and the elimination of the grade crossing of the New Jersey Southern Railroad at Winslow Junction, put that line, in the early spring, into excellent condition to move not only the travel from Camden, but also the increasing traffic over the all-rail route via the Delaware River Bridge.

In the Annual Report for 1895 reference was made to the formation of the Joint Traffic Association. The belief was then expressed that "through its instrumentality not only would substantial economies be enforced in the administration of the service, but stability and uniformity of rates secured to the public, and the violent fluctuations in rates prevented, which tend alike to disturbance of values and to unjust discrimination." The belief was also expressed that the Association would be a "potent agency in enabling the Inter-State Commerce Commission to enforce the provisions and secure the results sought to be accomplished by the passage" of the Act to regulate that branch of commerce. Almost immediately after its formation the legality of the Association was attacked in the courts, and during the last year the Supreme Court of the United States held it to be in violation of the Anti-Trust Act, whereupon the agreement under which it was formed was canceled and the Association dissolved. The railways are therefore not now permitted to make agreements for the establishment and maintenance of reasonable rates on traffic. As the railways of the United States employ over eight hundred thousand men, and disburse annually in payment of wages and purchase of supplies nearly eight hundred millions of dollars (more than one-tenth of which employment and disbursement is appurtenant to the operation of your system), it is to be hoped that such legislation may be promptly enacted as will enable those entrusted with the management of these properties to maintain them in the highest state of efficiency for the safety and accommodation of the public, and to protect the interests of their owners as well as of the army of employees upon whose experience and judgment the safety of travel and the prompt movement of traffic so materially depend.

Mr. D. S. Newhall having been appointed Purchasing Agent June 1st, 1898, in place of Mr. A. W. Sumner, deceased, Mr. John C. Sims was appointed Superintendent of the Employees Saving Fund, and Mr. Lewis Neilson Assistant Secretary of the Company, to fill the vacancies caused by Mr. Newhall's promotion.

Mr. F. Wolcott Jackson, after thirty-one years of faithful and honorable service as General Superintendent of the United Railroads of New Jersey, having resigned that position, Mr. Frank L. Sheppard was transferred to that position, Mr. John M. Wallis appointed General Superintendent of the Pennsylvania Railroad Division vice Mr. Sheppard transferred, and Mr. George W. Doughton, General Superintendent of the Philadelphia & Erie Railroad Division, in place of Mr. Wallis transferred, all taking effect January 1st, 1899. With the view of retaining for the Company the advantage of Mr. Jackson's long and valuable experience, he has been appointed Resident Manager on the United Railroads of New Jersey Division, with the special duty, in addition to such general duties as may be assigned to him, of aiding the General Manager in all questions affecting the terminal facilities in New York Harbor.

The Board renew their acknowledgments to the officers and employees for the fidelity and efficiency with which they have discharged their duties during the past year.

By order of the Board,

FRANK THOMSON, President.

[Stockholders may obtain copies of the report in pamphlet form on application in person or by letter to the Secretary, Room 471, Broad Street Station, Philadelphia.]

**United Traction Co. of Pittsburg—Philadelphia Company.—Exchange of Stock.**—Brown Brothers & Company, New York, and Alexander Brown & Sons, Baltimore, announce by circular that the Philadelphia Company of Pittsburg offers to exchange \$6,375,000 of its common capital stock for \$17,000,000 of the common stock of the United Traction Co., upon the payment of \$1 per share on the latter, provided at least a majority of the same is presented for exchange prior to Jan. 1, 1900. Under this proposition the holder of each lot of two and two-third shares of the United Traction Co. upon payment of \$3 66 $\frac{2}{3}$  will be entitled to one share of the common stock of the Philadelphia Co. Holders desiring to make this exchange will deposit their common stock with one of the firms named after March 27th and before April 15th next, together with one dollar per share.—V. 68, p. 381, 430.

**Virginia Iron Coal & Coke Co.—Virginia & Southwestern Ry.—South Atlantic & Ohio Ry.—Bristol Elizabethton & North Carolina R.R.—Prospectus.**—The Virginia & Southwestern Ry. Co., whose stock and bonds are all owned by the Virginia Iron Coal & Coke Co., has been formally organized and has taken title to the following properties: Bristol Elizabethton & North Carolina R.R., Bristol to Elizabethton, Tenn., 22 miles; South Atlantic & Ohio Ry., Bristol, Tenn., to Big Stone Gap, Va., 70 miles. The Virginia & Southwestern has an authorized capital of \$3,000,000, and, it is said, will issue to the Virginia Iron Coal & Coke Co. \$1,000,000 of first mortgage 5 per cent gold bonds, due March 1, 1919. Its directors are the same as those of the Coal & Coke Company, viz.: E. R. Chapman, M. D. Chapman and C. H. Eicks of New York, B. L. Dulaney of Bristol, Tenn., and George L. Carter of Pulaski, Va.

**New Mortgage.**—The new mortgage is for \$10,000,000, and is made to the Manhattan Trust Co., as trustee, to secure 5 per cent fifty-year gold bonds, bearing interest from March 1, 1899. It covers "nine iron blast furnaces, a horseshoe and rolling mill, coking, coal and steam coal on boundaries of over 50,000 acres of land, the limonite and brown hematite, or mountain and other iron ores on boundaries of over 65,000 acres of land; also fixtures, leases, etc., etc. The first issue of \$7,500,000 bonds has all been subscribed; of this \$2,000,000 was to be used only to retire bonds of the Carter Coal & Iron Co. The residue of the loan (\$2,300,000) can be used only for "working capital," or "for the acquisition of other property."—V. 63, p. 189; V. 63, p. 906.

**Western Union Telegraph.—Quarterly.—Earnings (partly estimated) for quarter and the nine months ending March 31.**

3 mos. ending	Net	Interest	Dividends	Balance
March 31—	revenue.	charges.	paid.	
1899 (est.).....	\$1,250,000	\$224,273	\$1,216,987	def. \$191,260
1898 (actual).....	1,155,323	234,411	1,216,950	def. 295,868
9 months—				
1898-9 (est.).....	\$4,236,431	\$672,819	\$3,650,960	def. \$47,318
1897-8 (actual).....	4,412,488	682,120	3,650,928	sur. 79,931

\*Including \$9,991 sinking fund.

Total surplus March 31, 1899 (estimated), \$7,875,887. The 1 $\frac{1}{4}$  p. c. dividend is payable April 15, 1899.—V. 67, p. 1261.

**Wilmington & Northern R.R.—Reading Company.—Bonds Guaranteed.**—Holders of Wilmington & Northern general mortgage gold 5s are notified as follows:

The Reading Company will guarantee the payment of the principal and interest of the general mortgage 5 per cent gold bonds presented to W. R. Taylor, Vice-President of the Reading Company, Philadelphia. As soon as the guaranty can be printed on the bonds and duly executed the bonds will be returned upon the surrender of the receipts.—V. 67, p. 1409; V. 69, p. 188.

## COMMERCIAL EPITOME.

FRIDAY NIGHT, March 10, 1899.

Considerable activity has continued to be experienced in most lines of merchandise. Values, with few exceptions, have shown a firm undertone, but no important advances have occurred in leading staples during the week under review. Announcements by mills and manufacturers of advances in wages have continued to attract attention, as showing the generally healthy conditions prevailing. The numerous trade combinations which are being effected have become a subject of much discussion. Renewed interest has been shown in the political situation in the Far East resulting from the demand made by Italy for concessions of territory in China. Freshets have been reported in some sections of the Mississippi Valley, and this has caused some apprehension of floods following the general breaking-up of winter. Complaints have been received from California of damage to crops from lack of rain.

Lard on the spot has been quiet, as neither exporters nor refiners have been extensive buyers. Offerings have been moderate and prices have weakened slightly, closing at 55c. for prime Western and 5½c. for prime City. Refined lard has had only a limited sale, but the close was steady at 58c. for refined for the Continent. Speculation in lard for future delivery has been quiet, and under limited selling by packers and talk of full receipts of swine, prices have weakened slightly. The close was quiet.

## DAILY CLOSING PRICES OF LARD FUTURES.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
March.....	5-50	5-52	5-55	5-55	5-57	5-55

The demand for pork has been quiet and prices have weakened to \$9@9 62½ for mess, \$10 50@11 for family and \$10 25@10 50 for short clear. Cut meats have been scarce for pickled shoulders and prices have advanced; other cuts have been quiet, closing at 4¼@4½c. for pickled shoulders, 7@7½c. for pickled hams and 5@5½c. for pickled bellies, 14@10 lbs. average. Beef has been in better demand for export, closing firm at \$8 50@9 00 for mess, \$9@10 50 for packet, \$9 50@10 50 for family and \$14 50@15 00 for extra India mess in tcs. Tallow has advanced, and the close was firm at 4½@4¾c. Ohio stearine has been quiet, closing at 5½c. Lard stearine has been steady at 6½c. for prime City. Cotton-seed oil has been firm but quiet at 26½@27c. for prime yellow. Butter has been quiet and easier, closing at 14@20c. for creamery. Cheese has been in demand and firmer, closing at 9@12½c. for State factory, full-cream. Fresh eggs have declined under full supplies, closing at 15@16c. for choice Western.

Brazil grades of coffee have sold slowly and the tendency of prices has continued downward, owing to the full supplies in sight and a continued large crop movement. At the close Arbuckle Bros. lowered their price for package coffee ½c., to 9c. per pound. Rio No. 7 closed at 6½c. West India growths have been dull but steady at 8c. for fair Cutcuta. East India growths have been firm for desirable grades, closing at 25@25½c. for standard Java. Speculation in the market for contracts has been more active, and prices have declined. The close was lower under liquidation by tired longs.

The following are final asking prices:

Mar.....	5-05c.	June.....	5-20c.	Sept.....	5-45c.
April.....	5-05c.	July.....	5-25c.	Oct.....	5-50c.
May.....	5-10c.	Aug.....	5-35c.	Dec.....	5-70c.

Raw sugars have been in demand and firm, closing at 4 13 32c. for centrifugal, 96-deg. test, and 3½c. for muscovado, 89-deg. test. Refined sugar has been in active demand and ½c. higher, closing at 5½c. for granulated. Teas sold at lower prices at auction for oolongs.

Kentucky tobacco has been in fairly active export demand at firm prices; sales for the week were 200 hhds. Seed-lump tobacco has been in better demand and steady. Sales for the week were 2,025 cases, as follows: 150 cases 1898 crop, New England Havana seed, forced sweat, partly spotted, 25@40c.; 600 cases 1896 crop, Wis. Havana, 11@11½c.; 300 cases 1897 crop, Wis. Havana, 8½@10c.; 100 cases 1897 crop, State Havana, 12@15c.; 250 cases 1897 crop, Zimmers, 15½@17c.; 75 cases 1897 crop, Dutch, 16@18c.; 100 cases 1895 crop, Zimmers, p.t.; 200 cases 1895-96 crops, Penn. seed leaf, 12½@13½c.; 200 cases 1897 crop, Penn. seed leaf, 11@11½c., and 50 cases 1897 crop, Gebhardt, 14c.; also 600 bales Havana at 65 to \$1 in bond and 150 bales Sumatra at 80c. to \$1 70 in bond.

The liquidation by outside interests in the market for Straits tin has had a weakening influence, and prices have declined, closing at 23½@23¾c. Ingot copper has been taken freely on old contracts, but new business has been quiet, closing at 17½@17¾c. for Lake. Lead has been more active and firmer, closing at 4-40c. for domestic. Spelter has been quiet and easier, closing at 6¼c. for domestic. Pig iron has been in demand and firm at \$13@14 50 for domestic.

Refined petroleum has been steady, closing at 7-35c. in bbls., 4-8c. in bulk and 8-10c. in cases. Naphtha steady at 10c. Crude certificates have been neglected; credit balances have been easier at \$1-13. Spirits turpentine has further advanced, closing firm at 48½@49c. Rosins have been in fair demand and firmer, closing at \$1-35 for common and good strained. Wool has been quiet but steady. Hops have been in only very moderate demand, but values have held to a steady basis.

## COTTON.

FRIDAY NIGHT, March 10, 1899.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 86,913 bales, against 91,128 bales last week and 82,875 bales the previous week, making the total receipts since the 1st of Sept., 1898, 7,846,429 bales, against 7,669,398 bales for the same period of 1897-8, showing a decrease since Sept. 1, 1898, of 322,969 bales.

Speculation in cotton for future delivery has been without animation. The outside interest has withdrawn almost entirely from the market, practically the only trading aside from professional operations being the liquidation by outside longs of their interests in the near by deliveries. The fact that prices have failed to advance latterly, together with the contraction of speculative interest in the market, has served to induce the liquidation by longs, and they have been steady sellers throughout the week of the near-by deliveries. Owing, however, to the fact that the short interest has been a ready buyer, the demand has been sufficient to absorb the offerings and has held values comparatively steady. A fair number of notices have been issued for deliveries on March contracts, but they have been nearly all stopped by a prominent Philadelphia house. While the liquidation in the near-by deliveries has been going on there has developed a stronger undertone to the market for the next-crop deliveries on absence of sellers and limited buying for investment account, based on the belief that the acreage for the coming crop will be smaller. The delay in farm work, small sales of fertilizers and the recent freshets in the South, and apprehensions of floods, many think foreshadow such a result. To-day there was an easier tone to the market, under liquidation by longs in the near-by deliveries, prompted by a larger crop movement for the week than had been generally expected and favorable weather conditions at the South. The close was easy at a net loss in price for the day of 5@7 points. Cotton on the spot has been quiet, and at the close prices declined 1/40., to 6 7-16c. for middling uplands.

The rates on and off middling, as established Nov. 16, 1893 by the Revision Committee, at which grades other than middling may be delivered on contract, are as follows.

Fair.....	1 1/2 on	Good Ordinary.....	6 11/16 on
Middling Fair.....	7 on	Good Middling Tinged.....	Even
Strict Good Middling.....	7 1/2 on	Strict Middling Stained.....	7 1/2 on
Good Middling.....	7 on	Middling Stained.....	7 1/2 on
Strict Low Middling.....	7 1/2 off	Strict Low Mid. Stained.....	1 on
Low Middling.....	7 1/4 off	Low Middling Stained.....	1 1/2 on
Strict Good Ordinary.....	7 1/4 off		

On this basis the official prices for a few of the grades for the past week—March 4 to March 10—would be as follows.

UPLANDS.	Sat.	Mon.	Tues.	Wed.	Th.	Fri.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. Continental stocks, as well as those for Great Britain and the afloat, are this week's returns, and consequently all European figures are brought down to Thursday evening. But to make the total the complete figures for to-night (Mch. 10), we add the item of exports from the United States, including in it the exports of Friday only.

	1899.	1898.	1897.	1896.

The imports into Continental ports the past week have been 106,000 bales.

The above figures indicate an increase in the cotton in sight to-night of 297,911 bales as compared with the same date of 1898, a gain of 929,448 bales over the corresponding date of 1897 and an excess of 991,371 bales over 1896.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since September 1, the shipments for the week and the stocks to-night, and the same items for the corresponding period of 1897-98—is set out in detail below.

Movement to March 10 1898.					Movement to March 11, 1898

								819	847

The above totals show that the week's interior stocks have increased during the week 8,423 bales, and are to-night 2,73 bales more than at the same period last year. The receipts at all the towns have been 15,059 bales less than the same week last year, and since Sept. 1 they are 439,368 bales more than for the same time in 1897-98.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.—We give below a statement showing the overland movement for the week and since Sept. 1, as made up from telegraphic reports received Friday night. The results for the week ending March 10 and since Sept. 10 in the last two years are as follows.

March 10.	1898-99.		1897-98.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.
Shipped—				
Via St. Louis.....	16,157	789,124	18,479	733,059
Via Cairo.....	6,845	345,596	11,334	304,308
Via Parker.....	.....	.....	1,814	26,721
Via Rook Island.....	928	42,691	620	42,315
Via Louisville.....	4,419	151,256	3,433	100,275
Via Cincinnati.....	3,304	129,257	5,328	109,123
Via other routes, &c.....	4,973	139,608	2,864	125,033
Total gross overland.....	36,626	1,597,532	43,872	1,444,834
Deduct shipments—				
Overland to N. Y., Boston, &c.....	13,520	421,587	8,420	371,042
Between interior towns.....	1,574	29,435	498	21,321
Inland, &c., from South.....	4,319	54,976	1,026	30,554
Total to be deducted.....	19,413	505,998	9,944	422,917
Leaving total net overland*.....	17,213	1,091,534	33,928	1,021,917

\* Including movement by rail to Canada.

The foregoing shows that the week's net overland movement this year has been 17,213 bales, against 33,928 bales for the week in 1898, and that for the season to date the aggregate net overland exhibits an excess over a year ago of 69,517 bales.

In Sight and Spinners' Takings.	1898-99.		1897-98.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.

Columbus, Ga. 6	.....	Montgomery.....	5 7/8	Shreveport.....	5 11/16

RECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week Ending—	Receipts at the Ports.			St'k at Interior Towns.			Rec'ts from Plantations		
	1890.	1898.	1897.	1899.	1898.	1897.	1899.	1898.	1897.
Feb. 3.....	176,413	228,128	101,584	599,918	569,251	444,400	151,089	201,409	74,778
" 10.....	129,479	200,966	119,428	631,000	568,556	429,094	57,561	190,170	105,117
" 17.....	72,150	185,133	84,394	499,421	540,768	401,905	40,571	167,346	57,745
" 24.....	82,875	162,474	84,895	487,898	511,247	374,238	50,852	182,958	56,728
Mar. 3.....	91,128	150,717	95,396	459,441	488,884	350,127	77,171	128,314	71,155
" 10.....	86,913	150,221	79,931	461,869	459,136	323,319	95,341	120,513	53,128

The above statement shows: 1.—That the total receipts from the plantations since Sept. 1, 1898, are 7,704,179 bales; in 1897-98 were 8,033,458 bales; in 1896-97 were 6,818,131 bales. 2.—That although the receipts at the outports the past week were 86,913 bales, the actual movement from plantations was 95,341 bales, the balance going to increase stocks at interior towns. Last year receipts from the plantations for the week were 120,513 bales and for 1897 they were 53,128 bales.

WEATHER REPORTS BY TELEGRAPH.—Our telegraphic reports from the South this evening indicate that as a rule the weather has been favorable at the South during the week. The rainfall has been light generally and at the close of the week the temperature is much higher. As a result of the more satisfactory conditions, farm work is now under way in most sections, and is making good progress. Preparations are, however, on the whole very backward. Our Memphis correspondent states that the Mississippi River is 1.5 feet below the danger line, and rising.

Galveston, Texas.—The weather the past week has in general been very beneficial to farming operations throughout the State, and much plowing and preparing of land has been accomplished. The week's rainfall here has been five hundredths of an inch on two days. The thermometer has averaged 55, ranging from 39 to 71.

Palestine, Texas.—There has been only a trace of rain during the week. The thermometer has ranged from 26 to 84, averaging 55.

Corpus Christi, Texas.—There has been rain on one day during the week, the precipitation reaching four hundredths of an inch. Average thermometer 57, highest 72 and lowest 42.

San Antonio, Texas.—Dry weather has prevailed all the week. Minimum temperature 32.

Paris, Texas.—Clear weather now prevails. The thermometer has ranged from 23 to 85.

New Orleans, Louisiana.—We have had dry weather all the week. The thermometer has averaged 60.

Shreveport, Louisiana.—It has rained on one day during the past week, the precipitation reaching twenty-one hundredths of an inch. The thermometer has ranged from 27 to 82, averaging 54.

Columbus, Mississippi.—We have had rain on one day of the past week, the precipitation reaching fifteen hundredths of an inch. Average thermometer 54, highest 80, lowest 18.

Leland, Mississippi.—The week's rainfall has been twenty hundredths of an inch. The thermometer has averaged 51.7, the highest being 78 and the lowest 23.

Meridian, Mississippi.—Rain has fallen on two days of the week. Preparations for planting have been delayed. The sales of fertilizers to date have not been more than one-third the quantity sold during the same period last year. Southern cotton mills are buying almost all the cotton offered.

Vicksburg, Mississippi.—The week's rainfall has been three hundredths of an inch, on one day. The thermometer has averaged 52.4, ranging from 30 to 80.

Greenville, Mississippi.—The weather continues fair and warm, and picking is proceeding vigorously.

Little Rock, Arkansas.—We have had rain on two days of the week, the rainfall reaching twenty-eight hundredths of an inch. Average thermometer 48, highest 79, lowest 18.

**Helena, Arkansas.**—The weather was cold and wet the first part of the week, but this morning is warm with indications of rain. The week's rainfall has been one inch and twenty-two hundredths, on two days. The thermometer has averaged 44.8, the highest being 77 and the lowest 18.

**Memphis, Tennessee.**—Picking and marketing have made better progress the past week. The river is thirty one and five-tenths feet on the gauge, or one and five-tenths below the danger line, and rising. There has been rain on two days of the week, the rainfall being fifty-two hundredths of an inch. The thermometer has averaged 44.4, ranging from 15 to 80.4.

**Nashville, Tennessee.**—We have had rain during the week, the precipitation reaching two inches and seventeen hundredths. The thermometer has ranged from 3 to 78, averaging 40.

**Mobile, Alabama.**—Reports from the interior are that cold weather and rain prevailed during the early part of the week, but that latterly it has been clear and warmer. Planting preparations have made some progress, but are very backward. We have had rain on one day, to the extent of twelve hundredths of an inch. Average thermometer 53, highest 76 and lowest 32.

**Montgomery, Alabama.**—There has been but a trace of rain during the week. The early part was cold, with the temperature below freezing, but since Wednesday the weather has been warmer and planters are "hustling" preparation of lands. The outlook is improved. The thermometer has averaged 53, the highest being 84 and the lowest 23.

**Selma, Alabama.**—It has rained on two days of the week, the precipitation reaching sixty hundredths of an inch. The thermometer has averaged 54, ranging from 21 to 82.

**Madison, Florida.**—We have had rain on two days, the precipitation reaching forty hundredths of an inch. The thermometer has ranged from 26 to 83, averaging 58.

**Savannah, Georgia.**—We have had rain on two days of the past week, the precipitation reaching fifteen hundredths of an inch. Average thermometer 54, highest 84, lowest 21.

**Augusta, Georgia.**—We have had rain on two days during the week, the precipitation being forty-six hundredths of an inch. The thermometer has averaged 50, the highest being 81 and the lowest 14.

**Charleston, South Carolina.**—There has been rain on three days of the week, the precipitation being thirteen hundredths of an inch. The thermometer has averaged 53, ranging from 26 to 80.

**Stateburg, South Carolina.**—A thunder storm with high wind and rain on Sunday was succeeded by a blizzard, with rain and sleet, on Monday, and freezing weather on Tuesday and Wednesday. The rainfall reached fifty three hundredths of an inch. The thermometer has ranged from 2. to 83, averaging 52.6.

**Greenwood, South Carolina.**—We have had rain on one day of the week, the precipitation being three hundredths of an inch. Average thermometer 44, highest 56, lowest 33.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock March 9, 1899, and March 10, 1898.

	Mar. 9, '99.	Mar. 10, '98.
New Orleans.....	Above zero of gauge.	12.2
Memphis.....	Above zero of gauge.	31.1
Nashville.....	Above zero of gauge.	37.2
Shreveport.....	Above zero of gauge.	5.6
Vicksburg.....	Above zero of gauge.	36.0

**INDIA COTTON MOVEMENT FROM ALL PORTS.**—The receipt of cotton at Bombay and the shipments from all India ports for the week ending Mch. 9, and for the season from Sept. 1 to Mch. 9 for three years have been as follows:

	1898-99.		1897-98.		1896-97.	
Receipts at—	Week.	Since Sept. 1.	Week.	Since Sept. 1.	Week.	Since Sept. 1.
Bombay.....	84,000	1,112,000	57,000	634,000	62,000	797,000

Exports from—	For the Week.			Since September 1.		
	Great Britain.	Continent.	Total.	Great Britain.	Continent.	Total.
Bombay—						
1898-99.....	.....	16,000	16,000	3,000	227,000	230,000
1897-98.....	.....	12,000	12,000	2,000	112,000	114,000
1896-97.....	5,000	16,000	21,000	16,000	274,000	284,000
Calcutta—						
1898-99.....	.....	.....	.....	2,000	14,000	16,000
1897-98.....	.....	.....	.....	2,000	9,000	11,000
1896-97.....	.....	2,000	2,000	4,000	21,000	25,000
Madras—						
1898-99.....	.....	.....	.....	2,000	15,000	17,000
1897-98.....	.....	1,000	1,000	2,000	7,000	9,000
1896-97.....	.....	.....	.....	9,000	17,000	26,000
All others—						
1898-99.....	.....	3,000	3,000	4,000	55,000	59,000
1897-98.....	.....	.....	.....	10,000	24,000	34,000
1896-97.....	.....	.....	.....	15,000	42,000	57,000
Total all—						
1898-99.....	.....	19,000	19,000	11,000	311,000	322,000
1897-98.....	.....	13,000	13,000	16,000	152,000	168,000
1896-97.....	5,000	18,000	23,000	44,000	352,000	398,000

According to the foregoing, Bombay appears to show an increase compared with last year in the week's receipts of 31,000 bales. Exports from all India ports record a gain of 3,000 bales during the week and since September 1 show an excess of 154,000 bales.

**ALEXANDRIA RECEIPTS AND SHIPMENTS OF COTTON.**—Through arrangements we made with Messrs. Davis, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, March 8	1898-99.		1897-98.		1896-97.	
Receipts (cantars)*....						
This week.....	120,000		175,000		70,000	
Since Sept. 1.....	5,113,000		5,019,000		5,161,000	
Exports (bales)—						
To Liverpool.....	10,000	229,000	10,000	272,000	2,000	263,000
To Continent.....	14,000	224,000	13,000	273,000	23,000	251,000
Total Europe.....	24,000	453,000	23,000	545,000	25,000	514,000

\* A cantar is 98 pounds.  
Of which to America in 1898-99, 29,161 bales; in 1897-98, 35,573 bales; in 1896-97, 38,149 bales.

This statement shows that the receipts for the week ending Mch. 8 were 120,000 cantars and the shipments to all Europe 24,000 bales.

**MANCHESTER MARKET.**—Our report received by cable to-night from Manchester states that the market is steady for yarns and firm for shirtings. Manufacturers are generally well under contract. We give the prices for to-day below and leave those for previous weeks of this and last year for comparison.

	1899.				1898.

**SEA ISLAND COTTON MOVEMENT.**—We have received this (Friday) evening by telegraph from the various ports the details of the Sea Island cotton movement for the week. The receipts for the week ending to-night (March 10) and since Sept. 1, 1898, the stocks to-night, and the same items for the corresponding periods of 1897-98, are as follows.

	1898-99.		1897-98.		Since Sept. 1, 1898.	
Receipts to March 10.	This week.	Since Sept. 1.	This week.	Since Sept. 1.	1898.	1897.

**NEW ENGLAND MILL SITUATION—WAGES INCREASED.**—As intimated in these columns, the restoration of wages in New England cotton mills to the scale in operation prior to the reductions made in the early part of 1898 has become quite general. Aside from the places specifically mentioned last week, manufacturers in Augusta, Biddeford, Lewiston and Waterville, Me., and Adams, Amesbury, Fitchburg, North Adams, Salem, Webster, Whitinsville, Williamstown and Worcester, Mass., have given notices of like import. In all cases the new rates of compensation go into effect April 3.

**THE BUBONIC PLAGUE IN BOMBAY.**—According to advice to the London (Eng.) "Morning Post" of date Bombay March 5, the bubonic plague is especially severe in that city at present. Last week's official returns indicate that 972 deaths occurred, but this is believed to be much below the actual result.

**COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT**—A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The monthly movements since September 1, 1898, and in previous years, have been as follows:

Monthly Receipts	Year Beginning September 1.					
	1898.	1897.	1896.	1895.	1894.	1893.
Sept'mb'r	697,784	786,702	912,486	383,986	518,762	377,408
October	1,735,660	1,424,907	1,468,516	1,202,460	1,622,664	1,311,279
Novemb'r	1,861,619	1,776,907	1,286,251	912,759	1,807,662	1,272,776
December	1,565,770	1,594,948	1,256,000	987,999	1,497,560	1,239,738
January	929,538	1,114,873	635,878	548,118	938,197	687,028
February	435,581	737,080	404,976	441,776	533,398	330,507
Total	7,225,932	7,425,417	5,964,107	4,478,898	6,718,243	5,218,723
Percentage of tot. port receipts Feb. 28..	85.58	87.49	82.99	85.23	87.23	

This statement shows that up to February 28 the receipts at the ports this year were 199,485 bales less than in 1897-98 and 1,361,935 bales greater than in 1896-97. By adding to the totals to Feb. 28 the daily receipts since that time we shall be able to reach an exact comparison of the movement for the different years.

	1898-99.	1897-98.	1896-97.	1895-96.	1894-95.	1893-94.

## BREADSTUFFS.

FRIDAY, March 10, 1899.

Only a limited volume of business has been transacted in the local market for wheat flour, but at the West mills have reported business as fairly good, with quotations well maintained, claiming that values for cash wheat in the interior have not followed the decline in

futures. Locally there has been some shading of prices to market supplies on the spot, but arrivals have been firmly held. City mills have been quiet and easier. The demand for rye flour has been quiet, but as offerings have been light, values have been firmly maintained. Buckwheat flour has been quiet but steady. Corn meal has had a fair sale and values have held steady, despite an easier market for the grain.

Speculation in wheat for future delivery has been without spirit as the trading has been largely in the way of liquidating outstanding contracts, and there has been a gradual weakening of prices. The statistical position has not been of a nature to encourage longs, the heavy world's shipments, as reported at the opening of the current week, especially having a depressing influence; foreign advices also have been against an improvement in values, as has also a full movement of the crop in the interior and generally favorable weather conditions at the West. Advices from California, however, have complained of drought and there were reports of damage to the Argentine crop by excessive rains; these factors have had a tendency to hold the downward tendency to values in check to some extent, as has also an improved export demand at the decline in prices. Thursday there was a stronger tone to the market. The liquidation by longs appeared to have subsided and on crop damage reports from the West and a demand from shorts to cover contracts, prices advanced  $\frac{1}{2}$  to  $\frac{3}{4}$ ¢. Business in the spot market has been more active, as exporters have been fair buyers at the lower prices ruling. To day the market was easier under general selling, prompted by expectations that the Government report will show large reserves in farmers' hands, weaker foreign advices and reports of a free movement of the Argentine crop. On the curb subsequent to the receipt of the Government report prices declined to  $\frac{3}{4}$ ¢ to  $\frac{1}{2}$ ¢ for May delivery, due to the report showing large reserves in farmers' hands, larger than had been expected. The spot market was quiet, the sales for export here and at outports were 48,000 bushels.

Indian corn futures have been quiet and early in the week there was an easier turn to the market. There has been some selling by longs to liquidate their accounts. The visible supply showed a larger increase than was generally expected, and this, together with the weakness in wheat, prompted selling by longs. Subsequently, however, on very moderate receipts in the interior and an improved export demand, there developed a steadier tone, and prices advanced. Business in the spot market has been fairly active, as exporters have been buyers; prices have been easier, as the premiums have narrowed. To-day the market was easier. The Government report showed larger reserves in farmers' hands than expected. The spot market was fairly active. The sales for export here and at outports were 365,000 bushels.

Oats for future delivery at the Western market has been quiet, and prices have been easier. The downward drift to values was most pronounced early in the week, when a full movement of the crop and sympathy with the weakness in other grains had a depressing influence. Thursday there was a slight recovery in prices on limited buying, stimulated by a good cash trade. The local spot market has been fairly active, but it has been at lower prices. To-day the market was quiet and easier.

AGRICULTURAL DEPARTMENT'S REPORT ON CEREAL STOCKS.—The Agricultural Department's report on cereal stocks, &c., was issued on March 10 as follows:

The consolidated returns of various crop-reporting agencies of the Department of Agriculture show the amount of wheat remaining in farmers' hands on March 1 to have been the equivalent of 29.3 per cent of last year's crop, or about 198,000,000 bushels. The corn in farmers' hands, as estimated, aggregates 800,500,000 bushels, or 41.6 per cent of last year's crop, against 782,800,000 bushels, or 41.8 p. c., on hand March 1, 1898, and 184,000,000 bushels, or 31 p. c. on March 1, 1897. The proportion of the total crop shipped out of the country where grown is estimated at 20.8 per cent, or about 336,000,000 bushels. The proportion of total crop merchantable is estimated at 42.2 per cent. Of oats there are reported to be about 293,000,000 bushels, or 38.7 per cent, still in farmers' hands, as compared with 272,000,000 bushels, or 38.7 per cent, on March 1, 1897.

As of interest in connection with this report we give below a statement covering the stock of corn on March 1 for a series of years as made up by us from the Agricultural Department's figures.

CORN.	Product of previous year. Bushels.	On hand March 1. Bushels.	Per cent.	Consumed or distributed. Bushels.
March, 1893..	1,616,996,100	587,468,943	33.7	1,029,527,157

## THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., March 10, 1899

Business in cotton goods at first hands has kept up well during the week, but actual results are still cramped to some extent by the small stocks on hand available for quick deliveries and by continued indifference on the part of sellers in regard to bids for forward deliveries. The latter feature is most marked in plain brown and grey cottons, on which the majority of mills are already well sold ahead. It is true that many of these mills are now working over-time, but there are no indications of stocks accumulating in any quarter. Both plain and fancy cotton goods continue very firm. The latter part of the week has been comparatively free from advances in prices, but the impression is general that a still higher range of prices will be reached before the upward movement is finally arrested. A large jobbing distribution is reported throughout the country and stocks are light in second hands. The formation of the American Woolen Company and rumors of other combinations have been the chief feature of the woolen goods division, in which business in men's-wear fabrics has continued of indifferent volume only.

**WOOLEN GOODS.**—The combination of the Washington Mills, Riverside Mills and the Fletcher & Phillips Worsted Mills as the American Woollen Company was announced this week. There are reports that other combinations are under way, covering the finest grades of men's wear, the low qualities, such as satinet and worsted dress goods. These have hardly told upon business in any direction, either one way or another. None of the combinations can be a factor in this season's situation, and buyers do not appear to be alarmed as to their influence in the future. This week's demand for men's-wear woollens and worsteds has again been on a moderate scale and without feature of prominence. Buyers have no difficulty in placing their orders for either staples or fancies, but prices are not

any lower. In the overcoating and cloaking division a quiet market is noted. Worsted dress goods are very firm with cotton-warp makes further advanced 10 per cent. Flannels dull. Blankets in fair demand.

**DOMESTIC COTTON GOODS.**—The exports of cotton goods from this port for the week ending March 6 were 1,717 packages, valued at \$105,528, their destination being to the points specified in the tables below:

NEW YORK TO MARCH 6.	1899.		1898.	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.
Great Britain.....	20	502	122	786
Other European.....	31	142	59	210
China.....		52,109	3,903	20,747

Total.....	1,717	83,124	6,574	53,225
China, via Vancouver.....		.....	.....	200
Total.....	1,717	83,124	6,574	53,425

\* From New England mill points direct.

The value of the New York exports for the year to date has been \$2,878,866 in 1899, against \$1,926,363 in 1898.

Some large blocks of 3-yard, 3½-yard and 4-yard brown sheetings have been bid for at only a slight percentage below sellers' asking prices, and the general rejection of such bids shows the strength of the brown goods situation. There has been a fair volume of business done with occasional advances of ¼c. reported. Ducks are firm and ¼c. higher in a few makes. Brown osenaburgs also firm but quiet. There have been no further advances in bleached cottons, but a fair business has been done at full prices. Wide sheetings show continued hardening tendency. Cotton flannels heavily sold ahead and strong; Denims and ticks in quiet demand but very firm. Other coarse, colored cottons firm but quiet. Kid-finished cambrics firm at recent advance. Fancy calicoes are as a rule well sold up and most staple lines are likewise in good condition. The demand is considerable and prices strong. Staple ginghams also strong and dress styles tending upwards. Print cloths have been inactive for regulars, but firm at 2¼c.; fair business in odds on that basis.

**FOREIGN DRY GOODS.**—There has been an improvement in the demand for foreign merchandise, particularly in dress-goods and silks, both of which are generally firm in price. Ribbons also firm. Linens occasionally slightly dearer. Burlaps very firm.

### Importations and Warehouse Withdrawals of Dry Goods

The importations and warehouse withdrawals of dry goods at this port for the week ending March 9, 1899, and since January 1, 1899, and for the corresponding periods of last year are as follows: •

IMPORTS ENTERED FOR CONSUMPTION FOR THE WEEK AND SINCE JANUARY 1, 1898 AND 1898.

## STATE AND CITY DEPARTMENT.

### TERMS OF SUBSCRIPTION.

The INVESTORS' SUPPLEMENT will be furnished without extra charge to every annual subscriber of the COMMERCIAL AND FINANCIAL CHRONICLE.

The STATE AND CITY SUPPLEMENT will also be furnished without extra charge to every subscriber of the CHRONICLE.

The STREET RAILWAY SUPPLEMENT will likewise be furnished without extra charge to every subscriber of the CHRONICLE.

The QUOTATION SUPPLEMENT, issued monthly, will also be furnished without extra charge to every subscriber of the CHRONICLE.

TERMS for the CHRONICLE with the four Supplements above named are Ten Dollars per year within the United States and Twelve Dollars in Europe, which in both cases includes postage.

### Terms of Advertising—(Per Inch Space.)

Transient matter (each time) \$4 20	Three Months (13 times) \$29 00
STANDING BUSINESS CARDS.	Six Months (26 times) 50 00
Two Months (8 times) \$22 00	Twelve Months (52 times) 87 00

**Alabama**—*Legislature Adjourns*.—On Feb. 23, 1899, the Legislature of this State adjourned.

**Dover—Englewood, N. J.**—*Incorporating Act Unconstitutional*.—On March 7, 1899, the Court of Errors and Appeals affirmed a decision of the Supreme Court declaring unconstitutional the Act under which Dover and Englewood were incorporated as cities.

**Essex County, N. J.**—*Bill to Annex Certain Towns*.—See item under head of Hudson County.

**Hudson County, N. J.**—*Bill to Transfer Certain Towns*.—A bill has been introduced in the Legislature transferring the towns of Harrison and Kearny and the borough of East Newark from this county to the county of Essex.

**Indiana**—*Interest Bill Defeated*.—A bill recently considered in the House, fixing the legal rate of interest at 6%, failed, according to the local papers, for want of a constitutional majority.

**Reduction in Interest on Bonds**.—The Legislature has passed a bill reducing the rate of interest from 6% to 5% on bonds issued for street and sewer improvements under Section 2, Acts of 1891.

**Road Bond Bill**.—House bill No. 89 (passed by Legislature), amending certain sections of the Acts of 1893, provides that bonds issued for the construction of gravel roads shall be payable in forty instalments, one instalment maturing every six months, and that interest shall not exceed 4%.

**Legislature Adjourns**.—The regular session of the State Legislature closed on March 4, 1899.

**Kansas**—*Legislature Adjourns*.—On March 8, 1899, the regular session of the State Legislature came to an end.

**Massachusetts**—*Bill Passed Over Veto*.—The State Legislature—the House on March 2 and the Senate on March 7—passed over the Governor's veto the bill to restore three days of grace on sight drafts.

**Minnesota**—*County Bonds Authorized by House*.—The House has passed a bill authorizing counties to issue bonds to fund floating indebtedness.

**Muhlenberg County, Ky.**—*Bond Compromise*.—The Louisville "Courier-Journal" on Feb. 18, 1899, stated that County Judge T. J. Sparks and W. A. Wickliffe, an attorney of Greenville, are effecting a compromise upon the county's bonds issued for the Elizabethtown & Paducah Railroad in 1899. Judge Sparks made the statement that \$50,000 or \$60,000 of the debt was compromised at ten cents on the dollar. The debt, it is stated, amounts in all to about \$910,000. The "Courier-Journal" said:

It appears that there are two sets of bonds, there being a new set, the debt on which is now \$115,000, given in 1875 on a 3-per cent compromise with holders of old bonds. These new bonds are being paid, dollar for dollar, by the county.

There are a great many judgments against Muhlenberg County on the old bonds, both in the State and Federal courts. Executions have been issued against Muhlenberg County, all of which have been returned "No property found." The latest execution was one involving interest to the amount of \$8,000 on a judgment in the Federal Court at Owensboro in favor of Evansville parties. United States Marshal James is just now in the act of going through the formality of serving this execution, but there is no reason to believe that there will be any property found, as Muhlenberg County has, for reasons generally adopted by its citizens, steadily resisted any attempt to enforce payment of the judgments.

In connection with the above a call has been signed by H. V. Loving, President of the Louisville Trust Co., and John Stites, President of the Fidelity Trust & Safety Vault Co., inviting all holders of these bonds to meet on March 7, 1899, at the office of the latter company for the purpose of selecting a committee to take charge of and to pool the bonds and judgments against the county, and to place them under the control of such committee.

**New Jersey**—*Bond Bill Defeated*.—A bill permitting municipalities to fund their indebtedness under resolution by the Common Council of such municipalities recently met with defeat in the House. The bill seems to have been defeated because the language of some of its provisions was too broad, and also because too much latitude was given Common Councils in the sale of bonds.

**City Bonds Proposed**.—A bill now before the Legislature allows any city to purchase or build a gas plant and to issue bonds in payment. Another bill permits the issuance of bonds to purchase or build any street railway.

**Loans Authorized by Legislature**.—The State Legislature has granted authority to cities, towns, townships, boroughs and villages to borrow money in anticipation of the collection of taxes and assessments.

**North Dakota**—*Legislature Adjourns*.—The Legislative session came to an end in this State on March 3, 1899.

**Pierce County (Wash.) School District No. 10**.—*Bond Issue Regular*.—On Feb. 28, 1899, Judge Kean in the State Superior Court decided the "Buell case" in favor of the school district, holding that the district had a right to retain the \$1,100 forfeit money put up by the successful bidders for the bonds. The decision was a lengthy one and reviews the points raised in the trial. The history of the case was given in the CHRONICLE on February 25, and the whole case turned on the point whether the district was within the debt limit or not when the election was held to validate debt. The plaintiff contended that the district was within the limit and that the election was held to make legal a debt which was already legal. The Court held that there was an indebtedness in excess of the debt limit and that the election to validate was therefore regular, and the bonds issued as a result of the election were a valid obligation, and that hence the district had a right to retain the forfeit money upon the successful bidders refusing to take the bonds.

**Rhode Island**—*New Constitution*.—The State Legislature has passed a resolution proposing an amendment to the present Constitution in the form of the new Constitution voted upon last fall, but which was then defeated, as it did not quite receive the necessary three-fifths vote. The question must be again voted upon and receive the Constitutional majority before adoption.

**Legislature Adjourns**.—The State Legislature adjourned on March 3, 1899, until after the spring election in April.

**South Dakota**—*Legislature Adjourns*.—The Legislative session in this State closed on March 8, 1899.

**Teller County, Col.**—*New County Created*.—The State Legislature has passed a bill creating the County of Teller out of a portion of El Paso County. The new county will include the Cripple Creek mining district.

**Tennessee**—*City Bond Bill Passed by Senate*.—The Senate has passed a bill authorizing municipalities having not less than 4,000 nor more than 20,000 population to issue and refund water-works bonds. The bill applies, it is stated, especially to Jackson, Madison County.

**Texas**—*Constitutional Convention*.—A joint resolution has been offered in the State Legislature calling a constitutional convention to frame a new State Constitution.

**Voorhees, N. J.**—*Borough Created*.—The State Legislature has created the borough of Voorhees out of a portion of the township of Waterford, Camden County.

**Washington**—*Interest Rate Bill*.—Committee approval has been given to Senate Bill No. 22, establishing the maximum legal rate of interest at 10% and to prevent usury; the bill also fixes the rate of interest on public warrants at not greater than 6%.

**West Virginia**—*The Virginia Debt Question*.—The following letter is from the Secretary of the committee which is seeking to induce the State of West Virginia to assume her part of the old Virginia debt now represented by Virginia Deferred Certificates.

"Editor of the FINANCIAL CHRONICLE—

"Your issue of the 4th states that:

"On the final day of the session a declaration was made by the Legislature that West Virginia owes nothing to Virginia or her creditors."

"I enclose a letter from the Clerk of the House, and a telegram from the Clerk of the Senate, stating that no action was taken after February 23, on which day the Memorial and Plan of Settlement was presented and ordered to be printed. The Legislature adjourned on the 25th. Possibly you have been misled by the utterance of some one who is unfriendly to any proposition in behalf of the owners of certificates. The committee, of which Mr. John Crosby Brown is Chairman, require less than \$750,000 of certificates to make up a majority, and it is safe to say that the balance of holders will co-operate as soon as they understand the merits of the present undertaking.

ROBERT L. HARRISON, Secretary."

**Legislature Adjourns**.—The State Legislature adjourned on Feb. 25, 1899.

### Bond Calls and Redemptions.

**Camden (N. J.) School District**.—*Bond Call*.—Wilbur F. Rose, Treasurer of Commission of Public Instruction, has called for payment April 1, 1899, at the National State Bank, Camden, \$75,000 10-20-year (optional) bonds, dated April 1, 1879; \$50,000 10-20-year (optional) bonds, dated June 1, 1880, and \$10,000 5-20-year (optional) bonds, dated Jan. 1, 1883.

**Clark County (Wash.) School Districts**.—*Warrant Call*.—County Treasurer Parcel has given notice that he is ready to pay outstanding school warrants as follows:

District No. 1, all except Nos. 137; No. 17, warrants Nos. 7 and 8; No. 25, warrant No. 7; No. 26, all; No. 27, warrant No. 30; No. 37, warrants Nos. 8 and 9; No. 46, warrants Nos. 31 and 32; No. 59, warrant No. 18; No. 67, warrants Nos. 713 to 718 and 722 and 723; No. 74, warrants Nos. 49 and 49.

Interest ceased Feb. 20, 1899.

**Doniphan School District, Ripley County, Mo.**—*Bond Call*.—This district has called for payment bonds Nos. 2 and 3 of \$1,000 each, bearing 6% interest and dated September, 1887. Bonds will be paid at sight at the National Bank of Rolla, Mo.

**Emmet County, Iowa.**—*Bond Call.*—This county has called for payment March 15, 1899, \$10,000 court-house bonds, which will be retired with funds on hand.

**Greensburg, Pa.**—*Bond Call.*—Ira C. Snyder, Town Clerk, has called for payment borough bonds Nos. 97 to 111, inclusive, series of 1892. Bonds are in denomination of \$100 and interest ceased March 1, 1899.

### Bond Proposals and Negotiations this week have been as follows:

**Adams County (Wash.) School District No. 38.**—*Bond Offering.*—This district is offering for sale six \$100 bonds.

**Akron, Ohio.**—*Bond Offering.*—The \$49,100 bonds described in the CHRONICLE on Feb. 18, 1899, will be sold at public auction at 10 A. M. March 18, 1899.

**Alamance County, N. C.**—*Bonds Authorized by Legislature.*—Road improvement bonds have been authorized by Legislature.

**Allegheny County, Pa.**—*Bonds Proposed.*—A dispatch from Harrisburg states that a bill will be presented in the State Legislature providing for the issuance of \$3,000,000 3% road-improvement bonds.

**Amherst, Mass.**—*Bonds Authorized.*—At the town meeting held March 6, 1899, it was voted to refund the \$50,000 town hall bonds maturing Jan. 1, 1900.

**Anderson, S. C.**—*Bond Offering.*—Proposals will be received until 9 A. M. March 25, 1899, by John K. Hood, Mayor, for \$8,000 city hall bonds. Bonds will be dated April 1, 1899. Bids are asked for 10, 20, 30 or 40-year obligations, bearing 3½%, 4%, 4½% or 5% interest. A deposit of 10% of the amount awarded will be required of successful bidders.

**Arkansas.**—*Bond Bill Passed by Senate.*—The Senate has passed the bill to refund the debt of the State. This bill directs the State Debt Board to fund the valid bonded indebtedness of the State, except 160 bonds, "Series of 1870," now owned and held by the United States. The new bonds will be in denominations of \$500 and \$1,000, payable 30 years after date of issue, and bearing 3% interest, payable annually on September 1. Under this law all outstanding scrips and Treasurer's certificates will be called in.

**Asheville, N. C.**—*Bonds Authorized by Legislature.*—The funding bond bill has passed the State Legislature.

**Attleboro, Mass.**—*Bonds Authorized.*—At a town meeting held recently the Water Commissioners were authorized to issue \$15,000 bonds for a new pump.

**Bellevue, Ohio.**—*Bond Offering.*—Proposals will be received until 12 M. April 4, 1899, by M. J. Nichols, City Clerk, for the following bonds:

Ten Main Street paving bonds in the amount of \$272.91 each.  
Ten Court Avenue paving bonds in the sum of \$174.26 each.  
Ten South Main Street improvement bonds in the sum of \$398.33 each.

All of the above bonds will be dated July 1, 1899; interest at 6% will be payable annually. Principal will mature one bond yearly of each series on July 1 from 1900 to 1909. The paving bonds are issued pursuant to Section 2705, Revised Statutes of Ohio, and a city ordinance passed Dec. 13, 1898. The Main Street improvement bonds are issued pursuant to Section 2705, R. S., and a city ordinance passed Jan. 24, 1899.

**Bond Election.**—At the election to be held on April 3, 1899, the people will vote on the question of issuing \$10,000 fire department building bonds. If bonds are issued they will bear 6% interest, payable at the office of the City Clerk.

**Bexar County, Texas.**—*Bonds Registered and Sold.*—We are advised by the County Clerk that the county has just had approved by the Attorney-General \$41,500 4½% 10-40 year (optional) refunding bridge bonds and \$240,000 5% 10-20-year refunding G. H. & S. A. Ry. subsidy bonds. These securities bear date Jan. 10, 1899, and have been sold to Rudolph Kleybolte & Co., Cincinnati, at 102-50 for the former and 101-66 for the latter. This last was included in our January sales.

**Biloxi, Harrison County, Miss.**—*Bonds Proposed.*—The City Council has under consideration the issuance of \$15,000 5% bonds for the purpose of building a bridge across Bacy Bay.

**Binghamton, N. Y.**—*Bonds Voted.*—At the election held on March 2, 1899, the people decided by a vote of 829 to 327 in favor of a special tax for the erection of a bridge at Tompkins Street. It has not been decided when the bonds will be issued.

**Blackton, Iowa.**—*No Bonds Issued.*—We are advised that the sale of the \$3,000 or \$4,000 water-works bonds did not take place on Feb. 6, 1899, as originally contemplated, as the proposition was defeated by the Council.

**Boone County School District No. 6, Belvidere, Ill.**—*Bond Offering.*—We are advised by the Secretary of the Board of Education that proposals will be received until 2 P. M., March 17, 1899, for \$20,000 5% bonds. Securities will mature yearly as follows: \$1,000 from 1900 to 1905, \$3,000 from 1906 to 1909 and \$2,000 in 1910. Interest will be payable semi annually.

**Boston, Mass.**—*Loan Authorized.*—On March 6, 1899, the Board of Aldermen concurred in the "loan order" for \$709,000 recently authorized, as stated last week, by the Board of Estimate and Apportionment.

**Bottineau County, N. Dak.**—*Bond Offering.*—Proposals will be received until 2 P. M. April 3, 1899, by Geo. J. Coulthard, County Auditor, for \$2,000 6% jail bonds. Securities are in denomination of \$100, maturing April 3, 1914. Interest will be payable semi annually. Bonds are issued under Section 5043. Laws of 1895, and were authorized by a vote of 699 to 255.

**Bradock (Borough), Pa.**—*Bond Offering.*—Proposals will be received until 7 P. M., March 23, 1899, by R. M. Holland, Chairman Finance Committee, for \$31,500 4½% reserve coupon bonds. Securities are in denomination of \$500, dated Oct. 1, 1898. Interest will be payable semi-annually at the office of the Borough Treasurer, and the principal will mature yearly on Oct. 1, as follows: \$1,500 from 1899 to 1903, \$2,000 from 1904 to 1908, \$2,500 from 1909 to 1912, \$3,000 from 1913 to 1917, \$3,500 from 1918 to 1921, \$4,000 from 1922 to 1925 and \$4,500 in 1926 and 1927. A certified check will be required.

**Bradley County, Tenn.**—*Bonds Authorized by Senate.*—Road bonds were the subject of a bill recently passed by the Senate.

**Bridgeport, Ohio.**—*Bids.*—Following are the bids received March 1, 1899, for the \$75,000 4% street-improvement bonds:

R. Kleybolte & Co., Cin. .... \$79,777 50	Denison, Prior & Co., Cleve. \$77,415 00
Feder, Holzman & Co., Cin. .... 79,616 00	Lamprecht Bros. Co., Cleve. .... 77,122 50
Seasongood & Mayer, Cin. .... 79,266 85	First Nat. B'k, Barnesville. .... 77,710 00
W. J. Hayes & Sons, Cleve. .... 78,806 00	People's Nat. B'k, Barnesville. .... 75,375 50
Briggs, Todd & Co., Cin. .... 78,772 50	Dollar Sav. B'k, Bridgeport. .... 75,350 00
N. W. Harris & Co., Chicago. .... 78,135 00	New 1st Nat. B'k, Columbus. .... 75,197 50

As stated last week, bonds were awarded to Rudolph Kleybolte & Co., Cincinnati, at 106-37.

**Bristol, Tenn.**—*Bonds Authorized.*—The Senate has granted this place the right to fund its floating indebtedness. The House has authorized the issuance of \$170,000 refunding bonds.

**Buffalo, N. Y.**—*Bonds Authorized.*—The issuance of \$100,000 3½% school bonds and \$100,000 3½% refunding water bonds have been authorized. The school bonds will be dated March 1, 1899. Interest will be payable March 1 and September 1 at the City Comptroller's office. The principal will mature \$5,000 yearly on March 1, from 1900 to 1919, inclusive. The refunding bonds will be dated April 26, 1899, and will mature \$5,000 yearly on April 26, from 1900 to 1919, inclusive. Interest will be payable April 26 and October 26 at the City Comptroller's office.

**Butler County (P. O. Hamilton), Ohio.**—*Bond Offering.*—Proposals will be received until April 8, 1899, at Hamilton, for \$20,000 4% bonds issued for the purpose of paying indebtedness on the fair ground. Securities will be in denomination of \$500; interest will be payable at Hamilton. Principal will mature \$2,000 yearly on July 1 from 1899 to 1908, inclusive.

**Cabarrus County, N. C.**—*Bonds Authorized by Legislature.*—The Legislature has empowered this county to issue bonds.

**Caldwell County, N. C.**—*Bonds Authorized by Legislature.*—An Act authorizing this county to issue jail bonds has passed the Legislature.

**California.**—*Bonds Authorized by Legislature.*—The Legislature has passed the bill providing for the issuance of \$1,000,000 4% 20-year bonds for the extension of the San Francisco sea wall.

**Catskill, N. Y.**—*Bonds Proposed.*—A bill recently introduced in the State Senate provides for the issuance of \$15,000 building bonds.

**Celina, Ohio.**—*Bonds Voted.*—On March 6, 1899, by a vote of about 6 to 1, the citizens of this place authorized the issuance of \$75,000 improvement bonds.

**Charleston County, S. C.**—*Loan Offering.*—B. R. Burnet, County Treasurer, asks proposals for a proposed loan of \$11,660 60, pursuant with an Act of the Legislature approved Feb. 22, 1899.

**Charleston, W. Va.**—*Bonds Proposed.*—An ordinance has been introduced in the City Council providing for an election to vote on the question of issuing \$15,000 bonds for the purchase of a site to be donated to the State for an annex to the Capitol.

**Clayton, N. Y.**—*Bond Sale.*—On Feb. 28, 1899, the \$28,912 sewer bonds and \$22,500 water bonds were awarded to the Jefferson Co Savings Bank at par for 3½ per cents. Bonds mature in equal annual instalments from the fifth to the thirtieth year, all bonds being subject to call after 10 years. For description of bonds see CHRONICLE, Feb. 25, 1899, p. 390.

**Cleveland, Ohio.**—*Bond Offering.*—Proposals will be received until 12 M. April 5, 1899, by the Board of Park Commissioners at the office of H. L. Rossiter, City Auditor, for \$700,000 4% park coupon bonds, maturing \$250,000 October 1, 1929, and \$250,000 Oct. 1, 1931. Securities will be coupon bonds of \$1,000, dated Oct. 1, 1898, interest payable semi-annually, both principal and interest being payable at the American Exchange National Bank, New York City. A certified check drawn on a national bank for 5% of the amount of bonds bid for, payable to the "Treasurer of the City of Cleveland," must accompany bids. Bids must be made on blanks furnished by the City Auditor or the Park Board.

**Cocke County, Tenn.**—*Bonds Authorized by House.*—This county will borrow money to pay its indebtedness, provided the bill recently passed by the House becomes a law.

**Colorado Springs, Col.**—*Bond Offering.*—Proposals will be received until 7:30 P. M. March 20, 1899, by I. S. Harris, City Clerk, for \$50,000 4% water-works bonds maturing 15 years from date of issue, subject to call after 10 years, and \$85,000 4% refunding water bonds due in 30 years, subject to call after 15 years. Interest on both issues will be payable semi annually at the Chemical National Bank, New York City, or at the office of the City Treasurer. Bonds will bear date of March 1, 1899, and are issued under authority of State law and City Council. The official circular states that there is no litigation affecting this issue and principal and interest of all previous bonds have been promptly paid.

**Hamilton County, Ohio.—Bids.**—Following are the bids received March 4, 1899, for the \$10,000 4% "Hamilton County fair-ground repair and improvement bonds":

**McConeillsville, Ohio.—Bond Sale.**—On March 8, 1899, the \$10,000 by water-works bonds were awarded to S. Kuhn & Sons, Cincinnati, according to reports.

**Mecklenburg County, N. C.—Bonds Authorized by Legislature.**—A bill recently passed by the Legislature authorizes the issuance of \$100,000 50 year road-improvement bonds.

**Media, Delaware County, Pa.—Loan Negotiated.**—The Borough President has borrowed \$2,000 at 5% from the First National Bank, Media. The loan was made upon a note of the borough, dated March 2, 1899, and maturing May 2, 1899.

**Middletown, Conn.—Bonds Proposed.**—The issuance of bonds for road improvements is being considered by citizens of this place.

**Minneapolis (Minn.) School District.—Bonds Proposed.**—The Board of Education has decided to request the City Council to issue at once the \$200,000 bonds authorized by the State Legislature.

**Monroe, Union County, N. C.—Bonds Authorized by Legislature.** This township has legislative authority to issue \$80,000 road bonds.

**Morristown, Tenn.—Bonds Authorized by Legislature.**—Legislative authority has been given to this place to fund its indebtedness.

**Mount Airy, N. C.—Bonds Authorized by Legislature.**—The Legislature has authorized this township to fund its indebtedness.

**Murfreesboro, Hertford County, N. C.—Bonds Authorized by Legislature.**—Legislative authority has been granted this township to refund its bonded indebtedness.

**Nashville (Ill.) School District.—Bonds Proposed.**—This district will issue about July 1, 1899, \$14,000 bonds to refund part of those maturing on that date.

**Nashville, Tenn.—No Election Held.**—No election was held on March 1, 1899, to vote on the question of issuing bonds to purchase a public park, the City Council having voted down the proposition. A motion to re-consider the matter is still pending and will be disposed of at the next meeting of the Council.

**New Orleans, La.—Floating Debt Bonds.**—Mr. R. L. Tullis, Secretary to the Mayor, advises us as to the present status of the floating debt bonds issued under the funding operations of the Board of Liquidation of the City Debt of New Orleans. Up to date about \$298,000 of claims have been funded at 68 cents on the dollar, making slightly more than \$200,000 funding bonds issued out of the \$250,000

authorized by the Constitution of 1898. "There are at present," Mr. Tullis writes, "some claims under consideration by the board, but not yet allotted." The law under which these claims are funded was given in the CHRONICLE August 27, 1898.

**North Carolina.—Bonds Proposed.**—House Bill No. 1875 authorizes the issuance of State bonds for the purpose of paying off the indebtedness of the penitentiary and also for buying State farms. The bill provides for the issuance of \$110,000 4% 10-year bonds for the first purpose and \$95,000 4% 10 year bonds for the latter.

**North East, Pa.—Bond Election.**—An election has been ordered early in April to vote on the question of issuing bonds.

**Oakley (Village), Ohio.—Bond Election.**—At the general election to be held April 3, 1899, the question of issuing \$10,000 4½% village-hall bonds will be voted upon. Securities, if authorized, will be in denomination of \$500, dated Sept. 1, 1899. Interest will be payable March 1 and September 1 and the principal will mature \$100 yearly on September 1 from 1904 to 1923, inclusive.

**Orange County, N. C.—Bonds Authorized by House.**—In order that this county might issue bonds to pay its indebtedness a bill was introduced in the House and has passed that body.

**Orange (Mass.) School District.—Loan Voted.**—At the town meeting held March 6, 1899, it was voted to borrow \$15,000 for an addition to the high-school building. Details of this loan have not yet been determined; but we are advised the loan will most likely be made with a local bank.

**Paducah, Ky.—Proposed Bond Election.**—Mayor Lang has recommended that the Council take the necessary action for an election to vote on the question of issuing bonds for a \$20,000 market house and for surface sewers and asphalt on Broadway.

**Palo Pinto (Texas) School District.—Bonds Approved.**—The Attorney General has approved an issue of \$2,500 school bonds.

**Pawtucket, R. I.—Bonds Authorized by Legislature.**—Legislative authority has been granted this city to issue \$100,000 4% gold street improvement bonds and \$50,000 4% gold school bonds.

Reference, First National Bank, Chicago.

**Peekskill, N. Y.—Bonds Defeated.**—At the election held March 7, 1899, the proposition to issue \$100,000 paving bonds was defeated.

**Pender County, N. C.—Bonds Authorized by House.**—This county has obtained authority from the House to issue funding bonds.

**Person County, N. C.—Bonds Authorized by Legislature.**—The Legislature grants this county the necessary authority to issue bonds to pay its indebtedness.

**Pilot Mountain, N. C.—Bonds Authorized by Legislature.**—Legislative authority has been given to issue public-improvement bonds.

**Pitt County, N. C.—Bonds Authorized by Legislature.**—This county may issue bonds, now that legislative authority has been obtained.

**Pleasant (Township), Ohio.—Bond Election.**—At the spring election the question of issuing \$40,000 turnpike bonds will be voted upon.

**Pulaski, Tenn.—Bonds Authorized by Senate.**—The Senate has passed a bill authorizing this place to issue bonds.

**Putnam, Conn.—Loan Authorized.**—At the annual city meeting the Common Council was authorized to borrow a sufficient sum of money to meet current expenses.

**Putnam County, Ill.—Bonds Proposed.**—It is stated that this county recently made an offer of \$50,000 in 20-year bonds, a free right of way and exemption for 10 years from taxation to any company that would build and operate a railroad into Hennepin, the county seat. The only means of transportation at present is by boat to Peoria. The county and city are free of debt.

**Raleigh (City), N. C.—Bonds Authorized by Legislature.**—This city has been authorized by the State Legislature to issue bonds.

**Raleigh (N. C.) School District.—Bond Election.**—An election will be held May 1, 1899, to vote on the question of issuing \$50,000 school bonds.

**Raleigh (Township), N. C.—Bonds Authorized by Legislature.**—The Governor has signed the bill authorizing this township to issue road bonds.

**Ramsey County, Minn.—Bonds Authorized.**—The issuance of \$18,000 3½% 10-year bridge bonds has been authorized by the Board of County Commissioners.

**Ripley, Tenn.—Bonds Authorized by Legislature.**—School bonds to the amount of \$10,000 have been authorized by the Legislature.

**Rockingham, N. C.—Bonds Authorized by Legislature.**—The State Legislature has passed the bill authorizing this town to issue water-works bonds.

**Rocky Mount, N. C.—Bonds Authorized by Legislature.**—The Senate has passed House Bill No. 1502, authorizing the issuance of water-works bonds.

**Rotterdam, N. Y.—Bonds Authorized by Senate.**—The State Senate has passed a bill legalizing the official action of Frank Davis, former sole Commissioner of Highways of this town, and authorizing the issue of bonds for the payment of indebtedness incurred by him.

**Rutherford County, N. C.—Bond Bill Signed.**—The Governor has signed a bill authorizing this county to issue bonds.

**Saginaw, Mich.—Bond Sale.**—On March 8, 1899, the \$18,500 and \$10,000 3½% refunding water bonds were awarded to E. H. Gay & Co., Boston, at 103½. Bonds mature May 1, 1920. For description of bonds see CHRONICLE March 4, 1899, p. 442.

**St. Francis, (Ark.) Levee District.—Bonds Authorized by Legislature.**—The Legislature has passed the bill authorizing the issuance of \$750,000 improvement bonds.

**Salinas City, Cal.—Bond Offering.**—Proposals will be received until 8 P. M. March 16, 1899, by John J. Kelly, City Clerk, for \$30,000 5% gold school bonds. Securities were authorized at an election held Feb. 9, 1899. They are in denomination of \$750. Interest will be payable annually on January 2 at the office of the City Treasurer. Principal will mature one bond yearly on Jan. 2 from 1900 to 1939, inclusive. A certified check, payable to the Mayor, for 2% of the amount bid must accompany proposals.

**Salisbury, N. C.—Bonds Authorized by Legislature.**—Water-works, sewer and electric-light bonds have been authorized by the Legislature.

**Saratoga (Township), Grundy County, Ill.—Bonds Voted.**—This township has voted to issue \$15,000 bonds for road improvements.

**Schenectady, N. Y.—Proposed Bond Sale.**—This city will shortly sell \$15,000 4% sewer bonds and \$15,000 water-works bonds.

**Sibley, Osceola County, Iowa.—Ford Election.**—An election will be held March 27, 1899, to vote on the question of issuing \$16,000 water works bonds. If issued the bonds will probably mature in 20 years, and interest will most likely be 5%, payable in gold.

**Swain County, N. C.—Bonds Authorized by Legislature.**—Bonds to pay off indebtedness have been authorized by the Legislature.

**Syracuse, N. Y.—Temporary Loan.**—This city has negotiated a loan of \$100,000 with Blake Bros. & Co., New York City, at 3-10%. The loan was made in anticipation of the collection of taxes and will mature Nov. 10, 1899.

**Tarboro, N. C.—Bonds Authorized by Legislature.**—Water works and sewerage bonds to the amount of \$40,000 have been authorized by Legislature.

**Taunton, Mass.—No Bonds Authorized.**—According to newspaper reports, this city has been authorized to issue \$50,000 sewer bonds, but upon inquiry we learn from the City Treasurer that he has not received authority to issue bonds of any kind.

**Trenton, Tenn.—Bonds Authorized by Senate.**—The Senate has passed a bill granting this place authority to issue bonds.

**Trinidad, Col.—Bond Election.**—At the spring election to be held in April, the question of issuing \$83,000 refunding bonds will be voted upon. These bonds, if authorized, will be issued to refund the funding, bridge and street bonds now outstanding.

**Ulaca, N. Y.—Bond Offering.**—John A. Cantwell, City Clerk, will sell at 2 P. M. March 14, 1899, \$6,823 70 4% 1-6 year (serial) paving bonds. Securities will be dated Dec. 23, 1898, and Jan. 20, 1899. Sealed proposals will be received by the Mayor until the above hour and must be accompanied by a certified check for 10% of the amount of bonds to be sold.

**Walla Walla, Wash.—Bonds Proposed.**—The Commercial Club of this city recently passed a resolution urging the Council to take immediate action looking toward the construction of a complete sewerage system.

**Ward, Col.—Bond Offering.**—Proposals will be received at any time by H. T. Haines, Town Clerk, for \$12,000 6% 10-15-year (optional) bonds.

**Washington County, Ky.—No Bonds to Be Issued.**—We stated in the CHRONICLE Feb. 24, 1899, that the report was

current that this county had under consideration the issuance of \$100,000 4% road bonds. Upon inquiry we learn that there will be no bonds issued.

**Wayne County (P. O. Wooster), Ohio.—Bond Sale.**—On March 3, 1899, the \$3,000 5% ditch bonds were sold to the Wayne County National Bank, Wooster, at 104-183. Following are the bids:

Wayne Co. Nat. B'k. Wooster, \$3,125 50 W. J. Hayes & Sons, Cleve., 3,065 00  
Denison, Prior & Co., Cleve., 3,125 00 First Nat. Bank, Barneville, 3,041 00  
New 1st Nat. B'k. Columbus, 3,103 50 Robert A. Childs, Syracuse, 3,125 00

Principal will mature \$60 yearly on Feb. 1 from 1900 to 1904, inclusive. For further description of bonds see CHRONICLE Feb. 25, 1899, p. 304.

**Westboro, Mass.—Bond Sale.**—On February 21, 1899, this city sold \$4,000 4% water bonds to Estabrook & Co., Boston, at 114-50. Principal will mature in 1925.

**Wilmington, N. C.—Bonds Authorized by Legislature.**—Refunding bonds have been authorized by the Legislature.

**Windsor (Village), N. Y.—Bond Sale.**—On March 6, 1899, \$20,000 3% water bonds were awarded to R. B. Smith & Co., New York, at 103-50. Following are the bids:

R. B. Smith & Co., New York, 103-50 Arthur S. Leland & Co., N. Y., 100-151  
W. J. Hayes & Sons, Cleveland, 102-785 E. H. Gay & Co., New York, Par  
Benwell & Everett, New York, 101-63 Jos. F. Gavin (for 3-35% bonds), Par  
Bertron & Storrs, New York, 101-57 I. W. Sherrill (for 3-41% bonds), 110-025  
Walter Stanton & Co., N. Y., 101-15 Jose. Parker & Co. (for 4% bonds), 107-079  
Geo. M. Hahn, New York, 100-60 S. A. Kean (for 4% bonds), 103-00  
Street, Wykes & Co., New York, 100-675

**Worcester, Mass.—Bond Sale.**—This city has sold the \$100,000 4% bonds recently authorized for the payment of land damages caused by laying out streets. Securities mature Jan. 1, 1909.

**Zanesville, Ohio.—Bond Sale.**—On March 1, 1899, the \$17,400 5% 1-5 year paving bonds were awarded to Feder, Holzman & Co., Cincinnati, at 104-65. For description of bonds see CHRONICLE February 18, 1899, p. 346.

**Green, N. Y.—Geo. L. Page, Supervisor.**—This town is in Chenango County.

\* Not included in totals.

*THE FINANCIAL SITUATION.*

The money market has continued to be the prominent feature of influence in Wall Street circles the past week. Rates of interest have further advanced, but this advance is apparently in considerable part temporary, and due to the payment into the sub-Treasury on last Friday of one half of \$11,799,657 (the first payment to the Government on account of the Central Pacific settlement), and to the disturbance to loans caused by preparations making to pay for the Chicago & Alton purchase. Other matters have also in some slight measure probably helped to lessen transactions on the stock market. Indeed, this is a period of the year, and the present season has been no exception, when the crop situation gets to be an important feature, and when the doubts that always hang about the winter-wheat prospects on the opening of spring are most talked about and the unfavorable reports are discounted and often exaggerated. Affairs in the Philippines too, although making favorable progress, have been a matter of more or less concern; at least so long as fighting continues large expenditures will be inevitable, the dimensions of the work we have undertaken will generally be over-estimated, and the question of a stable government for those islands must remain an unsolved problem. At the same time the lively movement started by the Sugar stock on Thursday of this week illustrates the real situation of the market—that behind this lessened activity there is a suppressed confidence and strength which will assert itself on every occasion, however slight.

Perhaps likewise with some the February foreign trade statement has been looked upon as a discouraging feature. It has certainly been widely misconstrued. The statement was issued on Tuesday by Mr. Austin of the Bureau of Statistics, and showed a favorable merchandise balance of \$33,624,117. That is a large surplus, the largest of any February in our record except in 1898; the only other year when the same month's result approximated the current year's figures was in 1878, twenty-one years ago, the total then being \$33,526,466. But notwithstanding that large favorable balance, the fact that last year's was \$11,842,804, or \$3,218,687 larger than last month's, and that this loss was the product of an increase in 1899 compared with 1898 in imports and a decrease in exports have been dwelt upon as highly important, because, as claimed, marking a critical change in the character of these exhibits. A few words of explanation will show how little significance there is in either of these events. The exports, to be sure, are smaller, but considering the month is February they are, as we have seen, very large, and are only \$1,033,304 smaller than in the phenomenal year of 1898. There is, too, a feature connected with that decrease which is especially favorable. It seems that the loss in exports of the single item of raw cotton was \$1,434,704 and that the aggregate loss in the exports of breadstuffs, provisions, cotton and petroleum was \$6,019,642. These changes, consequently, taken in connection with the fact that the total loss in exports last month was only about one million dollars, are proof that exports of manufactures in February 1899 must have been considerably larger than in February 1898. There was, too, a special reason why the exports of cotton

should fall off; we refer to the situation the Government statement discloses that the exports of that staple for the eight months ending with February 1899 have been 466,898 bales more than in the same eight months ending with February 1898, and hence Europe had to a greater extent anticipated its wants this year than it had at the same time last year; moreover prices of cotton had recently advanced until they were higher than a year ago, a change which, under the circumstances, also tended for the time being to induce English and Continental spinners to draw on their own holdings and on the largely increased European stocks, and not purchase so freely here.

As to the imports, the fact that they were in February 1899 \$7,185,000 in excess of February 1898 indicates no greater difference than should have been expected. The January 1899 imports were also \$7,403,000 in excess of January 1898. Indeed, ever since general business began to show a marked improvement, the monthly return of imports has been larger than last year's corresponding totals. The only conclusion to be drawn from that condition is that as the capacity for the consumption of domestic productions developed, the demand for foreign goods very naturally showed a corresponding growth. No doubt there will be a further small increase in March. The expansion thus far has been quite regular; in November 1898 the total imports were \$52,109,000, in December they were \$55,120,000, in January 1899 they were \$58,472,000, in February (28 days) they were \$58,240,000, and in March they will probably be over \$60,000,000. After March it would not surprise us if the movement should decline again; at least it is usual after the spring trade has been supplied, and the goods ordered in anticipation of that demand have come forward, for a short suspension of the extreme activity to intervene before the enlarged summer arrivals for the fall trade begin.

We have referred above to the effect on the money market of the preparations for and the disbursements made on account of the Chicago & Alton purchase this week. About \$24,000,000 was collected in the United States Trust Company as preliminary to this operation. It was suggested that as about half of the amount was due to out-of-town sellers of the stock, who were residents of New England and the West, the withdrawal of that portion of the money for a time from this center would lead to severe tension. High rates have prevailed in the call loan department of the market, 6 per cent having been reached on Thursday. That spasm though was we think a natural and necessary effect of so large an undertaking added to in some measure by a fear of stringency which the suggestion cited induced, rather than by any actual withdrawal, a course which does not seem at all likely. Owners of that stock are not of the kind of capitalists that transfer their funds from a center where they are most available for use or carry them into the country for safe-keeping. The money paid them would take the natural course of such transactions and remain in the city until a re-investment could be found and effected here or elsewhere. That cannot but be a slow affair, and will be done singly and so irregularly as to time as to have no influence on the market after the close of the week. A less ephemeral influence in its action on the rates of interest is the locking-up of nearly six million dollars

of the Central Pacific payment in the Sub-Treasury. As the Government income has increased recently and is likely further to increase with the development of business activity, it may be a considerable time before that money is wholly restored to the uses of business. The bank statement of last Saturday probably included this item in its averages two days, or one-third of the loss, as the money left the banks and was collected in the Union Trust Company on Thursday. The foregoing seems to account for the large loss in bank reserves shown in their report last Saturday; moreover, as we did not include the item referred to (that is make allowance for it) in our usual compilation of the currency movement, the divergence between our statement and the bank return was the consequence.

We remarked last week upon the conservative course our banks were pursuing with reference to their reserves and loans. We have evidence of the same disposition in their methods with relation to industrials. Those among our leading banks which loan on that class of securities have a rule quite generally observed that the collateral shall first be put in at a liberal reduction from the market price, and then in addition to that there shall be a margin of from 25 to 30 per cent. If borrowers are willing to comply with these conditions the banks referred to consent to make loans. One of the down-town Clearing House institutions this week made a time loan at 5 per cent on all industrials on this basis, but the properties were well margined, and moreover it is stated that they were among the strongest industrials on the Exchange list. There has been a somewhat urgent inquiry this week from some of the Western banks for small notes. Country institutions seem desirous of accumulating as much currency as possible, but only infrequent responses are made by our banks to these requests, for the reason that there is not a liberal supply here. As an indication of the large stock of gold, the fact may be noted that during the first eleven days of March the gold paid into the New York Custom House for duties amounted to 84.3 per cent of the entire payments. The largest previous percentage of gold receipts at the Custom House was 80.2 per cent, in December last year.

A feature of the industrial situation which deserves very close watching is the sensational way in which prices in the iron and steel trades are advancing. We referred to this movement and its noteworthy character last week, but it has made further and very striking progress the present week. The matter is of importance not only because of its possible bearing on our export trade after the orders taken at the low prices prevailing a short time since have been executed, but also because of the effect that the increased cost of iron and steel may have in checking domestic enterprises. On this last point we observe that the "Iron Age" states that instances have come to its notice repeatedly of late of work which is being delayed or postponed because prices are considered too high. It adds, though, that such cases are isolated still, and do not cut much of a figure when compared with the urgency of the demand from many quarters. During the week the further addition to the price of raw iron has been all the way from fifty cents to over two dollars a ton, and

the appreciation in the values of finished iron and steel has been proportionately just as great. The extreme advance of \$2 a ton occurred in Bessemer pig at Pittsburg, which is this week quoted at \$15 65, against \$13 50 last week, \$11 50 a month ago and \$10 35 at the corresponding date last year. Steel billets have risen to \$25 50 at Pittsburg from \$23 50 last week and \$18 00 only a month ago, while in March 1898 the price was but \$15 25. We notice that steel rails, too, are now quoted higher, being \$26 00 at the mills; last week the price for rails was lower than the price for billets. The "Age" cites facts to show that our export trade has not yet been entirely cut off, though it also notes orders that have been lost during the week because foreign competitors quoted lower figures. The situation seems for the time being decidedly unsettled, owing to the scare which has taken possession of consumers, who are in many instances anticipating future wants, and everybody must wish for a speedy return to a normal state of things.

Money on call representing bankers' balances has loaned at  $2\frac{1}{2}$  per cent and at 6 per cent, averaging about 4 per cent. On Monday the range was from  $2\frac{1}{2}$  per cent to 5 per cent, with the bulk of the business at  $2\frac{1}{2}$  to 3 per cent, though in the last hour considerable amounts were loaned at 4 per cent and some small sums at 5 per cent. On Tuesday the range was from 3 per cent to 4 per cent, with the bulk of the business at  $3\frac{1}{2}$  per cent. On Wednesday the range was from  $2\frac{1}{2}$  per cent to 5 per cent, with the majority of the loans at 4 per cent. On Thursday the lowest rate was  $3\frac{1}{2}$  per cent and the highest 6 per cent, with the bulk of the business at 4 per cent. On Friday the range was from 3 per cent to 5 per cent, the majority of the loans being at 4 per cent. Each day the higher rates seemed to bring in a supply of money from the banks and other institutions, causing the rate to fall off from the highest points. Banks and trust companies quoted 3 per cent as the minimum on Monday,  $3\frac{1}{2}$  per cent on the following day and 4 per cent on Wednesday and thereafter; some of them, however, obtained  $4\frac{1}{2}$  and even 5 per cent. There is a good demand for time money, not only on good mixed Stock Exchange collateral, but on industrial stocks as well. The offerings are liberal on the former, but borrowers having industrials in any considerable amounts find some difficulty in making contracts. The quotation on the first-named line of collateral, with perhaps a few hundred shares of good industrials well margined, is 4 per cent for all periods from 30 days to six months. The rate on a line of all industrial stocks without any "fattening" with railroad properties is not less than 5 per cent for all periods, as more fully explained above. As a rule conservative lenders of money prefer to buy paper, though at lower rates, than to place their money on time on industrial properties, even though these should be made as secure as possible in the manner above indicated. The supply of mercantile paper is fair but not large, and though the business is good it would be better were the offerings greater, for there is quite a general inquiry for the best names. Orders for paper are often wired from Western points, indicating some urgency in the demand. Quotations are 4 per cent for sixty to ninety day endorsed bills receivable, with exceptionally choice names selling at  $3\frac{1}{2}$  per cent;  $4@4\frac{1}{2}$  per cent for prime, and  $4\frac{1}{2}@5\frac{1}{2}$  per cent for good four

to six month's single names. One noteworthy incident of the week was the unprecedentedly large debit balance of \$17,413,862 at the Clearing House on Thursday, due to the Chicago & Alton settlement on Wednesday. The last previous high record of debit balances was \$17,163,312 on January 4. The amount of gold received from California by mail this week was about \$1,500,000, including \$1,000,000 last Saturday. This movement has now temporarily ended.

There has been no important feature in the European political situation this week, except the signing on Friday, by the Queen Regent of Spain, of the Treaty of Peace. A notable change in the financial situation is dearer money at London, Berlin, Frankfurt, etc. The Bank of England minimum rate of discount remains unchanged at 3 per cent. The cable reports discounts of sixty to ninety day bank bills in London advanced from  $2\frac{3}{4}$  to  $2\frac{1}{2}$  per cent. A special cable to us from the Union Discount Company of London states that the rate of interest allowed by it for money on deposit at call has this week been raised from  $1\frac{1}{2}$  per cent to 2 per cent, and at 3 to 7 days' notice from  $1\frac{3}{4}$  per cent to  $2\frac{1}{4}$  per cent. The open market rate at Paris is  $2\frac{3}{4}$  per cent and at Berlin and Frankfurt it is  $4\frac{1}{2}$  per cent, against  $4\frac{1}{4}$  to  $4\frac{3}{8}$  per cent last week. According to our special cable from London the Bank of England lost £105,919 bullion during the week and held £33,038,133 at the close of the week. Our correspondent further advises us that the loss was due to shipments of £114,000 *net* to the interior of Great Britain and to the import from Australia of £8,000.

The foreign exchange market has been only moderately active and easier this week, though otherwise without special feature. It has been chiefly influenced by dearer rates for money, which have checked the demand without inducing liberal offerings of bills, as the expectation is that the extreme rates for money are temporary. Bankers report the supply of drafts, and particularly those against cotton, quite small, and at the same time there are not many bankers' bills. The market was very dull after Wednesday, and the tone was steady at the decline. It is announced that \$1,000,000 gold left Sydney, N. S. W., on the steamer Mariposa, on Wednesday, for San Francisco. The arrivals of gold at the New York Custom House this week were only \$25,561. The range for nominal rates for exchange until Wednesday were from  $4\frac{1}{4}$  to  $4\frac{5}{8}$  for sixty-day and from  $4\frac{5}{8}$  to  $4\frac{7}{8}$  for sight. Then Brown Bros & Co., the Canadian Bank of Commerce and Baring, Magoun & Co. reduced their rates half a cent, and the range thereafter until Friday was from  $4\frac{1}{4}$  to  $4\frac{1}{2}$  for sixty-day and from  $4\frac{5}{8}$  to  $4\frac{7}{8}$  for sight. On Friday Brown Bros. advanced the sight rate half a cent, making the range  $4\frac{1}{4}$  to  $4\frac{1}{2}$  for sixty-day and  $4\frac{5}{8}$  to  $4\frac{7}{8}$  for sight. Rates for actual business opened on Monday unchanged compared with those at the close on Friday of last week, at  $4\frac{1}{2}$  to  $4\frac{3}{4}$  for long,  $4\frac{5}{8}$  to  $4\frac{7}{8}$  for short and  $4\frac{5}{8}$  to  $4\frac{7}{8}$  for cables, and the tone was easy; so continuing on the following day, though then there was no quotable change in rates. On Wednesday the market was weak and rates for actual business fell off half a cent for long, to  $4\frac{1}{2}$  to  $4\frac{3}{4}$ , and one quarter of a cent for short and for cables to  $4\frac{5}{8}$  to  $4\frac{7}{8}$  for the former and  $4\frac{5}{8}$  to  $4\frac{7}{8}$  for the latter. On Thursday

the market was steady at the decline without any alteration in rates and it was also steady on Friday. The following shows daily posted rates for exchange by some of the leading drawers.

DAILY POSTED RATES FOR FOREIGN EXCHANGE.

		FRI. Mar. 10.	MON. Mar. 13.	TUES. Mar. 14.	WED. Mar. 15.	THURS. Mar. 16.	FRI. Mar. 17.

The market closed steady on Friday with rates for actual business  $4\frac{1}{2}$  to  $4\frac{3}{4}$  for long,  $4\frac{5}{8}$  to  $4\frac{7}{8}$  for short and  $4\frac{5}{8}$  to  $4\frac{7}{8}$  for cables. Commercial on banks  $4\frac{1}{2}$  to  $4\frac{3}{4}$ , and documents for payment  $4\frac{1}{2}$  to  $4\frac{3}{4}$ . Cotton for payment  $4\frac{1}{2}$  to  $4\frac{3}{4}$ , cotton for acceptance  $4\frac{1}{2}$  to  $4\frac{3}{4}$  and grain for payment  $4\frac{1}{2}$  to  $4\frac{3}{4}$ .

The following statement gives the week's movement of money to and from the interior by the New York banks.

Week Ending Mar. 17, 1899.	Received by N. Y. Bank.	Shipped by N. Y. Banks.	Net Interior Movement.
Currency.....	\$5,435,000	4,374,000	Gain \$1,061,000
Gold.....	899,000	593,000	Gain 306,000
Total gold and legal tenders.....	\$6,334,000	\$5,087,000	Gain \$1,287,000

With the Sub-Treasury operations the result is as follows.

Week Ending Mar. 17, 1899.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.
Banks' interior movement, as above	\$6,334,000	\$5,087,000	Gain \$1,287,000
Sub-Treasury operations.....	22,800,000	30,500,000	Loss 7,700,000
Total gold and legal tenders.....	\$29,134,000	\$35,587,000	Loss \$6,453,000

The following table indicates the amount of bullion in the principal European banks.

Bank of	Mar. 16, 1899			Mar. 17 1899		
	Gold.	Silver.	Total.	Gold.	Silver.	Total.

## THE APPROPRIATIONS AND THE DEFICIT.

We have at hand this week the final summary of the actual budget of expenditure authorized for the next fiscal year by the Fifty-fifth Congress. So great is the confusion over this kind of legislation, and so numerous and perplexing are the changes made in the closing days of a session, that it is usually a week or ten days after adjournment before the Appropriations Committee can prepare the actual results of the session's work. Such a compilation we have now before us.

Dealing first with aggregates, we shall find that the total appropriations of the session just closed were apparently smaller by \$219,573,214 than those of the previous session of the same Congress. This decrease, however, results wholly from the fact that the first session was called upon to make \$329,661,795

emergency appropriations to provide for the war with Spain. Leaving out of account both these expenses and the permanent annual appropriations, and dealing only with the regular appropriations of the session, it appears that the outlay authorized by the session just closed was larger by \$72,579,473 than that of the preceding session. Of this increase, however, \$56,236,792 consists of enlarged appropriation for the army, and may therefore be properly enough set down to the account of the war with Spain. But even after making this allowance it will be observed that the figures show a very material increase in the appropriations during this winter's session. How much greater the increase would have been if the advocates of the Nicaragua Canal Bill and of the Shipping Subsidy Bill had succeeded in carrying their point, is largely a matter of conjecture. Fortunately these two pieces of recklessness—for they could have been nothing else under existing conditions—were brought to a halt by Mr. Cannon's resolute objections.

It is usual for the Chairman of the Appropriations Committee, in his review of the work of a second session, to make comparisons, not so much with results of the preceding session of the same Congress as with the total appropriations of the preceding Congress. This Mr. Cannon does in the document before us. The entire appropriations of the Fifty-fifth Congress, just adjourned, were \$1,566,890,016; but of this amount, Mr. Cannon explains, \$482,562,083 is directly chargeable to or incident to the war with Spain. Making this deduction, the ordinary appropriation for Government purposes was \$1,084,327,932, as against \$1,044,580,273 in the Fifty-fourth Congress—an increase of \$39,747,659.

This increase Mr. Cannon defends, and indeed asserts that it is "more than accounted for in a few items that are beyond criticism and that were advocated and passed without party division in either branch of Congress." "We are afraid that the last half of this statement will not greatly impress the average citizen, who has grown rather accustomed to seeing party lines dissolve in Congress when huge appropriations for a specific object are under consideration. Even the Nicaragua Bill this session was ardently supported by members of both political parties, and was defeated by the efforts of an Administration Congressman. It is only fair to add, however, that Mr. Cannon's summary shows several, at least, among the items of increase to be unquestionably proper. People may have their doubts over the \$3,875,200 increase in the account of pensions, the \$3,401,128 increase in river and harbor outlay and the \$5,000,000 increase in the grant for public buildings. But the largest increase of all—an increase of \$16,619,581 for the postal service—was, we believe, quite warranted, and will probably in the end pay for itself. The \$6,000,000 increase in the appropriation for new ships will similarly, we imagine, escape condemnation under existing circumstances.

On the whole, therefore, it is fair to say that when its appropriation work is reviewed in its final results, Congress has done much better than was expected. The table submitted as usual with Mr. Cannon's speech, and showing the history of each regular appropriation bill during the session, proves that if Congress has not been economical and prudent in its first impulses, it has at all events allowed itself to be checked and controlled by its sober-minded leaders. Not

to mention the extravagant canal and ship subsidy bills which were defeated absolutely, the estimates of the Administration were in several instances radically cut down in the grant of Congress. The War Department asked for \$144,677,342 for the army during the fiscal year 1900; the result of the very important debate on the army question, to which we drew attention at the time, was that Congress eventually granted only \$80,430,194. The Administration asked for \$12,151,895 on account of new fortifications, which would have been an increase of nearly four millions over even last year; but Congress cut this allowance down to \$4,909,902. The result was similar in some contests between the House and Senate. The Administration had asked for \$15,580,341 for river and harbor outlay; the House voted only \$12,524,648. and the Senate straightway raised the grant to the imposing sum of \$130,557,678. But the Senate had to yield at once, and only \$14,973,877 now stands to the credit of the warrant officers on this account. Keeping these facts in view, and also the incidental burdens imposed by the Spanish war, it hardly seems to us that Mr. Dockery is justified in his assertion that the grants of the outgoing Congress, as a whole, have been marked by "reckless improvidence." It had to resist the strongest kind of pressure to vote appropriations which would have increased the total by upwards of one hundred million dollars, and it succeeded, under the leadership of two or three prudent statesmen, in making a far more conservative showing than there was reason to expect a month ago.

Even with this concession, however, there remains the problem on which Mr. Cannon himself insisted vigorously in his speech of February 9—the problem of a revenue adequate to meet the enlarged expenditure. The Chairman of the Appropriations Committee then declared his uncompromising opposition to new lines of expenditure "unless there is already upon the statute book, or unless hand in hand with such legislation there goes upon the statute book, legislation that will give the money necessary to meet the expenditures." It is only one step from this unsailable position to the contention that Congress must either raise the revenues to the level of its present ordinary expenditure or must reduce that expenditure. It has not done this during the recent session, nor indeed in any session since the reckless Congress which convened in 1889 heaped on extra disbursements of \$137,000,000. Beginning with the autumn of 1892, Government revenue has steadily failed to meet expenditure. The story, briefly, is that each successive gain in revenue since the trade prostration of the panic has been nearly offset by increase in annual expenditure. The receipts of 1898 would more than have met the expenditures even of 1892; but the roll of expenditures had not halted with the work of the Fifty-first Congress. With our clumsy budget system, each successive Ways and Means Committee had turned its eyes back to the annual disbursements of two years before, at the very moment when the appropriations committees were piling up new grants on the public exchequer.

There is, consequently, a heavy deficit still in sight. For the first two months of 1899 expenditure exceeded revenue by \$15,287,437; for the eight months ending February 28 there is a deficit of \$99,109,545, and Mr. Cannon's own recent estimate of the probable deficit for the fiscal year ending with next June is \$159,000,000. Unless this tendency to a constan

shortage is checked by an automatic expansion of the revenue, it will have to be met by the imposition of new taxes.

It is, however, at least within the bounds of possibility that the movement of current trade will affect in a very considerable degree the public revenue. This has been apparent in some measure from the more recent returns of revenue secured from internal taxes. We think it is likewise becoming evident through the reports of Government income from customs dues. The foreign trade statement for January showed increase in dutiable imports, as compared with 1898, of \$3,411,006; that of February reported a similar increase of \$1,700,098; and there can be no doubt that with the enormous consumptive demand for finished goods at home and the current rapid advance in prices on the markets for many branches of manufactures, the total import movement of March will turn out to be larger than that for February. But the secondary result of this partial change in the foreign trade position is of course an increase in the customs revenue. In January, receipts from that source expanded \$3,722,249 over 1898: during February there was a gain of \$1,880,892; while for the two completed weeks of March there is a far more striking increase of \$3,067,444. It will thus be seen that a somewhat novel influence is at work which could not have been reckoned upon with confidence in the earlier estimates. Of course in making comparison as to customs receipts with the first six months of last year we must not forget the fact that the new law levying a tax of 10 cents per pound on tea was not in force until June 13 1898.

How far the expansion of the customs revenue will go, and how permanent the increase will be, depends on factors not yet entirely clear in trade developments. It is already plain enough, however, that plans for increase in the internal taxes would even now have to be regulated by the probable movement of the revenue under present laws. We have frequently had occasion to point out the most serious practical disadvantage of a customs tariff as the chief source of public income. Irrespective of the merits or demerits of the system from an economic point of view, the import duties are of all sources of revenue the most subject to quick and violent changes, the least reliable in a year of financial prostration, and the most difficult to measure accurately in advance. The experience of our history, however, teaches rather uniformly that in a year of domestic trade activity and of commercial speculation the customs revenue expands with as great rapidity as it contracted in the earlier period of reaction. It remains to be seen to what extent the rule will hold good this year.

#### THE MADAGASCAR TARIFF QUESTION.

REPORT OF THE BRITISH TRADE COMMISSIONER TO BRAZIL.\*

MANCHESTER, 1st March.

Statements, which are probably well founded, have been received from Paris to the effect that the customs tariff policy adopted in Madagascar by the French Government after the annexation of the island is being seriously reconsidered with a view to removing the objections formally submitted by Lord Salisbury last July.

The dispatch in which these objections were urged dwelt especially upon the engagement entered into between the two governments in 1890, recognizing on the one hand a French protectorate of Madagascar, and on the other hand all rights and immunities previously enjoyed by British citizens in the island. Amongst these was the right conceded by the Anglo-Madagascan treaty of 1865, guaranteeing to British trade with the island most-favored-nation customs treatment, and stipulating that the import duties should not exceed 10 per cent. Lord Salisbury further referred to certain official statements made in the French Chamber in 1894 and 1895. The first of these statements—that of 1894—confirmed the engagement of 1890, and the latter declared that “the occupation of the island will not raise any difficulties with foreign powers, and it is needless to say that we shall respect the engagements which we have contracted with them.” This was on the eve of the military operations which ended in annexation. The declaration was accepted in good faith, but if it had been foreseen, Lord Salisbury adds, that the result was to be a complete change in the customs system adverse to British trade, “the projected campaign would have excited serious and outspoken apprehensions in this country, and the prospect of the sacrifice of our commercial rights in Madagascar would have drawn forth very earnest remonstrances from Her Majesty’s Government and from public opinion in Great Britain.”

The publication in England a few weeks ago of the diplomatic correspondence of which this dispatch was a part created some stir in Paris, notwithstanding the anxious preoccupations arising from other sources. In view of the prevailing grave political excitements amongst our neighbors, it is perhaps not surprising that the British Government had received no reply a month ago to Lord Salisbury’s protest. If it be true that the French Administration is now trying to find some mode of complying with the implied claim of Lord Salisbury to a recognition of the old British rights in Madagascar, the interesting question arises how far the rights of American trade with the island secured by treaty with the now deposed Queen will be recognized. The matter is of some importance to United States exporters of cotton goods, of sheetings especially, which for many years have stood first in the estimation of the people of Madagascar, and used to be more extensively imported into the island than those of any other country. It cannot be pretended that the American case is anything like so strong as the British, since there is in it no confirmative engagement similar to the Anglo-French Agreement of 1890. Still, if the British claim be admitted, there can be no impropriety in seeking by friendly negotiation to preserve the “open door” in Madagascar for a class of goods which the people there greatly desire. Whether or not the old treaty rights can be urged in the absence of an express recognition of them by France is another matter.

It should be stated that the Ronen Chamber of Commerce, representing the cotton manufacturers of that town—who, together with those of the Vosges, possess now a practical monopoly of the Madagascar market for cotton goods—has recently addressed a very earnest appeal to the French Foreign Minister in favor of the maintenance of the present tariff arrangement. The appeal was called forth by the publication of Lord Salisbury’s dispatch, but it declines to

\*Communicated by our Special Correspondent at Manchester.

discuss the Agreement of 1890 on the ground that the interpretation of that document is a question for diplomatists. On the other hand, there are signs that even in France the policy of "colonial exploitation" is beginning to excite some misgiving. The "Politique Coloniale" recently published a strong and rather lengthy criticism on the commercial policy of France since 1892, in the course of which the tariff arrangements of the colonies were rather strongly condemned.

A further report from the Special Commissioner appointed by the Government "to inquire into and upon the conditions and prospects of British trade in certain South American countries" has just been published. Those previously issued, dealing with the trade of Chili and the Argentine Republic, have already been noticed in this correspondence. The present one records the results of Mr. Worthington's investigations in Brazil. He states that no official statistics of the imports into that country are obtainable later than those for 1894. By the courtesy of the editor of the "Brazilian Review," however, he was supplied with the following figures, not hitherto published. They can be accepted only as approximately correct, since they are compiled from the export returns of the several countries named. They represent the imports into all Brazil from each source from 1893 to 1897, inclusive:

	1893.	1894.	1895.	1896.	1897.
	£	£	£	£	£
Great Britain .....	2,017,764	2,204,505	2,543,739	2,983,946	2,260, 96
France .....	4,312,777	4,598,364	4,777,414	4,288,950	3,451,154
Germany .....	2,378,969	2,118,162	2,069,771	2,100,517	2,574,006
Belgium .....	1,469,032	977,523	1,764,161	2,234,163	1,038,164
Austria .....	158,760	187,733	217,600	254,197	Not stated
Italy .....	Not stated	229,241	629,391	338,119	Not stated
Portugal .....	1,711,666	1,451,900	1,678,154	1,402,745	1,251,549
United States .....	Not stated	2,319,354	2,905,405	2,560,489	2,457,914
Argentina .....	2,309,944	2,750,743	1,617,773	1,917,439	1,722,508
Uruguay .....	1,169,305	1,709,559	1,164,076	1,540,959	1,303,300
Total .....	22,431,650	26,471,787	26,651,231	24,916,726	19,463,190

\* Corrected figures.

† The German figures above relate to German products only; all the others include re-exports, &c. i.e., they cover the whole of the exports from the countries named to Brazil.

Upon a comparison of the average of the figures of 1893-4-5 with those of 1895-6-7, it appears that the imports from the United Kingdom fell off during the latter period by 13.7 per cent; those from France by 10.3 per cent, and those from Germany by 7.2 per cent, whilst the exports from Belgium increased by 12.6 per cent. Treating the imports from the United States in the same way, so far as the figures allow, the average per annum works out £3,112,331 in 1894-5 and £2,668,211 in 1896-7. The falling off in the latter period is £444,120, or at the rate of 14.2 per cent.

The result of this comparison is not unquestionably borne out by Mr. Worthington's detailed investigations of the various branches of the import trade at Rio de Janeiro and San Paolo. He finds that several important descriptions of goods imported into Brazil have been received in larger quantity in recent years from the United States. Amongst these are railway rolling stock (and their component parts), coal, wheat, wheat-flour, blue cotton drills, cheap household furniture, agricultural and carpenters' tools and implements, iron hinges, locomotive engines (chiefly Baldwin's), electrical machinery, iron and steel bars, angle, bolt and rod iron, steel rails, iron pipes, cheap printing paper and printers' ink. American cotton goods do not appear to have gained much hold upon the Brazilian markets. It is not evident either, from the statements under the various heads of the import trade, that any serious decline is apparent in the im-

ports of the classes of goods principally supplied by Great Britain, and the progress made by Germany and Belgium seems to be principally in cheap glassware and ironmongery.

In his general remarks upon the import trade of Brazil, Mr. Worthington dwells upon the frequent piracy of foreign trade marks by Brazilian manufacturers. He says that the law on this subject is good, and the latest "National Factory-Marks Act," is even stringent. Moreover, the tribunals are fair in their adjudication of such cases as are brought before them. But the enforcement of the law is intricate and expensive, owing, he learns, to the number of people who have to be paid in order to prevent vexatious delays and the State never undertakes any prosecutions.

Part of the report presents the results of an apparently careful study of the manufacturing industries of Brazil. Mr. Worthington inspected several of the cotton mills in the Rio and San Paolo districts. The machinery in these is almost entirely English, and the work-people are nearly all Brazilians or immigrants from the European Continent, probably Italians. Only Brazilian cotton, usually the lowest qualities is used. At least one of the weaving mills is in the hands of an Italian Company, which imports the yarn from its own spinning establishments in Piedmont. On the whole, it must be concluded that the Brazilian cotton industry is not very progressive. Mr. Worthington refers to a report of the British Consul at Rio for the year 1894, in which a full list of the mills in Southern Brazil is given. He adds that the proprietors of some of these have since gone into liquidation, although others have increased their machinery. For the most part only the coarser counts of yarn are spun, but in a few cases the product is as high as 50 or 60s. Jute weaving has made considerable progress, the chief fabric upon which it is engaged being coffee bags, but the yarn is mostly imported. Hat manufacture, too, has attained some importance, as well as glass-blowing. But the most successful branches of manufacture are those of leather, including saddlery and harness and boots and shoes.

#### THE CANADIAN PACIFIC REPORT.

The Canadian Pacific annual report for the late calendar year was made public this week, and it shows that the year was one of continued progress and development. The remark applies whether we refer to the further extension of the mileage of the system or to its growth in traffic and earnings.

Few persons have an adequate conception of the magnitude of this great system in point of mileage. We are accustomed to pretty large figures in the case of United States railroads. But the Canadian Pacific is the equal of any of these, if it does not actually outrank them. We may expect that in a year or two the system will comprise fully ten thousand miles of road. Indeed, it falls but a few hundred miles short of that total even now. The mileage included in the company's traffic returns is 6,681 miles, besides which 732 miles of other roads are worked. In addition there are 1,834 miles of controlled road, 589 miles representing the Duluth South Shore & Atlantic and 1,245 miles the Minneapolis St. Paul & Sault St. Marie, or "Soo" road. Hence the total of operated and controlled mileage is 9,247 miles. But

371 miles more of road is at present under construction. The grand aggregate of all mileage, therefore, is 9,618 miles.

The additions during the late calendar year comprised several hundred miles of road, but they are chiefly important because of their location and the territory which they are intended to drain and develop. The new road is mainly in the Western and the Pacific Divisions. The two principal pieces are the Crow's Nest Pass line and the Columbia & Western. The Crow's Nest Pass line was completed to Kootenay Landing last October (too late in the year, the report says, to affect the year's results as to earnings) and in connection with the section of the Alberta Railway from Dunmore on the Canadian Pacific main line to Lethbridge, 109 miles, purchased the previous January, forms a piece of road almost four hundred miles long. The object of the construction of this road has been to provide a Canadian outlet for the Kootenay mining district, and it is expected to give a decided stimulus to mining and smelting and to add materially to the earnings of the company. The coal deposits made accessible are said to be of great extent and of superior character. The Columbia & Western lies immediately to the west of Kootenay Lake, and will provide (including the piece of road under construction westward from Robson to the Boundary Creek Mining District) somewhere in the neighborhood of 150 miles of road. It is stated that though the attractions of the Klondyke drew away many prospectors and miners from Southern British Columbia early last year, the development of the mines in the latter district has continued, and shipments of ores have increased as rapidly as the means of transportation would permit.

One of the noteworthy characteristics of the Canadian Pacific is the ease and facility with which the means for new capital expenditures are provided. The call in this way in the late year was quite heavy, being not limited to the requirements for the new lines. And yet the end of the year found the company in the same excellent financial condition as before, with no floating debt except the ordinary current liabilities incident to the operation of the road. To be sure, the company received some further subsidy from the Dominion Government, earned in the construction of the Crow's Nest Extension, but this amounted to only \$2,322,410. On the other hand, among the capital expenditures were the following items: Crow's Nest extension, \$5,501,801; Alberta Railway purchase, \$976,590; Columbia & Western Railway purchase and extension, \$2,520,470; additions and improvements, main line and branches, \$2,022,283; addition and improvements of leased lines, \$1,086,300; construction on acquired and branch lines, \$288,684; additions to rolling stock, shops and machinery, \$2,016,967; steamships, \$554,462. These amounts foot up, roughly, \$15,000,000, and in addition the company enlarged its stock of materials and supplies in the sum of \$616,720.

It has not been the policy of the company to increase its bonded debt but to provide for its needs by the issue of additional 4 per cent preference stock, and of this only £2,285,000 was put out during the year, realizing \$10,461,267. It is proper to say that £412,191 additional of consolidated debenture stock was also issued during the twelve months, yielding \$2,005,996; but this may be disregarded because the

proceeds went to retire a somewhat larger amount of guaranteed securities. The difference between the \$10,461,267 realized from the sale of the preference stock (augmented by the subsidy from the Dominion Government) and the capital outlays was temporarily provided from the company's surplus. The important fact is that, notwithstanding these outlays were some millions in excess of the capital receipts, the financial position of the company remains one of great strength. The current liabilities December 31 1898 were reported \$4,566,231, and interest due and accrued \$1,850,047, making together \$6,416,278. But as against this the company held at the same date \$4,147,229 of cash in bank, there was due \$728,311 from the Imperial and Dominion Governments, and the station and traffic balances and accounts receivable amounted to \$3,565,638. Thus these three items of assets alone aggregate \$8,441,178, not to speak of items representing advances, securities held, etc.

It is worth noting that considerable further outlays are contemplated in the immediate future. Aside from the expenditures already authorized for new road, etc., the report tells us that the shareholders at their meeting next month will be asked to approve expenditures for permanent way aggregating \$1,150,979; for additional station, yard and terminal facilities, \$788,187; for the completion of air-brake and automatic coupler equipment, \$305,010; for branch lines to mines, \$300,000, and for the purchase of additional rolling stock, \$1,000,000.

Much of the mileage of the Canadian Pacific of course runs through a sparsely settled country—a country which was inaccessible until the lines of the system opened it up to development—yet each year sees a further addition to traffic and revenues, thus justifying the confidence of the management in the future of the property and their wisdom in putting so much new money into it. During the late year there was a further increase of over two million dollars in the gross earnings of the company, raising the total to \$26,138,977. Only three years before, in 1895, the aggregate of the gross was but \$18,941,037. It is a notable circumstance that this latest increase was made without any further expansion in the grain traffic, the road having moved only 35,443,081 bushels in 1898, against 37,756,201 bushels in 1897 and 32,528,256 bushels in 1896. The live-stock traffic and also the lumber traffic are being steadily enlarged, but the most striking growth is in manufactured and miscellaneous articles. Of manufactured articles the tonnage was 1,529,044 tons in 1898, against 1,070,675 tons in 1896 (two years before); of miscellaneous articles 1,119,087 tons, against 878,261 tons; of live stock 715,018 head, against 566,219 head, and of lumber 840 million feet, against 636 million feet. Total freight traffic of all kinds was 5,582,038 tons in 1898, against 4,442,055 tons in 1896, an increase it will be observed of 25 per cent in two years. The tonnage movement one mile was 2,142 millions in 1898 against 1,769 millions in 1896. In the same two years the number of passengers carried rose from 3,029,887 to 3,674,502 and the number one mile from 263,607,453 to 430,493,139.

The two million dollars increase in gross receipts, however, in the late year brought with it hardly any addition to the net, which is reported at \$10,475,371 for 1898, against \$10,303,776 for 1897. Of course the differences with the American trans-continental lines

on passenger business to the Pacific Coast and the Klondyke was an adverse influence, and this difficulty was not terminated until November. But President Van Horne points out that though the rate disturbances may in part be held responsible for the lack of growth in the net, the principal reason is to be found in the long-continued rains following the harvest in the Northwest. These rains, he states, prevented the threshing and harvesting and marketing of grain until within a few weeks of the close of lake navigation, making it necessary to find employment for the company's rolling stock in other traffic affording little profit.

Though the net increased but slightly as compared with 1897, as compared with the earlier years of course there has been noteworthy expansion. Thus since 1894 the total of the net has risen from \$6,423,309 to 10,475,371. The interest received by the company on deposits and loans and on its holdings of Duluth South Shore & Atlantic and Minneapolis St. Paul & Sault Ste. Marie bonds raised the aggregate of the net income to \$10,898,738. The requirements for charges were \$6,774,321, leaving a balance of \$4,124,417. The call for 4 per cent dividends on the preference stock is reported at \$472,709 (had the whole \$20,951,000 of such stock been outstanding the call of course would have been larger), and the 4 per cent dividends on the common stock took \$2,600,000, making \$3,072,709 together. In other words, over and above the 4 per cent dividends on all classes of stock, there was a surplus of more than a million dollars. This is on very low rates, too, the company having received an average of only 76 hundredths of a cent per ton per mile in the late year.

As indicating the growth of the territory contiguous to the line, attention should be called to the great increase which is taking place in the sales of land by the company. These sales were 348,608 acres for \$1,121,744 in 1898, against 199,482 acres for \$665,740 in 1897, and only 87,878 acres for \$308,928 in 1896. Furthermore, according to official returns, the number of homesteads taken up from Government lands in Manitoba and the Territories beyond was 4,484 in 1898, against only 2,406 in 1897. This influx of settlers obviously augurs well for the future. We observe also that President Van Horne states that a much larger amount of grain from the Northwestern crops remains to be moved than ever before at this time of year. This, together with the satisfactory agricultural and industrial conditions now prevailing in Canada, due in great measure to good crops and good prices and to successful mining, gives promise, he states, of a large spring and summer traffic.

### RAILROAD GROSS AND NET EARNINGS FOR JANUARY.

Our statement of gross and net earnings for United States railroads for January reveals very satisfactory results—much more satisfactory than those for February are likely to be. Bad weather proved somewhat of a drawback, but only in limited sections and in a limited way. In Colorado the roads suffered severely from snow blockades, and in the South and Southwest heavy rains made the wagon roads almost impassable. But there were no such general and widespread and exceptional interruptions to railroad operations as developed during February. The cotton movement in the South proved much smaller than in

January of last year (the bad weather being assigned as one cause for this), but the grain movement in the West showed further expansion in 1899 on top of expansion in 1898, though the gain came chiefly at the spring-wheat points, namely Chicago, Duluth and Minneapolis.

In the aggregate our tabulations show \$5,214,243 gain (or 8.14 per cent) in the gross, and \$1,801,605, or 10.01 per cent, gain in the net. The following are the totals:

	January. (120 roads.)	1899.	1898.	Increase.	
				Amount.	Per Cent.
Gross earnings.....		\$ 69,281,733	\$ 61,071,490	\$ 8,214,243	8.14
Operating expenses.....		40,401,141	40,018,835	3,812,634	7.41
Net earnings.....		19,791,297	17,989,692	1,801,605	10.01

What gives an added significance to the increase recorded is that there was an exceptionally heavy gain in this month of 1898, so that the improvement has been cumulative. In brief, in January of last year our statement recorded no less than \$8,056,508 gain in gross earnings (14.13 per cent) and \$3,218,818 (or 21.59 per cent) gain in net earnings. We present herewith the January totals for a series of years.

Year and Number of roads.	Gross Earnings.			Net Earnings.		
	Year Given.	Year Preceding	Increase or Decrease.	Year Given.	Year Preceding	Increase or Decrease.
	\$	\$	\$	\$	\$	\$
January.....						
1898 (126)	55,990,995	53,100,108	+2,890,887	13,341,814	14,682,355	-1,370,909
1894 (123)	47,010,999	54,121,847	-7,110,848	11,633,195	12,745,021	-1,111,826
1895 (124)	48,973,193	48,073,915	+900,315	12,320,173	11,138,594	+1,097,975
1896 (121)	56,821,878	52,154,039	+4,667,839	10,025,545	13,764,351	-3,738,806
1897 (124)	54,753,774	54,194,991	+558,783	14,900,873	16,123,199	-1,222,326
1898 (124)	69,080,049	57,012,511	+12,067,538	15,128,130	14,913,312	+214,818
1899 (120)	69,281,733	61,071,490	+8,214,243	19,791,297	17,989,692	+1,801,605

As further emphasizing the favorable nature of the results, we may note that when arranged in groups every group indicates an increase in gross, and all but the Southern group an increase in net. The loss in net in the Southern group reflects the bad weather and smaller cotton movement. Here is the statement.

#### SUMMARY BY GROUPS.

SECTION OR GROUP.	Gross Earnings.		Net Earnings.		Inc. or Dec.	P. O.
	1899.	1898.	1899.	1898.

Among the separate roads there are a good many with fair-sized gains, while on the other hand there are very few which are obliged to report losses for any considerable amounts. These losses, though, are somewhat more numerous in the net than in the gross (owing to increased expenses), as will be seen from the following, giving all gains and also all losses in excess of \$30,000 in both gross and net:

## ITEMS ABOUT BANKS, BANKERS AND TRUST CO'S.

—At a meeting of the Clearing House Association, held on Monday, at which all but three banks were represented, the amendment to the constitution, printed in the CHRONICLE last Saturday, empowering the Clearing House committee to establish rules and regulations regarding collections outside of the city of New York by members of the Association and by other institutions having the privilege of the Clearing House, was unanimously adopted. The Clearing House committee held a meeting on Wednesday and promulgated the rules and regulations, which are substantially the same as those published in the CHRONICLE last Saturday. They will become effective on and after April 3. In order to prevent banks from increasing interest rates as compensation for making collection charges, the following clause has been inserted in the regulations:

"No collecting bank shall, directly or indirectly, allow any abatement, rebate or return for or on account of such charges or make in any form, whether of interest on balances or otherwise, any compensation therefor."

The only other changes made in the rules as printed in the CHRONICLE was the substitution of the word "payable" for "collected" in the second section and the addition in the third section of Rhode Island to the States in which collecting banks shall charge not less than 1-10 of 1 per cent.

—The Astor National Bank, which was organized last year, and which is reported to be largely controlled by stockholders and directors of the First National Bank, has been admitted to membership in the Clearing House this week, receiving the number 94, making sixty-four banks in the Association, forty-five National and nineteen State banks. On Saturday the Sixth National Bank will make its last exchanges to the Clearing House, this institution having been taken over by the Astor National Bank, in pursuance of arrangements made a few months ago. This retirement of the Sixth National from the Clearing House will reduce the number of National banks to forty-four, making the total number of banks sixty-three.

—The stockholders of the Corn Exchange Bank on Monday ratified the merger with the Hudson River Bank and the Astor Place Bank and the merger will go into effect on Monday, March 20.

—The Clearing House Committee has been given authority to construct another vault in the building for the storage of gold coin whenever they shall deem such action expedient. The vault accommodation is now limited to \$180,000,000. If the new vault should be constructed, it will have capacity for \$50,000,000 of gold.

—On April 3 the Bank of the Manhattan Company will celebrate the centennial anniversary of its incorporation by a dinner at an up town hotel. Invitations have been sent to the presidents of the Clearing House banks, of the trust companies and of the savings banks in this city.

—Mr. James B. Dill, of East Orange, N. J., Mr. John B. Vreeland, of Morristown, N. J., and Mr. Thomas N. Mc Carter, Jr., of Newark, N. J., commissioners appointed by the Governor, under the laws of New Jersey of 1893, to revise the enactments of that State relating to banks, trust companies and safe deposit companies, made their report to the Governor March 7, and it is expected that the revised laws which they have submitted will be adopted at this session of the Legislature. In revising these laws care seems to have been taken to make the provisions regarding taxation of banks and trust companies as liberal as possible, pre-

sumably with the view of attracting capital to that State for investment in such corporations. Both banks and trust companies will be permitted by the revised laws to establish branches in any part of the State. The laws of New York now authorize the organization of branch banks and a similar privilege was probably incorporated in the revised New Jersey laws in consequence of the branch bank provision in this State. The sections of the proposed laws relating to taxation are less onerous than the New York laws as regards banks. The proposed New Jersey laws provide that bank stock shall be assessed in the taxing district where the owner resides, or, in case of a non-resident, the assessment shall be laid in the taxing district where the bank is located. This would seem to imply that the par value of the shares shall be taxed. The New York law imposes taxes upon the market value of the shares as personal property and also upon the surplus of the bank, besides which there is a State tax of half a mill on each dollar of capital. The proposed New Jersey law taxes trust companies upon the amount of their capital stock and accumulated surplus or undivided profits, except that any real estate belonging to such corporation shall be taxed in the taxing district where such real estate is situated, and the amount of the assessment made upon said real estate may be deducted from the amount of any assessment made upon the capital stock, surplus and undivided profits. The New York law imposes taxes upon the par value of the capital and surplus of trust companies, less 10 per cent of the surplus; and the investments by the company in United States bonds, or in non-taxable municipal bonds are also deducted, and as a consequence some companies invest both capital and surplus in non-taxable securities. The provision regarding real estate is similar to that in the contemplated New Jersey law. Whether the proposed laws in that State will tend to stimulate the investment of capital in banks and trust companies remains to be seen. It is thought that not much New York capital will seek such investment, for the reason that the business is chiefly here, unless there should be a large increase in business in New Jersey to justify more corporations of this character.

—A dinner was given on Wednesday evening at the Union League Club in this city by the Executive Council of the American Bankers' Association to the bankers who are now on a visit to New York. Fifty-two guests were present and Mr. Joseph C. Hendrix, of the National Union Bank, presided. After the dinner Representative Hill, member of the House Committee on Banking and Currency, and also of the Coinage Committee, in the course of his speech noted the differences of opinion between bankers regarding currency reform. He quoted, for illustration, one banker who asked him, when he was recently on his way to Washington, to do something for the currency but not to do anything with greenbacks; while another banker remarked that the greenback was just the thing that something should be done with. Mr. Hill then asked—if bankers cannot agree, how can we expect Congress to do any better? He argued that the country should be put upon a gold basis at once. Mr. George E. Roberts, Director of the Mint, in the course of his address, said that he did not believe the silver question would ever become an acute issue again, but the spirit of discontent which found expression in it will not die out. The argument for free silver has been practically destroyed by the marvelous new supply of gold the mines of the world are yielding. He declared that the production of that metal in the year of the next Presidential election promised to be more than the combined production of gold and silver was in the year of the last Presidential election. After giving some statistics of the world's gold production, which in 1896 amounted to \$200,000,000 and in 1893 to nearly \$300,000,000, while in 1900 it would probably be \$400,000,000, he referred to the plans for reforming the currency. On that point he expressed the belief that before the next President shall be elected a measure will have been passed regulating our currency by a new system, which shall keep all forms of our money on a par with gold without the necessity for action by any official and without the possibility of disturbance. Addresses were also made by Mr. Russell, President of the American Bankers' Association; by Mr. Hill, Vice President of the association, and by Mr. Joseph C. Brown, of Raleigh, N. C.

A meeting of the Executive Council of the American Bankers' Association was held in the afternoon of the same day, at which, in addition to the transaction of other business, Cleveland was selected as the place for holding the annual convention in the fall.

## Monetary: Commercial English News

[From our own correspondent.]

LONDON, Saturday, March 4, 1899.

The stock markets have been dull all week. One of the chief reasons, no doubt, is the weakness in New York. The American department here has no initiative of itself. It moves up and down with the New York Stock Exchange. But for all that the department is considered a good barometer of the state of the markets in general. Indeed, it is often noticed here that when the American department is active nearly every other department of the Stock Exchange is active likewise. One reason of course is that the great operators are interested in most departments, and if one is disappointing they have not the same courage to act in others. But the main reason is that the impression prevails here that the speculation in New York has been carried on with too much rapidity.

Nobody doubts the value of the securities or the great prosperity of the United States. But most people think that there has been too great a haste in rushing up prices. Consequently any set-back gives rise to apprehensions that difficulties may be disclosed, that money may become dear, and consequently that gold may be shipped from London to New York.

Another reason for the general dullness this week is that the monthly liquidation in Paris has been going on. On Monday and Tuesday options had to be declared. It is understood that they were on a very great scale, and that there was some anxiety as to how they might go off. Furthermore it was feared that a few great operators had speculated too largely, especially in the mining market, and that they would find it difficult to carry over their stocks. The liquidation, however, has so far gone off very smoothly. In ordinary stocks the carrying-over rate averaged from 4 per cent to 4½ per cent, in the mining market from 5 per cent to 5½ per cent and in some cases 6 per cent. The mining rates are certainly very moderate compared with the London rates, where from 8 per cent to 10 per cent is charged, and in some cases even 12 per cent and 15 per cent. The fall of the Sagasta Cabinet in Spain, the illness of the Pope and the pretensions of France in Siam have all helped to cause some anxiety in Paris and so to keep the Paris market weak.

The final upshot is that, compared with the last couple of months, business on the Stock Exchange has been very quiet here this week. There is, however, great confidence in the future, and everybody is looking forward to an exceptionally prosperous year.

In trade there is expansion in every direction. Manufacturing industry is more prosperous than ever before; employment is full, wages are high, and even exports are now beginning to increase. During the past few years, while there was great prosperity in every other direction, the value of the exports of British and Irish produce and manufactures did not materially increase. But from this time forward there is every reason to look for a considerable augmentation. Orders on a very great scale have been placed on account of India in Lancashire, and there ought soon to be a very marked increase in the exports to India. Shipbuilding is yet more active than it was. And even Yorkshire, that had been complaining more or less, is doing well now.

There is some apprehension that money may be shipped to New York in considerable amounts. You are in a better position to judge whether this is likely or not than anybody here can be. But although bankers and discount houses talk of the probability of shipments, they are unable to get the rates which would warrant their alleged apprehension. On Wednesday of this week the rate of discount in the open market for three months' bank bills was as low as 2 per cent, and even on Thursday and yesterday it was barely 2 1-16 per cent. It is quite clear that if bankers and discount houses really believed that gold shipments on a large scale were beginning, they would not

be willing to take bills at these rates. But as the New York sterling exchange has begun to move downwards, they are justified of course in a certain amount of apprehension.

There is not the slightest probability that gold will be shipped in considerable amounts to the continent. For the present the Imperial Bank of Germany has gained sufficiently in strength, and until the spring demand arises there will not be such withdrawals of money from Berlin as would seriously affect the market. The Russian Government is very desirous of attracting British capital to Russia, and in deed for some time past has been making very earnest efforts with that end in view. Russia therefore will not disturb this market just at present. The Bank of France is strong enough. The other Continental countries are not in a position to take much gold.

And there is no reason to anticipate that gold will be sent to India. It is quite true that a considerable amount of gold has either been received or is on the way to the Indian treasuries just now. But it is entirely coming from Australia, none of it being sent from here, and none is likely to be sent. The India Council is selling as many drafts as it can. But, owing to the famine and its consequences, the exports from India of late have been on an enormous scale, while the imports into India have been restricted. There has therefore been a great balance in favor of India in the trade between India and this country, and the India Council's drafts were not sufficient to fill up the void. Consequently the exchange banks have had to forward from Australia to India about 1½ millions sterling.

Under these circumstances the only country in a position to take much gold is the United States. If there are no shipments of any considerable amount money here will remain somewhat about its present level until the middle of April. There will be ease, of course, as there always is at the beginning of April, when the collection of the revenue is on a small scale and the interest on the debt is paid out. But towards the end of April the usual spring demands will make themselves felt, and in May the Scotch demand will have to be met.

The probability therefore is that the Bank of England rate will remain at about 3 per cent until May, always provided that gold shipments on a considerable scale are not made to New York.

Meantime there is a good demand for money in India, but no serious stringency. The bank rates are all at 7 per cent. Still the India Council continues, for the reasons already stated, to sell its drafts exceedingly well. It offered for tender on Wednesday 70 lacs, and the applications considerably exceeded 674 lacs. The whole amount offered for tender was disposed of at prices slightly over 1s. 4d. per rupee for bills and 1s. 4 1-16d. per rupee for telegraphic transfers.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols &c., compared with the last three years:

\* February 21.

Measrs. Pixley and Abell write as follows under date of March 2:

Gold—The Bank of England has received £55,000, and £530,000 has been withdrawn, of which £200,000 was for South Africa and £330,000 for South America. In spite of the Bank of England raising its buying price, the bulk of the recent arrivals has been purchased by Germany, and the demand continues unabated. Shipments Feb. 23: Bombay, £81,000. Arrivals: South Africa, £173,000; Australia, £37,000; Singapore, £7,000; Gibraltar, £2,000; West Indies, £23,000; River Plate, £22,000; total, £581,000.

Silver—There has been a large business doing with India, and after touching 27½d., the market closed firm at 27½ d. The Bombay price is: Rs. 70½ for spot silver. Shipments Feb. 23: Bombay, £39,000; Shanghai, £4,000; total, £47,000. Arrivals: United States, £304,000; West Indies, £24,000; total, £332,000.

Mexican Dollars—There has been a small business at 27½, but the supply even at this premium is very limited.

The quotations for bullion are reported as follows:

## WALL STREET, FRIDAY, MAR. 17, 1899.—3 P. M.

The Money Market and Financial Situation.—Financial operations in Wall street appear to have been restricted somewhat during the week by higher interest rates. The volume of business was smaller than that of any week since January 1st, notwithstanding the heavy transactions on Thursday, and standard railway issues were largely neglected. We have referred several times of late to the increasing attention given to industrial stocks, and this feature was more prominent this week than heretofore. On Thursday over a quarter of a million American Sugar Refining shares were traded in, and an advance of 29 points illustrates the speculative character of the movement. The conservative element in Wall Street, as elsewhere, is especially interested in the international trade statement for February given out this week. It shows a somewhat smaller export movement of grain than the corresponding month last year, but largely increased exports of general merchandise; and except the phenomenal showing of 1898 is the most favorable February statement in many years.

The money market has received close attention through the week, and, as noted above, operations in other departments have been affected to some extent by its tone. As the transfer of funds in connection with the Chicago & Alton purchase and payment to the Government on account of Central Pacific are now complete, a more steady money market in the immediate future is quite probable; although, as we stated last week, rates may be at a higher level than those which prevailed before the recent advance.

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 2 1/4 to 6 per cent. To-day's rates on call were 3 to 5 per cent. Prime commercial paper quoted 3 1/4 to 4 1/2 per cent.

The Bank of England weekly statement on Thursday showed a decrease in bullion of £105,919, and the percentage of reserve to liabilities was 43.20, against 44.20 last week; the discount rate remains unchanged at 3 per cent. The Bank of France shows a decrease of 425,000 francs in gold and 375,000 francs in silver.

## NEW YORK CITY CLEARING HOUSE STATEMENT.

	1899. Mar. 11.	Difference from Prev. week.	1898. Mar. 12.	1897. Mar. 13.
Capital.....	57,872,700		59,022,700	59,772,700

\*This is the price bid at the morning board; no sale was made.

State and Railroad Bonds.—Sales of State bonds at the Board include \$25,000 Tennessee settlement 8s at 97 1/2, \$31,500 Louisiana consol. 4s at 109 1/4, \$32,000 Virginia fund. debt 2-3s of 1991 at 83 to 84 and \$150,000 Virginia 6s deferred trust receipts, at 8 1/2 to 9.

The market for railway bonds has been generally steady to firm on a moderate volume of business. Transactions at the exchange averaged nearly \$3,200,000 par value per day and were fairly well distributed.

Kansas City Pittsburg & Gulf 1sts were the weak feature, and in sympathy with the stock declined 4 points on reports referring to the reorganization plan. Missouri Pacific trust 5s also declined. Union Pacific Denver & Gulf trust receipts advanced over 4 points on limited sales, and Wisconsin Centrals 6s gained a point. Chicago Terminal Transfer 4s were strong on rumors of more favorable leases. Special activity is noted in a few issues.

Stock and Bond Sales.—The following shows the volume of business in stocks and bonds on the New York Stock Exchange for the past week and since January 1.

	Week ending Mar. 17, 1899.	1898.	1899.	1898.

Total....	310,287	161,031	\$848,584	148,738	258,874	\$513,826

Railroad and Miscellaneous Stocks.—The stock market was irregular but generally weak in tone, although actual decline in quotations, especially for standard shares, was nominal in most cases. Standard issues were lightly dealt in, and the total transactions were much below the average of recent weeks. The grangers were relatively firm. Great Northern preferred made a further advance of 9 points, and is now about 50 points higher than in January. Chicago Terminal Transfer, common and preferred, advanced 5 1/2 and 7 1/2 respectively, on rumors of benefits which will be derived from Chicago & Alton's new connections. New York City traction stocks were again erratic. Brooklyn Rapid Transit advanced to 103, a gain of 6 1/4 points within the week. Third Avenue declined 9 points and recovered a large part of the loss. Metropolitan Street Railway fluctuated over a range of 8 1/2 points, and Manhattan Elevated a range of about 9 points.

Stocks on the miscellaneous list continued to attract attention, the movement of some issues being sensational. American Sugar Refining sold below 139 on Wednesday and at 170 on Thursday, without any change known to the public in the conditions affecting its value. New York Air Brake steadily advanced to 200, a gain of 31 points within the week and declined to 193 to-day. American Tobacco advanced 18 1/2 points, but lost a part of the gain. American Steel & Wire issues were unsteady, closing with a net loss of about 8 points.

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every STREAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

#### STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

\* Includes Baltimore Traction and City & Suburban for both years.

**Street Railway Net Earnings.**—In the following we show both the gross and the net earnings to latest dates of all STREET railways from which we have been able to procure monthly returns. As in the case of the steam roads, the returns of the different roads are published by us each week as soon as received, and once a month (on the third or the fourth Saturday of the month) we bring all the roads reporting together, as is done to-day.

## Missouri Pacific Railway Company.

(Report for the year ending Dec. 31, 1898.)

President George J. Gould says:

**Improvements, Etc.**—The physical improvement of the properties has received careful attention during the past year, not only by increased expenditure for new standard steel rails and steel bridges, but new equipment has been supplied, namely: 25 locomotives, 2,500 box cars and 500 coal cars, nearly one-fourth of the cost of which has been paid from the current revenue during the past year, and the balance arranged for settlement, monthly, during the next four or five years. [New 75 pound steel rail was laid on 200 miles of track on main lines; side track facilities were increased 12 miles; 65 miles of track were newly ballasted; 2,189,761 cross ties and 844 switch ties were laid.]

**Branch Lines Acquired.**—Under date of June 30 the company acquired the capital stock of the Central Branch Union Pacific Ry. (Atchison to Waterville, Kan.), and since the close of the year arrangements have been made for the purchase of the associated lines, the Atchison Colorado & Pacific RR., 254.79 miles, and the Atchison Jewell County & Western RR., 33.40 miles. This arrangement will strengthen the system of lines in Kansas, and completely connect the outlying properties.

**Iron Mountain.**—The earnings from the Iron Mountain would have enabled the payment of a 4 per cent dividend, but the policy indicated in last year's report has been followed, leaving the money reserved for further physical improvement. The work of adjustment of grade line to a six-tenths of one per cent grade was commenced and practically completed at various places, aggregating about 11 miles, the cost of which was included in the operating expenses; this work will be resumed with the advent of open weather and be pushed vigorously.

**Financial.**—Since January 1 arrangements have been made to pay off all Iron Mountain bonds prior in lien to the general consolidated railway and land grant mortgage; the latter mortgage thus taking the place of the prior liens so retired.

Vice-President Warner says in part:

**Freight Traffic.**—Returns for 1898 show a material increase in tonnage carried, with a slight decrease in per-ton-mile rate west of St. Louis, the latter due chiefly to sharp competition on export grain, packing-house products and lumber. The movement of export grain was largely diverted from the Gulf ports to the Atlantic Seaboard, attributable to a great extent to the sharp competition of lines east of the Mississippi. This and somewhat similar conditions through Belmont and Memphis resulted in a decrease in tonnage of bulk grain of 191,000 tons. Packing house products moved in greater volume than in 1897. The movement of cotton over the Iron Mountain increased 35,511 tons, but still did not meet general expectations. In the general improvement in conditions in the West, the movement of manufactures and merchandise was greatly stimulated, and on this class of remunerative traffic, the Missouri Pacific shows a gain of 64,076 tons, the Iron Mountain 8,956 tons.

**Traffic Statistics.**—The following tables compiled from the company's reports shows the changes in tonnage of principal articles carried, and other statistics:

## MISSOURI PACIFIC RY.—TONS CARRIED (000s omitted).

Year.	Total.	Lumber.	Live stock.	Bulk grain.	Coal.
1898.	5,839	44% (7.6%)	480 (8.2%)	1,156 (19.3%)	1,371 (23.5%)
1897.	5,502	430 (7.8%)	481 (8.7%)	1,171 (21.0%)	1,245 (22.6%)
1896.	4,697	338 (7.2%)	420 (8.9%)	874 (18.7%)	1,192 (25.4%)
1895.	4,379	330 (7.5%)	384 (8.3%)	540 (12.4%)	1,160 (26.5%)
1894.	4,326	318 (7.4%)	367 (8.5%)	797 (18.4%)	1,015 (23.4%)

## ST. LOUIS IRON MOUNTAIN &amp; SOUTHERN (000s omitted).

Year.	Total.	Lumber.	Live stock.	Bulk grain.	Coal.
1898.	4,720	1,189 (25.2%)	140 (3.0%)	302 (6.4%)	476 (10.1%)
1897.	4,258	1,035 (24.3%)	182 (4.3%)	479 (11.2%)	346 (8.1%)
1896.	3,731	926 (24.8%)	187 (5.3%)	346 (9.3%)	314 (8.3%)
1895.	3,605	961 (26.7%)	178 (4.9%)	187 (5.2%)	349 (9.7%)

**Statistics.**—The statement of operations and earnings of the combined Missouri Pacific and St. L. I. M. & So. systems for three years is as below given. The Central Br. Union Pac. Ry., Atch. Col. & Pac. RR., At. Jew. Co. & W. RR., and the Ark. & La. Ry. results are not included:

## Chicago St. Paul Minneapolis &amp; Omaha Railway Co.

(Report for the year ending Dec. 31, 1898.)

The passenger earnings increased 22.04 per cent and the freight earnings 8.30 per cent. The aggregate amount of the funded debt is unchanged. During the year Chicago St. Paul & Minneapolis Railway first mortgage bonds, amounting to \$347,000, were exchanged for like amount of Chicago St. Paul Minneapolis & Omaha consols. The length of wooden bridging was decreased 6,742 feet, and there were 59.51 miles of new steel, 80 pounds to the yard, laid on main lines.

**Statistics.**—The following statistics for four years have been compiled in the usual form for the CHRONICLE:

## Texas &amp; Pacific Railway.

(Report for the year ending Dec. 31, 1898.)

President George J. Gould says in substance:

**Earnings.**—The earnings for 1898 reflect a period of exceptional prosperity in the Southwest; abundant crops and a

general revival of confidence having stimulated all descriptions of trade. Gross earnings show an increase of \$417,854, or 5 1/2 per cent, and net earnings an increase of \$183,393, or 43 per cent. Two-thirds of the increase in gross traffic can be credited to passenger traffic. There was an increase in the number of passengers carried one mile of 26 42 per cent.

**Maintenance—New Line.**—The road has been carefully maintained and only such renewals, replacements and improvements introduced as would properly fulfill the mandatory requirements of your mortgages, and enable your road to efficiently handle its increasing traffic. A large amount of permanent work, however, was performed. That portion of the main line between Shreveport, Louisiana, and the State line of Texas, a distance of about 19 miles, has been operated under lease which terminated on Jan. 1, 1899. In view of this, the company built during the year a line of its own between the points named. The entire cost, \$161,694, was charged to new construction.

**Financial Condition.**—There was purchased during the year for the maintenance of the property, at a cost of \$706,263—5 252 tons steel rails and fastenings, \$100,268; 900 box cars, \$455,056; 100 coal cars, \$42,562; 10 freight locomotives, \$97,390; 2 passenger locomotives, \$21,000. All of the foregoing was paid for in cash, with the exception of 500 box cars, for which notes were issued. On Jan. 31, 1899, these notes were all discounted and retired, and the debt canceled, leaving the company with no equipment obligations whatever outstanding.

During the year the sinking fund, provided for the redemption of the first mortgage Eastern Division bonds, was revived, and under its provisions the trustees of the mortgage on Oct. 1, 1898, drew by allotment \$198,000 of bonds at par. The treasury will be benefited to the extent of the premium the first mortgage 5s issued in their stead command in the market. By the retirement of the above bonds and the cancellation of the Texas school fund loan the company is relieved of an annual interest charge of about \$5,600.

**Statistics.**—The comparative statistics of operations, earnings, income account, and the general balance sheet, for four years, have been compiled for the CHRONICLE as follows:

## FREIGHT CARRIED (000 OMITTED).

## Twin City Rapid Transit Co.

(Report for year ending Dec. 31, 1898.)

President Thomas Lowry says in substance :

**Earnings.**—The earnings of the year show a gratifying increase over the previous year, the increase in gross being 8.29 per cent and in net 5.9 per cent. The physical condition of the property has been maintained to the highest possible degree and the expense thereof charged to the cost of operating. This cost of operating, including taxes, is 49.92 per cent, as compared with 53.18 per cent for 1897.

**Financial.**—During 1898, \$825,000 of the 7 per cent preferred stock was issued, \$750,000 of which was used to pay the "collateral notes" mentioned in our last report. The company has also issued for construction \$90,000 of the Consolidated 5s of the St. Paul City Ry. Co.

**Improvements.**—The Selby Ave. cable line in St. Paul has been changed to an electric line, with all new construction of concrete and 80 lb. "T" rail with east-welded joints. This has been made possible by the installation of a modern counter-weight system, which overcomes the heavy grade of 15 1/2 per cent. This newly constructed line has been in successful operation since August, standing the severe tests of low temperature and heavy snows. The company has likewise completed a new Interurban line between Minneapolis and St. Paul, via Como Park, St. Anthony Park, the State Fair grounds and the State Agricultural College. The company has constructed and fully equipped, during the past year a new brick car shop 359 ft. long and 136 ft. wide, and has built and equipped twenty-two 44-ft. electric cars.

**Water Power Plant.**—This plant, mentioned in our last report, to generate electric power, has been in partial operation about a year. To avoid any possible delay in service the steam power plants were held in readiness for operation until all the electrical apparatus and transmission cables of the water power plant were in successful operation. This test consumed several months and the plant was only accepted by our company in December. This delay prevented the sale of surplus power and increased the expense of operation.

**Statistics.**—Various statistics of interest are shown in the following tables:

	1898.	1897.	1896.	1895.

## Brooklyn Wharf &amp; Warehouse Company.

(Report for the year ending Jan. 31, 1899.)

President Thomas A. McIntyre says in substance :

The most important factor in the loss of earnings during the past year was the Spanish war, which, while it lasted but a few months, disturbed and very seriously affected for the whole year the trade with the West Indian and South American ports, as well as the traffic with the Philippines. This is conclusively shown by the large decrease in the storage of sugar, resulting in a net loss as compared with the business of the previous year of \$297,000, as well as in that of many other well-known articles of import. There were over ten lines of vessels which use our docks that were seriously affected by the war; in fact a number of the vessels of those lines were taken by the Government for war purposes, and have only recently become restored to the uses of commerce. This resulted in a very considerable loss in wharfage earnings.

Notwithstanding all these conditions, the earnings from piers, wharves, rent of buildings, and storage of merchandise other than sugar and grain, show an increase over the previous year, and the company has retained its proportion of the business of the Port. The net earnings from grain are \$95,811 less than those of the previous year. This loss is accounted for by the fact that the largely increased foreign demand, combined with the shortage in the winter-wheat crop, has left no surplus of grain to be carried in the stores. The railroad department shows a very satisfactory increase in earnings, paying a profit to the company in addition to interest on the investment. It is intended during the coming year to extend the railroad terminal system. The increase in the item of tools, machinery and betterments is accounted for by an expenditure of over \$78,625 in equipping one of the grain stores to handle grain direct from cars and to install modern machinery, by which great savings in the handling of grain will be effected.

The balance sheet, income and profit and loss accounts have been audited by The Audit Company of New York and found correct.

**Statistics.**—Earnings, expenses, charges, etc., follow :

The balance sheet of Jan. 31, 1898, was in V. 68, p. 425. The changes in assets and liabilities during the year have been slight.—V. 68, p. 472.

## GENERAL INVESTMENT NEWS.

**Reorganizations, Etc.—Defaults, Reorganization Plans, Etc.**—The usual index is omitted this week, but that covering the items published to Feb. 24, inclusive, will be found in the CHRONICLE of March 4.

**American Car & Foundry Co.—Friendly Relations with Pressed Steel Car Co.**—President Bixby states that there is no truth in the rumors that the relations between the company and the Pressed Steel Car Co. are not harmonious; they are, on the contrary, most intimate. Charles T. Schoen, President of the Pressed Steel Car Co., is an active director of the American Car & Foundry Co., and E. N. Dickerson is a member of the executive committee of both companies. The American Car & Foundry Co. is the largest customer of the Pressed Steel Car Co. for bolsters, centre plates, truck frames, etc., used in connection with the building of wooden cars. The American Car & Foundry Co. has orders on its books for over 32,000 cars, together with large orders for miscellaneous supplies. The original owners of the car plants own a large majority of the stock of the new company, and the officers of the new company are also the large stockholders.

**Subscriptions Paid.**—Subscriptions to the \$15,000,000 stock have all been paid. The issue was largely oversubscribed.—V. 68, p. 426.

**American Hide & Leather Co.—Projected Consolidation.**—This is the title of the proposed company into which it is hoped to merge about twenty-five of the thirty leading upper-leather tanneries. The company's stock will probably be \$30,000,000 of cumulative 7 per cent preferred with preference also as to assets, and about \$30,000,000 common stock. Some of the properties to be merged are:

W. N. Eisendrath & Co., Grey, Clark & Engle, Lambeau Leather Co. and the Walker Oakley Co., Chicago; William Becker, Milwaukee; Dubois & Van Tassel, Dubois, Pa.; White Bros. & Co., Boston, Mass.; J. B. Weed & Co., Binghamton, N. Y.; Russell, Hubbard & Co., New York; C. Moench & Co., Cattaraugus, N. Y.; J. G. Hoffman & Sons, Wheeling, W. Va.; American Oak Leather Co., Cincinnati, O.; James Callery & Co., Pittsburg, Pa.; J. C. Lappe & Sons Tanning Co., Allegheny, and Hugh Smith (Incorporated), Newark, N. J.

**A. F. Hatch, of Chicago, is stated to be promoting the enterprise; the underwriting is expected to be in the charge of J. & W. Seligman. If the plan goes through the new company will take possession on July 1.**

**American Ice Co.—Ice Company Consolidation.—Incorporated in New Jersey.**—The company's certificate of incorporation was filed in the Hudson County Clerk's office, in Jersey City, on Saturday last. The authorized capital is \$60,000,000, of which \$3,000,000 has already been paid in. This is the company which it was sought to have incorporated in Maine by special act of the Legislature. The intention is said to be to bring under one control all the leading ice companies of the country.—V. 68, p. 185.

**American Maltng Co.—New Stock.**—The item published last week, although submitted for official revision, it seems was misleading as regards the method of paying for the new properties. Their purchase is accompanied by an increase in the preferred stock from \$12,500,000 to \$14,400,000 and in the common from \$13,750,000 to \$14,500,000.—V. 68, p. 471.

**American School Furniture Co.—Incorporated.**—This company was incorporated at Trenton, N. J., on March 13, with a capital stock of \$10,000,000, to manufacture all kinds of school and church furniture. The incorporators are:

Samuel B. Lawrence, Robert P. Barry, Jr., John B. Summerfield, George E. Spencer, Henry M. Haviland, Henry C. Everdell, Armitage Matthews and Leavitt J. Hunt, all of New York, and James C. Young, of Jersey City.

**American Ship-Building Co.—Incorporated.**—This company was incorporated at Trenton, N. J., on March 16 to build and equip ships and docks, to transport goods and passengers, and also engage in manufacturing and mining of all kinds. The authorized capital stock is \$30,000,000, of which \$15,000,000 is 7 per cent non-cumulative preferred. The incorporators are James B. Dill, Fred W. Klein and W. T. Coleman. This is the enterprise reported from Cleveland last week as intended to unite the ship-building and kindred interests of the Great Lakes.—V. 68, p. 471.

**American Smelting & Refining Co.—Underwriting.**—The underwriting of this new project (see last week's CHRONICLE), it is stated, is on the basis of \$1,000 cash for ten shares of preferred and seven shares of common stock. Of the authorized issue of \$65,000,000 capital stock, \$54,000,000 (half preferred) will be issued at once to provide for the purchase of properties and to supply \$7,500,000 working capital. The preferred stock is 7 per cent cumulative and is preferred as to assets as well as dividends. By the present issue of common and preferred, provision is made for acquiring the following concerns engaged in smelting and refining lead and silver ore:

The plants, machinery, tools, patents, appurtenant property, &c., of the following: Omaha and Grant Smelting Co., with plants at Omaha, Denver and Durango; United Smelting & Refining Co., with plants at Chicago, Great Falls and Helena; Colorado Smelting & Refining Co., plant at Pueblo; Pueblo Smelting and Refining Co., plant at Pueblo; Globe Smelting Co., plant at Denver; Germania Smelting Co., plant near Salt Lake City; Hannauer Works, plant near Salt Lake City; Pennsylvania Lead Co., plant at Pittsburgh; Pennsylvania Smelting Co., plant at Salt Lake City; Bl-metallic Smelting Co., plant at Leadville.

Also the capital stock of the Kansas City Smelting & Refining Co., which owns two plants at Leadville (the Arkansas Valley and the Union), one plant near Kansas City, one plant at El Paso, Texas, and large mining and other properties in Mexico.

The net earnings of the above-named properties are stated as having exceeded \$3,100,000 in 1898, and it is thought will be largely increased by the consolidation.—V. 68, p. 471.

**American Soda Co.—Incorporated.**—This company filed articles of incorporation at Trenton, N. J., March 1. The company is authorized to manufacture and deal in bicarbonate of soda, sal soda, caustic soda, alkalies, and all the products deductible from salt. Also to mine salt and refine the same. The capital stock authorized is \$1,000,000, of which \$250,000 is preferred 3 per cent cumulative. The incorporators are James S. Warden, 39 Cortlandt Street; Lewis E. Carr, 71 Broadway; Louis C. Hild and Francis N. Whitney, 36 Wall Street, New York, and Edward A. Mac-Leon, Glen Ridge, N. J.

**American Steel & Wire Co.—First Dividend.**—The company this week declared a first quarterly dividend of  $1\frac{1}{4}$  per cent on its preferred shares. No action was taken on a common stock dividend.

**New Purchase.**—The Schoenberger Steel Company's plant at Pittsburg is reported to have been acquired for \$3,000,000.

It was officially denied yesterday that the company has acquired, or intended to acquire, the Norton Iron Works of Ashland, Ky., or any other works. The properties owned, it is claimed, are particularly well located for economical operation. All of them, it is stated, are running full time and with satisfactory business assured for the rest of the year. The company has sought to be practically independent in all its departments—including the mining of its ore in the Misabe Range, the making of its own pig iron and steel billets and the landing of its product of all kinds (wire, wire rods, barbed wire, etc.) in its own ships at foreign ports. The company owns even its own coal mines and coke furnaces.—V. 68, p. 377.

**American Tin Plate Co.—First Dividend.**—The directors on Thursday declared the first quarterly dividend of  $1\frac{1}{4}$  per cent on the preferred stock.—V. 68, p. 329.

**Anaconda Copper Mining.—Stock on Unlisted.**—The company's stock has been admitted to dealings in the unlisted department of the New York Stock Exchange.—V. 67, p. 953.

**Baltimore & Ohio RR.—Double Track.**—It has been decided to lay a second track on the Central Ohio division from Bellaire to Cambridge, O., a distance of 53 miles, at an estimated cost of \$1,250,000. This portion of the road is much congested with freight at all times and the proposed improvement is in the nature of a necessity.—V. 68, p. 472.

**Bay State Gas—Dropped from Stock Exchange.**—The New York Stock Exchange on Saturday last sent out notices that trading in Bay State Gas Co. of Delaware stock would be discontinued at the close of business that day and thereafter. The Exchange recently declined to admit to dealing the company's \$50,000,000 of new stock, whereupon President J. Edward Addicks notified the Farmers Loan & Trust Co. to cease to act as registrar of the stock in this city. The Exchange's constitution prohibits dealings in shares which have no registry here and consequently it became necessary to exclude the stock from further dealings. Similar action was taken by the Boston Stock Exchange. On both Exchanges the shares had been sold on the "unlisted department." Yesterday it was announced that the Farmers Loan & Trust Co., at the request of the company, had resumed the position of registrar.—V. 68, p. 426.

**Bethlehem Steel Co.—Bethlehem Iron Co.—Negotiations Pending.**—A syndicate is being organized in Philadelphia to finance the Bethlehem Steel Co., a new corporation to be formed to take over and extend the operations of the Bethlehem Iron Co. as was done in the case of the Cambria Iron Co. by the Cambria Steel Co.—V. 64, p. 84.

**Brooklyn Heights RR.—Quarterly.**—This company operates all the lines of the Brooklyn Rapid Transit System. Earnings for the quarter and the six months ending Dec. 31 were:

3 mos. end.	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
Dec. 31—					
1898.....	\$1,439,847	\$553,268	\$20,558	\$535,001	\$37,825
1897.....	1,297,346	530,808	66,203	569,108	27,903
6 mos.—					
1898.....	\$3,104,778	\$1,259,153	\$42,530	\$1,065,858	\$235,825
1897.....	2,712,532	1,127,224	127,803	1,135,563	119,461

Loans and bill payable \$175,000, against \$100,000 on June 30.—V. 67, p. 954; V. 68, p. 472.

**Buffalo St. Mary's & Southwestern RR.—Central New York & Western—Sale of Road.**—The Buffalo St. Mary's & Southwestern RR. has been acquired by parties interested in the Central New York & Western. The properties may be connected and merged. Major John Byrne is now President of both roads.—V. 68, p. 84; V. 63, p. 399.

**Central District & Printing Telegraph Co.—Stock Increased.**—The directors have voted to increase the capital stock from \$3,000,000 to \$4,000,000, to provide for extensions and improvements.

**Central Pacific RR.—Four Notes Paid.**—According to the terms of the recent settlement four of the notes given to the Government were paid at the Treasury Department March 10. The notes amounted to \$11,762,543. See V. 68, p. 378.—V. 68, p. 472.

**Chicago Milwaukee & St. Paul Ry.—Listed.**—The company has decided that for the present the issue of its general mortgage Series A 4 per cent bonds shall stop at No. 24,000, and all of this series bearing higher numbers have been canceled and destroyed. In place of the \$357,000 bonds so destroyed, general mortgage bonds have been issued known as Series B, bearing interest at the rate of  $3\frac{1}{2}$  per cent. There have also been issued or authorized an additional \$4,317,000 of Series B  $3\frac{1}{2}$  per cent bonds, that when listed will make the registry of listed bonds correspond with amount of general mortgage bonds shown in the last yearly report of the company. These \$4,317,000 bonds have been issued as follows: For additional equipment, real estate and second main track, \$1,590,000; in place of bonds canceled \$2,727,000. Of the Series B bonds the New York Stock Exchange has just listed \$2,500,000.—V. 68, p. 129.

**Chicago Rock Island & Pacific Ry.—New Officers.**—The following officers were elected on Thursday: Directors—H. A. Parker, to succeed William H. Truesdale, and Tracy Dows, in place of the late David Dows; First Vice-President, H. A. Parker, to succeed Mr. Truesdale; Second Vice-President, J. M. Johnson.—V. 68, p. 186.

**Chicago & Alton RR.—Over 70 Per Cent of Stock Deposited.**—The United States Trust Co. informs the shareholders that over 70 per cent of the \$22,280,000 (\$3,470,500 of this preferred) capital stock has accepted the terms offered by the agreement, viz., 175 for the common and 200 for the preferred. The time for deposit expires on April 1. The new owners will elect on April 3 a board of directors and officers. See notice in advertising columns.

**Payment for Stock.**—The United States Trust Co. on Wednesday began making payment for the stock. The sum due on the amount of the issue deposited is over \$27,000,000 cash, and about \$24,000,000 of this was placed in the hands of the Trust Company for distribution. An additional 10 per cent of the subscriptions of the underwriting syndicate has been called, payable in April. This makes 70 per cent (\$28,000,000) of the subscriptions called to date.—V. 68, p. 427.

**Cleveland & New Castle RR.—Lake Erie & Western RR.—Project Abandoned.**—According to a press dispatch from Youngstown, Ohio, it is reported in that city that the projected Cleveland & New Castle RR., planned by the late Senator Brice, has been given up, some of its real estate in that city having been already sold. Such action was foreshadowed in the CHRONICLE of Feb. 11 (page 282), the new managers of the Lake Erie & Western deeming it unwise to proceed further with the undertaking. The Lake Erie & Western advanced a considerable sum to the new company (the amount is understood to be about \$800,000), and there will, necessarily, be a large loss in connection with the sale of assets, these consisting chiefly of right of way.—V. 67, p. 1004; V. 68, p. 282.

**Continental Cement Co.—Incorporated.**—This company has been organized by ex Mayor Gilroy and ex Corporation Counsel Clark and associates to control an important part of the cement industry of the United States. The company was incorporated on Tuesday at Trenton, N. J., with a capital of \$10,000,000, with power to increase the same. The company is reported to have acquired 80 per cent of the Portland cement plants of the United States and to have a capacity of 15,000 barrels a day. The incorporators are: W. H. Clark, Thomas F. Gilroy, Ralph Peverley, James C. Young and Frank Stevens.

**Continental Tobacco Co.—On "Unlisted."**—The shares of this company have been admitted to dealings on the unlisted department of the New York Stock Exchange.—V. 68, p. 377.

**Danville & Ohio River RR.—Chicago & Ohio RR.—Indiana Decatur & Western Ry.—Reorganized Company—New Mortgage.**—The Chicago & Ohio RR., Sidell, Ill., to West Liberty, Ill., having been sold under foreclosure, has

been reorganized as the Danville & Ohio River RR., and is now operated as the Ohio River Division of the Indiana Decatur & Western. The reorganized company has filed a mortgage to the Central Trust Company as trustee, to secure bonds to be issued at \$12,000 per mile (aggregating \$1,032,000) on the 86 miles of road built and to be built between Sidell and Olney, Ill. Upon the 77 miles of this as now constructed to near West Liberty the issue will be \$933,000. The Chicago & Ohio River RR. until recently formed part of the Peoria Decatur & Evansville. Most of its securities, however, were in the treasury of the last-named company, and it was arranged that the ownership of the property should pass, as now accomplished, to the Cincinnati Hamilton & Dayton interests, which control the Indiana Decatur and Western.—V. 67, p. 1109, 839.

**Detroit Ft. Wayne & Belle Isle Ry.—Bonds Called.**—The company has called for redemption on April 1, 1899, the \$345,000 Ft. Wayne & Belle Isle Ry. bonds of Oct. 1, 1892.—V. 66, p. 857.

**Dominion Atlantic Ry.—New Securities.**—The stockholders will vote March 30 upon a resolution authorizing the issue of an additional \$100,000 4 per cent second debenture stock.—V. 66, p. 573.

**Easton (Pa.) Transit Co.—Consolidation.**—The street railways and electric lighting companies of Easton, Pa., have been purchased by Stern & Silverman of Philadelphia, Pa. The various companies will be consolidated.

**Empire Steel & Iron Co.—Incorporated.**—This company filed articles of incorporation at Trenton, N. J., on March 14. The authorized capital stock is \$5,000,000, of which \$2,500,000 is preferred 6 per cent cumulative. The incorporators are Edward K. Sumnerwell, East Orange, N. J.; Charles A. O'Mally, Brooklyn, and Arthur L. Bissell of New York.

**Freeport (Ill.) General Electric Ry.—Receiver.**—This company, on March 11, went into the hands of William O. Johnson of Chicago as receiver. The Illinois Trust & Savings Bank is trustee under the mortgage, interest on which is in default.

**General Electric Automobile Co.—Official Notice.**—This company, having its head offices in the Bourse Building, Philadelphia, Pa., makes the following announcement:

This company, controlling basic patents covering the application of electrical power to independently operate vehicles of all descriptions, is now receiving orders for the prompt delivery of "horseless" conveyances of the latest and most approved types. Its specialty is the lightness of its apparatus, with storage battery one-half (½) the weight of other makes, and of greater efficiency.—V. 66, p. 1140.

**Hartford & West Hartford RR.—Receiver.**—J. T. Patterson, a director, has been appointed receiver.—V. 65, p. 1069.

**Havana Electric Ry.—Stock Increased.**—Papers were filed at Trenton, N. J., on March 15 increasing the capital stock from \$5,000,000 to \$10,000,000.—V. 68, p. 85.

**International Air Power Co.—International Power Co.—Rhode Island Locomotive Works.—Change of Name.—Stock Increased.**—The International Air Power Co. on Wednesday filed a certificate changing its name to the International Power Co. and increasing its capital stock from \$7,000,000 to \$8,000,000. Of the original \$7,000,000, \$600,000 was described as 3 per cent cumulative preferred.

**Locomotive Works Transferred.**—The plant of the Rhode Island Locomotive Works was formerly transferred to the International Air Power Co. on Tuesday for a sum said to be \$3,000,000, and the American Wheelock Engine Co. in Worcester, Mass., for \$600,000. It is understood that the bondholders of the locomotive works were given a mortgage on the Worcester plant for \$225,000.—V. 68, p. 282, 130.

**International Navigation Co.—New Mortgage Reported to be for \$20,000,000.**—"Philadelphia Financial News" says:

We understand that the new mortgage, which will be a first lien on the property, is for \$20,000,000; \$2,500,000 will remain in the treasury, about \$5,000,000 will be used in retiring the outstanding first mortgage 6s, which are being exchanged (at 105 and interest) for the new 7s, several millions will be used to retire the \$3,519,000 second mortgage 5s, which are being exchanged at par and interest, and the balance of the \$20,000,000 new issue has been taken by a syndicate, the increase in the issue being, as before stated, for the building of new ships. The syndicate paid, we are informed, par for the new bonds, and also got an allotment of preferred stock at a discount. The amount of the issue of preferred stock was something less than \$10,000,000.—V. 68, p. 331.

**International Traction Co.—Buffalo Street Ry.—Increase of Stock.**—Consolidation.—Articles were filed with the Secretary of State at Trenton, N. J., on Wednesday, increasing the capital stock of the International Traction Co. from \$85,000 to \$15,000,000. Of this amount \$5,000,000 is 4 per cent cumulative preferred. The papers were signed by Benjamin W. Franklin, President, and Charles McVeigh, Secretary. This is the company which will absorb the street railways of Buffalo and Niagara Falls and the lines crossing the river into Canada. J. P. Morgan & Co. have charge of the financial end of the consolidation. No official statement, however, as to the new company or the amount of its mortgage could be obtained yesterday. The current report is that the new mortgage will be \$30,000,000, of which \$11,000,000 of 4 per cents will now be issued, the balance being reserved to retire prior liens and for improvements. Some of the companies mentioned as likely to take part in the consolidation were shown in V. 68, p. 426.

**Majority of Buffalo Ry. Stock Reported Sold.**—The "Buffalo Commercial" of the 11th said: "About two-thirds of the stock of the Buffalo Ry. Co. has already been trans-

ferred to the new owners. A circular is to be issued to the stockholders setting forth to the smaller holders the exact situation."—V. 68, p. 426.

**Jacksonville Tampa & Key West RR.—Opposition Committee.**—A committee, consisting of F. J. Lismann, Chairman, of F. J. Lismann & Co., 30 Broad St., N. Y., Evans R. Dick, of Dick Bros. & Co., Philadelphia, and John D. Howard, of J. Harmanus Fisher & Son, Baltimore, give notice to holders of the first mortgage 6s, due Jan. 1, 1914, that they, at the request of a large number of bondholders, have consented to act as a committee for the purpose of protecting the interest of all the holders and to avoid the heavy burden of a 50 per cent assessment. The Investment Co., 310 Chestnut St., Philadelphia, issues its negotiable receipts for bonds or for certificates issued by the Pennsylvania Company for Insurances on Lives and Granting Annuities. The contention of the committee was stated last week.

**Notice from Winthrop Committee.**—The Committee, Winthrop Smith, Chairman, notifies the holders of the first mortgage bonds deposited with the Pennsylvania Company for Insurances on Lives & Granting Annuities, under agreement with the committee, dated Sept. 30, 1895, that a large majority of the bondholders have assented to its amended plan. To enable those who have not assented to do so, and to unite in the purchase of the property, an extension of time is granted to 3 p. m. March 25, 1899. Those who do not intend to co-operate are at liberty to withdraw their bonds. The committee states that negotiations are pending for sale of the bonds deposited under the amended plan, with prospect of success, and if such sale can be consummated upon terms which, in the judgment of the committee, would be fair to the bondholders, it is hoped that the assessment may be returned in full.—V. 68, p. 473.

**Kansas City Pittsburg & Gulf RR.—Kansas City Suburban Belt RR.—Reorganization Notice.—Deposits Limited to April 1.**—The reorganization committee, Ernst Thalmann, Chairman, gives notice that the committee will undertake to act only for such security holders as shall deposit their bonds and certificates for shares with the Mercantile Trust Co. on or before April 1, in exchange for negotiable receipts for the same. The reorganization plan is expected to be announced in a few days.—V. 68, p. 430, 187.

**Louisville & Nashville RR.—Extension.**—The gap of 40 miles in this company's line between Pineapple and Repton, Ala., is in course of construction, and will give the L. & N. a direct line from Selma to Pensacola. Surveys are reported in progress for an extension north of Selma.—V. 68, p. 232.

**Manhattan Ry.—Resolution.**—On Tuesday the Board of Aldermen adopted the resolution introduced last week by Mr. McCall requesting the State Board of Railroad Commissioners to stop the elevated railroads from storing cars on elevated structures.—V. 68, p. 474.

**Merchants' Distributing & Distilling Co.—Incorporated.**—This company has been incorporated under the laws of New York with a capital of \$5,000,000, of which half will be preferred, to unite, it is said, some large whiskey blending and distributing companies, including Merchants' Distilling Co. of Terre Haute, Ind.; Duffy Malt Whiskey, Roskam; Gerstle Co. of Philadelphia, Gottschalk Company of Baltimore, and Cook & Bernheimer, Luyties & Bros. and E. Heller & Co. of this city.

**Mexican Central Railway Securities Co.—Plan Successful.**—The directors announce that the deposits received insure the success of the company.—V. 68, p. 331.

**Missouri Kansas & Texas Ry.—Consolidation.**—The Texas Legislature, by an almost unanimous vote in both houses, has passed the bill granting the Missouri Kansas & Texas Ry. permission to purchase the Sherman Shreveport & Southern RR. An amendment provides that bonds on the purchased property shall not be issued to exceed the value placed upon the road by the State Railroad Commission.

The bill permitting railroads coming to the borders of the State to lease lines not more than thirty miles in length running from within the State to the border has also been passed.—V. 67, p. 631.

**Montreal Street Ry.—New Stock.**—The company has received permission to increase its capital stock by \$5,000,000, provided that working men's tickets be issued at much reduced rates, good between five and nine a. m. and five and eight p. m. Several extensions are proposed.—V. 67, p. 1000.

**National Car Coupler Co. of Chicago.—Stock Decreased.**—At Springfield, Ill., on March 8, the company certified to a decrease of capital stock from \$1,000,000 to \$250,000.

**National Salt Co.—Plan—Securities Over-Subscribed.**—This company is to be organized under the laws of New Jersey, with authorized capital consisting of non-cumulative 7 per cent preferred stock, \$5,000,000, and common stock, \$7,000,000. The present issue will be: Preferred stock, \$2,400,000; common stock, \$3,500,000. Archibald S. White, President National Salt Co. of West Virginia, has issued, under date of March 11, a circular giving the following particulars regarding the consolidation which the new company will effect:

It is proposed the company shall unite into one corporation the following salt-manufacturing plants, producing about 90 per cent of the evaporated salt from brine by artificial heat manufactured in the State of New York, viz.: Warsaw Salt Co., Bradley Salt Co., Empire Dair Salt Co., W. C. Gontlock and Hawley Salt Co., all of Warsaw, N. Y., Ithaca Salt Co., Ithaca, N. Y.; Kerr Salt Co., Rook Glen,

N. Y.; Le Roy Salt Co., Le Roy, N. Y.; Pavilion Salt Co., Pavilion, N. Y.; Pearl Salt Co., Pearl Creek, N. Y.; Silver Lake Salt Co., Perry, N. Y.; Cayuga Lake Salt Co., Ludlowville, N. Y.; Glen Salt Co., Watkins, N. Y.

And also to acquire the business of the National Salt Co. of West Virginia, which is now acting as a distributor of the product of the above-named manufactories.

In the acquisition of the foregoing properties the new company will issue: Preferred stock, \$2,400,000; common stock, \$3,500,000. The balance of the capital stock, viz., \$2,600,000 of preferred and \$3,500,000 of common stock, will be used solely for the acquisition of modern manufacturing salt plants, the product of other salt properties in the States of Ohio and Michigan, and the general purposes of the company. The above-named manufacturers are to transfer their good-will, plants, patents, trademarks and all their visible tangible real and personal property to the new company, under certificates that they are free of all indebtedness, secured or otherwise. These manufacturers have agreed to take in part payment for their properties about 55 per cent of the purchase price in shares of capital stock of the new company.

The net profits of the above-mentioned properties during the year 1898 on a production of about 300,000 tons of salt were, as certified to by the parties realizing the same respectively, not less than \$450,000. By the proposed union economies in the manufacture, transportation and distribution of the product, it is estimated, will amount to not less than \$150,000 per annum. In case, for any reason, any of the properties above enumerated shall not be acquired as above indicated, then there shall be withheld from the proposed issue of stock as above stated, such an amount as is estimated to be the value of said property or properties so omitted, according to a schedule lodged with the United States Mortgage & Trust Co.

For the purpose of providing funds for such of the manufacturers as prefer to accept cash, a working capital of not less than \$450,000 (consisting of raw material, finished product and cash) and to carry out the plan the Atlantic Trust Company received subscriptions for \$1,150,000, entitling the subscriber to \$1,150,000 of preferred and \$1,150,000 of common stock of the new company when issued by the United States Mortgage & Trust Co. This issue was largely over-subscribed, and the allotment will not exceed 50 per cent of the amount applied for.—V. 68, p. 429.

**New Orleans City RR.—New Orleans Traction Co.—Reorganized Company.**—The New Orleans City RR Co. has been organized with \$7,500,000 of capital stock (of which \$2,500,000 five per cent cumulative preferred) to carry out the plan for the reorganization of the New Orleans Traction system. See plan in our STREET RAILWAY SUPPLEMENT, also V. 67, p. 736. The new directors are:

Albert Baldwin, J. C. Denis, F. T. Howard, C. H. Hyams, R. E. Craig, J. B. Lovett, A. R. Wheeler, J. C. Russell, R. M. Walmsey. Mr. Walmsey is President and Mr. Baldwin Vice-President.—V. 68, p. 429.

**New York Gas & Electric Light, Heat & Power Co.—Edison Electric Illuminating Co. of New York.**—Deposits of Edison Stock.—About 92 per cent of the stock of the Edison Electric Illuminating Co. of New York had been deposited for exchange into the 4 per cent collateral trust bonds of the New York Gas & Electric Light, Heat & Power Co. up to March 10, and large deposits have been made since.—V. 68, p. 429.

**New York & Ottawa RR.—Right of Way.**—A decision has been rendered in the Appellate Division of the Supreme Court in this State on the question of the right of way through the Adirondacks by the New York & Ottawa RR. The decision of Judge Chester against the railroad is reversed, and the case now goes to the Court of Appeals.—V. 66, p. 1189.

**North Jersey Street Ry.—Mortgages Satisfied.**—The two mortgages of the Newark & South Orange Ry. Co., a total of \$2,000,000, have been canceled from record. The bonds of the North Jersey Street Ry. are therefore a first mortgage on the Newark & South Orange road, and also, it is understood, on the Montclair and Caldwell branch road. The North Jersey bonds, it is stated, will begin to draw interest on and after April 1.—V. 68, p. 41.

**Otis Elevator Co.—First Dividend—New Certificates Ready.**—The company has declared a quarterly dividend of \$1.50 per share upon the preferred stock, payable on and after April 15. The temporary certificates of both preferred and common stock may now be exchanged for the permanent engraved certificates at the office of the New Jersey Registration & Trust Co., New York.—V. 67, p. 1161.

**Pacific Coast Co.—Dividends.**—The directors have declared a dividend of  $3\frac{1}{2}$  per cent on the first preferred stock, 2 per cent on the second preferred stock and 1 per cent on the common stock, all payable April 17. The proposition to change the fiscal year to end June 30 instead of Nov. 30 was not approved; but the dividends upon the preferred stock were made semi-annual, and there was set aside from accumulated and current earnings an amount sufficient to pay the full dividends on these stocks for the year ending Nov. 30 next.—V. 67, p. 1161.

**Park Steel Co.—Over-subscribed.**—The subscription books for the preferred stock which were opened at 10 A. M. Tuesday by Baring, Magoun & Co., were closed at 10:05, the issue having been largely over-subscribed.—V. 68, p. 475.

**People's Gas Light & Coke Co. of Chicago.—New Stock Ready.**—Holders of interim certificates representing the \$3,750,000 of increased capital stock may now exchange their holdings for engraved certificates at the Central Trust Co., New York. The regular February dividend of  $1\frac{1}{2}$  per cent on that portion of the recently increased capital stock entitled to the same will be paid on delivery of the new certificates.—V. 68, p. 474, 475.

**Pittsburg Bessemer & Lake Erie.—New Securities Proposed.**—A special meeting of the stockholders is called for May 5, at Pittsburg, to take action on a proposed need of

preferred stock and second mortgage bonds to be used to fund the floating debt and provide funds for the use of the company.—V. 66, p. 428.

**Pittsburg Plate Glass Co.—Annual Meeting.**—At the annual meeting recently President John Pitcairn made an extended report in which he stated that the net profits for last year were \$1,077,770. Many accounts were charged to expense, such as machinery, new electrical equipment and depreciation of Charleroi coal mines, gypsum plant, etc. Pittsburg "Commercial Gazette" quotes further as follows:

The advance in the price of plate glass, which was made in May last, only applied to a portion of the product, as the large trade of the company in German sizes would not stand any advance, owing to the price of foreign plate glass. The company has a large number of contracts which were taken at the low prices prevailing early in the year. Attention is called to the fact that this company is not over-capitalized, as have been many of the recent consolidations, and while it has made material reductions in the cost of manufacturing, it was entirely owing to improved methods and not by reducing the wages of labor. The prospects for the coming year are favorable. The bonded debt was reduced by \$219,000 during the past year. The mortgage on the Ford City property has been satisfied.

**Staten Island Rapid Transit RR.—Second Mortgage Bondholders' Agreement Operative.**—Hailgarten & Co. inform holders of their certificates of deposit for second mortgage 5 per cent bonds that the agreement referred to in circular dated Jan. 27 is now operative. Due notice will be given when the new 4 per cent bonds to be issued pursuant to said agreement are ready for delivery. The agreement was outlined in the CHRONICLE of Jan. 28, 1899, p. 189.—V. 68, p. 333.

**Syracuse Rapid Transit Co.—New President.**—William P. Gannon has been elected President by a combination, it is said, of Cleveland and Philadelphia interests.—V. 67, p. 843.

**Tecumseh Copper Co.—New Stock.**—Of the 60,000 shares of new stock present stockholders, it is stated, will be given the privilege of subscribing for 40,000 shares, share for share, upon the payment of \$8 in cash per share. The proceeds will be used for development work. The remaining 20,000 shares will be held in the treasury.

**Texas & Pacific RR.—St. Louis Iron Mountain & Southern Ry.—Proposed Exchange of Securities.**—Reports are current that the Texas & Pacific seconds will be offered the option of exchanging their holdings for a new Iron Mountain 4 per cent bond at the rate of  $62\frac{1}{2}$  per cent for the incomes. Nothing has yet been decided upon. Kuhn, Loeb & Co. will form the syndicate to underwrite the offer in case it is decided upon.—V. 68, p. 283, 330.

**Third Avenue RR. of New York City.—Quarterly.**—Earnings for the quarter and the six months ending Dec. 31 have been reported.

3 mos. endg.	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance.
Dec. 31.	\$519,756	\$100,375	\$34,020	\$91,069	\$133,326
1898.....	682,208	240,626	13,287	89,144	164,771
6 months.					
1899.....	\$1,112,376	\$411,409	\$56,207	\$183,463	\$284,153
1897.....	1,311,141	539,497	33,406	180,963	411,740

Loans and bills payable, \$9,620,122, against \$9,693,348 on June 30.—V. 68, p. 430.

**Union Pacific RR.—Lands.**—At the foreclosure sale on March 9 Judge Wm. D. Cornish, representing the company (of which he is Vice-President), bought all the lands granted the old company in Wyoming except the coal lands, for \$1,235,922. On March 14 he purchased the coal lands for \$1,235,000.—V. 68, p. 476.

**United Shoe Machinery Co.—First Dividend.**—The board of directors at Boston on March 9 declared a dividend for the current month of one-half of one per cent ( $12\frac{1}{2}$  cents per \$25 share) on the preferred capital stock, and of two-thirds of one per cent ( $16\frac{2}{3}$  cents per share) on the common capital stock, payable April 15, 1899, to stockholders of record at the close of business on March 31, 1899. The official notice says: "It is expected that quarterly dividends will be paid beginning July 15, 1899, at the rate of 6 per cent per annum on the preferred stock, and at the rate of 8 per cent per annum on the common stock."—V. 68, p. 476.

**Union Station Ry. of Buffalo.—New Terminal Station.**—This company has been incorporated with \$50,000 of capital stock (par \$100) for the purpose, it is said, of building a Union railroad station at Buffalo. Its articles of incorporation permit the construction also of 6 miles of railroad from Main St. in Buffalo to Winchester in West Seneca. The directors are the following Buffalo men:

Lewis Stockton, William C. Cornwell, H. H. Littell, Fred. C. M. Lantz, T. Galliard Smith, Frank B. Baird, Frank H. Goodyear, W. Caryl Ely, George Urban, Jr.

**United Traction & Electric Co. (Providence).—New Vice-President—Dividend Increased.**—Meredith J. Perry has been elected Vice President, succeeding John E. Searles, resigned. The dividend rate has been increased from 3 to 4 per cent per annum, the next quarterly dividend being 1 per cent, payable April 1.—V. 65, p. 464.

**West Wisconsin Ry. Co.—Final Notice to Bondholders.**—All persons holding bonds of the company are notified to file the said bonds in the office of F. W. Oakley, Special Master of the Circuit Court of the United States for the Western District of Wisconsin, at Madison, Wisconsin, on or before the 15th day of April, 1899, or be forever precluded from any participation in the fund deposited for the payment of the said bonds.

For other investment news see page 526.

## Reports and Documents.

### CANADIAN PACIFIC RAILWAY COMPANY.

EIGHTEENTH ANNUAL REPORT—FOR THE YEAR  
ENDING DECEMBER 31, 1898.

#### To the Shareholders:

A balance sheet of the affairs of the Company at 31st December, 1898, together with the usual statements and schedules, are herewith submitted.

The gross earnings for the year were.....\$26,133,977 13  
The working expenses were.....15,663,605 51

And the net earnings were.....\$10,475,371 62

Add interest earned on deposits and loans  
and income from other sources.....\$87,966 86

Add interest due from Duluth South Shore & Atlantic Ry. Co. on Consolidated bonds held by your Company against Debenture Stock issued.....\$604,280 00

Less advanced by your Company.....395,280 00

209,000 00

Add interest from Minneapolis St. Paul & Sault Ste. Marie Ry. Co. on bonds held by your Company against Debenture Stock issued.....126,400 00

423,366 86

Deduct Fixed Charges accrued during the year, including interest on Land Bonds (see page 527).....\$10,893,738 48

6,774,321 24

The surplus for the year was.....\$4,124,417 24

From this there has been charged off the half-yearly div. on Preference Stock:  
2 per cent paid 1st October, 1898.....\$235,546 67

And half-yearly dividend on Ordinary Stock:  
2 per cent paid 1st October, 1898.....1,300,000 00

1,535,546 67

Leaving balance.....\$2,588,870 57

From this there has been declared a second half-yearly dividend on Preference Stock of 2 per cent payable 1st April, 1899.....\$237,162 50

And a second half-yearly dividend of 2 per cent on Common Stock payable 1st April, 1899.....1,300,000 00

2. The working expenses for the year amounted to 59.92 per cent of the gross earnings, and the net earnings to 40.08 per cent, as compared with 57.16 and 42.84 per cent, respectively, in 1897.

3. The earnings per passenger per mile were 1.52 cents and per ton of freight per mile 0.76 cents, as against 1.82, and 0.78 cents respectively in 1897.

4. Although the gross earnings for the year were considerably beyond those of 1897, the net earnings show a comparatively small increase. This was due in part to the rate disturbances which continued during nine months of the year, but in greater part to the long continued rains following the harvest in the Northwest, which prevented the threshing and harvesting and marketing of grain until within a few weeks of the close of lake navigation, making it necessary to find employment for the Company's rolling stock in other traffic affording little profit.

5. The passenger rate difficulty which prevailed at the date of the last annual report continued until November, when it was terminated with results not unsatisfactory to your Directors. This settlement resulted in a restoration of the North Bay arrangement with the Grand Trunk Company, and in removing all visible causes of friction with that Company.

6. The Company's ocean and lake steamships, and its telegraph, express, sleeping cars and grain elevators, have continued to add largely to your profits, and together show a handsome increase over any past year.

7. Your property has been maintained in excellent condition throughout and has been much improved in the way of permanent structures and station and terminal facilities, and large additions have been made to its equipment. A detailed statement of the expenditures for permanent improvements and new equipment is appended.

8. Two hundred and eighty miles of your principal lines were relaid during the year with steel rails weighing 73 pounds per yard in place of the original 56 and 60 lb rails.

9. The application of automatic couplers and air brakes to your freight equipment is well advanced, and the end of this heavy expense will soon be reached.

10. The Crow's Nest Pass line, mentioned in the last annual report, was completed to Kootenay Lake in October, too late in the year to affect your year's results as regards earnings.

11. The acquisition of the Columbia & Western Railway, which was authorized at your last Annual Meeting, has been carried out, and a formal lease has been entered into which you will be asked to approve. That railway is now in the possession of your Company, and its extension westward from Robson to the Boundary Creek Mining District (100 miles), to which your assent was also given, is now well advanced, and is expected to be completed about midsummer. This extension, although unusually expensive in construction, is fully justified by the extensive develop-

ments in the districts it is intended to serve, and which are as yet without railway facilities.

12. The Company will acquire, in connection with this line, 1,600,000 acres of land from the Province of British Columbia; but it is probable that this grant will be converted into a cash subsidy.

13. The attractions of the Klondyke drew away many prospectors and miners from Southern British Columbia early in the year, but the development of the mines of the latter district has continued, and the shipments of ores have increased as rapidly as the means of transportation would permit. The much desired shipping facilities afforded by the new Crows Nest Pass line and the facilities which will soon be afforded by the Boundary Creek line, will, without doubt, give a great impetus to ore shipments and to business generally in the Kootenay, Rossland and Boundary Creek districts.

14. Two extensions of branch lines in Manitoba were made during the year, one of the Stonewall Branch northward to Foxton, 19.6 miles, and one of the Pipestone Branch westward 17 miles; the settlement of the country having made both of these necessary.

15. Your Company expended a considerable amount about the beginning of the year in ocean and river steamers for the expected large movement towards the Yukon (Klondyke) country; but unfortunately the steamers could not be got ready in time to take full advantage of such trade as there was; it is however expected that the present season will afford them profitable employment.

16. The Company's hotel at Quebec—the Chateau Frontenac—has been most successful, and a large addition was made to it last year to meet the requirements of the travel it had so largely stimulated. It has not only become profitable in itself, but has from its beginning added materially to your passenger earnings.

17. A final agreement for the sale of the Aylmer Branch (between Hull and Aylmer, 7.5 miles) for \$100,000 has been entered into, subject to your approval.

18. During the year \$919,000 of the 4 per cent Consolidated Mortgage Bonds of the Minneapolis St. Paul & Sault Ste. Marie Railway; \$717,500 of the 5 per cent First Mortgage Bonds of the Montreal & Ottawa Railway, and £120,000 of the 4 per cent First Mortgage Bonds of the Columbia & Kootenay Railway, in respect of interest upon all of which your Company is liable as guarantor, were purchased with the proceeds of £412,191 four per cent Consolidated Debenture Stock, your Company thereby effecting a considerable annual saving.

19. During the year £2,285,000 of 4 per cent Preference Stock was created and sold, and the proceeds have been applied to the purchase of the Alberta Railway, to the completion of the Crow's Nest Pass Line, and towards the expenditures for additions, improvements and equipment, already authorized by the Shareholders.

20. The purchase price of the Columbia & Western Railway, the amount expended on its extension from Robson to Boundary Creek, and the cost of the extensions of the Stonewall and Pipestone Branches, together with a portion of the amount expended on general improvements and equipment, have been temporarily advanced from the Company's surplus.

21. The Duluth South Shore & Atlantic Railway, although still requiring assistance from your Company, is steadily improving in its earnings. The discovery of extraordinary deposits of cheaply mined iron in adjacent districts, six or seven years ago, forced a heavy reduction in the rates of that railway on iron ore, which had been its chief source of earnings; but this loss is being made good by the development of a diversified traffic, and your Directors are encouraged to believe that this line will soon be self-sustaining.

22. The Minneapolis St. Paul & Sault Ste. Marie Railway—the so-called "Soo Line"—earned last year \$413,275 above all its interest and other fixed charges, but necessary expenditures for rolling stock and various additions and improvements prevented the repayment to your Company of any part of the advances made prior to 1897. You will be asked to approve measures for placing this important line on a proper financial footing, such as will admit of its healthy development and insure its continued profitable working.

23. You will be asked to approve expenditures for improvements of permanent way aggregating \$1,150,979: for additional station, yard and terminal facilities at Montreal, Vancouver and other points, \$788,187; for the completion of air brake and automatic coupler equipment, \$305,010; for branch lines to mines in connection with the Crow's Nest line, \$300,000; and to authorize the purchase of rolling stock to the extent of \$1,000,000, as the traffic of the Company may require.

24. Your Directors are glad to be able to report a continued and marked improvement in land sales, which for the year were 348,608 acres for \$1,121,744, as against 199,482 acres for \$665,740 in 1897, and 87,878 acres for \$308,928 in 1896.

25. The position of the land grants will be found in schedule "D" appended to this report.

26. The satisfactory progress which has been made in the settlement of the Northwest is evidenced not only in the largely increased land sales of the Company, but in the number of homesteads taken up from Government lands

in Manitoba and the Territories beyond, which, according to official returns, were 4,848 in 1898 as against 2,406 in 1897.

27. A much larger amount of grain from the Northwestern crops remains to be moved than ever before at this time of the year, and this, together with the most satisfactory agricultural and industrial conditions now prevailing in

Canada, which are due in a great measure to good crops and good prices, and to successful mining, gives promise of a large spring and summer traffic.

For the Directors,

WM. C. VAN HORNE,  
MONTREAL, 27th February, 1899. *President.*

**Westchester Gas & Coke Co.—Incorporated.**—This company has been incorporated to manufacture gas at Mount Vernon, N. Y. The capital is \$200,000 and the directors are : Thomas R. Hodge, Theodore F. Nesbitt and Clarence S. McClellan of Mount Vernon; Thomas L. Holmstrom of Long Island City; L. B. Grant, P. H. Hampson and Thomas S. White of New York.

The company is understood to be a subsidiary corporation of the United Gas Improvement Co., which already owns the Yonkers Gas Light Co., and, it is said, will consolidate it with the Westchester Gas & Coke Co. The latter has filed application for franchises in Mount Vernon, East Chester, New Rochelle, Pelham and Pelham Manor. The consolidated company, it is said, will be known as the Westchester Lighting Co., and will absorb also the following electric light companies: East Chester Electric Co., operating electric light plants at Mount Vernon, New Rochelle, East Chester and Pelham; Port Chester Electric Light Co., operating plants at Port Chester and Rye; Larchmont Electric Co., operating plants at Larchmont, Mamaroneck and New Rochelle, and the White Plains Gas & Electric Co., operating at White Plains.

In last week's CHRONICLE was noted the consolidation, in the interest of the American Gas Co., of several Westchester gas companies under the title of the New York Suburban Gas Co.

**White Pass & Yukon Ry.—Train to Summit.**—On Feb. 20 the company celebrated the completion of its road to the White Pass by sending its first passenger train to the summit. The trip from Skagway, it is said, was made in about two hours, as against a month a year ago. The summit has an elevation of 2,853 feet.—V. 67, p. 1162.

**Yankton Norfolk & Southwestern RR.—Foreclosed.**—Road to be completed.—This property was sold under foreclosure at Pierce, Neb., Feb. 7, and was purchased for \$45,000 by Graham & Roby, railroad contractors at Norwalk. The purchasers confirm the statement that they propose to complete the road, which as originally projected was to be 75 miles long, extending from Norfolk, Neb., north to Yankton, S. D. Of this, 45 miles is graded and 25 miles completed. Work was suspended two years ago, but will be pushed to completion as soon as the sale is confirmed and the weather will permit. A combination wagon and railroad bridge will be built across the Missouri River at Yankton. "Railroad Gazette."—V. 69, p. 860.

—Messrs. J. & W. Seligman & Co. offer at 98 and accrued interest \$1,600,000 Wabash RR. Co., Des Moines Division, four per cent first mortgage bonds. Full particulars regarding this bond issue will be found in the advertisement on another page. It will be noted that after deducting \$250,000 for new rolling stock the issue of bonds is at the rate of \$14,400 a mile, or if the full limit of bonds is issued—viz., \$1,800,000—the rate will be only \$13,150 per mile, after deducting the value of the new rolling stock and the terminals at Quincy. Except for actual construction of new line of road, the Wabash Company has not charged anything to capital account since 1889, all improvements and betterments having been charged to operating expenses. The subscription books will open at 10 o'clock on Wednesday, the 22d inst., and close the same day.

—The Investment Co. of Philadelphia offers at par and interest \$100,000 first mortgage 5 per cent bonds of the Maryland Steel Co. The property, which belongs to the Pennsylvania Steel Co., is situated upon tide-water, about nine miles from Baltimore, and represents a cost of about \$6,000,000. The location on tide-water is an important factor in the value of this plant, as shipments can be made direct upon vessels to foreign countries without railroad freight charges or rehandling between the manufactory and the water transportation. The export business is a large and growing one. Full particulars regarding the offer of bonds will be found in the advertisement on another page.

—The report of the directors of the Bank of British North America, submitted at the sixty third annual meeting on March 7, shows capital and surplus to be £1,300,000 and deposits over two and one-half million pounds. A dividend out of profits for the half-year of 25s. per £50 share was declared, making five per cent paid for the year 1898.

—The subscription books for the \$3,280,000 Toronto Hamilton & Buffalo first mortgage 4 per cent gold bonds closed at 2:45 o'clock at the office of Edward Sweet & Co., the bonds having all been taken.

—Attention is called to the offering of \$300,000 5% first mortgage fifty-year gold bonds of the Raritan River Railway Co. by C. H. White & Co. Their advertisement is on page x.

—Attention is directed to the notice of the Jacksonville Tampa & Key West bondholders' committee, of which F. J. Lisman is Chairman. The notice is advertised on page vii.]

—Rolston & Bass offer a limited amount of Southern Pacific of California 1st gold 6s, underlying lien of Southern Pacific Company. See their advertisement on page vi.

—F. J. Lisman & Co. have just issued their March quotation sheet of unlisted and inactive railroad bonds. Copies can be had at their offices, 30 Broad Street.

—Messrs. Emerson McMullin & Co., No. 40 Wall Street, have issued a new edition of their valuable little book on gas securities.

# The Commercial Times.

## COMMERCIAL EPITOME.

FRIDAY NIGHT, March 17, 1899.

The general business situation has undergone few changes of an important nature. Healthy conditions have been quite generally noted and the movement of merchandise has been on a liberal scale. Unconfirmed rumors relative to an agreement being reached between the opposing interests in the refined sugar business has been a feature of the week. Crop accounts from the West have been in the main of a favorable nature and the fall of needed rains has occurred on the Pacific slope. Preparations for the cotton crop have continued backward. Heavy rains have been reported in some sections of the South, followed by local floods. Advices from the Philippines have reported an aggressive campaign on the part of the American army, and the Filipinos are being subdued. The fact that the rates of interest have advanced slightly has attracted increased attention to the money market.

Lard on the spot has had only a limited sale, but the tone of the market has held steady, prices being without important changes, closing at 5.55c. for prime Western and 5 1/4c. for prime City. The demand for refined lard has been quiet and prices have weakened slightly to 5.80c. for refined for the Continent. Speculation in lard for future delivery has been quiet and there has been a gradual sagging of prices under limited offerings and absence of buyers.

### DAILY CLOSING PRICES OF LARD FUTURES.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
March.....	5.57	5.52	5.52	5.55	5.52	5.50

Pork has been in moderate demand and steady, closing at \$9.99 6 1/2c. for mess, \$10.50 @ 11.50 for family and \$10.25 @ 12.50 for short clear. Cut meats have had a limited sale but at easier prices, closing at 4 1/4c. for pickled shoulders, 5 @ 5 1/4c. for pickled bellies and 7 @ 7 1/4c. for pickled hams. Beef has been in fair demand and steady at \$8.50 @ 9.10 for mess; \$9 @ 10.50 for packet; \$9.50 @ 11.50 for family, and \$14.50 @ 15 for extra India mess in tierces. Tallow has been in fair demand and firmer, closing at 4 3/4c. Oleo-stearine has been in moderate demand and firm at 5 1/2c. Lard stearine has been steady at 6 1/4c. Cotton-seed oil has been quiet and slightly easier, closing at 26 @ 26 1/4c. for prime yellow. Butter has been in limited supply for fancy grade and the close was firm at 14 @ 20c. for creamery. Cheese has continued in demand and firm, closing at 9 @ 12 1/2c. for State factory, full cream. Fresh eggs have declined, closing at 13 1/4c. for choice Western.

Brazil grades of coffee advanced slightly early in the week. The advance, however, was not maintained, a continued full movement of the crop and the large supplies in sight having a weakening influence, closing at 6 1/4c. @ 8.16c. for Rio No 7. Mild grades have been moderately active and steady, closing at 8c. for fair Ccuta. East India growths have been unchanged at 25 @ 25 1/2c. for standard Java. Speculation in the market for contracts has been moderately active, but for the week prices showed no decided changes, closing steady.

The following are final asking prices:

Mar.....	5.05c.	June.....	5.20c.	Sept.....	5.45c.
April.....	5.10c.	July.....	5.25c.	Oct.....	5.55c.
May.....	5.10c.	Aug.....	5.35c.	Dec.....	5.75c.

Raw sugars have been firm but quiet at 4 3/4c. for centrifugal, 96 deg. test, and 3 7/8c. for muscovado, 89 deg. test. Refined sugar had a large sale Thursday, on unconfirmed rumors that the trade war had been settled; to-day prices for softs were lowered 1 16 @ 1 1/4c., closing at 5 1/4c. for granulated. Other staple groceries have been unchanged.

Kentucky tobacco has been quiet, but values have been well maintained. Seed leaf tobacco has been fairly active. Sales for the week were 3,565 cases, as follows: 2,200 cases 1896 crop, Wisconsin Havana, 11 @ 12c.; 290 cases 1897 crop, Wisconsin Havana, 8 3/4 @ 9 1/4c.; 200 cases 1897 crop, Pennsylvania seed, 11 @ 11 1/4c.; 200 cases 1895-96 crops Pennsylvania seed, 12 1/2 @ 13 1/2c.; 50 cases 1897 crop, Gebhardt, 13 1/2c.; 300 cases 1897 crop, Zimmers 16 @ 8c.; 75 cases 1897 crop, State Havana, 12 @ 15c.; 110 cases 1898 crop, New England Havana, forced sweat, spotted, 30 @ 40c.; and 150 cases sundries, 6 @ 16c.; also 800 bales Havana at 90c. @ \$1 in bond, and 100 bales Sumatra at 80c. @ \$1 70 in bond.

Straits tin has had a fair sale and prices have advanced slightly, closing firm at 23.80 @ 23.90c. Ingot copper has weakened slightly, business has been moderately active, closing at 17 1/2c. for lake. Lead has been in better demand and firmer, closing at 4.45 @ 4.50c. for domestic. Spelter has been steady at 6.25 @ 6.35c. for domestic. Pig iron has been in good demand and higher, closing at \$14 @ \$16 for domestic.

Refined petroleum has been unchanged, closing at 7.35c. in bbls., 4.85c. in bulk and 8.10c. in cases. Naphtha steady at 10c. Crude certificates have been neglected: credit balances have been steady at \$1.13. Spirits turpentine has been easier, but the close was steady at 47 @ 47 1/4c. Rosins have been steady at \$1.32 1/2 @ \$1.35 for common and good strained. Wool has been dull and barely steady. Hops have been quiet and unchanged.

## COTTON.

FRIDAY NIGHT, March 17, 1899.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 95,510 bales, against 86,913 bales last week and 91,123 bales the previous week, making the total receipts since the 1st of Sept., 1898, 7,441,939 bales, against 7,815,192 bales for the same period of 1897-8, showing a decrease since Sept. 1, 1898, of 373,253 bales.

Speculation in cotton for future delivery has continued to lack spirit and the drift of prices has been towards a lower basis. The feature of the trading has been continued liquidation in the near-by deliveries by tired outside longs. The movement of the crop has confirmed to some extent the predictions of increased receipts and this has been instrumental in prompting the holders of long cotton to unload. During the middle of the week less favorable weather conditions at the South, the backward preparations for the new crop and talk of a reduced acreage gave a steadier tone to the market, and stimulated some buying of the new crop deliveries for investment account. Subsequently, however, weather conditions at the South became more favorable, and the receipts at interior towns showed increased supplies of cotton coming into sight; this started renewed selling by tired longs to liquidate their accounts, and values turned easier. At the lower prices shorts and Liverpool were buyers of the near-by deliveries, but they sold new crop months, particularly October and January. Today the market was easier under general selling, prompted by weaker foreign advices, a fairly large movement of the crop for the week and favorable weather conditions at the South. The close was steady at a decline in prices for the day of 3/4¢ points. Cotton on the spot has been quiet, prices declined 1-16c. on Monday, advanced 1-16c. on Wednesday, declined 1-16c. on Thursday. The close was quiet and easy at 6 1/4c. for middling uplands.

The rates on and off middling, as established Nov. 16, 1898, by the Revision Committee, at which grades other than middling may be delivered on contract, are as follows.

Fair.....	1 1/4 on	Good Ordinary.....	6 1/2 on
Middling Fair.....	7/8 on	Good Middling Tinged.....	Even
Strict Good Middling.....	3/4 on	Strict Middling Stained.....	7 1/2 on
Good Middling.....	3/4 on	Middling Stained.....	7 1/2 on
Strict Low Middling.....	3/4 on	Strict Low Mid. Stained.....	1 1/2 on
Low Middling.....	7/8 on	Low Middling Stained.....	1 1/2 on
Strict Good Ordinary.....	3/4 on		

On this basis the official prices for a few of the grades for the past week—March 11 to March 17—would be as follows.

UPLANDS.		Sat.	Mon	Tues	Wed	Th.	Fri.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. Continental stocks, as well as those for Great Britain and the afloat, are this week's returns, and consequently all European figures are brought down to Thursday evening. But to make the total the complete figures for to-night (Mch. 17), we add the item of exports from the United States, including in it the exports of Friday only.

	1899	1898	1897	1896
Stock at Liverpool.....	bales. 1,787,000	1,214,000	1,349,000	1,148,000
Stock at London.....	6,000	4,000	3,000	7,000
Total Great Britain stock.....	1,793,000	1,218,000	1,352,000	1,155,000
Stock at Hamburg.....	20,000	9,000	19,000	20,000
Stock at Bremen.....	418,000	335,000	189,000	257,000

Cable states Havre stock has been revised.  
The imports into Continental ports the past week have been 147,000 bales.

The above figures indicate an increase in the cotton in sight to-night of 199,484 bales as compared with the same date of 1898, a gain of 821,591 bales over the corresponding date of 1897 and an excess of 993,960 bales over 1896.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since September 1, the shipments for the week and the stocks to night, and the same items for the corresponding period of 1897-98—is set out in detail below.

TOWNS.	This week.	Since Sept. 1, 98.	Shipments This week.	Stock Mch. 17.	This week.	Since Sept. 1, 97.	Shipments This week.	Stock Mch. 18.

Memphis, Tenn.	1,988	24,035	827	2,719	196	38,114	64	3,754
Nashville, Tenn.	616	83,537	600	2,719	857	46,016	1,010	1,793
Birmingham, Ala.	140	83,231	582	41	465	127,006	503	2,835
Dallas, Texas	23,347	83,231	28,331	85,251	13,746	1,070,554	17,011	45,098
Houston, Texas	1,213	83,597	1,305	3,700	200	58,459	247	800
Total, 31 towns	110,352	6,200,693	110,406	461,755	68,300	5,669,273	87,594	439,842

The above totals show that the interior stocks have decreased during the week 114 bales, and are to-night 21,913 bales more than at the same period last year. The receipts at all the towns have been 43,052 bales more than the same week last year, and since Sept. 1 they are 531,420 bales more than for the same time in 1897-98.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.—We give below a statement showing the overland movement for the week and since Sept. 1, as made up from telegraphic reports received Friday night. The results for the week ending March 17 and since Sept. 1 in the last two years are as follows.

March 17	1898-99.		1897-98.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.
Shipped—				
Via St. Louis	16,542	805,660	14,703	747,762
Via Cairo	7,777	353,373	8,376	316,644
Via Parker			1,998	28,619
Via Rock Island		42,791	400	42,715
Via Louisville	2,524	153,780	2,836	103,111
Via Cincinnati	4,382	133,639	6,599	115,722
Via other routes, &c.	4,467	144,075	3,768	128,801
Total gross overland	35,692	1,033,224	38,589	1,483,414
Deduct shipments—				
Overland to N. Y., Boston, &c.	10,570	432,157	12,169	383,211
Between interior towns	973	30,408	27	21,348
Inland, &c., from South	3,315	55,294	1,143	31,697
Total to be deducted	14,861	520,859	13,339	436,256
Leaving total net overland*	20,831	1,112,365	25,241	1,047,158

\* Including movement by rail to Canada.

The foregoing shows that the week's net overland movement this year has been 20,831 bales, against 25,241 bales for the week in 1893, and that for the season to date the aggregate net overland exhibits an excess over a year ago of 65,207 bales.

In Sight and Spinners Takings.	1893-99.		1897-98.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.

The closing quotations to-day (Friday) at other important Southern markets were as follows.

Athens	6 1/4	Columbus, Miss.	5 1/8	Nashville	5 1/8
Atlanta	5 1/8	Eufaula	5 7/8	Natchez	5 1/8
Charlotte	6 1/8	Little Rock	5 7/8	Raleigh	5 1/8
Columbus, Ga.	5 1/8	Montgomery	5 1/8	Shreveport	5 1/8

WEATHER REPORTS BY TELEGRAPH.—Advices to us by telegraph from the South this evening denote that rain has fallen in most localities during the week, and that in portions of Alabama and Mississippi the precipitation has been heavy, interfering with farm work. In Texas the weather has been satisfactory as a rule, and much progress has been made with crop preparations. In the northwestern part of the State, however, rain is badly needed. In most sections work is now under way, but generally is very backward. The Mississippi River is two-tenths of a foot above the danger line at Memphis, and rising.

Galveston, Texas.—On the whole the weather during the week has been very favorable for farm work, and much plowing and planting has been accomplished except in Northwest Texas, where rain is still badly needed. We have had rain on four days of the week, the precipitation reaching fifteen hundredths of an inch. The thermometer has ranged from 56 to 72, averaging 69.

Palestine, Texas.—Rain has fallen on five days of the week, to the extent of nineteen hundredths of an inch. Average thermometer 57, highest 76 and lowest 35.

Corpus Christi, Texas.—There have been showers on two days during the week, to the extent of twenty hundredths of an inch. The thermometer has averaged 68, the highest being 80 and the lowest 56.

San Antonio, Texas.—There has been but a trace of rain during the week. Minimum temperature 50.

New Orleans, Louisiana.—We have had rain on three days of the week, the precipitation being twenty-eight hundredths of an inch. The thermometer has averaged 63.

Shreveport, Louisiana.—Rain has fallen on three days of the week, to the extent of two inches and sixty hundredths. Average thermometer 59, highest 76 and lowest 42.

Columbus, Mississippi.—It has rained on four days during the week, with rainfall to the extent of seven inches and fifty three hundredths. The thermometer has averaged 58, the highest being 82 and the lowest 30.

Leland, Mississippi.—We have had rain during the week, the precipitation reaching five inches and seven hundredths. The thermometer has averaged 53, ranging from 37 to 72.

Vicksburg, Mississippi.—Rain has fallen on four days of the week, to the extent of three inches and fourteen hundredths. The thermometer has ranged from 46 to 80, averaging 62.

Meridian, Mississippi.—It has rained heavily on three days of the week. The preparation of ground has been delayed and planting will be late.

Little Rock, Arkansas.—There has been rain on two days of the week, the precipitation reaching one inch and twenty-five hundredths. The thermometer has averaged 44, the highest being 64 and the lowest 24.

Helena, Arkansas.—The weather is now spring-like. Considerable cotton yet remains to be picked. We have had rain on three days of the week, on one of which heavy, to the extent of one inch and fifty-three hundredths. The thermometer has averaged 50.5, ranging from 33 to 68.

Memphis, Tennessee.—Picking and marketing are making good progress. Farming preparations are active. The river is thirty-three and two-tenths feet on the gauge, or two-tenths of a foot above the danger line, and rising. There has been rain on four days the past week, the rainfall reaching ninety two hundredths of an inch. The thermometer has ranged from 37 to 73, averaging 54.8.

Mobile, Alabama.—Reports from the interior indicate that farm work was interrupted during the early part of the week by heavy rains. Some progress has been made the latter part of the week but preparations are seriously backward. The sales of fertilizer tags in Alabama and Mississippi to March 1, as officially reported, are about 40 per cent less than last year. There has been rain on four days of the week, the precipitation reaching one inch and sixty-eight hundredths. The thermometer has averaged 64, the highest being 75 and the lowest 52.

Montgomery, Alabama.—We had rain on four days in the early part of the week, but since the weather has been delightful and planters are hard at work preparing for the

next crop. The rainfall reached fifty-five hundredths of an inch. The thermometer has averaged 64, ranging from 49 to 80.

**Selma, Alabama.**—Farming operations are very backward. We have had rain on three days of the week, the precipitation reaching one inch and seven hundredths. The thermometer has ranged from 43 to 81, averaging 63.

**Madison, Florida.**—It has rained on one day of the week, the rainfall being twenty hundredths of an inch. Average thermometer 71, highest 85 and lowest 59.

**Savannah, Georgia.**—There has been rain on two days during the week, the rainfall reaching eighty hundredths of an inch. The thermometer has averaged 66, the highest being 88 and the lowest 49.

**Augusta, Georgia.**—We have had rain on three days of the past week, to the extent of fifty-two hundredths of an inch. The thermometer has averaged 69, ranging from 45 to 73.

**Charleston, South Carolina.**—Rain has fallen on four days of the week, to the extent of sixty-one hundredths of an inch. The thermometer has ranged from 51 to 76, averaging 64.

**Stateburg, South Carolina.**—Farm work is very backward. It has rained on three days of the week, the rainfall reaching thirty-two hundredths of an inch. Average thermometer 59.8, highest 77 and lowest 46.

**Greenwood, South Carolina.**—There has been rain on three days of the week, the rainfall reaching ninety-five hundredths of an inch. The thermometer has averaged 53, the highest being 68 and the lowest 44.

**Wilson, North Carolina.**—It has rained on two days of the week, the rainfall reaching one inch and seventy seven hundredths. The thermometer has averaged 54, ranging from 42 to 73.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 8 o'clock March 16, 1899, and March 17, 1898.

**EUROPEAN COTTON CONSUMPTION TO MARCH 1.**—We have received to-day (Friday) by cable Mr. Ellison's figures brought down to March 1. We have also received the revised totals for last year and give them for comparison. The spinners' takings in actual bales and pounds have been as follows:

October 1 to March 1.	Great Britain.	Continent.	Total.
For 1898-99			
Takings by spinners...bales	1,652,000	2,170,000	3,822,000
Average weight of bales lbs	511	491	500.0
Takings in pounds.....	844,372,000	1,065,470,000	1,909,842,000
For 1897-98.			
Takings by spinners...bales	1,537,000	2,173,000	3,710,000
Average weight of bales lbs	507	486	500.9
Takings in pounds.....	779,411,000	1,078,184,000	1,857,595,000

According to the above, the average weight of the delivered in Great Britain is 511 pounds per bale this season, against 507 pounds during the same time last season. The deliveries average 491 pounds, against 496 pounds last year, and for the whole of Europe the deliveries average 500 pounds per bale against 500.3 pounds last season. Our dispatch also gives the full movement for this year, and last year in bales of 500 pounds.

Oct. 1 to March 1.	1898-99.			1897-98.		
	Great Britain.	Continent.	Total.	Great Britain.	Continent.	Total.
Sales of 500 lbs. each, 000s omitted.						
Spinners' stock Oct. 1.	56.	493.	549.	31.	183.	214.
Takings to March 1..	1,689.	2,131.	3,820.	1,559.	2,156.	3,715.
Supply.....	1,745.	2,624.	4,369.	1,590.	2,339.	3,929.
Consumption, 21 weeks	1,449.	1,908.	3,355.	1,336.	1,922.	3,258.
Spinners' stock Mch. 1	298.	718.	1,016.	204.	517.	721.
Weekly Consumption, 00s omitted.						
In October.....	69.0	90.0	159.0	66.0	86.0	152.0
In November.....	69.0	90.0	159.0	66.0	86.0	152.0
In December.....	69.0	90.0	159.0	66.0	86.0	152.0
In January.....	69.0	92.0	161.0	66.0	88.0	154.0
In February.....	69.0	92.0	161.0	66.0	88.0	154.0

The foregoing shows that the weekly consumption is now 161,000 bales of 500 pounds each, against 154,000 bales of like weights at the corresponding time last year. The total spinners' stocks in Great Britain and on the Continent have increased 125,000 bales during the month, and are now 233,000 bales more than at the same date last season.

**SEA ISLAND COTTON MOVEMENT.**—We have received this (Friday) evening by telegraph from the various ports the details of the Sea Island cotton movement for the week. The receipts for the week ending to-night (March 17) and since Sept. 1, 1898, the stocks to-night, and the same items for the corresponding periods of 1897-98, are as follows.

Receipts to March 17.	1898-99.		1897-98.		Stock	
	Takings week.	Since Sept. 1.	Takings week.	Since Sept. 1.	1899	1898.
Savannah.....	290	49,674	229	56,197	8,898	15,633

Total.....	127	85	212	17,722	7,773	25,495	435	30,960
Total 1897-8	1,523	167	1,692	25,135	6,623	31,758	307	27,255

Quotations March 17 at Savannah, for Floridas, common 9c.; medium fine, 10c.; choice, 13c.

Charleston, Carolina, medium fine, 18c.; fine, 20c.; fully fine, 22 to 25c.; extra fine, 40 to 50c.

**NEW ENGLAND MILL SITUATION—WAGES INCREASED.**—Further notices have been given the past week by mills in New England of a restoration on April 3 of the wages ruling before the cut down of January, 1893. The number of operatives affected now reaches considerably more than 100,000.

**JUTE BUTTS, BAGGING, &c.**—The market for jute bagging has been devoid of animation during the past week and prices are nominal at  $5\frac{1}{2}$ ¢@ $5\frac{3}{4}$ ¢. for  $1\frac{1}{4}$  lbs. and  $6\frac{1}{2}$ ¢. for 2 lbs., standard grades. Jute butts continue dull as a rule, although some business is reported to have been put through. Quotations are 1.05¢. for paper quality and  $1\frac{1}{2}$ ¢. for mixing to arrive.

**SHIPPING NEWS.**—As shown on a previous page, the exports of cotton from the United States the past week have reached 62,254 bales. The shipments in detail, as made up from mail and telegraphic returns, are as follows:

	Total bales.

## BREADSTUFFS.

FRIDAY, March 17, 1899.

Early in the week there was a steadier market for wheat flour, sellers holding for higher prices in sympathy with the advance in grain. Business, however, was quiet, as buyers were disposed to hold off. Subsequently, however, reflecting the decline in wheat values, there developed an easier tone, and to sell, lower prices have had to be accepted. Rye flour has continued to meet with only a jobbing sale, but values have been fairly well maintained. Buckwheat flour has advanced, but the market has been largely a nominal one, as the season is practically over. Corn meal has been quiet and easier with the grain.

Speculation in wheat for future delivery has been moderately active, but the tone has been unsettled. Immediately following our last report prices weakened slightly under moderate offerings, prompted by the Government report showing larger reserves in farmer's hands than had generally been expected; then came an upward turn to values. Crop damage reports were received from the West and Southwest. Colder weather was reported throughout the West. Foreign advices were stronger, based on reports of damage by drought to crop in India, all of which had a tendency to make shorts nervous, and they bought to cover contracts. Wednesday the market again turned easier. Foreign advices were disappointing, crop accounts from the West were, as a rule, of a more favorable nature, and a continued absence of a cash demand prompted increased pressure to sell. Thursday there was a decidedly easier market, prices in the local market showing a decline of  $1\frac{1}{2}$ ¢@ $2\frac{1}{2}$ ¢. Advices from California reported improved crop prospects as a result of the fall of needed rains, foreign advices were easier, the movement of the crop was fairly large, crop accounts from the West were generally of a more favorable nature, and the sentiment of the trade was bearish. There was also considerable liquidation by tired longs. Business in the spot market has been quiet. Shippers have reported comparatively few orders, and prices have declined with futures. Shipments from Argentine are increasing and this naturally has had a tendency to lessen the demand in the foreign market for American wheat. To-day the market was again easier, prices declining  $\frac{3}{4}$ ¢@ $1\frac{1}{2}$ ¢. under free selling by demoralized longs, prompted by weaker foreign advices and the improved crop accounts from the West. Business in the spot market was more active. Prices have declined to a point where shippers could come in. Sales reported for export here and at outports were 400,000 bushels.

Indian corn futures have been moderately active, but the tendency of prices has been towards a lower basis. The large reserves in farmers' hands—800,500,000 bushels, according to the Government report—prompted liquidation by longs at the opening of the week. Subsequently, however, there was a slight recovery, in sympathy with the advance in wheat. At the close of the week the market again turned easier. There was renewed selling by longs to liquidate their accounts, foreign advices were easier, and the decline in wheat values had a depressing influence. Business in the spot market has been fairly active, as exporters have buyers at a decline in prices. Clearances from the seaboard have been large. To-day the market was steady. The spot market was moderately active and steady. Sales for export here and at outports were 240,000 bushels.

Oats for future delivery at the Western market have been quiet. At the opening of the week prices were lower under a full movement of the crop and liquidation by longs. Sympathy with the improvement in other grains then turned the market steady, but during the latter part of the week prices again weakened. The crop movement was fairly large and there was aggressive buying. The local spot market has been quiet and prices have weakened. To-day the market was quiet, and No. 3 mixed on the spot was easier under fairly free offerings.

THE DRY GOODS TRADE

NEW YORK, FRIDAY, P. M., March 17, 1899

The volume of business transacted in the primary market during the past week does not compare favorably with the results of several weeks immediately preceding, nor does there appear to have been as much tentative bidding in progress. The quieter condition thus denoted is a natural result of the heavy business recently transacted in cotton goods, of the difficulty now of securing ready supplies, and the material advance in prices. It does not come upon sellers unexpectedly, and has not affected the general good tone of the market in even a slight degree. Brown and grey cottons are too well sold ahead for a temporary lull in buying to tell upon prices, and finished goods are still relatively behind in their upward progress. In no direction does there appear to be any surplus of merchandise; most buyers still complain of scarcity. There have been few advances quoted this week, but all hitherto recorded are strongly upheld. The woolen goods division has been without special feature. Reports from all quarters tell of an excellent distribution from second hands; keeping up. Collections are satisfactory.

WOOLEN GOODS.—Reports of projected combinations have occupied much of the attention of the woolen trade, but up to the present time there has been nothing definite beyond the American Woolen Company mentioned last week. The regular market has continued quiet enough to allow of plenty of time for gossip. Buyers have been in moderate attendance only, and their requirements have not been difficult to fill. The best business relatively has been in the finer grades of worsted fabrics, the most recently opened, several lines of which have sold fairly well. Clays, serges and medium and low grade staples and fancies have ruled quiet throughout. The price situation shows no

material change. There has been a quiet demand only for overcoatings and cloakings at previous prices. Flannels are in more liberal demand, with the new season opening; blankets quiet. Dress goods are firm in staple worsteds, which are scarce; otherwise inclined to favor buyers.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending March 13 were 5,737 packages, valued at \$177,370, their destination being to the points specified in the tables below:

NEW YORK TO MARCH 13	1899.		1898.

\* From New England mill points direct.

The value of the New York exports for the year to date has been \$3,056,236 in 1899, against \$2,031,538 in 1898.

Coarse colored cottons, which have lagged behind other divisions of the market, are now moving upward, and advances are reported during the week of ¼c. to ½c. in denims, plaids and hickory stripes. Other descriptions, although not quotably higher, are tending against buyers. Heavy brown cottons have ruled quiet on both home and export account, but very firm in price. Light-weights also quieter but firm. Dacks have an upward tendency. There has been a moderate demand for bleached cottons, with prices well maintained in all grades. Several lines of wide sheetings are advanced 5 percent. Cotton flannels and blankets selling well. Kid-finished cambrics firm. The demand for printed calicoes has ruled quieter than of late, but stocks in first hands are light and prices very firm throughout. All ginghams are scarce, with an upward tendency. Domets and other napped dress fabrics selling well for fall at advances of ¼c. to ½c. per yard. Print cloth quiet in both regular and odds, but firm on basis of 2½c. for the former.

FOREIGN DRY GOODS.—Business has ruled quiet all around at first hands, but jobbers have sold foreign merchandise liberally. Dress goods, silks, ribbons and linens firm for both quick and forward deliveries.

IMPORTATIONS AND WAREHOUSE WITHDRAWALS OF DRY GOODS.

The importations and warehouse withdrawals of dry goods at this port for the week ending March 16, 1899, and since January 1, 1899, and for the corresponding periods of last year are as follows:

**Brown Valley (Cal.) Irrigation District.—Bonds Illegal.**—In the fall of 1898 suit was instituted in the Superior Court of Yuba County by the Board of Directors of this district, under what is known as the Confirmation Act, the purpose of the suit being to procure a decree of the Court confirming the legality of the organization of the district and the validity of the \$140,000 6% bonds outstanding. Judge Gray, before whom the case was heard, recently rendered a decision declaring the district to be illegally incorporated and that the bonds were illegally issued and therefore void. Judge Gray declares that almost every step in the organization of the district and the issuance and sale of the bonds was irregular. According to the San Francisco "Chronicle" the decision is one of great importance, owing to the fact that there are at this time a large number of irrigation districts in California organized under the Wright Act which have issued bonds in practically the same manner as those issued by the Brown Valley Irrigation District.

**Delaware.—Legislature Adjourns.**—On March 13, 1899, the State Legislature adjourned.

**Gunnison County, Col.—Bonds Legal.**—The United States Supreme Court recently declared valid bonds issued in 1882 for the purpose of funding outstanding warrants. Interest was paid on these bonds until 1886, when the county ceased redeeming the coupons, claiming that in issuing the bonds it had incurred an indebtedness not authorized by the Constitution of Colorado or by the statute referred to in the text of the bonds. The suit was instituted by E. H. Rollins & Sons, Boston, and the U. S. Court at Denver declared the bonds invalid. The Circuit Court of Appeals remanded the case for a new trial. The Supreme Court now declares that the lower courts erred in finding for the defendant, holding that as the bonds have on their face a positive declaration that they were issued in compliance with all the provisions of the Constitution and statutes, the county cannot now plead that the Constitution was violated in their issue.

**McKinley County, Okla.—County Created.**—The State Legislature has passed a bill creating McKinley County out of a portion of Wood County.

**New Hampshire.—Legislature Adjourns.**—The Legislative session of the State closed on March 11, 1899.

**New Jersey.—County Bonds Authorized.**—Senate Bill No. 1, authorizing an additional issue of bond to the amount of \$25,000 in counties for the erection of county asylum buildings, has been signed by the Governor.

**New Mexico.—Refunding Bond Bill.**—Hon. H. O. Bursum, Chairman of the Committee on Finance, writes us that the Council has passed his Bill No. 58, providing for the refunding of the bonded indebtedness of the Territory of New Mexico and the various counties and municipalities therein. This bill, Mr. Bursum says, will no doubt pass the House, and as a result of its passage there will be something like \$2,000,000 county and municipal bonds to be sold or refunded.

The bill provides (sections 1 to 13) that any holders of bonds or deficiency indebtedness of the Territory of New Mexico shall have the right to surrender the same and to receive in exchange general refunding bonds of the Territory. These bonds will bear 4% interest, payable March 1 and September 1, and will mature 30 years from date of issue, subject to call after 20 years. Sections 14 to 31 authorize and require every county and municipality to compromise and refund its matured and maturing indebtedness, evidenced by outstanding bonds, interest coupons, judgments or other lawful outstanding indebtedness, whenever the holders and owners thereof shall consent, and to issue new bonds in payment or exchange at par. These bonds are to be issued in sums of \$100 or multiples thereof. They also bear 4% interest, payable March 1 and September 1 in New York City. Principal will mature 30 years from date of issue, subject to call after 20 years. Section 23 of the above law permits any lawful indebtedness of any county contracted prior to March 1, 1897, and not maturing until after August 1, 1897, and also school warrants outstanding and approved by the proper authorities to be funded into bonds under the provisions of this Act.

**North Carolina.—Legislature Adjourns.**—The Legislature of this State concluded its work on March 8, 1899.

**Oklahoma.—Legislature Adjourns.**—The Territorial Legislature concluded its session on March 11, 1899.

**Summit, N. J. City Charter Granted.**—A bill has passed the Legislature incorporating the township of Summit as a city.

**Texas.—Permanent School Fund Investments.**—We are advised that a bill has passed the Lower House of the Texas Legislature enlarging the power and authority of the State Board of Education. This bill permits the Board to invest

the permanent school fund, now amounting to several millions of dollars, in city bonds, in addition to other investments heretofore permitted. The bill also gives the Board authority to pay such premium as it thinks proper for city and county bonds, whereas under the existing law the Board cannot pay more than par. There is no doubt, we are informed, that the bill will pass the Senate at an early day, and become a law, when it will practically shut out all outside investors in these securities.

**Tonawanda, N. Y.—Against Annexation.**—At the election held March 14, 1899, the citizens of this place voted against the question of annexing the town to the city of Buffalo. The vote was 626 for to 633 against.

**United States.—Defaulted State Bonds.**—A dispatch from Washington states that the following proviso was inserted in the conference report on a bill amending the law providing for the reimbursement of the states for equipping troops for the Spanish war. The bill provides that the expenses should be paid notwithstanding any "unsettled accounts, claims or indebtedness of the United States against such States, and without prejudice to such unsettled accounts."

Provided, That when such unsettled account is caused by a default in payment of the principal or interest on any bonds or stock issued or guaranteed by any State, the ownership of which is vested in the United States, the Secretary of the Treasury be, and he is hereby, authorized and directed to institute any act or proceeding which he may consider advisable against such State or its representatives to secure the payment of the principal and interest of said bonds or stocks.

This was adopted by the two Houses, it is stated, in the closing hours of the session, and became a law.

The bonds affected by this legislation (all formerly part of Indian trust funds except \$538,000 Arkansas bonds belonging to the Smithsonian Institution fund) aggregate \$2,074,666. They were issued by these States: Arkansas, \$793,000; Florida, \$132,000; Louisiana, \$37,000; North Carolina, \$58,000; South Carolina, \$125,000; Tennessee, \$335,666; Virginia, \$594,000.

**Utah.—Legislature Adjourns.**—The Legislature of this State was declared adjourned at midnight March 9, 1899. The members failed to elect a United States Senator.

**Washington.—Legislature Adjourns.**—The State Legislature adjourned on March 9, 1899.

## Bond Calls and Redemptions.

**Bexar County, Texas.—Bond Call.**—John W. Tobin, County Treasurer, has called for payment March 25, 1899, at the National Park Bank, New York City, the following bonds:

Ridge bonds Nos. 1 to 49, issued March 1, 1892, and in denomination of \$500. Bridge bonds Nos. 151 to 198, inclusive, issued June 10, 1892, and also in denomination of \$500.

Interest will cease on March 25, 1899.

The official notice of this call will be found among the advertisements elsewhere in this Department.

**Los Angeles County, Cal.—Bond Call.**—Mark G. Jones, County Treasurer, has called for payment the following bonds: Funded debt bonds of 1882, Nos. 33 and 34; issue of 1885, Nos. 181 to 196, inclusive; court-house issue of 1887, Nos. 69 to 73, inclusive; court-house bonds of 1890, Nos. 60 to 63, inclusive. Denomination of all the above bonds is \$1,000.

**Salline County, Salt Pond Township, Mo.—Bond Call.**—R. E. L. Smith, Clerk of the County Court, has called for payment May 1, 1899, at the Third National Bank, St. Louis, Salt Pond Township bonds Nos. 7 and 8, issued Aug. 1, 1890.

**South Omaha, Neb.—Warrant Call.**—City Treasurer F. A. Broadwell has called for payment the following warrants: Interest fund up to and including registered warrant No. 259; judgment, No. 250; police, No. 214; fire and water, No. 153; public light, No. 60; street repair, No. 135; salary, No. 349; engineer, No. 35; general, No. 197; school, No. 1941.

## Bond Proposals and Negotiations this week have been as follows:

**Antelope, Wasco County, Ore.—Bond Offering.**—Proposals will be received until March 31, 1899, for \$4,000 6% 5-10-year (optional) bonds. Securities are in denomination of \$500.

**Atlanta, Ga.—Bond Election.**—An election will be held April 12, 1899, to vote on the question of issuing \$200,000 4% gold bonds for the extension of water mains. Securities if authorized will be in denomination of \$1,000, with the interest payable semi-annually. Principal will mature in 30 years from date of issue.

**Avondale, Ala.—Bonds Proposed.**—This place is considering the issuance of \$25,000 water-works and electric-light bonds.

**Bildeford, Me.—Loan Negotiated.**—On Feb. 21, 1899, this city negotiated a loan of \$25,000, in anticipation of taxes, with Messrs. Curtis & Motley, Boston, at 3 1/4%. Loan matures Oct. 13, 1899.

**Blooming Prairie, Minn.—Bond Election.**—An election will be held April 4, 1899, to vote on the question of issuing \$3,000 5% water-works bonds.

**Bristol, R. I.—Loan Authorized.**—At a recent town meeting, the Treasurer was authorized to borrow \$40,000 in anticipation of the collection of taxes.

**Brooks (Township), Newaygo County, Mich.—Bill Legalizing Bonds Signed.**—The Governor has signed the bill legalizing the bonds of this township.

**Buffalo, N. Y.—Bond Issue.**—The issuance of a \$4,608 61 3/4 judgment bond, dated March 1, 1899, and maturing July 1, 1900, has been authorized. The bond has been awarded to the City Comptroller for investment in the Park Bond Redemption Sinking Fund.

**Cambridge, Mass.—Bonds Proposed.**—The House Committee on Cities has reported a bill permitting this city to issue \$500,000 4% additional park bonds. These securities cannot be sold to the amount of more than \$100,000 in any one year and will mature in not more than forty years.

**Canton, Ohio.—Bids.**—On March 11, 1899, the following bids were received for the \$8,500 current expense bonds:

For a 3 1/2% Bond—	Premium.	For a 4% Bond—	Premium.
Briggs, Todd & Co., Cincinnati. \$142 50		Central Savings Bank, Canton. \$122 50	
Seaman & May, Cincinnati. 139 00		Dime Savings Bank, Canton. 122 00	
Foster, Holman & Co., Cincinnati. 114 99		For a 5% Bond—	
Lamprecht Bros., Co., Cleveland. 111 60		W. J. Hayes & Sons, Cleveland. 127 00	
New Nat. Bank, Columbus. 67 10			
Denison, Prior & Co., Cleveland. 44 63			

Principal will mature March 1, 1900. For further description of bonds see CHRONICLE Feb. 18, 1899, p. 343.

**Cape May, N. J.—Bond Offering.**—Proposals will be received until 7 P. M. March 20, 1899, by H. F. Douglass, Recorder, for \$13,000 5% refunding bonds. Securities are in denominations of \$100 and \$500, five being for \$100 and twenty-five for \$500. They bear date April 1, 1899; interest will be payable April 1 and October 1 at the City Treasurer's office. Principal will mature April 1, 1924. A certified check for 5% of the amount of bid must accompany proposals.

**Carthage, Mo.—Bond Offering.**—Proposals will be received until 7:30 P. M. March 21, 1899, by R. Lundy, City Clerk, for \$25,000 electric-light plant bonds. Securities are in denomination of \$100, dated May 1, 1899. Interest will be payable May 1 and November 1 at the Continental National Bank of St. Louis. Principal will mature May 1, 1919, subject to call \$10,000 after five years, \$10,000 after ten years and \$5,000 after fifteen years. These bonds were advertised for sale on Dec. 28, 1898, but postponement was deemed advisable pending a suit brought by the Gas Company of the City of Carthage to have the issue enjoined. The suit referred to was made returnable at the June term 1899. The city applied, however, for a hearing in the December term. This application was granted, but the plaintiff's counsel resisted, contending that the Court had no authority to set the case down for the December term. The Court overruled the motion, and when the trial was reached the plaintiff's attorneys failed to answer ready, whereupon the case was dismissed for want of prosecution. A motion to set aside this order of dismissal was overruled and an affidavit for appeal to the Court of Appeals has been filed. Meanwhile citizens of this place have pledged \$10,000 guaranteeing the validity of the issue, and the bonds are now being offered for sale under that condition.

**Cohoes, N. Y.—Bond Sale.**—On March 15, 1899, the Cohoes Savings Institution was awarded \$10,650 50 and the Mechanic's Savings Bank \$5,000 of the \$15,650 50 3 1/2% public-improvement bonds advertised for sale on that date. Bonds mature \$5,000 on Jan. 1, 1920 and 1930, and \$5,650 January, 1, 1931.

**Columbus (Ohio) School District.—Bond Offering.**—Proposals will be received until 12 M. March 28, 1899, by the Finance Committee of the Board of Education for \$12,000 4% school bonds. Securities will be in denomination of \$1,000; interest will be payable March 1 and September 1 at the National Park Bank, New York City. Principal will mature March 1, 1917. These bonds are a part of an issue of \$75,000 which was authorized under Section 8994, Title 3, Chapter 8, Revised Statutes of Ohio, and the proceedings of the Board of Education of said district thereunder, Jan. 26, 1897. The official circular states that \$47,000 of these bonds were sold to the Ohio National Bank, Columbus, on March 9, 1897, and all questions as to legality, etc., were satisfactorily settled at that time. The sale of the above \$12,000 bonds was authorized by resolution of the Board of Education adopted March 7, 1899.

**Concord, N. H.—Loan Authorized.**—A loan of \$50,000 has been authorized in anticipation of the collection of taxes.

**Council Bluffs (Iowa) School District.—Bonds Voted.**—At the election held March 1, 1899, citizens of this district authorized the issuance of \$65,000 high school bonds and \$2,000 bonds for a new school house.

**Cullman, Ala.—Bond Offering.**—Proposals will be received until April 1, 1899, by this city for \$35,000 gold water-works, electric-light and street-improvement bonds. Interest at not more than 5% will be payable semi-annually at Cullman, and the principal will mature 25 years from date of issue, subject to call after five years.

**Dayton (Ohio) School District.—Bond Offering.**—Proposals will be received until 12 M. April 13, 1899, by the Committee on Finance and Accounts at the office of Wm. G. Haensler, Clerk Board of Education, for \$50,000 4% coupon school bonds. Securities will be in denomination of \$1,000, dated May 1, 1899; interest will be payable May 1 and Nov. 1 in the City of New York. Principal will mature May 1, 1918. Bonds are issued pursuant to Section 3994, Revised Statutes of Ohio. Proposals must be accompanied by a certified check on a national bank for 5% of the gross amount of said bonds, payable to the order of the Clerk of the Board of Education.

**Demopolis, Marengo County, Ala.—Bond Offering.**—Proposals will be received at any time for the next 30 days for \$13,500 5% 20-year gold bonds, \$8,000 of which are for refund-

ing purposes and \$5,500 to purchase the Marengo Female Institute. Interest will be payable semi-annually.

**Durham (N. C.) School District.—Bond Election.**—An election will be held in this district to vote on the question of issuing \$20,000 bonds for school buildings.

**Eagle County, Col.—Bonds Not Sold.**—This county advertised for sale on Feb. 15, 1899, \$103,000 5% refunding bonds. The highest bid submitted was 101 4/5. The bonds were not awarded, and according to the "Eagle County Blade" legislative action is necessary before the refunding can be legally accomplished.

**Easthampton, Mass.—Loan Authorized.**—At the town meeting held March 13, 1899, the Treasurer was authorized to borrow \$25,000 in anticipation of the collection of taxes.

**Elroy, Wis.—Bond Election.**—The question of issuing bonds for an electric light plant will be voted upon by the citizens of this place.

**Everett, Mass.—Bond Offering.**—Proposals will be received until March 18, 1899, for \$25,000 4% 30-year bonds, according to reports.

**Fort Dodge (Iowa) School District.—Bonds Voted.**—This district recently voted to issue \$4,000 school house bonds.

**Franklin County (P. O. Columbus), Ohio.—Bond Offering.**—Proposals will be received until 12 M., March 25, 1899, by W. H. Halliday, County Auditor, for \$120,000 4% bridge bonds. Securities will be in denomination of \$1,000, dated April 1, 1899; interest will be payable April 1 and October 1 at the agency of the County Treasury, namely, the United States Mortgage & Trust Company, in New York City. Principal will mature \$6,000 yearly on April 1 from 1900 to 1919, inclusive. Bonds are issued pursuant to Sections 2824, 2825 and 871 to 875, inclusive, Revised Statutes of Ohio, and the proceedings of the Board of County Commissioners of March 1, 1899. Each bidder must satisfy himself as to the legality of the bonds before bidding, and he may have their genuineness certified by the United States Mortgage & Trust Co., and may also have the bonds registered by the same company without expense. Proposals must be accompanied by a certified check on a trust company or a national bank, payable to O. E. D. Barron, County Treasurer, in the amount of 1% of the bonds bid for.

**Geary County (P. O. Junction City), Kan.—Bond Election.**—At the election to be held on April 4, 1899, the question of issuing \$35,000 20-year court house and jail bonds will be submitted to the voters.

**Gladstone, Mich.—Bonds Authorized by Legislature.**—The Governor has signed bills recently passed by the Legislature legalizing the bonded indebtedness of this place and the refunding of the same.

**Goliad County, Texas.—Bonds Approved.**—The Attorney-General has approved an issue of \$65,000 refunding court-house bonds.

**Greenville, Miss.—Bond Election.**—An election will be held on April 4, 1899, to vote on the question of issuing \$50,000 5% street-paving bonds.

**Hartford, Conn.—Loan Authorized.**—The City Treasurer has been authorized to borrow \$118,666 47 to reimburse the city for amounts expended for certain permanent improvements.

**High Point, N. C.—No Bonds at Present.**—We are advised that it is very doubtful whether an election will be called in the near future for the purpose of voting on the bonds recently authorized by the State Legislature, and that it will certainly be some time before any bonds are issued.

**Hillsborough County, N. H.—Bonds Authorized by Senate.**—The Senate has passed a bill allowing this county to borrow money for the purpose of building a court house.

**Horsellville, N. Y.—Bonds Defeated.**—At the election held March 7, 1899, the proposition to issue \$3,600 bridge bonds was defeated.

**Iowa Falls (Iowa) School District.—Bond Sale.**—On March 10, 1899, the \$7,000 4% refunding bonds were awarded to Trowbridge, Mac Donald & Niver Co., Chicago, at 100 1/8. Bonds mature \$1,000 yearly on June 15, from 1900 to 1905, inclusive.

**Jackson, Miss.—Bond Offering.**—Proposals will be received until 7:30 P. M. April 6, 1899, by the Mayor and Board of Aldermen at the office of D. P. Porter, Jr., City Clerk, for \$100,000 5% sewer bonds. Securities will be in denomination of \$500, dated April 1, 1899; interest will be payable annually at the office of the City Treasurer, or at the Chase National Bank, New York City, at the option of the holder. Principal will mature \$500 yearly on April 1 from 1900 to 1918, inclusive, and \$90,500 on April 1, 1919. Proposals must be accompanied by a certified check equivalent to 5% of the amount bid for on some bank in Jackson, payable to D. P. Porter, Jr., City Clerk, without conditions, and bidders must satisfy themselves as to the legality of the bonds in advance of the sale.

**Jefferson City (Mo.) School District.—Bonds Defeated.**—At a special election held March 14, 1899, the proposition to issue \$10,000 school bonds was defeated.

**Jefferson County, Mont.—Bids.**—Following are the bids received on March 6, 1899, for the \$75,000 10 20-year (optional) refunding bonds:

N. W. Harris & Co., Chicago. Will take 4 1/2% bonds. \$75,000 can be paid at option 10 years same 15 years and balance 20 years and pay \$200 premium.	
Seymour Bros. of New York. Will take 4 1/2% 20-year bonds at par less 1/4 of 1%.	
W. E. Bell and Spokane Eastern Trust Co. Will take 4 1/2% 20-year bonds at par less \$27 50.	
Parson, Leach & Co., of Chicago. Will take 4 1/2% 20-year bonds and pay a premium of \$5 50.	
F. H. Rollins & Sons Boston. Will take 4 1/2% bonds and pay a premium of \$2 50.	

11. It. Palmer & Co., of Helena—Will take 4½% bonds and pay \$10 premium.  
 Denison, Prior & Co., Boston—Will take 4½% bonds at par.  
 Minnesota Loan & Trust Co.—Will take 4½% bonds at discount of \$375.  
 Union Bank & Trust Co.—Will take 4½% bonds at par less 3% commission.  
 Lamprecht Bros. & Co., Cleveland—Will take 5% bonds at a premium of \$5,101.  
 New First National Bank, Columbus, Ohio—Will take 5% bonds and pay \$3,875 premium.

W. J. Hayes & Sons, Cleveland—Will take 5% bonds and pay \$3,427 premium.  
 As stated last week, bonds were awarded to N. W. Harris & Co., Chicago, but the price paid was 100-266 and not par, as reported.

**Kettle Falls (Town), Wash.—Bond Offering.**—Proposals will be received until March 28, 1899, by this town for the \$2,000 6% water-works bonds recently voted. Interest will be payable semi-annually at place agreed upon by the Council and purchaser.

**Laurium (Village), Houghton County, Mich.—Bond Offering.**—Proposals will be received until 8-30 P. M., April 4, 1899, by Joseph R. Murphy, Village Clerk, for \$35,000 5% sewer bonds. Securities are dated July 1, 1899. Interest will be payable semi-annually, and will mature serially commencing July 1, 1904, and concluding July 1, 1923.

**Lawrence County, Ala.—Bond Election.**—An election will be held April 18, 1899, to vote on the question of issuing the road bonds which were authorized by the last Legislature.

**Lawrence County (P. O. Deadwood), S. Dak.—Bonds Authorized.**—The County Commissioners have voted to issue \$14,000 20-year bonds to refund 10% bonds maturing July 1, 1899.

**Lebanon (Ill.) School District.—Bond Election.**—The question of refunding \$14,000 (% school bonds maturing in June will be voted upon on April 15, 1899.

**Louisiana, Mo.—Bond Sale.—Bond Call.**—Local reports state that the City Council on March 7, 1899, passed an ordinance calling in \$75,000 of the city's bonds which now bear 5 and 6% interest. The Mayor and City Clerk were authorized to issue new 4% bonds therefor, the sale of which at 101-066 had been previously arranged through the city's agent, John W. Matson.

**Madison, Wis.—Bond Sale.**—On March 14, 1899, the \$40,000 10-20-year (optional) coupon sewer bonds were awarded to Duke M. Farson, Chicago, at 102-15 for a 3½% bond. Twenty bids, ranging from 101-25 to 106 41, were received for the 4% bonds, the rate advertised. For description of securities see CHRONICLE March 4, 1899, p. 441.

**Madisonville, Ohio.—Bond Election.**—At the coming spring election the question of issuing \$3,500 fire department bonds will be voted upon.

**Maine.—Loans Authorized.**—The State Legislature has authorized a loan of \$50,000 for 1899 to meet claims of Maine cities and towns for money paid in the Spanish war and a loan of \$150,000 in 1900 to renew the \$50,000 loan above authorized and the war loan of \$100,000 placed a few months ago.

**Marshall County (P. O. Guntersville), Ala.—Details of Bonds Authorized.**—Upon inquiry we learn that the amount of bonds to be issued under authority of the State Legislature for bridges and turnpike roads is \$100,000. Interest at not more than 5% will be payable at Birmingham, Ala., Nashville, Tenn., or New York City. Bonds will mature 35 years from date of issue, subject to call after 20 years. The Commissioners' Court met on the 14th inst. to consider the time of sale, and other details connected with the issuance of these bonds.

**Mattoon (Ill.) School District.—Description of Bonds.**—We are advised that the bonds recently voted for school purposes will be \$28,000 in amount, bearing 4% interest, payable semi-annually. Principal will mature 20 years from date of issue (probably July 1, 1899), and will be subject to call after ten years. Bonds will be in denomination of \$1,000. Date of sale has not yet been determined.

**Medway, Mass.—Bonds Proposed.**—Water bonds to the amount of \$75,000, bearing 6% interest and maturing in 30 years, are the subject of a bill now before the Legislature.

**Milton (Ore.) School District.—Bonds Voted.**—On March 6, 1899, this district authorized the issuance of \$3,500 bonds by a majority of four votes.

**Mitchell, S. Dak.—Bond Sale.**—We are advised that the \$19,500 4-25% refunding bonds which were sold on Dec. 5, 1898, to the Minneapolis Loan & Trust Co. have since been resold to Mr. O. L. Branson; also that Messrs. Phelps & Eyeman, Chicago, have contracted to buy the \$45,000 5% water bonds issued to refund those now subject to call.

**Mount Healthy, Ohio.—Bond Election.**—W. B. Jones, Village Clerk, has given notice that on April 3, 1899, the question of issuing \$2,000 fire bonds will be submitted to a vote of the people.

**Mount Vernon, N. Y.—Bond Sale.**—On March 13, 1899, the \$32,000 5% school tax relief bonds were awarded to the Yonkers Savings Bank at 105-32. Following are the bids:

Yonkers Savings Bank.....105-32	Edw. C. Jones & Co., New York.....104-515
Allen, Sand & Co., New York.....105-2	Bertron & Storrs, New York.....104-38
Parson, Leach & Co., N. Y.....104-77	Street, Wykes & Co., New York.....104-238
W. J. Hayes & Sons, Cleveland.....104-61	

Bonds mature March 1, 1902. For full description of bonds see CHRONICLE March 4, 1899, p. 441.

**Neenah, Wis.—Loan Proposed.**—The Finance Committee of the Common Council is negotiating for a loan of \$30,000 to pay outstanding indebtedness.

**New Hampshire.—Loan Authorized.**—The Legislature has authorized the State Treasurer to negotiate a loan.

**Newton (Town), Sussex County, N. J.—Bonds Voted.**—On March 6, 1899, the people of this town voted favorably on the question of issuing \$5,000 4% bonds for the extension of the water plant. Details of the issue are not yet determined.

**North Adams, Mass.—Loan Negotiated.**—On March 3, 1899, this city placed a loan for \$40,000 with Rogers, Newman & Tolman, Boston, at 2-93½; loan was made in anticipation of taxes and will mature October 3, 1899.

**North Dakota.—Bonds Authorized by Legislature.**—Before adjourning the Legislature authorized the issuance of \$50,000 bonds for the erection of additional buildings at the State Insane Asylum.

**Norwalk, Conn.—Bonds Authorized by Senate.**—The Senate has passed a resolution authorizing this city to issue \$250,000 3½% funding bonds.

**Norwood, Ohio.—Bond Election.**—At the spring election the question of issuing \$25,000 bonds for the improvement of Montgomery road will be voted upon.

**Ocean Springs, Miss.—Bonds Authorized.**—The Board of Aldermen has authorized the issuance of \$5,000 school bonds.

**Oregon, Wis.—Bonds Voted.**—At the election held March 7, 1899, the vote stood 2 to 1 in favor of issuing the \$7,000 5% water bonds, a description of which was given in the CHRONICLE last week. The Village Clerk writes us that he thinks the bonds are already contracted for.

**Paterson, N. J.—Bonds Authorized by Legislature.**—Senate bill No. 137, enabling this city to renew refunding bonds, has passed the House.

**Paulding County, Ohio.—Bond Sale.**—On March 14, 1899, the \$39,500 5% pike bonds were awarded to Denison, Prior & Co., Cleveland, at 105-283. Following are the bids:

Denison, Prior & Co., Cleve.....105-283	Lamprecht Bros. Co., Cleve.....105-283
Feder, Holman & Co., Cincln.....2-068 51	Seasongood & Mayer, Cincln.....1-801 21
W. J. Hayes & Sons, Cleve.....1-992 00	Society for Savings, Cleve.....1-159 99
New Nat. B'k, Columbus.....1-975 00	Paulding Deposit Bank.....980 24
Briggs, Todd & Co., Cincln.....1-907 00	

For description of bonds see CHRONICLE March 4, 1899, p. 442.

**Perry County, Ala.—No Bonds Probable.**—W. W. Crawford, County Treasurer, writes us that the \$6,000 bridge bonds authorized by the last Legislature will probably not be issued, as the financial condition of the county has greatly improved since the introduction of the bill.

**Quincy, Mass.—Bonds Proposed.**—Bills now before the Senate provide for the issuance of \$150,000 highway bonds and \$100,000 4% 10-year refunding bonds.

**Ramsey County (P. O. St. Paul), Minn.—Bond Offering.**—Subscriptions will be received until April 3, 1899, by W. R. Johnson, County Auditor, for \$18,000 3½% 10 year bridge bonds. Securities will be issued in denominations of from \$100 to \$1,000, dated May 1, 1899. Interest will be payable semi-annually at the office of the County Treasurer or the county's fiscal agent in New York City. Preference will be given to small local bidders and bids for small amounts will be awarded in the order filed.

**Reading, Mass.—Temporary Loan.**—This town recently negotiated a loan of \$40,000 with Rogers, Newman & Tolman, Boston, at 3-09% discount. Following bids were received:

Rogers, Newman & Tolman, Boston.....3-09%	Warren Inst. for Savings.....3-25%
Charles Well & Co., Boston.....3-10%	Estabrook & Co., Boston.....3-34%
Blodgett, Merritt & Co., Boston.....3-10%	Curtis & Motley, Boston.....3-37%
Bond & Goodwin, Boston.....3-20%	Parkinson & Burr, Boston.....3-55%
	Blake Bros. & Co., Boston.....3-625%

\* Interest.

Loan matures \$10,000 on November 1, 8, 15 and 22.

**Reldsville, N. C.—Bonds Voted.**—At the election held March 14, 1899, the issuance of \$25,000 water-works bonds was authorized. Only 7 votes were cast against the proposition.

**Rockingham County, N. H.—Bond Offering.**—Proposals will be received until 12 M., March 21, 1899, by William H. C. Follansby, County Treasurer, for the \$35,000 3½% coupon bonds mentioned in the CHRONICLE, March 4, 1899. Securities are in denomination of \$1,000, dated April 1, 1899. Interest will be payable April 1 and October 1, and the principal will mature \$7,000 yearly on April 1 from 1906 to 1910 inclusive.

**Russell, Mass.—Loan Negotiated.**—According to local papers, this town has negotiated a loan of \$10,000 at 3½% interest. Loan will mature \$1,000 yearly from 1904 to 1913, inclusive.

**Saginaw, Mich.—Bond Sale.**—On March 8, 1899, the \$28,500 3½% refunding water bonds of this city were awarded (as stated last week) to E. H. Gay & Co., Boston, at 103-10.

We now give a full list of bids:

E. H. Gay & Co., Boston.....29,883 50	Estabrook & Co., Boston.....23,160 84
W. J. Hayes & Sons, Cleve.....29,379 00	Adams & Co., Boston.....28,408 50
Briggs, Todd & Co., Cincln.....29,363 55	March, L'n & Tr. Co., Chicago.....28,876 20
Denison, Prior & Co., Cleve.....29,235 25	Farson, Leach & Co., Chicago.....28,878 12
Seasongood & Mayer, Cincln.....29,232 40	Second Nat. B'k of Saginaw.....28,500 00
Lamprecht Bros. & Co., Cleve.....29,212 50	

\$18,500 of these bonds will mature May 1, 1920, and the remaining \$10,000 will mature March 10, 1920. For further description of bonds see CHRONICLE, March 4, 1899, p. 442.

**Salem, Ore.—Bond Election.**—An election will be held on March 30, 1899, to vote on the question of issuing about \$80,000 refunding bonds. If authorized the interest on these bonds cannot exceed 4½%.

**Sandusky, Ohio.—Bids.**—The following bids were received on March 1, 1899, for the \$50,000 4% paving bonds:

Denison, Prior & Co., Cleve.....103-17	Lamprecht Bros. Co., Cleve.....102-525
Seasongood & Mayer, Cincln.....103-16	Farson, Leach & Co., Chicago.....102-545
Briggs, Todd & Co., Cincln.....103-15	E. H. Rollins & Sons, Boston.....102-187
N. W. Harris & Co., Chicago.....102-91	New Nat. B'k, Columbus.....102-938
W. J. Hayes & Sons, Cleve.....102-872	Society for Savings, Cleveland.....101-43
Feder, Holman & Co., Cincln.....102-72	Third National Exchange Bank.....101-425
S. A. Keen, Chicago.....102-55	

The following bids were received too late to be considered:

G. Kuhn & Son, Cincln.....103-20	Rudolph Klaybolte & Co., Cincln.....101-905
Stern Nat. Bank, Cincln.....102-91	

Principal will mature \$5,000 yearly on March 1 from 1901 to 1910, inclusive. For further description of bonds see CHRONICLE Feb. 4, 1899, p. 244.

**Sardis, Miss.—Bond Offering.**—This city is advertising for sale \$2,000 water-works bonds.

**Schenectady, N. Y.—Bonds Authorized by Senate.**—The Senate has passed a bill authorizing the issuance of \$512,000 bonds to improve the water supply.

**Schoolcraft, Mich.—Bonds Defeated.**—At a recent election the proposition to issue electric-light bonds was voted upon and defeated.

**Southbridge, Mass.—Bonds Proposed.**—A bill permitting the issuance of \$50,000 sewer bonds is being considered in the House.

**South Dakota.—Bonds Authorized by Legislature.**—Before adjourning, the State Legislature passed the bill authorizing towns and municipalities, except cities of the first class, to issue bonds for water works.

**South Hadley, Mass.—Loans Proposed.**—At the annual town meeting to be held shortly the question of borrowing \$20,000 for 10 years at not more than 5% for school purposes will be voted upon; also the question of negotiating a loan of \$12,500 to refund paying bonds maturing July 11, 1899.

**South Hadley (Mass.) Fire District.—Loan Authorized.**—At the annual meeting of this district, held March 13, 1899, the Treasurer was authorized to borrow \$5,000 in anticipation of the collection of taxes.

**Sumter County, Ala.—Bond Election.**—We are advised that, under the authority recently granted by the State Legislature, an election will be held next summer to vote on the question of issuing road improvement bonds.

**Sunbury, Pa.—Bonds Proposed.**—We are advised that this city proposes to refund its total bonded indebtedness (about \$60,000) with long-term 3% coupon bonds.

**Syracuse, N. Y.—Bonds Authorized by Legislature.**—The bill recently passed by the State Legislature providing for the issuance of \$10,000 bridge bonds has been signed by the Governor.

**Tarentum (Pa.) School District.—Bond Offering.**—Proposals will be received until 7:30 p. m. March 27, 1899, by H. K. Humes, Secretary, for \$25,000 4% high-school bonds. Securities are in denomination of \$500, dated May 1, 1899. Interest will be payable semi-annually at the office of the School Treasurer. Principal will mature May 1, 1920. A certified check for \$500 must accompany proposals.

**Taunton, Mass.—Bond Offering.**—Proposals will be received until 7:30 p. m. March 21, 1899, by Edward H. Temple, City Treasurer, for \$50,000 4% sewer bonds and \$5,000 4% electric-light bonds. Securities are in denomination of \$1,000, dated Dec. 1, 1898. Interest will be payable semi-annually and the principal will mature Dec. 1, 1928.

**Thibodaux (Town), La.—Bond Offering.**—Proposals will be received until 12 m. March 31, 1899, by the Mayor and Council for the \$15,000 5% electric light plant bonds recently authorized. Securities will be in denomination of \$100, dated April 1, 1899; interest will be payable January 1 and July 1 at the Bank of Thibodaux or the Bank of Laourche, both in Thibodaux. Principal will mature \$2,500 yearly on January 1 from 1905 to 1910, inclusive. Bonds are issued pursuant to ordinance No. 124, adopted Feb. 24, 1899.

**Toledo, Ohio.—Bond Issues.**—Local papers state that the Sinking Fund Commissioners will accept from \$50,000 to \$60,000 street improvement bonds which will be issued by this city.

**Trenton, N. J.—Bonds Authorized by House.**—A bill which permits the issuance of bonds for a high school has passed the House.

**Union County (Ore.) School District No. 1.—Bond Offering.**—Proposals will be received at any time by William Miller, Clerk Board of Education, La Grande, for \$20,000 5% 10-20-year (option) school bonds. Securities were authorized by a vote of 173 to 45 at an election held March 6, 1899.

**Utica, N. Y.—Bond Sale.**—On March 14, 1899, the \$6,923 70 4% 1-6-year (serial) paying bonds were awarded to Bertron & Storrs, New York, at 101 1/4. A bid of 101 3/8 was received from the Hon. J. G. Gibson, Utica, and one of 101 7/8 (unaccompanied by check) was received from S. A. Kean, Chicago.

**Vermillion County (P. O. Perrysville), Ind.—Bond Election.**—On March 28, 1899, the proposition to issue bonds for road improvements, the estimated cost of which is \$36,500, will be submitted to a vote of the taxpayers. Bonds, if issued, will bear 5% interest and will run from one to ten years. We are advised by one of the county officials that it is doubtful whether the proposition carries.

## NEW LOANS.

### PUBLIC NOTICE.

TO THE HOLDERS OF THE FOLLOWING BRIDGE BONDS ISSUED BY THE COUNTY OF BEXAR, TEXAS.

BRIDGE BONDS ISSUED MARCH 1st, 1899 NUMBERS 1 to 49 inclusive, of \$500 each, are ordered redeemed, and the holders of said BONDS will present same at the NATIONAL PARK BANK in NEW YORK CITY for payment on SATURDAY MARCH 25, A. D. 1899, at TEN O'CLOCK A. M.

MUNICIPAL BONDS,

1st Nat. Bank Bldg. . . CHICAGO

**Wallingford (Borough), Conn.—Bond Sale.**—On March 14, 1899, the \$45,000 3½% 20-year electric-light plant bonds were awarded to N. W. Harris & Co., New York, at 103-179. Following are the bids:

N. W. Harris & Co., New York, 103-179 | E. W. C. Jones & Co., N. Y., 101-470  
Street, Wykes & Co., N. Y., 101-942 | Rines & Cummings, Boston, 101-300  
E. H. Rollins & Sons, Boston, 101-675 | Farson, Leach & Co., N. Y., 101-005

**Wallingford (Conn.) School District.—Bond Sale.**—On March 14, 1899, the \$35,000 3½% bonds were awarded to E. H. Gay & Co., Boston, at 101-58 and other considerations. Following are the bids:

E. H. Gay & Co., Boston, 101-58 | E. H. Rollins & Sons, N. Y., 101-079  
N. W. Harris & Co., New York, 102-076 | E. W. C. Jones & Co., N. Y., 100-075  
Street, Wykes & Co., N. Y., 101-317 | Farson, Leach & Co., N. Y., 100-515

Bonds mature \$3,000 in 1901 and \$3,000 each alternate year until 1917, and \$8,000 in 1919. For full description of bonds see CHRONICLE March 4, 1899, p. 443.

**Washington.—State Bonds Authorized.**—The Legislature has authorized the State Treasurer to find outstanding State warrants and purchase the bonds, which shall bear 3½% interest, with money in the permanent school fund.

**Wayland, Mass.—Bond Sale.**—The sale of \$42,000 4% 20-year bonds to Estabrook & Co., Boston, at private sale is reported.

**Waynesboro, Pa.—Bond Election.**—At the election to be held on April 4, 1899, the people will vote on the question of issuing \$6,000 for the purpose of converting the lower part of the Academy of Music into a market house and for a firemen's building.

**Westchester County (P. O. White Plains), N. Y.—Temporary Loan.**—This county has recently borrowed \$200,000 in anticipation of taxes. Loan will mature in three months.

**Williamsport, Md.—Bonds Voted.**—At the election held in this town March 6, 1899, it was voted to issue bonds for an electric-light plant. There will not be more than \$6,000 bonds issued, and they will be free from county and municipal tax. Details of sale, etc., are not yet determined.

**Wilmington, Del.—Bond Bill Defeated.**—The bill allowing this city to borrow \$125,000 for streets and sewers was recently defeated by the House, it failing to receive the constitutional majority.

**Winchester, Mass.—Bonds Authorized.**—At a recent town meeting the issuance of twenty \$500 4% highway bonds was

authorized. Securities will mature \$5,000 on Dec. 1 of the years 1906 and 1907.

**Windsor, N. Y.—Correction.**—The list of bids published last week for the \$20,000 3½% water bonds of this place were sent us by one of the village officials. We have since been informed by Messrs. Arthur S. Leland & Co., New York City, that their bid was 101-51, instead of 101-151.

**Woburn, Mass.—Bonds Proposed.**—Legislative authority is being sought by this city to issue \$25,000 additional water bonds.

**Woonsocket, R. I.—Bond Offering.**—Proposals will be received until 1:30 P. M., March 21, 1899, by S. P. Cook, City Treasurer, for the \$150,000 4% gold refunding water-works bonds recently authorized by the State Legislature. Securities will be in denomination of \$1,000, dated April 1, 1899; interest will be payable April 1 and October 1 at office of the City Treasurer. Principal will mature April 1, 1919.

**Worcester, Mass.—Temporary Loan.**—This city last month negotiated a loan of \$300,000 with Rogers, Newman & Tolman, Boston, at 2½%.

**Bonds Awarded.**—We are advised that the \$100,000 4% 10-year bonds, the sale of which was recorded last week, were awarded to Duncomb & Jennison, New York City, on a 3% basis.

**Yazoo City, Miss.—No Election to Be Held.**—We are advised that the City Council has revoked its order calling for an election to authorize the issuance of \$100,000 bonds.

**Youngstown, Ohio.—Water Bonds Not to be Voted.**—The City Council has been asked to bring before the people at the spring election the question of issuing \$500,000 water-works improvement bonds, but we are advised that the Council is averse to the proposition at the present time.

**Zanesville, Ohio.—Bond Sale.**—On March 1, 1899, the \$17,400 5% 15 year street improvement bonds were awarded to Feder, Holzman & Co., Cincinnati, at 104-400. Following are the bids:

Feder, Holzman & Co., Cincinnati, 565 65	Briggs, Todd & Co., Cincinnati, 565 50
New First Nat. Bank, Columbus, 783 00	Lamprecht Bros. Co., Cleveland, 551 00
W. J. Hayes & Sons, Cleveland, 672 00	People's Nat. Bank, Barnesville, 400 00
Denison, Prior & Co., Cleveland, 621 18	First Nat. Bank, Zanesville, 490 00
Seasongood & Mayer, Cincinnati, 616 75	People's Sav. Bank, Zanesville, 435 00
Rudolph Kleybolte & Co., Cincinnati, 570 00	

For further description of these issues see CHRONICLE, Feb. 18, 1899, p. 346.

*THE FINANCIAL SITUATION.*

The stock market has been very irregular the past week. During the first three days the industrials were the prominent feature, especially American Sugar Refining stock; this was not due to any demand for investment, but because of wide fluctuations caused wholly by manipulation. Indeed, that stock has been conspicuous all the week for its erratic movement. Monday it opened several points higher than the close on Saturday, and after fluctuating widely reached 182. Accompanying this advance it was reported that the sugar refining interests had effected a settlement of their differences, and also that the American Refining Company had absorbed the Glucose Refining Company. Later in the day these reports were denied, and American Refining dropped from 182 to 164, eight points below the close on Saturday. Some of the investment railroad stocks made notable advances the same day. Among these the New York Central, Chicago & North West, and New Jersey Central showed the greatest gains. After Monday there was no important special feature until Thursday, when the anthracite coal stocks and the granger shares were all advanced, and they continued to make further progress yesterday. The Brooklyn Rapid Transit shares have likewise been conspicuous for their strength, having advanced Monday and every day since; the close last Saturday was 103½ and the close yesterday was 113½. It is stated that this company has secured the Brooklyn Elevated roads, and rumor had it that the Long Island road had also passed into its control; the latter report is denied, though no doubt the Long Island will be run in harmony with the Rapid Transit.

It is not difficult to read the dominant influences underlying facts like these. There certainly has been no general weakness shown this week in the better class of railroad stocks; on the contrary, strength with the trend upward in the face of higher money, describes as nearly as may be the prevailing condition so far as such properties are concerned. It is obvious, too, that the stock of any railroad company which has given promise, by its earnings or by new connections, of fresh progress has quickly advanced in price. These facts and conditions are evidences of the same truths of which we have so often spoken. We refer to the influences which are now at the bottom of stock values. They are first and foremost the industrial situation; and so long as enterprise and general business develop in a healthy way, with no unsound growth, the stock market may decline on close money or from other special cause, but strength and recovery will continue to be the tendency. The second influence is the traffic-rate situation, which, for reasons we give in a subsequent item in this article, has seldom been so well maintained and afforded so promising an aspect as now. The highest rate for call money was on Monday. That derangement was said to be due to the calling of about \$17,000,000 for payment by the American Car and Foundry Company to the corporations absorbed by that organization. There was no intimation of this transaction until late on Monday, and hence there was no disturbance to the market until the last hour. Then there came a sharp inquiry which forced the rate upward from 4 per cent to 9

per cent; immediately after the special demand was satisfied the rate fell again to 4 per cent. The wide fluctuations in Sugar and Tobacco stocks that day doubtless aided in deranging money. Since Monday the rate on call has ruled from 4 to 6 per cent.

The plan of our Clearing House banks to charge depositors for the collection of their checks and other evidences of debt drawn on interior localities, which is to be put in operation April 3, has very naturally excited opposition. Throughout the preliminary discussion the scheme has been considered almost exclusively in its bearing on out-of-town banks, corporations and individuals that kept accounts in this city. As sharp competition has existed for such deposits and as interest as high as the loan market would permit has consequently been paid on the balances, it appeared wholly just that the depository bank should be reimbursed for its expense and loss of interest in making collections. By that method paying interest on deposits would be made every way equitable and the loss or gain to each party to the contract be manifest—an outcome that has not hitherto been ciphered out closely or obtainable from the accounts kept by many city banks.

There is however another class of cases in which the change will be more onerous. We do not mean that the feature we refer to should necessarily prevent the carrying out of the plan. On the contrary it seems every way proper that our banks should be paid for any actual disbursement made and any business done for a depositor outside of the ordinary routine of receiving money on deposit and cashing checks. The claim we make though is, that the plan in its effects on our local merchants, commission merchants and manufacturers will work a material loss which will in the end force a corresponding adjustment of business details; and where no interest is now paid on merchants' accounts the operation of the new arrangement will be inequitable, and lead to results which cannot at the moment be forecast. St. Louis has been cited as illustrative of the working and effects here, and showing that opposition in New York will speedily die out. The situation of the two cities in hardly any particular corresponds. We need state only the single circumstance that all Eastern money is usually at a premium in St. Louis, whereas here every sale of goods to any one living outside of the excepted cities will hereafter be at a discount. As competition is so severe that business has to be done at a very small percentage of profit, we do not need to describe the effect a quarter of one per cent allowance for collection will have on many classes of transactions that have heretofore been of daily occurrence. We have also said above that at banks where no interest is paid on New York accounts, the operation of the new arrangement will be inequitable. That is so because depositors' accounts differ largely in value to their banks. That is to say, some carry a large balance all the time and require no favors except collections. From that degree of advantage to the bank the balances in every institution shade off until a body of individuals is reached the conduct of whose business is actually unprofitable. It remains to be seen how these affairs between merchants, manufacturers and the banks will adjust themselves. Some material revolution in business methods is inevitable if the New York Clearing House institutions retain the

collection business and their charge thereby becomes the rate of exchange.

A preliminary report issued the present week by the Statistician of the Inter-State Commerce Commission on the income account of the railways of the United States for the year ending last June serves to direct attention anew to the increased prosperity which the carrying interest has latterly been enjoying. The report, being merely preliminary, does not cover the entire mileage of the country, and yet is very comprehensive and does not fall far short of the full total. Prof. Henry C. Adams, the Statistician, in his remarks points out that the statement accounts for at least 97 per cent of the aggregate operated railway mileage. The chief point of interest is the great improvement which the returns show to have occurred, figures of large magnitude being always peculiarly impressive. Prof. Adams finds that at \$1,238,523,380, the gross earnings indicate an increase of \$116,433,607 as compared with the fiscal year preceding (the year to June 30 1897), while as compared with 1894, when the railroad industry was particularly depressed, the increase is \$165,161,563. In the net earnings the gain over the previous year amounts to \$57,716,913, making it evident that the year was a very good one for the roads, a fact of course well known. The Statistician is deserving of great credit for his efforts to get these early returns before the public. The complete report is necessarily very much delayed, and a preliminary statement like this, containing a few leading items for each road, gives a degree of usefulness to the statistics of the Commission which they would not otherwise possess. Of course as far as the course of earnings is concerned, our own compilations are issued long in advance of those of the Commission. Thus in our number of March 4 we gave a summary showing the gross earnings for the late calendar year on 168,810 miles of road. This statement recorded \$80,749,039 increase over the calendar year 1897, and on these figures we calculated the gain for the whole United States system of roads at \$90,000,000, in addition to an improvement of 70 to 75 million dollars in the preceding calendar year.

Another decision has been rendered denying the contention of the Inter-State Commerce Commission with reference to the meaning and application of the long-and-short-haul clause of the Inter-State Act. The decision was by the United States Circuit Court of Appeals, sitting at New Orleans. The case was that originally brought before the Inter-State Commerce Commission by the Railroad Commission of Georgia, back in 1891. The question at issue was the right to charge higher rates of freight from Cincinnati and other Ohio River points to local stations on the Western & Atlantic than were charged to Atlanta. The Inter-State Commission ruled that this was a violation of the fourth section of the Inter-State Act. The roads having refused to obey the order of the Commission to desist from the alleged discrimination, the Commission in May 1893 filed its bill in the Circuit Court for the Northern District of Georgia, asking the Court to compel enforcement of the order. In this, however, it was defeated, a decision being rendered in June last year by Judge Newman, holding that the rates complained of were

not a violation of the statute. It is this ruling which has now been affirmed, the Circuit Court of Appeals upholding the decision of the lower court.

We refer to this decision mainly because it forms part of the history of an interesting case. As bearing on current affairs, these court interpretations no longer possess very much importance. The Inter-State Commission is now following a different line of policy. Finding itself minus the exceptional powers for which it had been contending, it is evidently seeking to exercise influence over railroad affairs by conferring and co-operating with those charged with the administration of the roads. In this way we are sure it is capable of exerting real and substantial power, and also capable of accomplishing much good, and furnish real justification for its existence. We have several times of late referred to the excellent results accomplished by the conferences that were held earlier in the year with the managers of the Eastern trunk lines. The effect is seen in the fact that schedule rates over these lines are now better maintained than they have been for years. As a consequence there is an absence of the preferences to favored shippers which always exist when rates are not observed, and which work so seriously to the detriment of shippers as a whole. The same plan is now being tried with the Western roads, there having been several conferences this week with the managers of the roads west of Chicago. These conferences appear to have been very harmonious, and evidently complete co-operation exists between the Commission and the roads. The outcome is sure to be very beneficial. Indeed, since the first of the year the rate-cutting evil seems to have disappeared like magic, and there can be no question the new policy is to be credited with an important share in the change.

Money on call, representing bankers' balances, has loaned at the Stock Exchange at 9 per cent and at 3 per cent during the week, averaging 5 per cent. The higher rate was recorded on Monday afternoon, when, as stated above, there appeared to be an urgent demand for money, due chiefly to the calling of loans early in the day preparatory to the payment of \$17,000,000 by the Am. Car & Foundry Co. to corporations absorbed by that company. The lowest rate on Monday was 4 per cent, and the bulk of the business was done at 4½ per cent. On Tuesday, after opening at 6 per cent, there appeared to be a supply of money from near-by interior points and also as a result of the partial distribution of the Amer. Car & Foundry Company's money, but the business was largely done at 5@5½ per cent until the last hour, when the rate fell to 3 per cent. On Wednesday the extremes of the day were 5½ per cent and 3 per cent, with the majority of the transactions at 4½ per cent. On Thursday the range was from 4 per cent to 5 per cent, with the bulk of the business at 4½ per cent. On Friday the extremes were 5 per cent and 3½ per cent, with the majority of the transactions at 4½ per cent. Banks and trust companies quote 4½ per cent as the minimum, though many of the institutions have obtained 5 per cent. There seems to be a disposition on the part of some of the down-town trust companies and a few of the larger banks to make a closer

distinction in loans on stock collateral and at the same time carefully to scrutinize the names of borrowers which appear upon the stock notes. Rates are 4 per cent for all periods, from sixty days to six months, on dividend-paying collateral;  $4\frac{1}{4}$  to  $4\frac{1}{2}$  per cent, also for all periods, on good mixed Stock Exchange security and  $5\frac{1}{2}$  per cent for sixty days to six months on industrial collateral. The latter is required to be put in at a liberal reduction from the market value, and in addition a margin of from 25 to 30 per cent is demanded, as was noted in this column last week. There is a little better supply of commercial paper in the market, but at the same time the demand is good, especially from out-of-town buyers and from some of the smaller interior banks. Rates are 4 per cent for sixty to ninety day endorsed bills receivable;  $4\frac{1}{2}$  to 5 per cent for prime, and 5 to 6 per cent for good four to six months' single names. The recent deposit of part of the Central Pacific money in the depository banks in this city increased the amount on deposit in all the depository banks throughout the country to \$90,975,950 on the 20th, against \$84,232,463 on the 10th. It is stated that this Central Pacific money will be withdrawn from the banks within the next two months at the rate of about \$1,000,000 every ten days. The increased concentration of gold at this centre is shown by the fact that Customs payments for the first twenty days in March were 86.1 per cent in gold, the highest on record. The small proportion of 3.9 per cent of payments in legal tenders reflects the scarcity of these notes, while there seems to be a comparatively better supply of silver certificates, payments of which for Customs were 9.8 per cent. Washington dispatches report that about \$91,500,000 of the 3 per cent bonds are now in possession of the banks as security for circulation and for deposits.

There is no feature of importance either in the European political or the financial situation. The Bank of England minimum rate of discount remains unchanged at 3 per cent. The cable reports discounts of sixty to ninety day bank bills in London slightly easier at  $2\frac{1}{2}$  to  $2\frac{3}{4}$  per cent. The open market rate at Paris is  $2\frac{3}{4}$  per cent, against  $2\frac{1}{2}$  per cent last week; at Berlin it is  $4\frac{3}{4}$  to  $4\frac{1}{2}$  per cent, and at Frankfurt it is  $4\frac{3}{4}$  to  $4\frac{1}{2}$  per cent. According to our special cable from London the Bank of England lost £560,633 bullion during the week and held £32,477,500 at the close of the week. Our correspondent further advises us that the loss was due to the import of £10,000 from Holland, to shipments of £291,000 net to the interior of Great Britain, and to the exports of £280,000, of which £110,000 were to the Argentine Republic, £100,000 to the Cape, £50,000 to Natal and £20,000 to the Continent.

The foreign exchange market has been dull this week, and though it continues to be influenced by higher rates for money at the Stock Exchange, there were no quotable changes in rates during the week until Friday, when there was an advance. Bankers report a light supply of commercial bills, and the offerings of bankers' drafts appear to be only moderate, though sufficient to meet the ordinary counter requirements for remittance. There is no evidence in the market of important bond negotiations; neither are there any indications of an inquiry to

remit for stocks sold for European account. Imports of gold during the week amounted to \$416,000, of which \$366,700 was from Europe. Nominal rates for exchange have been  $4\frac{81}{100}$  to  $4\frac{81\frac{1}{2}}{100}$  for sixty-day and  $4\frac{86\frac{1}{2}}{100}$  for sight during the week. Rates for actual business opened on Monday unchanged, compared with those at the close on Friday of last week, at  $4\frac{83}{100}$  to  $4\frac{83\frac{1}{2}}{100}$  for long,  $4\frac{85\frac{1}{2}}{100}$  to  $4\frac{85\frac{1}{2}}{100}$  for short and  $4\frac{85\frac{1}{2}}{100}$  to  $4\frac{86}{100}$  for cable transfers. The tone was easy, influenced by activity in money, but no change was made in rates. On the following day the market was very quiet and steady, and it so continued without any alteration in rates until Friday. Then there was an advance of one-quarter of a cent all around. The following shows daily posted rates for exchange by some of the leading drawers.

DAILY POSTED RATES FOR FOREIGN EXCHANGE.

The market closed firm on Friday, with rates for actual business  $4\frac{83\frac{1}{2}}{100}$  to  $4\frac{83\frac{1}{2}}{100}$  for long,  $4\frac{85\frac{1}{2}}{100}$  to  $4\frac{85\frac{1}{2}}{100}$  for short and  $4\frac{86}{100}$  to  $4\frac{86\frac{1}{2}}{100}$  for cables. Commercial on banks  $4\frac{82\frac{3}{4}}{100}$  to  $4\frac{83}{100}$  and documents for payment  $4\frac{82\frac{1}{2}}{100}$  to  $4\frac{83\frac{1}{2}}{100}$ . Cotton for payment  $4\frac{82\frac{1}{2}}{100}$  to  $4\frac{82\frac{1}{2}}{100}$ , cotton for acceptance  $4\frac{82\frac{3}{4}}{100}$  to  $4\frac{83}{100}$  and grain for payment  $4\frac{83}{100}$  to  $4\frac{83\frac{1}{2}}{100}$ .

The following statement gives the week's movement of money to and from the interior by the New York banks.

Week Ending Mar. 24, 1899.	Received by N. Y. Banks.	Shipped by N. Y. Banks.	Net Interior Movement.
Currency.....	\$5,381,000	4,431,000	Gain. \$950,000
Gold.....	644,000	438,000	Gain. 156,000
Total gold and legal tenders.....	\$6,025,000	\$4,869,000	Gain. \$1,086,000

With the Sub-Treasury operations the result is as follows.

Week Ending Mar. 24, 1899.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.
Banks' interior movement, as above	\$6,025,000	\$4,869,000	Gain \$1,086,000
Sub-Treasury operations.....	22,000,000	23,250,000	Loss. 1,250,000
Total gold and legal tenders.....	\$28,025,000	\$28,119,000	Loss \$164,000

The following table indicates the amount of bullion in the principal European banks.

Bank of	Mar. 23, 1899			Mar. 24, 1899.

\* The division (between gold and silver) given in our table of coin and bullion in the Bank of Germany and the Bank of Belgium is made from the best estimate we are able to obtain; in neither case is it claimed to be accurate, as those banks make no distinction in their weekly returns, merely reporting the total gold and silver, but we believe the division we make is a close approximation.

NOTE.—We receive the foregoing results weekly by cable, and while not all of the data given at the head of the column they are the returns issued to that date—that is the latest reported figures.

# COMBINATIONS TO MAINTAIN PRICES NOT ALWAYS ILLEGAL.

The Appellate Division of the New York Supreme Court last week rendered a decision of much importance and of wide interest. The Court laid down the rule that all contracts in restraint of trade are not void. Agreements which have for their purpose, it says, the realization of a fair price for the product manufactured and sold, do not contravene any rule of public policy though they operate in restraint of trade. Furthermore, it contends that courts should refrain from interfering with the affairs of individuals and corporations, unless the apprehension of danger to public interests rests on evident grounds.

There is nothing novel in this doctrine. Up to the time of the decision of the U. S. Supreme Court in the case of the Trans-Missouri Freight Association, the courts had always made a distinction between contracts which were in reasonable and those which were in unreasonable restraint of trade. It is the rigid interpretation which the U. S. Supreme Court gave to the words of Congress in their application to inter-state commerce over the railroads that makes the reaffirmation of this old rule of judicial construction by the courts of this State a fact of moment.

The action in which the present determination was obtained was that of Cohen vs. Berlin & Jones Envelope Co. The case has been twice before the Appellate Division, and the ruling has been the same in each instance. On this last occasion, however, the judges had before them the facts bearing on the operation of the contract as well as the contract itself, and hence the language is correspondingly broader and more unqualified. The first time the suit came up for review was in October 1896. It then went before the Appellate Division, First Department. Last week's decision was by the Appellate Division, Second Department, none of the judges being the same.

It appears that on August 8 1887 Charles J. Cohen, a manufacturer of envelopes in the city of Philadelphia, was induced to enter into an agreement with a number of envelope manufacturers in this State and in Connecticut and Massachusetts, among others the Berlin & Jones Envelope Company of New York City. These manufacturers had combined and formed the Standard Envelope Company, and this company was to act as a clearing house for all the goods manufactured by these various concerns. The company was to issue from time to time price lists for envelopes which prices Cohen bound himself to observe. The manufacturers in the combination also agreed to buy from Cohen his output of envelopes up to the number of 250,000 per day, for the period of five years, counting three hundred days to the year. In case they failed to take the envelopes from Cohen, they were to pay him 10 cents per thousand in liquidation of damages sustained by him. Cohen, however, was to use his best endeavors to sell to the trade in the usual course of business any of the envelopes not taken by the combination, and as to such sales he was to have no claim for damages. The contract also provided that if Cohen sold in excess of 250,000 envelopes per day to the trade, he was to pay over on his part 10 cents per thousand to the combination on such excess; he was not to be required to furnish goods in any event for less than their cost of manufacture. Stringent provisions were inserted to pre-

vent any deviations from the prices fixed. Among these Cohen bound himself to pay twenty-five cents per thousand on sales made in violation of the contract besides the value of the goods sold; he also by another clause pledged himself, on a penalty of \$50,000 for non-compliance, not to sell, lease or transfer his property except upon condition that the new party should become substituted for him in the agreement. He was not to interest himself, directly or indirectly, by advance of capital or otherwise, with any one engaged or intending to engage in the manufacture or sale of envelopes or envelope machinery, other than the parties to the contract. There were likewise some other restrictions which it is not necessary to specify.

For three years of the contract term Cohen furnished monthly statements of the envelopes sold by him at the price list issued by the Standard Envelope Company, with the number the combination had agreed to take, and a bill for 10 cents per thousand for the difference. Before the expiration of the five years, the Envelope Company disbanded and the parties in the combination refused to pay further under the agreement. Cohen accordingly brought suit to recover damages for breach of contract. From an interlocutory judgment overruling a demurrer to the complaint an appeal was taken, and the Appellate Division, First Department, in October 1896, as already said, affirmed the judgment of the Special Term.

Judge Williams, who then delivered the opinion, said that a contract would not be adjudged to be illegal when it was capable of a construction which would render it valid. In the absence of evidence with reference to the circumstances surrounding the execution of the contract, and the manner in which business was conducted under it, the Court did not think it could be said the intent was to violate the law. It could not be claimed that the design was to restrict the manufacture and sale of envelopes, because Cohen was in no way restricted in the quantity he should manufacture or sell. Nor could it be said the parties to the combination were in any way restricted in the manufacture or sale of envelopes. In like manner it could not be affirmed from the mere language of the contract that there was an unlawful agreement to fix or maintain prices, since not every agreement to maintain prices is illegal. When all the facts had been brought out at the trial of the case, it would be possible to determine the legality of the arrangement.

This was the conclusion of the Court, as stated, in 1896. In the interval since then the case has been to trial, and on the present review therefore the Appellate Division was able to render judgment with all the facts before it. It was established at the trial that at the time of the execution of the contract the business in which Cohen was engaged had fallen to a low ebb, competition was severe and goods were being sold here in the East below cost. The question as to whether or not the contract unduly enhanced prices or whether it was entered into for the purpose of making a reasonable profit was left by the Court to the jury, who were charged that if the contract did not unduly enhance prices it was not unlawful. The Appellate Division rules that this question was properly submitted to the jury.

Speaking by the mouth of Judge Hatch, the Court says the established rule of law is that where the

agreement deals with an article of prime necessity and seeks through its terms to prevent competition in trade therein, and to control the market price thereof, it invades the sanctity of a sound public policy, and therefore is void. The test of such an agreement is not what has been but what may be done thereunder; and if it may operate to the hurt of trade and the prejudice of the public, it falls under condemnation. But none of the authoritative cases, Judge Hatch says, hold that all contracts in restraint of trade are void, nor is such the law. He quotes from *People vs. Sheldon*, where it was said: "The obtaining by dealers of a fair and reasonable price for what they sell does not seem to contravene public policy or to work an injury to individuals. On the contrary the general interests are promoted by activity in trade which could not permanently exist without reasonable encouragement to those engaged in it. Producers, consumers and laborers are alike benefited by healthful conditions of business." In the present case, though Cohen was bound to sell at schedule prices, yet it was not made to appear in the estimation of the Court that any schedule of price could be fixed at which the goods could be disposed of and produce more than a reasonable profit.

The Court also holds that the provision of the contract whereby Cohen was to pay those in the combination 10 cents per thousand for all envelopes produced by him in excess of the stipulated number of 250,000 per day did not injuriously affect the public, unless the price was thereby enhanced (which was not the case in this instance) and that to a limited extent and for the purpose of obtaining a reasonable profit it was lawful to make such restrictions. It only remains to add that the judgment of the Appellate Division was unanimous on both occasions, the sitting judges on the first appeal being Van Brunt, Barrett, Rumsey, Williams and Patterson, and on this last appeal Goodrich, Cullen, Bartlett, Hatch and Woodward.

#### *TUNNELS AND THE LONG ISLAND RAILROAD.*

There is before the Legislature at Albany at the present time one group of bills that, it seems to us, especially deserves favorable action. The convenience of the public at large and the best good of the city of New York, even more than the position of the company most closely concerned, demand this. We refer to the measures designed to facilitate, or rather make possible, the consummation by the Long Island Railroad of its long-entertained plans for a direct service by tunnel under the East River to the business centre of lower Manhattan.

The legislation desired is the outcome of the protracted negotiation between the former city of Brooklyn and the railroad company regarding the removal of the latter's tracks from the surface of Atlantic Avenue. The tracks were a serious obstruction to street traffic, a menace to life and an injury to property. In January 1897 a Commission appointed by the city decided that the nuisance should be abated, in part by depressing and in part by elevating the tracks above the surface. The city, it was agreed, should pay half the cost, but not to exceed in all \$1,250,000, but, as part of the compact, the company was to extend its road by tunnel under the river to lower New York. The company fell in with the scheme, and prepared plans by which it would run electric cars at short intervals from stations under-

neath Maiden Lane and Cortlandt Street, in this Borough, to Jamaica, covering the distance in the neighborhood of twenty minutes, as well as furnishing local service between New York and Brooklyn. The bills to authorize the project have the hearty support of the Commission and the approval of the public generally, but they failed to receive attention in the Legislature at its last session, and are in danger from lack of an expression of public opinion of failing again. A strong syndicate stands ready to finance the undertaking, but they can do nothing until the necessary authority is given by a franchise of sufficient length to justify the necessary expenditure, the charter of Greater New York at present limiting such franchises to twenty-five years.

It is certainly strange, in view of the proverbial readiness of our people to experiment with new schemes, that in the matter of city tunnels we should be so far behind England. We seem scarcely to have awakened to the fact that in the decreased cost of construction, and in general attractiveness when completed, as much progress has been made of late years in this as in any other branch of the engineer's work. Indeed, the sole idea that many of us have regarding tunnels seems to be that produced, until recently, by a trip into this city over the tracks of the New York & Harlem, or, worse yet, by a ride on the Metropolitan road of London, with its shroud of sulphurous fumes, a combination of awe-inspiring darkness and choking gases. The modern tunnel is quite a different affair, brilliantly lighted by electricity and freed from smoke by the use of electricity as the motive power. Of such tunnels London has in operation several of much importance.

No one needs proof of the desirability of a direct connection for the railroads approaching a great city with the city itself. To the railroad companies themselves such connection may sometimes be only an indirect benefit; to the public it is always a great advantage. It seems probable that after years of delay the tunnel under the North River will at length be pushed to completion, and there are rumors that one of the large railway systems now having terminals on the Jersey side of the river is contemplating the use of the tunnel by its passengers. Should one of these companies offer to the public the opportunity thus to avoid travel by ferry, it is safe to say that before many days had passed steps would be taken looking to the acquisition of similar facilities by some competing line or lines. We have before us the report of the Waterloo & City Railway of London, a line that was opened last August and carries the passengers of the London & Southwestern Railway Company in electric cars, and without stop in transit, under the River Thames from the Waterloo Station to the business centre of the city. The road is only 1½ miles long (the two tracks being in parallel tunnels); but, as the chairman at the recent meeting said, the importance of the undertaking is to be measured not so much by this fact as by the value of the property to the company itself, to the Southwestern and to the traveling public. The cost of the road was not excessive; including some expenditures yet to be made it reaches about \$3,000,000, which was the sum estimated. The gross earnings for the four months and twenty-four days that the line was in operation during the half-year ending Dec. 31 1898 were about \$55,000, the net earnings about \$31,500.

These earnings certainly are not heavy, but no one who has not traveled from Waterloo to the Bank, or some similarly situated place, can estimate the comfort to the patrons of the Southwestern line of this connection. Nor is the income of the tunnel road any indication of the new business secured to the Southwestern, and by it carried to a greater or less extent for long distances, in consequence of the easy means afforded the public of reaching its London station. As every one knows, this Waterloo & City Railway is but one of several tunnel railways which London will be enjoying within a few years, to say nothing of several that have been authorized by Parliament, and may or may not be built. A work of the first magnitude is that of the well-known Central London Railway running under Oxford Street and Holborn to the Bank of England. This line is making good progress, but the managers have found it necessary to ask for a year more from July next in which to complete it.

We are well aware that the danger that threatens the bills introduced at Albany in behalf of the Long Island Railroad does not arise from any question as to the practicability of the plan. But we feel that if the public appreciated to what great deprivation it was being put by the obstructive means taken to thwart the enactment of the laws, that pressure might be brought sufficiently strong to overcome the opposition. It is clearly inadvisable for any syndicate to advance the funds for such a tunnel unless more than a twenty-five year franchise can be obtained. We approve fully the principle that private corporations should pay the municipality for the facilities granted when these facilities shut the people out of a part of their public property, as is done by the street railways or when the rights given are exclusive and of such nature that no other company can possess equal advantages. But neither of these conditions obtains in the present instance. No doubt the Long Island Railroad would be a great gainer if it could land its passengers by electric cars in lower New York, but years would elapse before the growth of traffic consequent on the improvement would bring to it the full reward for its enterprise. The public, however, would be a gainer from the very first. The urgent demand for better connection between the two boroughs is acknowledged by all, and now that a syndicate stands ready to give a practical illustration of the feasibility of tunnel connection, it seems shortsighted policy to put obstacles in the way.

#### DELAWARE & HUDSON REPORT.

The Delaware & Hudson report attracts a good deal of attention this time by reason of the changes and adjustments made necessary in the company's balance sheet because of the abandonment of the canal from Honesdale to Rondout, and the determination of the managers to mark the canal off the books as an asset. It is evident from the price of the company's stock in the market that the public has accepted the views which we were almost alone in urging towards the close of last year, namely that neither the wiping out of the canal, nor the sale of Rutland stock, nor the outlook for the anthracite trade (unfavorable as it then appeared) gave any cause for uneasiness in the case of a property of such strength and with such a record as that of the Delaware & Hudson. The course of prices then had every

appearance of speculative manipulation with the purpose of depressing the shares. But while in November last those who were decrying the property were selling the stock at 93, the price now is 117.

Study of the report makes it plain that the management has met the new situation fully and frankly, though it is obvious from some of the newspaper comments that a fuller analysis of the changes in the different items than has yet been attempted will be found useful. The canal appeared for \$5,500,000 in the previous year's balance sheet. Now it has been entirely omitted. It is evident, however, that the loss in this way has not been made good from accumulated surplus, for this surplus is reported only a little less than at the end of 1897, namely \$4,895,707 December 31 1898, against \$5,128,344 December 31 1897. Several new items appear among the assets this time. The one likely to attract first attention and sure to excite most comment is that designated "unmined coal, \$12,000,000." This is the value put on the company's coal lands, and the only question that can arise with regard to it is as to whether it is in excess of a conservative valuation. There can be but one answer. It is far below the true valuation.

The report tells us that in view of the unfounded rumors which had been current respecting the near exhaustion of the coal lands, the management had an examination made by thoroughly independent experts. These experts report that the coal remaining in the lands owned in fee by the company amounts to 165,186,393 tons, while that remaining in the lands of the Northern Coal & Iron Company aggregates 58,361,400, making together 223,547,793 tons. If this were valued at only 20 cents a ton, it would represent over 44 million dollars. The allowance at \$12,000,000 is therefore very small. Nor must it be supposed that the whole \$12,000,000 is new this time. The lands of the Northern Coal & Iron Co. had been carried on the books at \$3,240,366, those held by the Delaware & Hudson in fee at \$851,000, making \$4,091,365 for the two combined; \$7,843,433 has been added to the \$851,000, raising the lands owned in fee to somewhere near the average of those of the Northern Coal & Iron Company, and this appreciation of \$7,843,433, together with a small item of \$65,201 for advanced royalties, makes up the full \$12,000,000.

The \$851,000 for the company's coal lands was last year carried under the head of "Real Estate." The present year, we see, it has been taken out of that item. But at the same time \$671,207 has been added for undervaluation of real estate, and \$255,726 of real estate owned by the Northern Coal & Iron Company and previously given under that company's name has been transferred to the same account. In this way the item of Real Estate stands at \$5,530,234 December 31 1898, against \$5,452,719 December 31 1897.

It was noted last year that the company had marked off items aggregating \$1,264,689, representing depreciation of boats, equipment, etc. The present year this conservative process has been carried a step further. President Olyphant enumerates various small reductions to the amount of \$340,323, and in addition he states that the Gravity Equipment for about \$800,000 has been marked off, (the Gravity Railroad is not to be given up, but to be changed to broad gauge, rendering, however, the old equipment useless,) while general equipment has been marked

down in the sum of \$2,000,000. Owing to the numerous changes in the different items, and the new items incorporated, the fact of a reduction in the equipment may not appear clear to superficial observers. We will say, therefore, that last year the entry of "Railroad and Equipment" was made up of \$4,119,627 representing the railroad in Pennsylvania and \$6,182,829 representing the value of equipment. The present year the railroad is given as a separate item for its old amount, \$4,119,627, while equipment account, notwithstanding the expenditure of \$484,000 for new rolling stock, is reported at but \$3,666,559, against \$6,182,829, thus evidencing the reduction referred to.

One other item needs explanation. In the present report the value of the Northern Coal & Iron Co. is given at only \$2,557,476. In the previous report the amount was stated at \$6,053,564. But this last item included the value of both that company's real estate for \$255,722 which has now been transferred to real estate account, and the value of that company's coal lands at \$3,240,365, which latter now forms part of the \$12,000,000 item of coal lands. The value of the Railroad of the Northern Coal & Iron has been kept at the same figure in both years, \$2,557,476.

It will thus be seen that there is nothing calling for adverse criticism in the bookkeeping changes that have been made, while there is much to commend. That the policy has been to make the estimate of values conservative becomes very apparent when we examine the company's holdings of securities. That item has been reduced about 1½ million dollars, this following mainly from the sale of the Rutland stock. But we observe that both the \$450,000 of Albany & Susquehanna stock and the \$800,000 of Rensselaer & Saratoga stock is carried on the books at only par. In the market both these shares sell close to 200. Some question has been raised in the past as to whether the \$1,109,482 spent by the Delaware & Hudson in building the Lackawanna & Susquehanna could prudently be carried on the books at its face value. Hence it will be interesting to hear that on inquiry we learn that the road in the late calendar year earned over 10 per cent on a capitalization of \$2,000,000. Financially the Delaware & Hudson appears to be in easy condition. The Loans Payable outstanding were reduced during the year from \$1,100,000 to \$1,000,000, while cash on hand is reported \$1,555,692 December 31 1898, against \$1,172,159 December 31 1897.

#### NEW TARIFF OF JAPAN AND THE IMPORT TRADE OF AMERICAN GOODS.\*

TOKIO, Jan. 7, 1899.

The ratification of the Japano-Austrian treaty has duly been exchanged at Vienna, and the last obstacle for enforcing the new tariff law in this country has at length been removed. The new tariff went into force from the first of January 1899. Comparing it with the old tariff, one finds a great advance in the rate of the duties levied. The rate varies from 5 per cent to 40 per cent, while the old tariff was of a uniform rate of 5 per cent. Therefore it is very important to study if the new tariff might cause any curtailment to the American trade for this country. Before going into a detailed examination, it will be desirable to say a few words about "specific duty"

and "conventional tariff." According to the spirit of the new tariff law of Japan the specific duty is to be levied in the place of general duty, especially when the value of goods could not easily be assessed. The rate of specific duty is determined from time to time according to the average price of taxable commodities, and any alteration in the rate of specific duty is to be declared six months before its enforcement.

The conventional tariff is to be applied to particular goods of particular nations who made a special tariff convention with this country, or of those nations who are entitled to all the privileges that other nations enjoy from the Japanese Government. The following is the comparison of general duty and conventional tariff:

Articles.	Statutory Tariff.	Conventional Tariff.			
		Great Britain.	Germany.	France.	Austria.
Binoocular glasses (leather-covered).....	15%	..	10%	10%	..

A cursory view of the above table will reveal the fact that the rate of conventional tariff is, in many cases, from twenty-five per cent to fifty per cent lower than that of statutory tariff. Only in thirty-three articles does the rate of statutory tariff correspond with the same in the conventional tariff; while of all 497 dutiable commodities 148 articles are covered under the conventional tariff. Now the United States is entitled to the privileges of the conventional tariff, by the virtue of her treaty with Japan (see Article IV of the treaty). But, according to the tariff law of this country, a merchant who wishes to enjoy the privileges of the conventional tariff is required to present with the goods a certificate obtained from a Japanese consul stationed at different ports in those countries which are parties to the tariff convention or their equivalents. In case where a shipper could not find a Japanese consul in the port whence he intends to export his goods for Japan, he is allowed to substitute the required paper with an appropriate certificate obtained from his own government.

Let us now study whether the new tariff of Japan might in any degree discourage the import of American goods to this country. Of the fifteen principal articles coming from the United States, raw cotton covers more than forty per cent of the whole, and fortunately this material is free of duty, as it is

\*Communicated by our correspondent at Tokio, Japan.

the policy of this country to encourage cotton manufactures. During the last seven years the import of American cotton has increased with a wonderful rapidity. In 1892 we imported little more than one million yen of American cotton, in 1894 two and a-half million, in 1896 four million, in 1897 seven million and in 1898 we imported fourteen million yen during the last ten months from January to October. Kerosene oil is not included in the conventional tariff, and one who imports it has to pay either general duty of ten per cent or specific duty of one and six-tenths sen per gallon. This duty is twice as large as before, and it tends to encourage the home production of oil. We have in this country one hundred and thirty-three oil wells, but the annual output of these wells is very insignificant, and we believe the new tariff will scarcely affect the importation of American oil. I say this because our demand for kerosene oil is increasing year by year, while our home production is very trifling. The following figures indicate the growth in the import of kerosene oil from the U. S. and Russia, and it will give an idea how rapidly the demand for kerosene oil is increasing here:

From U. S.		From Russia.		From U. S.		From Russia.	
Yen.		Yen.		Yen.		Yen.	
1897.....	5,971,966	1,336,353		1894.....	4,079,352	1,055,980	
1896.....	5,282,909	1,013,127		1893.....	2,599,581	1,801,160	
1895.....	3,039,355	1,217,990		1892.....	2,530,940	797,658	

Locomotive engines, railway passenger cars, rails, printing machines, telegraph wires are included in the conventional tariff, and duty for these articles is just the same as before; while on the other hand, iron and steel bars, rods, sheets and plates are 2½ per cent higher, and iron rail is twice higher in the rate of Custom House duty than before. But as we have no iron mines in this country, we have to rely upon the foreign product just the same, and therefore our new tariff would scarcely affect the importation of those commodities. On the contrary the marked advance in the import of American rails, locomotives, engines, iron nails and pipes, as shown below, is to be regarded as a promise of further advance:

	1893.	1894.	1895.	1896.	1897.
	Yen.	Yen.	Yen.	Yen.	Yen.
Rails.....	.....	.....	.....	374,911	1,284,975
Iron pipes.....	20,413	19,295	67,250	73,942	939,379
Engines.....	306	51,139	103,367	54,870	211,970
Locomotives.....	116,707	553,302	284,330	416,107	2,303,385
Dynamos, electric.....	99,253	145,909	69,826	279,516	685,049
Iron nails.....	305	569	5,063	232,364	939,379

As I have repeatedly stated in my communications, the American locomotive and other machinery are gaining much favor here, and in many cases the United States is winning against British and German competitions. The following analysis serves to give prominence to this fact. The statement covers the years 1892 and 1897, and for each year the countries are given in the order of their rank:

IMPORTS OF LOCOMOTIVE ENGINES FROM THREE GREAT POWERS.

	Yen.	Yen.	Yen.
1892.....	G. B. 151,157	Ger.. 48,922	U. S.. 330
1897.....	U. S. 2,393,365	G. B. 1,805,481	Ger.. 2,146

IMPORTS OF RAILS.

	Yen.	Yen.	Yen.
1892.....	G. B. 632,745	Ger.. 33,624	U. S.. None
1897.....	G. B. 1,926,726	U. S. 1,234,975	Ger.. 170,303

IMPORTS OF ENGINES.

	Yen.	Yen.	Yen.
1892.....	G. B. 131,609	U. S.. 21,001	Ger.. 2,609
1897.....	G. B. 1,944,771	U. S. 211,970	Ger.. 10,841

IMPORTS OF ELECTRIC DYNAMOS.

	Yen.	Yen.	Yen.
1892.....	Ger.. 73,942	U. S.. 50,116	G. B. 0,471
1897.....	U. S. 685,049	G. B. 185,063	Ger.. 166,854

IMPORTS OF IRON PIPES AND TUBES.

	Yen.	Yen.	Yen.
1892.....	G. B. 47,417	U. S.. 6,130	Belg. 0,93
1897.....	G. B. 679,609	Belg. 117,537	U. S.. 95,495

IMPORTS OF IRON PLATES AND SHEETS FROM FOUR GREAT POWERS.

	Yen.	Yen.	Yen.	Yen.
1892.....	G. B. 264,266	Belg. 43,621	Ger. 12,101	U. S. None
1897.....	G. B. 991,376	Belg. 126,678	Ger. 45,952	U. S. 1,249

IMPORTS OF IRON BAR AND ROD FROM FIVE GREAT POWERS.

	Yen.	Yen.	Yen.	Yen.	Yen.
1892.....	G. B. 525,185	Ger.. 158,101	Belg. 141,251	Fr.. 35,113	U. S. None
1897.....	G. B. 1,529,117	Belg. 1,068,659	Ger.. 291,724	U. S. 134,323	Fr.. None

IMPORTS OF IRON NAILS FROM FIVE GREAT POWERS.

	Yen.	Yen.	Yen.	Yen.	Yen.
1892.....	Ger.. 565,314	Belg. 180,073	G. B. 157,373	U. S.. 2,593	Fr. None
1897.....	U. S. 939,379	Ger.. 422,010	Belg. 68,298	G. B. 32,654	Fr. 5,929

In the first case the United States rose from the second rank, defeated England and Germany in five years and advanced to the first rank; in the second case the United States beat Germany; in the third and sixth cases she kept her original position; in the fourth case she rose from the second rank, defeated Germany and came to the first; in the seventh case she made only one step advance; in the last case she began her career at the fourth rank and advanced to the first rank by defeating Germany, Belgium and Great Britain; only in the fifth case was she beaten by Belgium and retrograded one rank. Thus the United States has recently made a brilliant record in the commercial competition with great European Powers in the Far Eastern market, and we believe she is likely to continue her triumphant career throughout the coming century.

Turning to the refined sugar, cotton piece goods and yarn, I should say that these are the most important of all the imported commodities, and duly included in the conventional tariff; nevertheless duty for refined sugar and cotton-piece goods is twice higher, and that of cotton yarn is four-fifths higher than before. This increased rate of duty would certainly encourage cotton manufactures as well as sugar refining industry in Japan. We have already one hundred cotton mills and several sugar refineries. Regarding cotton mills, I may refer to our progress in that particular in a subsequent communication. The sugar refining industry is very promising here, and it may make further decided growth under the stimulus of the new tariff, since we have a large demand for refined sugar on one hand, while on the other an easy access of the raw material from Oceanic Islands. If the cotton and sugar industries should undergo great additional expansion in this country, the import trade for refined sugar and cotton piece goods from abroad might be seriously curtailed. The following is the detailed account of the import of cotton and sugar from several countries for 1897.

	Hong Kong.	Germany.	Philippines.	China.	U. S.
	Yen.	Yen.	Yen.	Yen.	Yen.
Brown sugar...	834,374	19,810	2,289,460	1,057,669	.....
White sugar...	10,793,863	3,321,402	32,650	656,339	116,512
Rock candy...	1,899	32,763	.....	1,255	.....
Leaf sugar...	10,854	3,114	.....	35	3,095
Molasses.....	126,779	714	.....	.....	.....
Totals.....	11,767,769	3,378,103	2,322,110	2,315,329	110,597

COTTON PIECE GOODS.

	Gr. Britain.	Germany.	U. S.
	Yen.	Yen.	Yen.
Cotton yarn.....	9,587,915	.....	.....
Cotton threads.....	252,767	8,328	.....
Chintzes.....	981,125	.....	.....
Cotton drills.....	549,828	.....	894
Cotton satins.....	1,784,209	8,256	.....
Cotton velvets.....	651,923	25,127	.....
Shirting, gray.....	3,778,312	.....	5,485
Shirting, white.....	247,659	91	3,039
Shirting, figured.....	17,548	12	.....
Shirting, twilled.....	76,227	.....	656
Shirting, dyed.....	134,287	1,063	.....
Taffetas.....	10,394	586	.....
Fabrics.....	89,400	.....	.....
Turkey reds.....	477,714	.....	.....
Victoria lawns.....	138,324	.....	.....
Other piece goods.....	294,878	148,300	117,016
Totals.....	19,060,510	196,783	127,089

Here no one can help noticing that Hong Kong, Germany and Great Britain are the three greatest sugar and cotton suppliers, while the United States is the smallest; it follows that the proposed duty for sugar and cotton will scarcely affect the American trade for Japan.

Finally, cigarettes and watches are not included in the conventional tariff. The new duty for the former is forty per cent and that for the latter varies from thirty to twenty per cent, according to the quality of goods. But we hardly think the proposed high duty will in any wise affect the importation of these commodities, because we have not the skill of making watch movements, and because the domestic tobacco is subject to a very heavy internal tax, say one hundred per cent on the cost. Therefore, I am glad to say that, in spite of the proposed high duty, the import of American tobacco and watches should increase, year after year. The following figures, showing such to have been the tendency in the past, would seem to afford confirmation for this belief.

IMPORT OF CIGARETTES AND WATCHES FROM THE UNITED STATES.					
	1897.	1896.	1895.	1894.	1893.
Cigarettes.....	573,357	377,757	220,580	179,96	229,465
Watches.....	219,220	188,894	59,220	23,729	20,074

The conclusion therefore is that the new Japanese tariff will hardly injure the interest of American commerce, while on the other hand the several tables quoted above abundantly indicate the almost irresistible progress made by American trade in this quarter of the world, as well as the bright future in store for it.

#### ITEMS ABOUT BANKS, BANKERS AND TRUST CO'S.

—Mr. A. G. Loomis, President of the Aetna National Bank of Hartford, Conn., will, at a meeting of the directors of the National City Bank of New York, to be held next week, be elected Active Vice-President of that bank. Mr. Loomis is a comparatively young man. He has been very successful in the management of the Aetna Bank of Hartford, and is recognized throughout the country as an authority on commercial credits and ratings, and therefore, will be of great assistance to Mr. Stillman, the President, in the management of the City Bank. Mr. Loomis is well known in this city, having for some time been a large buyer of paper and also a loaner of money in New York.

—This week, Tuesday, the stockholders of the National Bank of Commerce of St. Louis met and voted to issue 20,000 shares of additional stock. They offered it to the shareholders at 200. President William H. Thompson was Chairman of the meeting and Cashier B. F. Edwards acted as Secretary. Nearly the entire capital stock was represented (25,175 shares out of a total of 30,000 shares), and the vote was unanimous for the increase. This sale of new stock will yield \$4,000,000—of which \$2,000,000 will be added to the bank's capital, making the capital \$5,000,000, and \$2,000,000 to the surplus, making the surplus \$3,057,143. When the Controller of the Currency has given his approval of this action by the stockholders this St. Louis bank will become the third bank in the United States with \$5,000,000 capital, and the second in size counting capital and surplus. The Bank of Commerce of New York has \$5,000,000 capital and \$3,559,100 surplus.

—The Bank of Buffalo has issued a circular, of which we have received a copy, announcing its purpose hereafter to pay depositors only 2 per cent on their balances. It also states that the preliminary steps have been taken to increase its capital from \$300,000 to \$500,000 and its surplus from \$350,000 to \$500,000. That is to say, the managers propose to strengthen the bank and increase the security given the public and depositors (1) by making the capital and surplus \$1,000,000 against \$650,000 heretofore, and (2) by reducing the rate of interest paid for deposits.

—Savings banks deposits increase so fast that year after year the legislatures of the various States have to widen the field for their employment. The New York State Legislature has two bills of this character before it. This week (Wednesday) the measure introduced by Senator Krum was agreed to by the Committee on Banks, and has been reported favorably. Among other things it authorizes savings banks to invest their deposits in the mortgage bonds of the Chicago & North Western R.R. Co.; Chicago Burlington & Quincy R.R. Co.; Michigan Central R.R. Co.; Illinois Central R.R.

Co.; Pennsylvania R.R. Co.; Delaware & Hudson Canal Co.; Delaware Lackawanna & Western R.R. Co.; New York New Haven & Hartford R.R. Co.; Boston & Maine R.R. Co.; Maine Central R.R. Co.; provided that at the time of making such investment the said railroads shall have earned and paid regular dividends of not less than 4 per cent per annum for the ten years next preceding such investment, and provided the capital stock shall equal or exceed in amount one-third of the par value of all its bonded indebtedness, etc.

The Massachusetts Legislature also has two or three bills under consideration, but Mr. Starkes Whiton, Chairman of Commissioners of Savings Banks, in a letter to us under date of March 22, states that no law has as yet been enacted. From what we hear otherwise, the expectation is that railroad bonds of several States other than those now included will be added by the Legislature before it adjourns to the list of permissible investments for the savings banks of that State.

Connecticut is likewise making progress in the same direction. There is to be a hearing on Thursday of next week on a bill in preparation by a select committee of savings bank men.

—Mr. William H. Oakley, President of the National Citizen's Bank, died in this city on Sunday last in the seventy-second year of his age. Mr. Oakley was connected with the bank in various official positions during the greater part of his business life, and he was highly esteemed by those who were closest to him, and respected by all. He was a director in the Manhattan Life Insurance Company, one of the trustees of the Manhattan Savings Institution and Treasurer of the American Institute.

—Mr. William H. Nichols, President of the Nichols Chemical Company and of the General Chemical Company of this city, and Mr. Hugh J. Grant, have been elected directors of the Corn Exchange Bank. Provision for an increase in the number of directors was made at the time of the taking of preliminary steps for the absorption of the Hudson River and of the Astor Place banks as branches of the Corn Exchange. Both these banks opened on Monday as branches of the above-named institution.

—The Court of Appeals of the State of New York has decided that the statutory exemption from taxation contained in Section 4 of Chapter 903 of the Laws of 1896 was intended to apply to depositors in savings banks, and to relieve them from assessment for taxation on their deposits. The decision is important, for the Supreme Court in the Second Department had previously held that savings bank depositors were liable to pay a personal property tax on the amount of their deposits, and the tax authorities in Brooklyn have acted under this decision. The New York Tax Commissioners were also advised that savings bank depositors in this city are liable for the tax. But now the decision of the Court of Appeals finally disposes of the question in the negative.

—The Clearing House regulations for the collection of charges on country checks have been amended by the Clearing House Committee so as to include Hoboken and Bayonne, N. J., among the discretionary points at which it is optional whether charges on collections shall be made. The new rules will make necessary some change in individual bank methods. Checks deposited or forwarded for collection will have to be classified according to locality, and this classification must either be made by the depositor, or by the correspondent or by the bank. The charges for collections will probably be entered upon the pass book of the depositor monthly.

—The revised laws of New Jersey relating to banks, trust companies and safe deposit companies, to which reference was made in this column last week, have passed both houses of the Legislature and received the signature of the Governor.

#### IMPORTS AND EXPORTS FOR FEBRUARY.

The Bureau of Statistics at Washington this week issued the statement of the country's foreign trade for February, and from it and from previous statements we have prepared the following interesting summaries. The tables are the same as those formerly given by us in our article on the Financial Situation.

FOREIGN TRADE MOVEMENT OF THE UNITED STATES.  
In the following tables three ciphers (000) are in all cases omitted.

	1898-99.			1897-98.		
	Exports.	Imports.	Excess.	Exports.	Imports.	Excess.
March' dis...	247,796	149,116	+98,680	238,470	133,918	+104,552

IMPORTS AND EXPORTS OF GOLD AND SILVER AT SAN FRANCISCO.

Through the courtesy of the Collector of Customs at San Francisco we have received this week the details of imports and exports of gold and silver through that port for the month of February, and they are given below in conjunction with the figures for preceding months, thus completing the results for the eight months of the fiscal year 1898-99. The imports of gold are smaller than in any month since July, but are still of considerable volume, the amount received reaching \$2,215,256, of which \$2,196,010 was in coins. Of silver there came in \$107,435, of which \$83,255 was bullion. During the eight months there has been received a total of \$26,792,043 gold and \$1,305,578 silver, which compared with

\$14,706,296 gold and \$1,474,680 silver in 1897-98. The shipments of gold during February were \$53,915, all coin, and the exports of silver have been \$457,093, of which \$420,792 was bullion. For the eight months the exports of gold have reached \$901,583, against \$1,094,272 in 1897-98, and \$3,842,313 silver has been sent out, against \$3,019,525 in 1897-98. The exhibit for February and the eight months is as follows:

Monetary and Commercial English News

[From our own correspondent.]

LONDON, Saturday, March 11, 1899.

Early in the week the market for mining shares was hopeful and active, and prices all rose considerably. With the recovery in New York on Tuesday there was a corresponding recovery in the American department here on Wednesday, and towards the close of Wednesday evening there was a very hopeful spirit and a general expectation that business was once more beginning to widen out; but the protest of the Russian Government against the Noi Chwang Ry. contract, in its pretension that practically the people of no other State were to have a free commercial opportunity within the Russian sphere of influence, checked operations and revived some little apprehension.

The general impression, however, is that nothing serious will come of the Russian protest. Probably Russia will avail herself of the opportunity to wring further concessions from China, but it is not thought in the least likely that she will insist upon her protest to the teeth of the British notification that the contract will be maintained by this country. In the first place, as everybody knows, the Siberian Ry. is not finished, and it is difficult to see, therefore, how Russia could enter upon a conflict at such a distance from her base of supplies, and without rapid means of transit either by land or by sea.

Beyond this it is pretty certain that France will not this time allow herself to be made a cat's-paw of by Russia. In the Fashoda affair Russia found no difficulty about throwing over France, and therefore it is not in the least thought probable that France will back up Russia at the risk of having to bear the brunt of the attack of the whole British fleet. Over and above all this the question at issue is really of as much interest to the other commercial countries—the United States, Germany and Japan in particular—as it is to ourselves. For if the Russian pretension is to be allowed nobody but a Russian can get security for any kind of enterprise within what Russia chooses to claim as her sphere of influence.

But while for all these reasons it is not thought likely that there will be serious consequences from the protest, the act revives apprehension and deters the timid from engaging in new enterprises. It may be mentioned, as illustrating the financial straits to which Russia has to resort just now, that having found it impossible to raise a large loan either in France, or in Germany, or in this country, she is now employing a syndicate of bankers to place in Franco a small internal 4 per cent loan for a little over 3 millions sterling. The French holdings of Russian securities are on so enormous

a scale that no issuing house will undertake to bring out another large loan. Germany is in need of capital for carrying on her own business, and here in England it is extremely doubtful whether a Russian loan could be placed.

Meantime the Muscat incident is closed, France contenting herself with a coal-shed for supplying coal for her shipping and renouncing the claim to have a harbor of her own. It is also understood that the negotiations between this country and France regarding the British and French spheres of influence in Africa are going on very satisfactorily. It is also said that there is a chance of an arrangement respecting both Newfoundland and Siam.

There is a report, which I believe is substantially correct, that two or three of the South African mining magnates have combined to negotiate with President Kruger for a modification of the dynamite monopoly. The law advisers of the Transvaal Government state that as the breach of the conditions on which the monopoly was granted was authorized by the Government, the Government now is not in a position to take advantage of the breach. It is understood that the mining magnates are willing to lend a large sum on condition either that the monopoly is bought up, or that its terms are so modified that there can be a large reduction in the price of dynamite. It is impossible to find out how the negotiations are proceeding. But as the market for Transvaal mining shares is very strong in spite of the Russian protest, and the uneasiness it has excited, it is generally believed that the negotiations are being conducted more favorably than otherwise would seem likely.

Meantime trade is improving in every direction; even the exports are at last expanding. Last month the value of the exports of British and Irish produce and manufactures exceeded those of February of last year by £1,740,557 or over 9½ per cent. Deducting the value of newships sold abroad, an item which did not appear in February of last year, there remains an increase of £1,535,525, or about 8½ per cent. To a large extent the increase is due to much larger purchases by the United States and India, though there are augmented exports to several other countries.

The rates both of interest and of discount have moved up somewhat this week, owing in great measure to the large collection of the revenue and in a lesser degree to the fear of gold shipments to New York, inspired by the decline in the New York sterling exchange. In ordinary years the Bank of England would have obtained control of the market much sooner than this. But the payments out of the Exchequer have been on an exceptionally large scale this year, and therefore the market, while being denuded with one hand has been supplied with the other. For this reason it appears likely that the payments out of the Exchequer will not be so large at the end of the month as they usually are, and if so the Bank will continue to obtain more and more control of the market.

If there are no gold shipments to New York there will probably be two or three weeks of easy money in April. But rates will begin to rise again at the end of that month. On the other hand, if gold goes to New York, or even if the New York sterling exchange remains low, rates will probably continue high all though the spring. For the Bank reserve is not very strong, and besides it is thought probable that if rates were to rise much in New York, American money now employed in Germany would be withdrawn; that in consequence rates would rise rapidly in Germany; and that the danger of gold shipments to Germany would then arise. Upon the whole, it is thought probable that the money market will not change very much, except for a few weeks in April, for months to come.

In France the money market just for the moment is rather tight, owing largely to the issue of the Russian internal loan referred to above, and in a lesser measure to very considerable purchases of mining securities in this country which are about to be admitted to a quotation in Paris. It is estimated that the sum to be paid for the blocks of shares bought aggregate about three-quarters of a million sterling.

Meantime the India Council continues to sell its drafts with undiminished success. It offered for tender on Wednesday 70 lacs, and the applications amounted to 935 lacs. The whole amount offered was sold at prices varying from a trifle over 1s. 4d. per rupee for bills to 1s. 4 1/32d. per rupee for telegraphic transfers.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

WALL STREET, FRIDAY, MAR. 24, 1899.—3 P. M.

The Money Market and Financial Situation.—The most important developments of the week in Wall Street are a steadily diminishing speculative interest in industrial stocks, a corresponding increased interest in railway shares, and a steadier money market. The sensational movement in American Sugar Refining issues was worked at too high a temperature to continue, and as it subsided legitimate business, which had been for the moment greatly overshadowed, again became prominent. It is somewhat surprising to the more conservative element in Stock Exchange circles that this revival of interest, especially in the case of railway shares, is attended at the start with an advance in prices.

Evidence that this movement is not speculative in character is seen in the fact that the advance is most pronounced in such substantial issues as New York Central, Delaware Lackawanna & Western, Pennsylvania, Chicago & North Western and Burlington & Quincy, and in some cases the quotations recorded this week are the highest in recent years. The investing public evidently does not consider the political, industrial or financial situation in any other than a favorable light.

The money market, as noted above, is steadier, but as has been predicted it is steadier at higher rates than have been customary of late, thus illustrating the fact that a 1½ to 2-per-cent rate for money is not essential to legitimate enterprise and activity. Possibly something like the present rates may be maintained for some time to come, and if so, will it be detrimental to any important interest? We think not.

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 3 to 9 per cent. To-day's rates on call were 4 to 4½ per cent. Prime commercial paper quoted 4 to 5 per cent.

The Bank of England weekly statement on Thursday showed a decrease in bullion of £560,633, and the percentage of reserve to liabilities was 41.40, against 43.20 last week; the discount rate remains unchanged at 3 per cent. The Bank of France shows an increase of 2,550,000 francs in gold and 2,400,000 francs in silver.

The New York City Clearing-House banks in their statement of March 18 showed a decrease in the reserve held of \$6,079,700 and a surplus over the required reserve of \$19,074,175, against \$23,203,000 the previous week.

Foreign Exchange.—The foreign exchange market has been dull and easy on a limited demand for bills. Rates were generally steady.

To-day's actual rates of exchange were as follows: Bankers' sixty days' sterling, 4 83¼ @ 83¼; demand, 4 83¼ @ 83¼; cables, 4 86 @ 86¼; prime commercial, sixty days, 4 82¼ @ 4 83; documentary commercial, sixty days, 4 82¼ @ 4 83¼; grain for payment, 4 83 @ 83¼; cotton for payment, 4 82¼ @ 4 82¼; cotton for acceptance, 4 82¼ @ 83.

Posted rates of leading bankers follow:

Mar. 24.	Sixty days.	Demand.
Prime bankers' sterling bills on London.	4 84 @ 84¼	4 80¼
Prime commercial.....	4 82¼ @ 83	.....
Documentary commercial.....	4 82¼ @ 83¼	.....
Paris bankers' (francs).....	5 21¼ @ 21½	5 19¼ @ 19½
Amsterdam (guilders) bankers.....	39¼ @ 39½	40 @ 40½
Frankfort or Bremen (reichmarks) bankers.....	94¼ @ 94½	95½ @ 95½

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 1-16 discount, selling 75c. per \$1,000 premium; Charleston buying par, selling ¼ discount; New Orleans, bank, 50c. premium; commercial, 25c. premium; Chicago, 35c. discount; St. Louis, 40c. per \$1,000 discount.

United States Bonds.—Sales of Government bonds at the Board include \$166,000 4s. comp., 1½ 25, at 128½ to 129; \$13,500 4s. comp., 1907, at 113 to 113½; \$23,000 5s. comp., at 112¼ to 112½; \$10,000 5s. reg., at 112; \$522,000 3s. comp., at 107¼ to 108¼; \$1,900 ditto (small bonds), at 107¼ to 107½; and \$10,500 3s. reg., at 108 to 108½. For yearly range see seventh page following.

\* This is the price bid at the morning board; no sale was made.

State and Railroad Bonds.—Sales of State bonds at the Board include \$60,000 Tennessee settlement 3s at 97¼ and \$37,000 Virginia fund. debt 2-3s of 1891 at 83 to 83½.

The railway bond market has been steady to firm, on a volume of business somewhat better than last week. Changes in quotations are generally unimportant, being about evenly divided between fractional advances and declines. Louisville Evansville & St. Louis 1st trust receipts were notably strong features of the active list, having advanced nearly 5 points on limited transactions. Texas & Pacific 2ds advanced 2¼ points and St. Louis Southwestern 2ds 2¼ points, on a good demand. High-grade bonds are in request by investors, but such offerings are extremely light, and the activity was limited chiefly to a few issues, including Atchafalpa, Kansas City Pittsburg & Gulf, Louisville, Ev. & St. L., Northern Pacific, Reading, St. Louis Southwestern, St. L. & Iron M., Texas & Pacific and Wisconsin Central bonds.

Stock and Bond Sales.—The following shows the volume of business in stocks and bonds on the New York Stock Exchange for the past week and since January 1.

	Week ending Mar. 24. 1899.	1898.	Jan. 1 to Mar. 24. 1899.	1898.

Railroad and Miscellaneous Stocks.—The stock market was irregular during the early part of the week, but gradually settled into more normal conditions. The volume of business was better, transactions averaging about 725,000 shares per day, against 661,000 shares last week. Monday's market was characterized by the highly erratic movement of some industrial stocks and the city traction issues. On that day nearly 200,000 shares of American Sugar Refining were traded in at prices ranging from 164 to 182. Continental Tobacco covered a range of 13 points and American Tobacco over 9 points. These features were so absorbing that little attention was paid to the railway list as a whole, but rumors in regard to New York Central's new Western connections were revived, and that stock advanced 4 points, a large part of which it has retained. The anthracite coal stocks have been strong through the week and show a net gain of from 3 to nearly 10 points. The granulars have become prominent for activity and strength as the interest in investment shares increased, led by Burlington & Quincy, which gained nearly 3 points. Third Avenue declined 1½ points and Metropolitan Street Railway 5 points, on the prospect of legislative action at Albany. Of the miscellaneous list, the various iron and steel issues were uniformly strong. General Electric was weak, on the commencement of a suit by the Westinghouse Company. New York Air Brake sold 24 points below the high quotation of last week, but recovered a large part of the loss.

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every **STEAM** railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

ROADS.	Latest Gross Earnings.		Jan. 1 to Latest Date	
	Week or Mo	1898-9.	1897-8.	1898-9.

**Net Earnings Monthly to Latest Dates.**—The table following shows the gross and net earnings of STEAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained, is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of March 18, 1899. The next will appear in the issue of April 22, 1899.

## STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

## STREET RAILWAYS AND TRACTION COMPANIES.

\* Includes Baltimore Traction and City & Suburban for both years.

**Street Railway Net Earnings.**—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday) we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONICLE of March 18, 1899. The next will appear in the issue of April 22, 1899.

## ANNUAL REPORTS.

**Annual Reports.**—The usual index is omitted this week, but that published in the CHRONICLE of March 18 covers all reports published to March 11, inclusive.

### Delaware & Hudson Canal Company.

(Report for year ending Dec. 31, 1898.)

President R. M. Olyphant says:  
Canal, Etc., Charged Off.—Your managers, after careful consideration, decided that it would be greatly to your interest to cease operating the canal. The cost of transportation by that route is too great as compared with other methods, and the increased earnings will, it is believed,

much more than compensate for the change. The cost of canal has, therefore, been charged off, and no longer stands as an asset on your books.

It has been reported that the Gravity R.R. would also be given up. This is an error, as that road will be changed to broad-gauge and be used for the carrying of coal, general freight and passengers, with good prospects of yielding a profitable return. The Gravity equipment has, of course, been marked off—an item of about \$300,000. The general equipment has also been marked down about \$2,000,000, and new and larger equipment will be purchased, by which the amount so expended will be regained in a short period through the saving in expense of transportation. Other reductions, aggregating \$340,323, have been made as follows: Boats, barges and steamboats, \$167,257; mine improvements, \$100,000; sundry accounts, \$73,065.

These changes have necessitated some readjustment of values in the balance sheet. Fortunately, the practice of carrying the real property at a very low valuation on the books of the company has rendered this an easy matter, and the valuations now placed upon various properties, especially in the case of your coal lands, are very much below their real value.

**Sinking Fund.**—Your managers have decided to recommend that a portion of the net earnings be set aside every year to act as a sinking fund against the mining of coal, and their views will be presented to the stockholders at the annual meeting in May for their action.

**Coal Lands.**—Stockholders, owing to unfounded rumors respecting the coal lands of the company and their near exhaustion, have shown much anxiety upon the subject. Your managers therefore decided to order an examination by thoroughly independent experts. This examination has been completed, showing tons of coal owned in fee by your company, 165,186,393; tons of coal under lease by your company, 58,361,400; total, 223,547,793.

**Sale of Rutland Stock.**—Your managers have sold the stock of the Rutland R.R. at cost and 4 per cent interest, payable Jan. 1 and July 1. On this account \$235,000 cash has been received; and of the balance, \$100,000 is due on Dec. 1, 1899, and \$1,165,000 is due on Dec. 1, 1900. These payments bear interest and are properly secured.

**Refunding.**—Your leased roads show a loss of \$5,526 for the year. The first mortgage on the New York & Canada R.R., \$4,000,000 at 6 per cent, and \$1,000,000 debentures at 4½ per cent, will come due in 1902, when a large saving may be expected from refunding at a lower rate of interest; and \$10,000,000 of Albany & Susquehanna 7 per cent and 6 per cent bonds will fall due in 1906.

**New Equipment.**—There were added to equipment during the year: 7 locomotives; 65 coal cars; 150 platform cars; 50 box cars; 2 milk cars; 1 baggage and express car. 3,164 tons of steel rails were purchased and charged to operating expenses.

The total output of coal, the amount produced by your company, and the amount transported for others, were:

Tons (000s omitted).	1898.	1897.	1896.	1895.	1894.	1893.

### Burlington Cedar Rapids & Northern Railway.

(Report for the year ending Dec. 31, 1898.)

President C. J. Ives says in substance:

The traffic for the year 1898 exceeded that of any year since the organization of the company. The directors have declared a special dividend of 2 per cent on the capital stock. This special dividend will appear in the account for 1899.

The steady improvement of the property has been carried on as in former years. New steel rails to the amount of 1,562 tons, weighing eighty pounds to the yard, have been laid. Oak ties to the number of 222,480 and cedar ties to the number of 141,704 have been placed in track, and 45,549 oak ties and 8,743 cedar ties are on hand for use in 1899. Twenty four wooden bridges have been replaced with steel and thirty-three with stone culverts. An improvement of grade near Violon has been made at an expenditure of \$30,430; this covered the expense of replacing an iron bridge with a double arch culvert, the moving of 150,000 cubic yards of earth, and the placing of 2,355 cubic yards of stone work. The results of this change represent an increase of 25 per cent in the hauling capacity of engines at this important point.

There has been contracted for use in 1899 8,000 tons of steel rails, which will mostly be used on the main line, replacing lighter rails, which will be retained on the branch lines. There has been purchased to be delivered part in 18-9 and part in 1899, 50 vehicle cars and 400 box cars, all of 60,000 pounds capacity; also 8 passenger coaches. This will be all the new equipment required during this year. The prospects for earnings for the first half of the year 1899 are very good, and with an average crop for this year we may look for earnings substantially the same as in 1898. The policy of improvement will be continued during the coming years until all wooden bridge structures are replaced by steel or stone.

**Statistics.**—The operations and fiscal [results] and balance sheet for several years compare as follows:

### Baltimore Chesapeake & Atlantic Railway.

(Report for the year ending August 31, 1898.)

The gross earnings for the year increased \$76,678 and the net, \$51,335. President John S. Wilson says in part:

The mail compensation and through traffic with connecting lines were materially increased, but on the other hand our Choptank route was obliged to meet sharp competition; the peach crop was a failure and the "mines" placed near Fort Carroll at the commencement of the late war did serious injury to our business. While the expenses increased 54 per cent, 13 per cent more was put to maintenance of equipment and charged to expenses, thus putting the property in better condition than ever before. The only source of revenue showing a decrease was the express. This was owing to the adjustment of a disputed claim that had been increasing since 1895.

The earnings and balance sheet were as below:

	1898.	1897.	1896.	1895.
Gross earnings.....	\$59,843	\$48,005	\$49,708	\$514,108

### Tennessee Coal, Iron & Railroad Co.

(Report for the fiscal year ending Dec. 31, 1898.)

President N. Baxter, Jr., says, in substance:

**General Results.**—The year 1898 has been an eventful one in the history of the company. Many matters of great importance have been carried to successful completion and the company has been placed in better condition to meet the demands upon it for increased output of products at lower costs. The year has also witnessed the commencement of a movement toward better prices that bears every evidence of being of a more permanent character than any similar movement since 1893. I confidently believe, with our various brands of iron so well and favorably established in the markets of foreign countries that the company will enjoy to the fullest extent its share of trade in the foreign markets, both for its iron and steel.

The production of materials by this company for the year 1898 is as follows: Coal, 3,679,534 tons (increase of 222,221 over 1897); coke, 992,697 tons (increase, 76,205); pig iron, 549,457 tons (increase, 7,517).

**Steel Plants.**—During the year [under charter of the Alabama Steel & Shipbuilding Co.] we began building at Ensley an open-hearth steel plant, which will have a capacity of at least one thousand tons of steel products per day. We have secured control of the stock of the Robinson Mining Co., and, after considerable negotiation have closed contracts with parties incorporated as the Alabama Steel & Wire Co. for the erection of a wire rod, wire and wire-nail plant at Ensley, and for the supplying to them for a period of years of a large tonnage of billets at fair prices.

**Ensley Land Co.**—In my last report I spoke of the effort to make of value the Ensley Land Company stock held by this company, and am gratified to be able to report that our efforts in that direction are being realized and that we can now see that the stock is going to be of great value.

**New Mineral Properties.**—Following our plan of adding each year to our mineral properties as much as we worked out, we have bought and paid for out of working account several valuable tracts of mineral lands, and have made some exchanges of lands where it would benefit this company by consolidating its holdings.

**Sale of Railroad Lines.**—We have made a sale of our railroad property upon terms satisfactory to this company, and with such restrictions as will insure us against any increase in that part of the work over the tracks as is done solely for the benefit of this company, but relieving us of the necessity of doing a great deal of work without remuneration. The details of this matter will be submitted to you in a separate report, and will, I am sure, meet your hearty approval. (See V. 68, p. 284, 430).

**General.**—We will blow three additional blast furnaces on or about April 1 and a fourth furnace will be ready for work between the 15th and 30th of April. The refunding of the Eureka and Alice bonds, which bear 7 per cent interest, has been accomplished since the close of 1898, with a lessening of the interest payments. In closing allow me to say that at no time in the history of the company has the prospect for the stockholders been brighter than it is this day.

**Statistics.**—The following statistics have been prepared for the CHRONICLE:

Sinking funds Dec. 31, 1897, were \$562,830.—V. 68, p. 430.

### Pennsylvania Steel Company.

(Report for year ending Dec. 31, 1898.)

The "Philadelphia Press" gives the following facts from the report presented at the annual meeting last week:

The Sparrow's Point plant was able to work at only about one-half its capacity, owing to the war in Cuba and the inability to get ore from that place. During 1898 the Sparrow's Point works were placed in first-class order and the ship-building plant was started up. The company has several large vessels to build, some being for the United States Government and a few for private corporations.

The prices paid for steel products during the best part of 1893 were low, and there was little profit made. The outlook is thought to be more encouraging, and at ruling prices there is a fair profit. It is understood the company has over \$2,000,000 of orders on its books.

The following were elected directors for the ensuing year: Edgar C. Felton, Steelton, Pa.; Luther S. Bent, Overbrook; Edinham B. Morris, Philadelphia; S. W. Hunnewell, Boston; John Cassels, Washington, D. C.; George Wood, C. Stuart Patterson, Evans R. Dick and William B. Winsor, Philadelphia.

The "Philadelphia Financial News" supplies the following data as to production, earnings, charges, etc.

STEELTON OUTPUT.				
	1898.	1897.	1896.	
Pig and spiegelheisen.....	246,000	137,000	85,000	
Bessemer and open hearth steel ingots.....	340,000	259,000	200,000	
Steel rails.....	132,000	110,000	69,000	

**NOTE.**—In 1898 45 per cent of the production tonnage was open-hearth. The frog and switch department shipments, it is stated, increased in value 20 per cent, while the bridge and construction department shipments decreased in value 15 per cent. Average price for rails was \$1.92 per ton less than in 1897. For billets and slabs 86½ cents more per ton was received than in 1897.

EARNINGS, CHARGES, ETC.				
	Steelton plant.	Sparrow's Point.	Total both.	
	1898.	1897.	1898.	1897.
Manufact'g profit.....	\$656,684	\$310,286	loss \$98,933	\$357,701

A director is quoted as saying: "There has been no financial plan formulated as yet, but I think that within a reasonable time the management will take advantage of the business prosperity and take the action that has been in mind for some years of calling upon stockholders for additional working capital."—V. 67, p. 428.

### Terminal Railroad Association of St. Louis.

(Report for the year ending Dec. 31, 1898.)

The increase of \$135,525 in gross earnings was contributed through all sources. After meeting fixed charges the report shows a surplus on the year's operations of \$236,430, which is greater by \$128,245 than that for the previous year. This result, however, is apparently without allowing for disbursements on account of the company's guaranty of St. Louis Merchants' Bridge bonds, the "advances on contracts," as shown in the next paragraph, having been \$115,000, or the same as in 1897.

"The expenditures which may be called extraordinary, including those for improvements," are shown in the report

as aggregating \$220,202, of which for real estate \$5,000, for construction \$56,522, for improvement account, new locomotives, coaches, etc., \$43,679, and "advances on contracts," \$115,000. For the current year it is estimated that there will be needed for extraordinary expenditures and betterments about the same sum, namely \$218,000.

The earnings, balance sheet, etc., compare as follows:

EARNINGS AND EXPENSES.				
	1898.	1897.	1896.	1895.

### Standard Underground Cable Company.

(Report for the year ending Dec. 31, 1898.)

The reports of this company, of which Mr. George Westinghouse is President, and whose capital stock is \$1,000,000 (par, \$100), compare as follows:

	1898.	1897.
Sales wire, cable, etc.....	\$1,290,017	\$850,556
Cable laying, jointing, etc.....		74,561
Net profit.....	\$169,034	\$97,052
Dividends.....	60,000 (7%)	70,000
	\$109,034	\$27,052
Total surplus Dec. 31.....	\$437,570	\$335,094

\* Including \$95,413 for manufactured goods on hand.

† This amount was paid during 1898: an extra dividend of 2 per cent has been declared and paid since Jan. 1.

The board of directors was re-elected, as follows:

Mark W. Watson, James H. Willock, John B. Jackson, George B. Hall, John Moorhead, Jr., Robert Pitsa, B. F. Jones, J. N. Davidson and Joseph W. Marsh.—V. 66, p. 430.

### Lehigh Coal & Navigation Co.

(Report for the year ending Dec. 31, 1898.)

The report affords the following data:

The coal tonnage of the Lehigh & Susquehanna R.R. and Lehigh Canal was 4,876,037 tons in 1898, compared with 5,250,810 tons in 1897. The gross receipts of the Lehigh & Susquehanna R.R. were \$1,292,899, as compared with \$4,411,373 in 1897, and the rental received therefrom (one-third of gross receipts) was therefore \$1,430,465, against \$1,470,457 in 1897. The rental was consequently \$16,568 in excess of the guaranteed minimum of \$1,414,400. The coal traffic has fallen off somewhat from previous years, in common with other carriers of this fuel, but it is believed, however, that this year will show an increase.

The production of coal from the company's property, including the coal used by the company in its operations, was 1,450,964 tons, as compared with 1,530,823 tons in 1897, a decrease of 79,859 tons.

**Lehigh & Hudson River Ry. Bonds Guaranteed.**—On May 2, 1898, this company joined with the Central R.R. Co. of New Jersey in guaranteeing the principal and interest of general mortgage 5 per cent bonds of the Lehigh & Hudson River Railway Co. to the amount of \$1,062,000, one-half of this amount then belonging respectively to each company. The road is owned and controlled jointly by this company

and the Central RR. Co. of New Jersey; the ownership was acquired in 1895. For the past ten years the road has never failed to earn more than its fixed charges. [The facts regarding the new refunding loan of the Lehigh Coal & Navigation Co. are also set forth in detail, but these have already been published in the CHRONICLE.]

**Balance Sheet.**—The earnings for the year were given in the CHRONICLE of March 4, page 425. Balance sheet follows:

BALANCE SHEET JAN. 1, 1899.

Assets—	Liabilities—
Lehigh & Susq. RR. \$15,514,500	Capital stock \$14,366,650
Lehigh Nav. 1,969,474	Bonds 16,548,083
Coal lands 4,890,939	Bills payable 590,554
Coal improvements 2,456,363	Cent. RR. of N. J. construction—
Panther Creek RR. 531,266	Acc. Lehigh & Susq. RR. 298,377
Landford shops 98,629	Do. Wilkesbarre & Scranton Ry. 312,571

<b>Total \$32,723,721</b>	<b>Total \$32,723,721</b>

Balance sheet of Jan. 1, 1899, in V. 66, p. 390.—V. 68, p. 425.

### Edison Electric Illuminating Co. of New York.

(Report for the year ending Dec. 31, 1898.)

President Spencer Trask says in part:

The station earnings show an increase in gross of 17½ per cent, and in net, on the same basis as last year, notwithstanding reductions in rates, of 15 per cent. The ratio of operating expenses is practically the same as in 1897. The following shows the installations, central station service only:

	1898, Dec. 31.	1897, Dec. 31.	Increase.
Number customers.....	9,990	8,711	1,279
Number incandescent lamps.....	443,074	392,291	60,783
Number arc lights.....	7,353	7,201	152
Number motors, h. p.....	24,435	19,380	5,058
Total equivalent, 10 c. p.....	891,614	756,438	135,176

Adding supplementary service, etc., the installation figures on all services combined give a total of 994,810 10 c. p. lamp equivalent.

Two annex stations have been added during the year past, and the installation of improved machinery at the main stations has greatly increased the facilities of the company. The underground system has been extended as far west as Hudson Street, from Canal to Fourteenth streets, and as far north as Ninety-fifth Street, on the east side of Central Park.

The reduction of rates has continued, and on Oct. 15 a new system of rates was put in general operation experimentally. It is gratifying to note that the revenue of the company has continued to increase subsequently to each rate reduction, so that this policy has been thoroughly justified.

**Statistics.**—The earnings, expenses, etc., were as follows:

	1898.	1897.	1896.	1895.
Gross station earnings.....	3,894,012	2,466,216	2,222,737	2,000,856

## GENERAL INVESTMENT NEWS.

**Reorganizations, Etc.—Defaults, Reorganization Plans, Etc.**—The usual index is omitted this week, but that covering the items published to Feb. 24, inclusive, will be found in the CHRONICLE of March 4.

**American Fisheries Co.—Dividend Passed.**—The March dividend on the preferred stock has not been declared, as it has not been earned.—V. 68, p. 229.

**American Linseed Oil Co.—New Independent Mill.**—Alexander Euston, recently President of the National Linseed Oil Co., is arranging to build in Chicago a new linseed oil mill with a capacity of 1,000,000 bushels per annum. Mr. Euston is quoted as saying that he does not expect to be directly concerned in the management of the new company, but that it will give employment to a number of competent men heretofore in his employ but thrown out of work by the reorganization.—V. 67, p. 1206.

**American Saddle Co.—Organization, Etc.**—The company announces that its organization has been completed and that its offices are located in the American Trust Building, Cleveland, Ohio. The company has acquired the properties and business of the following named companies:

The Garford Mfg. Co., Elyria, Ohio; The Wheeler Saddle Co., Detroit, Mich.; The Wheeler Saddle Co., Toronto, Ont.; The Gilliam Mfg. Co., Canton, Ohio; The Hunt Mfg. Co., Westboro, Mass.; The P. & F. Mfg. Co., Reading, Pa., and a controlling stock interest in The Brown Saddle Co., Elyria, Ohio.

"The primary purpose of the new organization is to arrest the calamitous conditions which for the past two seasons have deprived the makers of fair returns on their capital invested. This it will strive to accomplish, not by the advancement in the price of its product to the trade, but by the reduction of expenses." A. L. Garford is President.—V. 68, p. 329.

**American Steel & Wire.—Location of Works.**—The official statement of President John Lambert, which we cited last week, gave also the following:

Our mills are located at Worcester, Mass.; Allentown, Penn.; Newburg, N. Y.; Duaneville, Penn.; Cleveland, Ohio; Salem and Findlay, Ohio; Beaver Falls, Penn.; Pittsburg, Penn.; Braddock, Penn.; Joliet, Ill.; DeKalb, Waukegan, Ill.; Anderson, Ind.; Crawfordsville, Ind.; Lawrence, Kan., and Kansas City, Mo. These various plants are so located that we can handle the business to the best possible advantage, and save largely in freights by shipping, say, from Joliet, Ill., to territory naturally tributary to it, and by shipping from Worcester, Mass., to territory tributary to Worcester, and so on. It will not be necessary to make any further purchases for the reason that we have all the producing capacity that we need. We own one of the best ore mines in the Mississippian range. We have our own coal mines and coke furnaces, so that we start at the bottom and have all the profits that there are from ore to finished material. Our business is entirely satisfactory.

John W. Gates has gone to Europe on very important business connected with the company and the result of his mission, it is believed, "will be entirely satisfactory to the stockholders." The allusion last week to the company's doing its own ocean transportation, was due it seems to a misapprehension, no such intention being announced.—V. 68, p. 523.

**American Warp-Drawing Machine Co.—Incorporated.**—This company has been incorporated in Maine with a capital stock of \$3,000,000, of which \$700,000 is 8 per cent preferred stock (with preference as to dividends and assets) and \$2,300,000 is common stock, to purchase all United States and foreign patents covering the Field Warp-Drawing Machine, and to manufacture and sell the machine, and associate devices. This machine is designed to draw the warp threads through the loom harnesses and reed preparatory to weaving, the only part of the textile process now done by hand. The stock is in \$25 shares and the preferred is entitled to redemption at \$50 per share after 10 years by means of a sinking fund from surplus earnings, after payment of 8 per cent annual dividend on common stock.

The board of directors is composed of:

B. P. Cheney, Director Manchester Mills; Sidney W. Winlow, President United Shoe Machinery Co.; Nathaniel J. Rust, President Manchester Mills; George W. Brown, Treasurer United Shoe Machinery Co.; Theophilus Parsons, Treasurer Lyman Mills; Edward P. Hurd, Director United Shoe Machinery Co.; Thomas W. Stoum, of Minot, Hooper & Co., mill agents; C. D. Lanning, Treasurer San Diego Land & Town Co., and Millard F. Field.

The company's Boston office is at 95 Milk Street. The unsubscribed 8 per cent preferred stock is offered for public subscription at the Boston Safe Deposit & Trust Co., Boston, till March 27, upon the following terms: Four shares preferred, total par value \$100, and one share common, par value \$25, for \$100. Machines in operation on coarse cotton, gingham, lawn and print warps at 18 Post Office Square, Boston.

**Astoria Heat, Light & Power Co.—Consolidated Gas Co.—Bill Killed.**—The New York State Senate yesterday agreed to the adverse report of its committee on the bill respecting the Astoria Heat, Light & Power Co. A motion to

reconsider the vote was voted down. The bill is therefore dead.—V. 68, p. 377.

**Atchison Topeka & Santa Fe Ry.—Notice to Holders of Adjustment Bonds.**—Holders of large amounts of the adjustment bonds have requested the directors to provide for the payment of interest semi-annually instead of annually, by substituting new coupon sheets for those now attached to the bonds. The board has expressed its willingness to do this provided the holders of a sufficient amount of the bonds request that the change be made, and declare their willingness to pay 1 per cent on the par of their bonds to cover the expense of attaching the new coupon sheets and the loss of interest to the company. Bondholders desiring the proposed change are requested to communicate at once with J. W. Davis & Co., 9 Broad Street, New York, who will furnish forms of applications to be signed, and will forward the same to the offices of the company.

**Listed.**—The New York Stock Exchange has listed \$2,699,000 additional general mortgage 4 per cent 100-year gold coupon bonds of 1895, making the total amount listed to date \$126,823,000.

These bonds were used as follows:

\$553,374 for improvements and betterments of the Santa Fe Pacific RR. from May 1, 1898, to Sept. 30, 1898; \$1,645,108 for improvements made by the Atchison Topeka & Santa Fe from Jan. 1, 1898, to Sept. 30, 1898, per certificate furnished to the trustee; \$500,900 for improvements which will be included in the next certificate.

The total amount of Atchison general mortgage bonds countersigned to date is \$126,823,000. This amount includes \$10,596,000 issued to take up guarantee fund notes to the amount of \$9,000,000. All of the guarantee fund notes have been paid for, canceled and destroyed by burning, and the mortgage discharged by the trustee thereof.—V. 68, p. 472.

**Baltimore & Ohio RR.—Interest on New Bonds to be Paid April 1.**—The reorganization managers announce that, pending the issue of the new securities, they have arranged to advance to the holders of Mercantile Trust Company certificates of deposit for the bonds deposited, the amounts in cash equal at face value to the coupons representing six months' interest due Jan. 1, 1899, on the new prior lien  $3\frac{1}{2}$  per cent gold bonds, and the coupons representing three months' interest due Oct. 1, 1898, and six months' interest due April 1, 1899, on the new first mortgage 4 per cent bonds respectively, when issued under the plan of reorganization. Such cash advances will be made on and after April 1, 1899, at the office of the Mercantile Trust Co. of New York, or its London agency.

J. P. Morgan & Co. announce that holders of their receipts or certificates for consolidated mortgage 5 per cent gold bonds of the Baltimore & Ohio RR. (due 1898) are entitled to receive at their office, on April 1, on presentation of such receipts or certificates, the sum of \$22.12 per bond of \$1,000, which is the amount collectible by them from the reorganization managers of said railroad. The coupons from the new bonds (i. e., for six months' interest to Jan. 1, 1899, on the new prior lien and nine months' interest to April 1, 1899, on the new first mortgage bonds) corresponding to the above payment will be assigned to the reorganization managers, and the new bonds when ready are deliverable to depositors, ex such coupons.

**Foreclosure**—Judges Goff and Morris, in the United States Circuit Court, at Baltimore, on Wednesday, filed a decree foreclosing the mortgage of 1883 on the Baltimore & Philadelphia RR., which is the Philadelphia Division of the B. & O.—V. 68, p. 523.

**Boston & Seven Devils Copper Co.—Incorporated.**—At Trenton, N. J., on March 20 this company, with an authorized capital of \$5,000,000, was incorporated to do a general mining, smelting and manufacturing business. The incorporators (nearly all from Boston) are:

G. E. Howe, Eric A. Knudsen, John Murray Marshall, Kenneth K. McLaren, Harry W. Meen, Frederick B. Hyde and Thomas I. Steadfast.

**Brooklyn Union Elevated RR.—Brooklyn Rapid Transit Co.—Control Acquired.**—Formal announcement was made on Monday of the acquisition by the Brooklyn Rapid Transit Co. of a controlling interest in the Brooklyn Union Elevated RR. Co. The terms of the transaction, it is stated, will not be made public, but H. B. Hollins & Co. are depositary for the stock of the elevated company, and, it is said, the holders will receive in part payment stock of the Rapid Transit Co. of the recent issue of \$25,000,000, of which \$9,500,000 has already been issued to acquire the Nassau Electric RR. Under the new arrangement passengers on the surface cars in Brooklyn now controlled by the Brooklyn Rapid Transit Co. it is learned will be transferred to the Brooklyn Elevated trains without extra charge. The equipment of the elevated for operation by electricity, it is expected, will be pushed to early completion. The acquisition of the Kings County Elevated RR., it is also understood, will be accomplished shortly. The acquisition of the Brooklyn & Brighton Beach road by the Rapid Transit interests is referred to below. The Brooklyn Rapid Transit Co. has also arranged with the Long Island RR. Co. to take over that company's lease of the Prospect Park & Coney Island RR., known as the Culver route.—V. 68, p. 426, 523.

**Brooklyn & Brighton Beach RR.—Brooklyn Rapid Transit Co.—Purchased.**—At the foreclosure sale on Tuesday the property of the Brooklyn & Brighton Beach RR. Co. was purchased for \$711,000 by W. F. Sheehan, representing the Brooklyn Rapid Transit Co. The line will be

equipped at once for operation by trolley. The Brighton Beach Hotel, as well as the railroad, will be controlled by the Rapid Transit Co.—V. 68, p. 473, 523.

**Cape Fear & Yadkin Valley Ry.—Payment of Bonds.**—All holders of the company's bonds and coupons are notified to present the same for payment of distributive share to E. S. Martin, Master Commissioner, 15 Princess St., Wilmington, N. C., on or before May 22, 1899. "A" bonds, it is stated, will receive \$1,043.95; "B" bonds \$727.55; "C" bonds \$661.83.—V. 68, p. 281.

**Central Massachusetts RR.—Boston & Maine RR.—Lease.**—President Aldrich of Central Massachusetts, says:

"I have received notice from Judge Dunbar and Sherman L. Whipple, who claim to represent large holders of the common stock of the Central Massachusetts Railroad, that the lease of the road to the Boston & Lowell is illegal, and requesting that the directors of the Central Massachusetts demand from the Boston & Maine the return of the road to the stockholders. Messrs. Dunbar and Whipple say that unless the Boston & Maine give up the lease suit, will be brought to break it."—V. 61, p. 1106; V. 63, p. 427.

**Central New England RR.—Installment Called.**—Notice is given that, under the terms of the reorganization plan, an installment of 25 per cent has been called on Philadelphia Reading & New England income bonds and preferred and common stock, payable on or before April 7 at the office of the Fidelity Insurance Trust & Safe Deposit Co. in Philadelphia. The proceeds, it is stated, will be used in connection with the construction of the line to Springfield. This is understood to be the third installment under the terms of the reorganization plan, in all 50 per cent having been called.—V. 68, p. 283.

**Central Union Telephone Co.—Bonds Offered.**—Poor & Greenough will receive subscriptions until March 29, at 105 and accrued interest, for \$1,000,000 of this telephone company's new consolidated mortgage 5 per cent gold bonds. The company is the largest of the operating sub companies of the American Bell Telephone Co. and holds licenses for all instruments and apparatus owned and controlled by the Bell Company for the States of Ohio, Indiana and Illinois. The bonds offered are part of an authorized issue of \$6,000,000, and are redeemable at 105 on and after January, 1909, at the option of the company. Of this amount \$2,500,000 are to be reserved in the hands of the trustee to retire a like amount of outstanding first mortgage 6 per cent bonds, \$1,000,000 for extensions now being made and \$2,500,000 to be issued as necessary to pay for the cost of future extensions. The company has 45,305 subscribers. For the year ended Dec. 31, 1898, the company earned a surplus applicable to dividends of \$303,337, against \$287,799 in 1897 and \$241,209 in 1896. E. Rollins Morse & Bro. will receive subscriptions in Boston.—See V. 68, p. 472, 379 and 229.

**Central Vermont RR.—Sold.**—At the foreclosure sale on March 21 the property was sold for \$7,000,000 to Ezra H. Baker, chairman of the reorganization committee. A notice was filed by Owen D. Young of New York, counsel for the Lamotte Valley extension bondholders, in which the New York Central joined, to the effect that parties purchasing the property did so subject to claims of those filing the notice.

The Central Vermont Railway, the successor company, will issue \$3,000,000 of capital stock, a controlling interest in which will be held by the Grand Trunk Railway, and will make a mortgage to secure \$12,000,000 of 4 per cent bonds. For plan see INVESTORS' SUPPLEMENT and V. 67, p. 735; V. 63, p. 427.

**Charles River Embankment Co. of Boston.—Sale April 8.**—The foreclosure sale is set for April 8. There are outstanding \$476,000 of 7 per cent bonds, interest on which was defaulted Jan. 1, 1899, and \$620,900 capital stock. The bondholders' committee consists of Col. A. A. Pope, Samuel Carr and Benjamin D. Hyde.

**Chicago Burlington & Quincy RR.—Chicago Burlington & Northern RR.—Meeting May 20 to Authorize Purchase of Various Lines.**—The stockholders of the Chicago Burlington & Quincy RR. Co. will vote May 20 upon propositions to purchase the railroads, property and franchises of the Chicago Burlington & Northern Co. and of such other leased roads and branches in the State of Illinois as the meeting may deem proper to include.—V. 63, p. 523.

**Colorado & Southern RR.—Union Pacific Denver & Gulf RR.—New Securities Ready.**—The Central Trust Co. of New York and the American Loan & Trust Co. of Boston are now prepared to deliver the new securities issued under the plan of reorganization of the Union Pacific Denver & Gulf RR. Co. Each certificate for a \$1,000 Union Pacific  $4\frac{1}{2}$  per cent bond is exchangeable for the following Colorado & Southern securities: \$650 in first mortgage 4s; \$200 of trust certificates for first preferred stock, and \$150 of trust certificates for second preferred stock. See notice on another page.—V. 68, p. 427.

**Columbia Refrigerating Co.—Incorporated.**—This company, with a capital of \$3,000,000, was incorporated at Trenton, N. J., on March 10 to manufacture refrigerating cars; also refrigerating appliances for use in cars and vessels. The incorporators are:

Allan Carpenter, New York; William Cooper Prime, Yonkers; James F. Boothroyd, Newburg, and John Milton Ferry, Bayonne.

**Edison Electric Co. of New Orleans.—Bonds Offered.**—N. W. Harris & Co., of New York, Boston and Chicago, offer for sale at 106 and interest, by advertisement on another

page, \$500,000) of the company's 5 per cent first mortgage gold bonds, due 1929, interest J&J, American Loan & Trust Co., of Boston, trustee. The bonds are part of a total authorized issue of \$3,500,000, of which the firm has already sold \$1,300,000. Of the authorized issue bonds in excess of \$2,000,000 can be certified by the trustee only as follows: \$300,000 for 75 per cent of the actual cash cost of extensions and additions, and the remaining \$300,000, or 66 2-3 per cent, for extensions and additions to the property, excluding any royalty charges. The company controls the entire electric lighting business of New Orleans, serving a population of over 250,000. The franchises are stated to be perpetual and its equipment fully equal to the present and future needs of the city. The net earnings in 1893 were \$262,817, against \$220,321 in 1897. The earnings for 1899, as estimated by the officials, should be \$300,000, or a surplus of \$300,000 over the 5 per cent interest on the \$2,000,000 bonds outstanding. The company's capital stock is: Common, \$1,500,000; preferred, \$2,000,000. See further particulars in advertisement.

**Elevation of Tracks in Chicago.**—*Report.*—The report of the Commissioner of Track Elevation in Chicago shows that within the last two years 41 miles of track in the city have been elevated, and 141 miles contracted for, thus eliminating 131 dangerous crossings; and 88 miles more will be completed when present contracts are finished. There remain 88 grade crossings to be eliminated and it is expected they will be removed before the end of this year.

**General Chemical Co.**—*Authoritative Statement.*—Jas. H. Oliphant & Co. of this city have issued a circular saying:

This corporation is organized under the laws of the State of New York, with an authorized capital of \$25,000,000, consisting of \$12,500,000 6 per cent cumulative preferred stock and \$12,500,000 common stock, for the purpose of carrying on a general chemical business, including that heretofore conducted by the following: Nichols Chemical Co., N. Y.; National Chemical Co., Cleveland; Passalo Chemical Co., Newark; Highlands Chemical Co., N. Y.; Lodi Chemical Co., N. J.; Chappell Chemical Co., Chicago; Moro Phillips Chemical Co., Philadelphia; Martin Kalbfleisch Chemical Co., N. Y. and N. J.; James L. Morgan & Co., N. Y.; Dundee Chemical Works, N. J.; Fairfield Chemical Works, Conn.; James Irwin & Co., Pittsburgh.

About \$7,500,000 preferred and \$7,500,000 common stock will be issued for the business and plants of the above concerns upon the following basis: 60 per cent of the preferred stock will be issued at par for the appraised value of tangible property of constituent companies, but no preferred stock will be issued for property upon which the previous owners were not earning at least 4 per cent per annum net profit. A working capital of \$750,000 has been provided by the vendors, each subscribing at par for additional preferred stock to an amount equal to 10 per cent of the valuation of its tangible property, payable in cash. The common stock will be issued at par for the entire value of the intangible property of the vendors in proportion to their earning capacity as ascertained by the Audit Company of New York. No stock has been given as a bonus to an underwriting syndicate and no commission has been paid to promoters.

The aggregate net earnings of the constituent companies for the year 1898 were over \$1,000,000, and it is expected that economies in manufacture, administration and distribution will largely increase the annual net profits. Quarterly dividends at the rate of 4 per cent per annum will be paid upon the preferred stock commencing July 1st, 1899. The company has an ample working cash capital provided as before stated, and has no bonded or floating debt. Registrar, Manufacturers' Trust Co.; transfer office, company's office, No. 32 Liberty Street, New York. The directors and officers are as follows:

**Officers.**—President, William H. Nichols; Treasurer, James L. Morgan, Jr.; Secretary, Charles Robinson Smith; Counsel, Sanford H. Steele; Consulting Engineer, J. B. F. Herreshoff.

**Directors.**—William H. Nichols, Sanford H. Steele, George W. Kenyon; Charles Robinson Smith, James L. Morgan, Jr.; Louis S. Wolf and J. Herbert Baggs, all of New York, N. Y.; Eugene Waugh, Highlands Station, Putnam County, N. Y.; Frederick Phillips, Philadelphia, Pa.; C. P. Tierce, Pittsburgh, Pa.; E. H. Rieing, Cleveland, Ohio; H. F. Chappell, and H. W. Chappell, Chicago, Ill.—V. 68, p. 330.

**General Electric Co.**—*Westinghouse Electric & Manufacturing Co.*—*Litigation.*—A suit was instituted this week at Utica, in the Circuit Court of the United States for the Northern District of New York, to enjoin the General Electric Co. from delivering multiphase apparatus covered by the Tesla patents to the Edison Electrical Illuminating Co. of New York, on the ground that the exclusive license under the Tesla patents for this district is held, and has been held for many years, by the Westinghouse Company's licensee, the United Electric Light & Power Co. The motion for a preliminary injunction is returnable on April 1.

The General Counsel for the Westinghouse Company, referring to the action brought, as above stated, by his company, is quoted as saying that the suit was instituted to settle a dispute on the point involved, and might be classed as a friendly suit. It does not involve the agreement existing between the two companies in the least, beyond the one point in question, and it will make no change or difference whatever in their relations to each other. When the agreement for the settlement of their patent suits entered into by the two companies three years ago was made, it was understood that in case of a dispute over any matter that could not be adjusted by themselves, such matter of dispute should be brought before the courts for a legal determination. It was under this understanding that the present suit was brought.—V. 68, p. 292; V. 67, p. 1264.

**Green Bay (Wis.) Gas & Electric Light Co.**—*Consolidated Company.*—*New Bonds.*—This company has absorbed by consolidation the McCartney Electric Light Co. and the Fox River Electric Lighting Co., both of Green Bay. It was reported last October that A. M. Sutherland & Co. of this city had contracted to purchase \$125,000 of the company's bonds to be issued for improvements, etc., and also one-fourth of the capital stock, William Mainland of Oshkosh and Sinclair Mainland of Green Bay having acquired a controlling interest.

**Hocking Valley Ry.**—*New Mortgage Filed.*—The new \$20,000,000 mortgage has been executed by the Hocking Valley Railway Co. and the Buckeye Coal & Railway Co. to the Central Trust Co. of New York as trustee.—V. 68, p. 429.

**Houston & Texas Central RR.**—*Consolidation Bill Vetoed.*—Gov. Sayres, of Texas, has vetoed the bill authorizing the Houston & Texas Central to merge in itself various branch lines, including the Austin & Northwestern.—V. 67, p. 1309.

**Indianapolis Street Ry.**—*Officers.*—*Proposition to City.*—The officers of this new company are: President, Hiram P. Wasson; Vice President and General Manager, H. J. McGowan; Sec., Henry Jameson; Treas., Julius A. Lemcke.

On March 12 the company submitted its proposition to the Board of Public Works. The company agrees in return for a thirty-four-year franchise to acquire the property and franchises of the Citizens' Street R.R. Co. and of the City Railway Co. and to surrender all the rights and franchises held or claimed by said companies under prior legislation and contracts; to pay to the city in instalments \$750,000 in cash; to convey to the city the Fair View Park and Shelby Street barns and real estate; to guarantee five-cent fares, six tickets for 25 cents, or twenty-five tickets for \$1, with transfer privileges; and to pave and keep in repair the space occupied by its tracks and for eighteen inches on the outside thereof, and to expend in the extension and improvement of its plant, cars and lines of street railway all sums that shall be necessary in order to put the same in condition to afford adequate and efficient service.

**Prospectus.**—The company's prospectus shows the proposed capitalization as follows:

Capital stock, \$5,000,000; consolidated mortgage 5 per cent 40-year gold bonds, \$1,000,000. Of the consols there are offered for subscription \$3,000,000, and there will be retained in the treasury of the company (1) to meet underlying bonds at maturity \$300,000 and (2) for future extensions \$200,000.

As to the earnings the prospectus adds:

"This system is being rapidly converted into an electric road, which work should be completed during the coming year. The company has 78 miles of road, of which 23½ are operated by electricity and 5½ by horses and mules; 15 miles of track have been lately relaid and are ready for electrical equipment. It owns 238 horse cars and 43 electric cars, and 992 horses and mules, and real estate more than sufficient for the present needs.

During the past five months the road has been earning at the rate of \$930,000 per annum; the net receipts being at a rate sufficient to pay the interest on the entire bonded debt and taxes, leaving over 2½ per cent applicable to dividends on the proposed issue of \$5,000,000 of stock. The property's gross earnings as an electric road, allowing 25 per cent increase as a conservative estimate, it is believed will not be less than \$1,160,000 and the net earnings \$322,000. Deducting interest on \$3,900,000 bonds at 5 per cent, \$195,000, and 6 per cent dividend on stock, \$300,000, there remains a surplus of \$32,000.

From the sale of this \$3,000,000 bonds there will be sufficient money to thoroughly equip the system with electricity and provide for all present necessities. Subscriptions are payable at the office of the fiscal agent and trustee, the Solicitors' Loan & Trust Company, Philadelphia.—V. 68, p. 473.

**International Power Co.**—*The \$225,000 Mortgage.*—The first mortgage of the International Power Co., referred to last week, amounts to \$225,000, and is secured by the property previously owned by the Rhode Island Locomotive Works, of Providence, and certain property in Worcester. The Rhode Island Hospital Trust Co. is mortgage trustee. The \$225,000 in bonds secured by the mortgage were taken as part payment for their property by the former owners of the locomotive works.—V. 68, p. 534.

**International Silver Co.**—*Mortgage Filed.*—The company has filed its mortgage for \$1,500,000 to the Continental Trust Co. of New York as trustee.—V. 68, p. 331.

**International Traction Co.**—*Buffalo Street Railways.*—*Purchase.*—J. P. Morgan & Co. on Tuesday completed the purchase for cash of a controlling interest in the Buffalo and Niagara Falls electric railways which are to be absorbed by the new International Traction Company. The International Company will purchase power from the Niagara Falls Power Co. The terms on which minority stockholders may come in will be announced later. The companies acquired are officially stated to be those shown in our item of March 4, page 426. The underlying bonds, however, will be somewhat different.

**New Buffalo Traction Mortgage.**—The Buffalo Traction Co. under date of Dec. 1, 1898, has made a mortgage for \$2,345,000 to the Metropolitan Trust Co. of New York, as trustee, to secure first mortgage 5 per cent gold bonds. Attorney Herbert P. Bissell is quoted as saying that the mortgage is not a new indebtedness, but is merely given to take up a prior mortgage given to the Central Trust Co. of New York.—V. 68, p. 524.

**Isle Royale Copper Co.**—*Consolidation.*—An official circular issued by the Miners' Copper Co. says in part:

A new company, called the Isle Royale Copper Co., has been organized under the laws of New Jersey, with a capital of \$3,750,000, divided into 150,000 shares of \$25 each. Of this, 60,000 shares are offered to stockholders of this company at the close of business March 31, 1899, on the basis of six-tenths of one share of stock in the New Jersey company for each share of the stock in the Miners' Copper Co., and the remaining 90,000 shares are to be offered to the stockholders of the Isle Royale Consolidated Mining Co. (of Michigan) in exchange for 100,000 shares of such company held by them. To avail yourself of this privilege you must surrender your stock certificates at the transfer office of the Isle Royale Copper Co., 190 Washington St., Boston, Mass., duly indorsed in blank, between April 1, 1899, and April 8, 1899. If the foregoing plan is carried out, the Isle Royale Copper Co. (of New Jersey) will have two miles or more of what is known as the Isle Royale Lode, with about 1,700 acres of land, etc. It will also have a cash working capital of about \$1,400,000. The directors and officers of the Isle Royale Copper Co. (of New Jersey) are the same as the Isle Royale Consolidated Mining Co. (of Michigan) with one exception.

**Jacksonville Tampa & Key West Ry.—Reorganization.**—Attention is called to the advertisement of F. J. Lisman & Co., which appears for the first time in this issue of the CHRONICLE.—V. 68, p. 524.

**Lake Shore & Michigan Southern RR.—Payment of Maturing Bonds.**—The principal of the \$989,000 of 7 per cent "dividend bonds" due April 1 will be paid at maturity at the United States Trust Co. Coupons will be paid at the company's office as usual.—V. 67, p. 1354.

**Lehigh Valley RR.—\$2,000,000 Car Trusts Sold.**—The company has sold to Drexel & Co., of Philadelphia, \$2,000,000 4½ per cent car trusts, \$200,000 of which will be retired yearly.—V. 68, p. 474.

**Long Island RR.—Improvements.**—The managers are spending the earnings of the road in general improvements and equipment, road-bed, passing tracks, etc. This policy is pursued, regardless of the immediate effect upon the net results from operation, in order to enable the road to handle efficiently, with greater satisfaction to its patrons and less cost to itself, a larger volume of traffic than ever in the past. The following statement, officially revised, is pronounced correct:

The company is spending about \$1,250,000 this year in improvements and equipment. It has had built by the Brooks Locomotive Works eight 21-inch cylinder Wootton type hard coal locomotives, for heavy freight business; also eighty new coaches, built by the Wagon Manufacturing Co., and eight large parlor cars, built by the Barney & Smith Co.; nineteen 17-inch eight-wheel engines have been rebuilt to Wootton type. The Wootton boiler will be the standard, in order to use small hard-coal, thus reducing the smoke to a minimum. Every day for the last two years the road has handled a train-load of pea-coal cinders, which makes a dustless track. A large freight yard is being constructed at Jamaica, at which point all freight trains will be made up. This is in lieu of increased terminal facilities at Long Island City. An inclined track is being built between the Flatbush Ave. station in Brooklyn and the Brooklyn Elevated RR., and by April 15 a through rapid-transit service will be run between Jamaica and the Brooklyn side of the Brooklyn Bridge, passengers transferring to and from the bridge trains. The Long Island RR. Co. will double-track its line between Rockaway Park and Far Rockaway—five miles—and during the summer months will operate electric cars, by overhead trolley, between those points under ten minutes' headway, and in conjunction with the steam trains which pass over the same track.—V. 58, p. 474.

**Louisville & Nashville RR.—Called Bonds.**—Of the \$10,058,000 general mortgage 6 per cent bonds of 1880, \$364,000 have been designated for redemption at 110 on June 1, 1899, at the office of the company; see notice in advertising columns. Also of the \$490,000 Cecilian Branch 7s of 1877, \$55,000 have been drawn and will be paid at par at the Union Trust Co., New York, on Sept. 1, 1899.—V. 68, p. 524.

**Maryland Brewing Co. of Baltimore.—Bonds Offered.**—Baltimore banking houses have sold recently at 106 and interest \$1,000,000 of this company's \$7,500,000 of 39 year first mortgage 6 per cent gold sinking-fund bonds, dated March 1, 1899, due March 1, 1933, principal and interest payable in gold coin at the Citizens' Trust & Deposit Co. of Baltimore, trustee; coupon bonds of \$1,000 each, interest payable March 1 and September 1.

The properties purchased or contracted to be purchased (the funds therefor being in the hands of trustees) were mentioned in the CHRONICLE of Feb. 18, page 831. The following data are furnished in connection with the above:

The Maryland Brewing Co. has been formed under the laws of Maryland to take over the business of all the breweries of Baltimore City and county. The total barrelage of all these breweries per annum is about 665,000; the barrelage at present acquired by the Maryland Brewing Co. is about 620,000. The Maryland Brewing Co. is capitalized as follows: Common stock, \$3,250,000; preferred 6 per cent stock, \$3,250,000; first mortgage 6 per cent bonds, \$7,500,000. The company will start with its properties paid for and the following assets in its treasury: Cash working capital and merchantable beer, \$1,107,000; preferred stock, \$300,000; common stock, \$400,000.

The net earnings of the properties acquired are \$319,165; the charges on the bonds now issued, 6 per cent on \$7,500,000, \$450,000; 1 per cent sinking fund, \$75,000; 6 per cent on \$2,950,000 preferred stock, \$177,000; balance, equal to over 4 per cent on \$2,850,000 common stock, \$117,165. The company is required to pay annually into the hands of the trustee \$75,000, to be invested in the bonds, if procurable, at a price not exceeding 120. The authorized issue of bonds is \$7,500,000; to be retained by the trustee to retire an equal amount of bonds upon the Eigenbrot Brewing Co., \$105,000; to retire an equal amount of bonds upon the National Brewing Co., \$92,000; issued in part payment for properties, \$9,303,000; leaving the \$4,000,000 now offered. The company's President is John Bauernschmidt; Treasurer, Paul A. Seeger.—V. 68, p. 331.

**Metropolitan RR. of Washington.—Columbia Ry.—Purchase.**—It is understood that the purchase of these roads by the Crosby syndicate, which controls practically all the other street railways of the city excepting the Capital Traction Co., has been virtually completed. A Washington paper on March 17 said:

The sales of our two electric-lighting companies having been fully consummated, it is a fair assumption that the negotiations for purchase of the gas companies and of the Metropolitan and Columbia railroads will speedily be likewise concluded. The recent change of directors in the U. S. Electric Light Co. is sufficient indication that all these properties will be substantially in the same control. The U. S. Mortgage & Trust Co. of New York is apparently the agency to represent the buyers in the payment of their purchase moneys. When the trades are fully closed out, there will doubtless be devised an economical system for managing these properties through two or three corporations, bound together by proper agreements. Much is anticipated in the way of increased profits from more modern and improved methods of operation.—V. 63, p. 459; V. 67, p. 788.

**Milwaukee & Minnesota Ry.—Effort to Foreclose Old Mortgage.**—The "Evening Wisconsin," of Milwaukee, says:

In the effort to fasten the liability of a mortgage of \$800,000, with thirty years' accrued interest, upon the Chicago Milwaukee & St. Paul Ry. Co., a horde of lawyers descended upon Milwaukee this morning. They summoned D. W. Keyes before the United States Court to tell what he knew of the loan. He, having been Secretary, aided in the preparation of the bonds. The bonds were executed in 1864 by the old Milwaukee & Minnesota Ry. Co., but it is claimed by

the St. Paul Company were never issued and sold. Roswell P. Flower came across 225 of them, each of the face value of \$1,000, and he, with others, is endeavoring to foreclose the mortgage which purports to encumber the old Portage line. Mr. Keyes testified that the bonds were duly executed and placed in the vaults of the company, but what subsequently became of them he does not know. The Supreme Court of Wisconsin has stated in a suit concerning the company that it ceased to exist more than twenty-five years ago. Suit has been instituted to foreclose the mortgage. The St. Paul Company denies all liability under the mortgage.

**Missouri Kansas & Texas Ry.—Consolidation Bill Vetoed.**—Gov. Sayers on March 20 vetoed the bill authorizing the consolidation of the Missouri Kansas & Texas and the Sherman Shreveport & Southern railway companies, on the ground that they were parallel and competing.—V. 68, p. 524.

**Missouri Pacific Ry.—St. Louis Iron Mountain & Southern Ry.—Texas & Pacific Ry.—New Refunding Mortgage.**—Bonds Sold.—The St. Louis Iron Mountain & Southern Railway Co. has arranged with Kuhn, Loeb & Co. to underwrite about \$16,000,000 of St. Louis Iron Mountain & Southern Ry. "unified and refunding mortgage" thirty-year 4 per cent gold bonds, to be issued in connection with the offer to holders of Texas & Pacific seconds shortly to be made. The bonds so sold form part of a new loan limited to \$30,000,000, the remaining \$14,000,000 being mainly for the purpose of refunding and retiring practically the entire indebtedness and leased-line obligations of the Iron Mountain, except the general consolidated 5s, leaving the latter and the new 4 per cent bonds the only outstanding issues of the Iron Mountain company. Substantially the entire net earnings of the Iron Mountain and Texas & Pacific systems over and above the interest on the Iron Mountain consolidated 5s and on the Texas & Pacific system's first mortgage bonds will thus, after completion of the contemplated conversion and funding, be available for interest on the new bonds. It is understood that the price at which the bonds have been underwritten is 85, being equal to approximately a 5 per cent basis, at which price depositing holders of Texas & Pacific seconds will have the option of selling to a syndicate the new bonds to which they will become entitled. The proposition respecting the Texas & Pacific seconds will be made public on Monday.—V. 68, p. 520, 521, 525.

**Nashville Gas Light Co.—To Pool Stock.**—A committee of shareholders consisting of E. W. Cole, W. D. Talbot, Jos. H. Thompson, J. Hill Eakin and B. F. Wilson has sent out a circular requesting deposits of the company's stock (total issue \$1,000,000) with the Nashville Trust Co. on or before April 1 under the terms of an agreement giving the committee the right, in case a majority of the stock is deposited, to sell the same in their discretion at any time prior to April 1, 1901. It is said that certain parties have options on the controlling stock of the Nashville Street Railway and upon the entire stock of the electric light plant. It is suggested they may desire to obtain the Gas Company also. The incorporation of the Tennessee Gas Co. of Nashville, with \$1,000,000 capital stock, was noted two weeks ago (V. 68, p. 475).—V. 67, p. 29.

**Nassau Belt Line Traction Co.—Incorporated.**—This company has been incorporated to build and operate an electric surface road from Mineola to Long Beach, N. Y. Capital stock is \$300,000, in shares of \$100 each. Paul K. Ames, of Rockville Centre, holds \$297,200 of the stock.

**National Salt Co.—Incorporated.**—This company, with an authorized capital of \$12,000,000 (\$5,000,000 of this 7 per cent preferred), was incorporated at Trenton on March 20. The incorporators are:

Samuel B. Lawrence, New York; Henry C. Everdell, New York; John B. Summerfield, New York; George E. Spencer, Brooklyn; James Hunt, Jersey City.

The company's prospectus was given last week.—V. 68, p. 524.

**National Screw Co.—American Screw Co.—Consolidation.**—A dispatch from New Haven says that a consolidation of the screw manufacturers of the country, with proposed capital stock of \$10,000,000, is being perfected under the title of The National Screw Co. The American Screw Co. of Providence is named as the prime mover in the combination. It is understood in New Haven that the following companies will be acquired:

American Screw Co., Providence, R. I.; Griley Co., New Haven, Conn.; Russell & Erwin Manufacturing Co., New Britain, Conn.; National Screw & Tack Co., Cleveland, Ohio; Atlantic Screw Works, Hartford, Conn.; Reed & Prince, Worcester, Mass.; Boston Screw Co., Fitchburg, Mass.; Wright & Colton, Worcester, Mass.; Columbia Screw Co., Pullman, Ill.; Massachusetts Screw Co., Holyoke, Mass.; Reading Screw Co., Philadelphia; P. & F. Corbin, New Britain, Conn.; Charles Parker Co., Meriden, Conn.; and Union Screw Co., Cleveland.

**American Screw Co.**—The balance sheet of Dec. 31, 1898, presented at the annual meeting and the directors elected were:

**Balance Sheet.**—Assets: Accounts receivable, \$313,430; manufactured goods and in process, \$448,899; raw material, \$87,933; scrap and supplies, \$23,167; cash, \$439,930; bills receivable [largely accounted for by a mortgage of \$225,000 on the Canada Screw Co.], \$243,277; and quick assets, \$1,534,838. Eagle, New England and Bay State plant, wharf and stables, repair, \$2,135,000; good will, trademark, patents, \$3; duplicate parts machinery, \$333,354. Total assets, \$1,002,996. Liabilities—Accounts due, \$84,892; bills payable, \$121,000; guarantee fund, \$11,631; capital stock, \$3,250,000. Total liabilities, \$3,747,523. Surplus, \$255,472.

Directors elected: Clark Thurston, Charles B. Humphries, Henry C. Bangs, Charles Alexander and Herbert J. Wells.—V. 67, p. 735.

**National Straw Board Co.—Strawboard Consolidation.**—Prospectus.—The prospectus says in substance:

It is proposed to organize the National Straw Board Co. for the further purpose of uniting the manufacturing plants now belonging to the following companies: Peoria Straw Board Co., Peoria, Ill.; Illinois

River Paper Co., Marietta, Ill.; Bondfield Paper Co., Waldron, Ill.; Consumers Paper Co., Muncie, Ind.; West Muncie Straw Board Co., Yorktown, Ind.; U. S. Board & Paper Co., Oathage, Ind.; Paragon Paper Co., Easton, Ind.; Vincennes Paper Co., Vincennes, Ind.; Diamond Paper Co., Anderson, Ind.; Albany Paper Co., Albany, Ind.; Western Straw Board Co., Gas City, Ind.; Western Straw Board Co., St. Marys, O.; Ohio Straw Board Co., Urbana, O.; Eyster & Son, Hallowell, W. Va.

The new company will issue 7 per cent cumulative preferred stock \$3,000,000 and common stock \$3,000,000. Of this amount \$2,600,000 of preferred stock and \$2,600,000 of common stock will be used in the acquisition of properties above enumerated and to provide working capital of \$100,000 in cash. The new company will thus start with \$400,000 of preferred stock, \$400,000 of common stock and \$200,000 of cash in the treasury. The properties, plants, patents, gas and oil wells are to be delivered to the new company clear of all encumbrances.

The present annual output of the above companies is approximately 70,000 tons and each mill is now and has for months past been run at its full capacity. The plants are mostly of recent construction, ten of the fourteen having been built since 1890. The form of construction universally adopted is brick or stone with slate roofs. The net profits accruing to these companies during 1898 were over \$230,000, or more than enough to pay 7 per cent on the contemplated issue of preferred stock and 3 per cent on the common. The most conservative estimate of the savings to be effected by the consolidation is from \$10,000 to \$15,000 per month. The new company has chosen its directors and executive officers from among the most successful men now engaged in the business. The consumption of straw board is constantly increasing, being to-day more than double the requirements of four or five years ago.

The following is published as showing that friendly relations will exist with the American Strawboard Co.:

The companies in contemplation control practically 50 per cent of the straw board business of the United States, the remaining portion being supplied by the American Straw Board Co. An iron clad agreement exists with the last-named company whereby the entire straw board business is at all times to be divided equally between the two companies, should any differences in output exist, the same are to be settled for in cash on the 10th day of each month for the preceding month's tonnage. This arrangement will regulate prices, divide territory, etc., so that a mutually profitable combination will be made.

The company's financial agents are Thomas & Post, 71 Broadway, New York. Subscribers to the underwriting syndicate are to receive par in preferred stock to the amount of their subscriptions, together with a like amount of common stock.

**New England Electric Vehicle & Transportation Co.—Incorporated.**—This company was incorporated at Trenton, N. J., on March 23, with a capital of \$35,000,000, to manufacture and operate vehicles. The incorporators are: James E. Hayes, Camden, and Arthur Phillips and Augustus Treadwell, Jr., of New York.

**New England Loan & Trust Co.—Sale of Securities.**—Adrian H. Muller & Son sold at auction March 23d various Western farm mortgages, which were pledged under the collateral trust agreement of March 3, 1896. The securities were offered for sale by order of the Farmers' Loan & Trust Co., as trustee, in consequence of default.—V. 67, p. 789.

**New England Telephone & Telegraph Co.—Bonds.**—The \$500,000 1st series 6 per cent bonds, payable April 1, 1899, will be paid at the office of the Treasurer in Boston, No. 135 Milk Street, Room 30, on Saturday, April 1, 1899. The company has sold a new loan of \$500,000 of 5 per cent bonds, due April 1, 1919, to Adams & Co. of Boston.—V. 67, p. 320.

**New York Central & Hudson River RR.—Fall Brook Ry.—Syracuse Geneva & Cornlmg Ry.—Pine Creek Ry.—Meeting April 19 to Authorize Leases.**—The stockholders of the New York Central & Hudson River RR. will vote April 19 on propositions to take over, under lease, the Fall Brook Ry. for 999 years from May 1, 1899; the Syracuse Geneva & Cornlmg Ry. for the term of its corporate existence; the Pine Creek Ry. for 999 years from May 1, 1899, and the Walkill Valley RR. for the term of its corporate existence. The Walkill Valley road is a short branch; the other three lines constitute the Fall Brook system, which, it was announced last February, would be leased (see V. 68, p. 379).—V. 68, p. 379, 380; V. 68, p. 190; V. 68, p. 650.

**Northern RR. of New Jersey—Erie RR.—Merger.**—At Trenton, N. J. on March 17, Gov. Voorhees signed the bill authorizing the Erie RR. to absorb by consolidation the Northern RR. of New Jersey.—V. 68, p. 111; V. 68, p. 379.

**Planters' Compress Co.—On Unlisted in Boston.**—The receipts of the Old Colony Trust Co. for 28,260 shares of this compress company's stock have been admitted to quotation in the unlisted department of the Boston Stock Exchange. The company was incorporated under the laws of West Virginia April 16, 1896, and has a capitalization of \$5,000,000, consisting of 50,000 shares of a par value of \$100.

The directors, transfer office, etc., are as below:

President, General Stephen M. Weld; T. Jefferson Coolidge, Jr., Judge H. E. Howland, George A. Nickerson, Walter Hunsnewell, G. A. Lowry, E. H. Oshwald, J. F. O'Shaughnessy, C. P. Baker, E. W. Weld. Principal office, 89 State Street, Boston; transfer office, Old Colony Trust Co., Boston. New York office, 35 Wall Street.

**Raritan Ry.—Bonds Offered.**—C. H. White & Co. offered by advertisement in the CHRONICLE last week at 102½ and interest a block of the company's \$300,000 1st mortgage gold 5s.

**Southern Bell Telephone & Telegraph.—Increase of Stock.**—The stockholders will vote March 29 on a proposition to issue \$1,000,000 6 per cent cumulative preferred stock, in addition to the present \$1,000,000 of common stock.

**Standard Gas Light Co. of New York.—Proposition to Purchase.**—The proposition recently made by William Rockefeller to purchase the property was at last accounts held in abeyance.—V. 67, p. 1207.

**St. Louis Peoria & Northern Ry.—St. Louis & Northern Short Line.—Through Service from Chicago to St. Louis.**—This road issued a circular March 10, announcing that it has made an arrangement by which it operates a continuous through line between St. Louis and Chicago for freight traffic, the running time comparing favorably with that of other St. Louis-Chicago lines. Extensive arrangements have been made for terminals at East St. Louis and Chicago and traffic arrangements have been made which will enable the interchange of freight with all railroads entering Chicago. The road runs its freight trains between Pekin and Chicago over the rails of the Atchison Topeka & Santa Fe., and uses the terminals of the Chicago Terminal Transfer Co. in Chicago as provided in the lease; see CHRONICLE Jan. 7, p. 41.—V. 68, p. 41.

**St. Louis Southwestern Ry.—Consolidation Bill Vetoed.**—Gov. Sayres, of Texas, on March 21, vetoed the bill authorizing consolidation with the Tyler Southeastern RR., upon grounds that the roads are a part of the Gould system and are parallel and competing with other Gould lines in the State.—V. 68, p. 279, 283.

**St. Louis & San Francisco RR.—Central Division Bonds Offered.**—Redmond, Kerr & Co. are offering for sale, at 93½ and interest, by advertisement on another page \$1,962,000 of the company's Central Division 30-year 4 per cent gold bonds. President D. B. Robinson says:

These bonds are issued under a mortgage securing an aggregate amount of \$3,462,000 4 per cent gold bonds, maturing April 1, 1929, of which bonds to the amount of \$1,962,000 have been issued for the purchase price of the railroad formerly owned by the St. Louis & Oklahoma City RR. Co., and the balance of \$1,500,000 is reserved to retire \$1,500,000 St. Louis & San Francisco RR., Southwestern Division, first mortgage 5 per cent gold bonds, which are subject to call at par. The bonds issued under this mortgage are secured by a first purchase money lien to the extent of \$1,962,000 (the purchase price of that property) upon 103 miles of main line of railroad, extending from Sapulpa, Indian Territory, to Oklahoma City, at the rate of about \$19,000 per mile, and when the existing Southwestern Division bonds of the St. Louis & San Francisco RR. shall have been exchanged under the provisions of this mortgage, will have the additional security afforded by the Southwestern Division mortgage, which constitutes a first lien upon the Southwestern Division extending from Seneca, Missouri, to Sapulpa, at about \$16,000 per mile. The Central Division bonds are a direct obligation of the St. Louis & San Francisco RR. Co., and are subject to redemption at 102½ and accrued interest on any half-yearly interest day at the option of the company.

The St. Louis & Oklahoma City RR. was built on our specifications and all its appointments are first class. Oak ties, with 60-lb. steel rails, were laid, steel bridges with masonry foundations were provided where needed, sidings at proper intervals, stations and section houses, stock yards and water stations are complete. It has ample and good terminal facilities at Oklahoma City, and the whole division is well fenced. The property of the St. Louis & Oklahoma City RR., (now owned—Ed.) has been operated under a traffic contract by the St. Louis & San Francisco RR. Co. since November, 1898, and its present earnings show an ample surplus over fixed charges. I believe the earnings will increase from now on.

The St. Louis & San Francisco RR. Co. now owns 1,385 miles of railroad and operates by operating contracts in addition 258 miles, making its system 1,643 miles. The company at present is paying dividends of 4 per cent upon its first preferred stock and 2 per cent upon its second preferred stock.

For the seven months from July 1st, 1898, to Jan. 31st, 1899, the company reports gross earnings, \$4,289,551; net earnings, \$1,747,283; fixed charges and taxes, \$1,326,424; surplus, \$420,859. See also advertisement on a preceding page.—V. 68, p. 332.

**Tennessee Coal, Iron & RR.—Listed—Earnings, Etc.**—The New York Stock Exchange recently listed \$332,000 additional consolidated first mortgage 6 per cent gold bonds of Birmingham Division, issued to retire \$300,000 Alcoa Furnace Co. bonds due March 1, and for other purposes. There are now listed \$3,731,000 Birmingham Division bonds and there still remain in the hands of the trustee \$633,000 of bonds to secure \$933,000 of Pratt Coal & Iron Co. bonds. The general balance sheet of Dec. 31, 1898, is given under "Annual Reports."—V. 68, p. 430.

**Texas & Pacific RR.—New Directors.**—Frank J. Gould and Winslow S. Pierce have been elected directors in the places of Milton H. Smith, President of the Louisville & Nashville and Gen. Samuel Thomas.—V. 68, p. 521, 525.

**Trenton Gas & Electric Co.—Bonds Sold.**—Redmond, Kerr & Co. of this city and the Fidelity Trust Co. of Newark, N. J., recently sold \$1,500,000 of the company's bonds. The loan consists of first mortgage 5 per cent 50-year gold bonds due March 1, 1919 (interest M. & S.), coupon bonds of \$1,000, with the privilege of registration of principal, both principal and interest to be paid in gold; Colonial Trust Co., trustee. The mortgage is limited in amount to \$2,000,000, of which \$1,500,000 bonds are issued, the balance, \$500,000, remaining in the treasury, to be issued for actual extensions and improvements under careful restrictions of the mortgage. President Henry C. Moore writes:

The company is a consolidation of the Trenton Gas Light Co., the City Gas Light Co., Trenton Light & Power Co., People's Electric Light Co., Trenton Electric Light & Power Co. and Edison Electric Light & Power Co. In addition the consolidated company owns the entire capital stock of the People's Gas Improvement Co. and the Delaware River Improvement Co., thereby controlling either through actual ownership or ownership of stock all of the gas and electric light plants in the city and suburbs of Trenton, N. J., and supplying a population of about 75,000.

The earnings of the various companies last year were far more than the fixed charges. The interest charges on the bonds now issued amount to \$75,000 per annum. The decrease in operating expense resulting from the consolidation and the increase in gross receipts, we believe, will from now on very materially increase the net earnings, which will undoubtedly show a large surplus over all fixed charges.—V. 68, p. 294.

**Union Bag & Paper Co.—On Unlisted.**—The company's 7 per cent cumulative preferred stock and common stock were admitted yesterday to the unlisted department of the New York Stock Exchange.—V. 68, p. 476.

**United Electric Securities.—Semi-Annual Statement—New Loan Proposed.**—The reports for the half-years ending Feb. 1, 1899, and Feb. 1, 1898, compare as follows:

Half-Year.	Int. & div. received.	Interest & exp. paid.	Net profit.	Total surplus.	Dividend paid.
1898-99.....	\$128,728	\$92,581	\$36,147	\$217,950	\$70,000
1897-98.....	170,581	120,369	50,212	236,650	.....

Of the \$8,000,000 collateral trust 5s, \$5,150,000 have been retired and canceled from the proceeds of the sale of \$5,555,000 of underlying bonds pledged as security therefor. During the past year the amount of 5s canceled was \$943,000. The price at which the collateral trust 5s have been reduced is 94-85, and the average price received for the underlying bonds was 88-14. The company will issue a new series of 500 bonds in a short time, to be known as the Eleventh Series. The assets now amount to \$1,569,796, and the surplus held for the collateral trust 5s is \$659,785. See list of the collateral, etc., Feb. 1, 1898, in V. 66, p. 707.—V. 67, p. 905.

**United Railways & Electric Co. of Baltimore.—Income Bonds in Place of Preferred Stock.**—A circular has been issued to the members of the underwriting syndicate proposing to issue income bonds in place of the \$14,000,000 of preferred stock originally authorized.—V. 68, p. 476.

**United States Rubber Co.—Beacon Falls (Conn.) Rubber Shoe Co.—Competitors.**—"Boston Traveller" March 3 says:

Much interest centres in the starting up of the plant of the Beacon Falls Rubber Shoe Co., with its capacity for turning out 10,000 pairs of shoes per day, which is announced in this morning's dispatches. This is the third company to start up independently of the United States Rubber Co., and having for its head a former director of that company. The other two are the Hood Company, with George Hood in control, and the Watkinson factory, operated by George Watkinson. It also swells the total of companies outside the trust to seven, and the daily producing capacity to 42,000 pairs. They are the Hood Rubber Co., 15,000 pairs per day; Joseph Banigan Co., 10,000; Bescon Falls Rubber Shoe Co., 10,000; Mishawaka Woolen Manufacturing Co., 8,000; George Watkinson & Sons, 2,000; Byfield Rubber Co., 2,000; G. N. Bourne & Son, 1,000; total, 42,000. With the Beacon Falls Co. are such well known rubber men as George A. Lewis, formerly a director of the United States Rubber Co. and President of the Goodyear Rubber Glove Co., as the head, with A. D. Warner, formerly superintendent of the Goodyear Rubber Glove Co., as manager.—V. 67, p. 905.

**Wabash RR.—Des Moines Union Ry.—Des Moines Division Bonds.**—J. & W. Seligman & Co. offered last week, by advertisement in the CHRONICLE, at 93 and accrued interest, \$1,600,000 Wabash RR. Co., Des Moines Division, four per cent first mortgage 40-year bonds. The total issue is \$1,800,000, but of this there is reserved with Trustee for construction of railroad from East Hannibal to Quincy in the State of Illinois, to be canceled, if said line not constructed, \$200,000; present issue, \$1,600,000.

President Ashley writes as follows:

The bonds will be secured by first mortgage on 94 miles of railway, between Moulton and Des Moines, in the State of Iowa, of which line 67 miles, between Albia and Des Moines, are already constructed and in operation, and the remaining 27 miles, between Moulton and Albia, are to be constructed, thus forming part of the company's main line between St. Louis and Des Moines. The mortgage will also cover new or recently acquired rolling stock, consisting of 10 first-class locomotive engines, 200 thirty-ton box cars, with air brakes and automatic couplers, and 7 passenger cars, the whole costing about \$250,000; and, in addition, it will cover the stock of the Des Moines Union Railway Co., owned by the Wabash RR. Co., and the terminal agreement between that company and the Wabash RR. The bonds will be further secured by 17 miles of newly constructed railway in Illinois between East Hannibal and Quincy, and by the terminals in Quincy, valued at about \$100,000. It is possible that the last-named line of 17 miles may not be constructed, in which case the mortgage will be limited to \$1,600,000 and will cover the property before described other than the 17 miles and the terminals in Quincy.

The country traversed by the new line between Moulton and Des Moines is largely underlaid with coal and the development of this traffic promises to furnish a large revenue. The construction of this line will shorten the distance between Des Moines and St. Louis by about 24 miles and between St. Paul and St. Louis about 16 miles and will save the company a rental of \$15 00 to \$16,000 per annum now paid to the Chicago Rock Island & Pacific Ry.

The loan was over-subscribed.—V. 68, p. 473.

**Wheeling & Lake Erie RR.—Opportunity for Participation in Plan to Terminate April 1.**—The reorganization Committee, Louis Fitzgerald, Chairman, informs holders of stock and Central Trust Co.'s certificates of deposit representing the same, who have not yet deposited their securities, that they may become parties to the plan by making on or before April 1 all payments required; otherwise they will not be entitled to participate in the reorganization. They also inform holders having already deposited their securities and having failed to make payments that they must do so on or before April 1 or they will forfeit their rights.—V. 68, p. 431.

**White Motor Wagon Co.—Incorporated.**—This company filed articles of incorporation in the County Clerk's office in Jersey City on March 15. The capital stock is \$10,000,000, of which \$3,000,000 is 6 per cent preferred; the incorporators are Charles N. King of Jersey City, Charles H. Blair, Anderson Price, Oscar S. Gunz, William R. Mitchell and William S. Scott.

**Wisconsin Central Co.—Plan Next Week.**—The large interests in Wisconsin Central securities have accepted the proposed plan for the reorganization of the company. The plan as finally approved is now in the printer's hands, and will probably be made public next week.—V. 68, p. 431.

—The firm of M. A. Devitt & Co., Chicago, has been reorganized under the style of Devitt, Tremble & Co. See card in Municipal Department of the CHRONICLE.

## The Commercial Times.

### COMMERCIAL EPITOME.

FRIDAY NIGHT, March 24, 1899.

The average report has been of a fairly active business in commercial circles. In some instances complaints have been heard of unsatisfactory trade conditions, but they have been fully offset by the buoyant conditions existing in other lines. The tendency to form trade combinations appears to be quite general, the number of new "trusts" formed steadily increasing. The reports current last week that an agreement had been reached by the opposing interests in the sugar refining business are now quite generally discredited. Weather conditions in the cotton belt have been generally favorable. The Erie Canal will be opened for navigation on Saturday, April 15. Good Friday, March 31, will be observed as a holiday by the financial and commercial exchanges.

Lard on the spot was dull and easier early in the week. Subsequently, however, there was a better inquiry and the close was steady at 5-52½c. for prime Western and 5-15c. for prime City. Refined lard has sold slowly and prices have weakened slightly under the absence of demand, closing at 5-70c. for refined for the Continent. Speculation in lard for future delivery has been only moderately active. Early in the week, under fairly free offerings and absence of buyers, prices declined. Subsequently, however, packers began buying, and this, together with lighter receipts of swine than expected, advanced values. The close was steady.

#### DAILY CLOSING PRICES OF LARD FUTURES.

March.....	Sat. 5-52	Mon. 5-42	Tues. 5-42	Wed. 5-47	Thurs. 5-52	Fri. 5-52
------------	-----------	-----------	------------	-----------	-------------	-----------

Pork has had a fair sale, but it has been at slightly lower prices, closing at \$3 75@9 50 for mess, \$10 50@11 for family and \$10@12 25 for short clear. Cut meats have been quiet but steady at 4¼@4½c. for pickled shoulders, 7@7½c. for pickled hams and 4¼@5¼c. for pickled bellies, 14@10 lbs. average. Beef has had a moderate sale at unchanged values. The close was steady at \$3 50@9 for mess, \$9@10 50 for packet, \$9 50@11 50 for family and \$14 50@15 for extra India mess. Tallow has been quiet, closing at 4¼c. Oleostearine has advanced to 4¼c. Lard stearine has been steady at 6¼c. Cotton-seed oil has been quiet and slightly easier, closing at 26@26½c. for prime yellow. Butter has been in fairly active demand and firmer for desirable grades, closing at 14@22c. for creamery. Cheese has been moderately active and firm, closing at 9@12¼c. for State factory, full cream. Fresh eggs have advanced slightly, closing at 14c. for choice Western.

Brazil grades of coffee have been quiet and without decided changes. Both buyers and sellers have shown a disposition to hold back and await developments. Foreign markets have been quiet but steady. The close was quiet at 6 1/16c. for Rio No. 7 on the spot. West India growths have been in full supply; demand has been quiet, and prices have weakened slightly, closing at 7¾@8c. for fair Cutcuta. East India growths have been quiet but steady at 25@25½c. for standard Java. Speculation in the market for contracts has been dull, and there has been a slight sagging of prices. The close was quiet but steady.

The following are the final asking prices:

Mar.....	5-00c.	June.....	5-15c.	Sept.....	5-40c.
April.....	5-00c.	July.....	5-20c.	Oct.....	5-50c.
May.....	5-05c.	Aug.....	5-30c.	Dec.....	5-65c.

Raw sugars have been in fair demand; offerings have been limited, and the tone has held firm, closing at 4¾c. for centrifugal, 98-deg. test, and 3¾c. for muscovado, 89 deg. test. Refined has been quiet; soft grades have been easier; but hard grades have been firmly held, closing at 5½c. for granulated. Other staple groceries have been firm.

Kentucky tobacco has had a slightly better sale, and prices have been firm. Seed leaf tobacco has been in fairly active demand and firm. Sales for the week were 2,075 cases, as follows: 700 cases 1897 crop, Wisconsin Havana, 5@9½c.; 200 cases 1896 crop, Wisconsin Havana, 11@11½c.; 250 cases 1897 crop, Zimmers, 16@18c.; 75 cases 1897 crop, Dutch, 16@18c.; 750 cases 1897 crop, Gebhardt, 13½@14c.; 75 cases 1897 crop, State Havana, 12@16c.; 200 cases 1897 crop, Pennsylvania seed leaf, 11@12c.; 150 cases 1895-96 crops, Pennsylvania seed leaf, 12½@13½c.; 125 cases 1898 crop, New England Havana, forced sweat, 30@60c. and 150 cases sundries, 6@16c.; also 600 bales Havana at 70@90c. in bond and 180 bales Sumatra at 85c.@\$1 65 in bond.

Early in the week demand for Straits tin was fairly active but the close was quiet and prices have weakened slightly, closing at 23-55@23-65c. Ingot copper has had only a limited sale, and prices have weakened to 17@17½c. for Lake. Lead has been quiet and easier, closing at 4-40@4-45c. for domestic. Spelter has been in moderate demand and steady at 6¼c. for domestic. Pig iron has had a fairly large sale at full values, closing firm at \$14 50@16 50 for domestic.

Refined petroleum has been steady, closing at 7-35c. in bbls., 4-85c. in bulk and 8-10c. in cases. Naphtha steady at 10c. Crude certificates have been steady at \$1 11; credit balances have been unchanged at \$1 13. Spirits turpentine has been in moderate demand and steady at 47@47½c. Rosins have had a fair sale, closing at \$1 32½@1 35 for common and good strained. Wool has been quiet and unchanged. Hops have been quiet but steady.

COTTON.

FRIDAY NIGHT, March 24, 1899.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 108,622 bales, against 95,510 bales last week and 86,913 bales the previous week, making the total receipts since the 1st of Sept., 1898, 7,550,561 bales, against 7,916,893 bales for the same period of 1897-8, showing a decrease since Sept. 1, 1898, of 366,337 bales.

<b>Total 1897...</b>	<b>35,357</b>	<b>14,341</b>	<b>54,319</b>	<b>12,847</b>	<b>116,874</b>	<b>644,129</b>

Speculation in cotton for future delivery has been more active, but it has been at lower prices. The principal feature of the trading, particularly during the first half of the week, was free selling by tired outside holders to liquidate accounts. As values weakened stop loss orders were reached, and this added to the pressure to sell. At the lower prices Liverpool has been a free buyer to cover short sales in the near-by deliveries, and there has also been a demand from local shorts to cover contracts. The pressure to sell has been prompted by the fact that the movement of the crop has shown a material increase, the interior receipts for the week running considerably in excess of those for the same week last year. At the close, however, advices received from Houston, Texas, stated that the large receipts for the present season in that State would end with this week. The movement of cotton from the South to this port has continued on a fairly liberal scale, and on Thursday a sailing vessel cleared from New Orleans for New York with 6,000 bales of cotton. Weather conditions at the South have been reported as generally favorable. Preparations for the new crop, however, have continued backward, and the talk has been that the acreage to be planted will be somewhat smaller than last year. The new-crop deliveries have weakened in sympathy with the decline in the near-by months and under sales for Liverpool account, as many operators in that market have transferred their short interest from the near-by deliveries to the distant months. To-day the market was easier early in the day, under weaker foreign advices and some selling by longs to liquidate their contracts. Subsequently, however, on buying by shorts to cover contracts and the movement of the crop being slightly below expectations, the market turned firmer and the close showed prices 1@3 points higher for the day. Cotton on the spot declined 1-16c. on Saturday, 1/8c. on Monday and advanced 1/8c. on Wednesday. To-day the market was quiet and unchanged at 6 1/2-16c. for middling uplands. Good Friday and Saturday will be observed as a holiday on the Cotton Exchange.

On the basis of the rates on and off middling as established by the Revision Committee, the prices for a few of the grades would be as follows:

UPLANDS.	Sat.	Mon.	Tues.	Wed.	Th.	Fri.

Chattanooga—	477	83,074	1,977	2,200	1,682,453	43,991
Total, 31 towns—	97,717	6,298,410	103,241	456,231	59,890	75,537
					5,730,658	424,105

The above totals show that the interior stocks have decreased during the week 5,524 bales, and are to-night 32,036 bales more than at the same period last year. The receipts at all the towns have been 37,827 bales more than the same week last year, and since Sept. 1 they are 567,752 bales more than for the same time in 1897-98.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.—We give below a statement showing the overland movement for the week and since Sept. 1, as made up from telegraphic reports received Friday night. The results for the week ending March 24 and since Sept. 1 in the last two years are as follows.

March 24	1898-99.		1897-98.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.
<i>Shipped—</i>				
Via St. Louis.....	11,133	816,799	12,406	760,168
Via Cairo.....	4,980	358,353	7,094	323,778
Via Parker.....			816	28,935
Via Rock Island.....	416	43,107	189	42,904
Via Louisville.....	3,833	157,613	2,730	105,841
Via Cincinnati.....	3,918	137,557	5,927	121,649
Via other routes, &c.....	7,748	151,823	1,987	130,788
Total gross overland.....	32,028	1,665,252	30,649	1,514,063
<i>Deduct shipments—</i>				
Overland to N. Y., Boston, &c.....	9,060	441,217	10,904	394,115
Between interior towns.....	671	31,079	48	21,396
Inland, &c., from South.....	3,568	61,862	1,021	32,718
Total to be deducted.....	13,299	534,158	11,973	448,229
Leaving total net overland*..	18,729	1,131,094	18,676	1,065,834

\* Including movement by rail to Canada.

The foregoing shows that the week's net overland movement this year has been 18,729 bales, against 18,676 bales for the week in 1898, and that for the season to date the aggregate net overland exhibits an excess over a year ago of 65,260 bales.

<i>In Sight and Spinners Takings.</i>	1898-99.		1897-98.

WEATHER REPORTS BY TELEGRAPH.—Telegraphic reports to us from the South this evening indicate that on the whole the weather has been favorable for farming operations the past week, and that generally preparations for the new crop have made good progress. Work, however, is very backward at most points. The Mississippi River is one and seven tenths feet above the danger line at Memphis, and rising.

Galveston, Texas.—We have had rain on one day during the week to the extent of two hundredths of an inch. Average thermometer 63, highest 73 and lowest 47.

Palestine, Texas.—We have had rain on one day during the week, the rainfall reaching twenty hundredths of an inch. The thermometer has averaged 59, the highest being 84 and the lowest 34.

Corpus Christi, Texas.—We have had rain on one day of the week, the precipitation reaching one hundredth of an inch. The thermometer has averaged 70, ranging from 54 to 86.

San Antonio, Texas.—Only a trace of rain the past week. Minimum temperature 49.

Farris, Texas.—The weather is very dry. The thermometer has ranged from 31 to 72.

New Orleans, Louisiana.—It has rained on one day of the week, to the extent of one hundredth of an inch. Average thermometer 65.

Shreveport, Louisiana.—There has been rain on one day of the week, the precipitation reaching fourteen hundredths of an inch. The thermometer has averaged 61, the highest being 83 and the lowest 33.

Columbus, Mississippi.—Rain has fallen on two days of the week, the precipitation being eighty-two hundredths of an inch. The thermometer has averaged 60, ranging from 40 to 82.

Leland, Mississippi.—Rain has fallen the past week to the extent of one inch and nine hundredths. The thermometer has ranged from 35 to 79, averaging 59.9.

Vicksburg, Mississippi.—There has been rain on two days, the precipitation reaching thirty-three hundredths of an inch. Average thermometer 60, highest 80 and lowest 40.

Greenville, Mississippi.—The weather is fair and cool.

Little Rock, Arkansas.—There has been rain on two days of the week, the precipitation being one inch and six hundredths. The thermometer has averaged 54, ranging from 31 to 77.

Helena, Arkansas.—There is still some little cotton to pick. We have had showers on two days of the week, the precipitation reaching eighty eight hundredths of an inch. The thermometer has ranged from 34 to 73, averaging 51.3.

Memphis, Tennessee.—Picking is yet going on. Some progress has been made with preparations for the new crop, but generally work is very backward. The river is now thirty-four and seven-tenths feet on the gauge, or one and seven tenths feet above the danger line, and rising. We have had rain on three days of the past week, the precipitation reaching ninety-eight hundredths of an inch. Average thermometer 54.5, highest 74.2, lowest 36.

Nashville, Tennessee.—We have had rain to the extent of one inch and fifty-six hundredths. The thermometer has averaged 52, the highest being 72 and the lowest 32.

Mobile, Alabama.—Reports from the interior indicate that the weather has been favorable the past week, and that farm work is making good progress, but is very backward. There is some apprehension about the quality of the seed to be planted. There has been rain during the week to the extent of twenty-six hundredths of an inch, on two days. The thermometer has averaged 62, ranging from 42 to 77.

Montgomery, Alabama.—Farmers are hustling. There was rain on three days in the early part of the week, the precipitation being seventy-eight hundredths of an inch, but latterly the weather has been cool and pleasant. The thermometer has ranged from 40 to 76, averaging 53.

Selma, Alabama.—We have had rain on two days of the week. The rainfall reached one inch and six hundredths. Average thermometer 61, highest 80, lowest 33.

Madison, Florida.—We have had rain on two days during the week, the precipitation being ninety hundredths of an inch. The thermometer has averaged 68, the highest being 83 and the lowest 44.

Savannah, Georgia.—Rain has fallen on two days of the week, the precipitation being forty-seven hundredths of an inch. The thermometer has averaged 61, ranging from 42 to 80.

Augusta, Georgia.—It has rained on three days during the past week, the precipitation reaching one inch and forty-three hundredths. The thermometer has ranged from 37 to 79, averaging 58.

Charleston, South Carolina.—Rain has fallen on two days of the week, to the extent of thirty eight hundredths of an inch. Average thermometer 62, highest 80 and lowest 42.

Stateburg, South Carolina.—Farm work is progressing rapidly. Rain has fallen on one day during the week—thunderstorm with high wind—to the extent of eighty-nine hundredths of an inch. The thermometer has averaged 60, the highest being 78 and the lowest 36.

Greenwood, South Carolina.—There has been rain on two days during the week, to the extent of one inch and twenty-two hundredths. The thermometer has averaged 53, ranging from 41 to 66.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock March 23, 1899, and March 24, 1898.

	Mar. 23, '99.	Mar. 24, '98.
New Orleans.....	Above zero of gauge.	14.9
Memphis.....	Above zero of gauge.	34.6
Nashville.....	Above zero of gauge.	33.2
Shreveport....	Above zero of gauge.	3.1
Vicksburg.....	Above zero of gauge.	42.5

JUTE BUTTS, BAGGING, &C.—The market for bagging during the week under review has been very quiet, and prices are nominal at 5½¢@5¾¢. for 1½ lbs. and 6@6½¢. for 2 lbs., standard grades. Jute butts have been dull. Quotations are 1-05¢. for paper quality and 1½¢. for mixing to arrive.

INDIA COTTON MOVEMENT FROM ALL PORTS.—The receipts of cotton at Bombay and the shipments from all India ports for the week ending Mch. 23, and for the season from Sept. 1 to Mch. 23 for three years have been as follows:

Receipts at—	1898-99.		1897-98.		1896-97.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.	Week.	Since Sept. 1.

1896-97..	.....	.....	.....	6,000	14,000	20,000
All others—						
1898-99..	.....	2,000	2,000	4,000	61,000	65,000
1897-98..	.....	.....	.....	10,000	24,000	34,000
1896-97..	.....	4,000	4,000	17,000	48,000	65,000
Total all—						
1898-99..	.....	20,000	20,000	12,000	338,000	349,000
1897-98..	.....	18,000	18,000	16,000	171,000	187,000
1896-97..	.....	22,000	22,000	44,000	385,000	429,000

According to the foregoing, Bombay appears to show an increase compared with last year in the week's receipts of 25,000 bales. Exports from all India ports record a gain of 2,000 bales during the week and since September 1 show an excess of 161,000 bales.

ALEXANDRIA RECEIPTS AND SHIPMENTS OF COTTON.—Through arrangements we made with Messrs. Davis, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, March 24	1898-99.	1897-98.	1896-97.
Receipts (cantars)...			
This week.....	75,000	90,000	70,000
Since Sept. 1....	5,271,000	6,153,000	5,326,000
Exports (bales)...			
To Liverpool.....	5,000	239,000	5,000
To Continent.....	4,000	217,000	6,000
Total Europe.....	9,000	456,000	11,000

\* A cantar is 95 pounds.  
† Of which to America in 1898-99, 32,001 bales; in 1897-98, 38,132 bales; in 1896-97, 41,272 bales.

This statement shows that the receipts for the week ending Mch. 23 were 75,000 cantars and the shipments to all Europe 9,000 bales.

**MANCHESTER MARKET.**—Our report received by cable to-night from Manchester states that the market is steady for yarns and quiet for shirtings. Manufacturers are generally well under contract. We give the prices for to-day below and leave those for previous weeks of this and last year for comparison.

1899.						1898.

**SEA ISLAND COTTON MOVEMENT.**—We have received this (Friday) evening by telegraph from the various ports the details of the Sea Island cotton movement for the week. The receipts for the week ending to-night (March 24) and since Sept. 1, 1898, the stocks to-night, and the same items for the corresponding periods of 1897-98, are as follows.

Receipts to March 24.	1898-99.		1897-98.		Stock.	
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	1899.	1898
Savannah.....	378	50,050	113	56,310	7,604	14,671

Boston.....	.....	.....	.....	1,945	.....	1,945	.....	.....
Balt., &c.....	.....	.....	.....	1,492	.....	1,492	.....	.....
Total.....	478	10	488	18,200	7,783	25,983	875	31,835
Total 1897-8.....	.....	.....	.....	25,280	7,123	32,383	664	27,919

A considerable portion of the Sea Island cotton shipped to foreign ports goes via New York, and some small amounts via Boston and Baltimore. Instead of including this cotton for the week in which it leaves the Southern outports, we follow the same plan as in our regular table of including it when actually exported from New York, &c. The details of the shipments of Sea Island cotton for the week will be found under the head "Shipping News," on a subsequent page.

Quotations March 24 at Savannah, for Floridas, common, 9c.; medium fine, 10c.; choice, 13c.

Charleston, Carolinas, medium fine, 18c.; fine, 20c.; fully fine, 22 to 25c.; extra fine, 40 to 50c.

**NEW ENGLAND MILL SITUATION.**—Operatives of the Warren Cotton Mills, Warren, R. I., to the number of about 650, struck Thursday morning. The trouble is over the discharge of an employe for signing a paper for the organization of a union in the cloth department. No agreement has yet been reached.

**EXPORTS OF COTTON GOODS FROM GREAT BRITAIN.**—Below we give the exports of cotton yarn, goods, &c., from Great Britain for the month of February and since October 1 in 1898-99 and 1897-98, as compiled by us from the British Board of Trade returns. It will be noticed that we have reduced the movement all to pounds.

00s omitted.	Yarn & Thread.		Cloth.				Total of All.

Total exports of cotton manufactures.....	.....	.....	.....	.....	.....	.....	549,810	536,215

The foregoing shows that there has been exported from the United Kingdom during the five months 549,810,000 lbs. of manufactured cotton, against 536,215,000 lbs. last year, or an increase of 13,604,000 lbs.

A further matter of interest is the destination of these exports, and we have therefore prepared the following statements, showing the amounts taken by the principal countries during February and since October 1 in each of the last three years:

# **EXPORTS OF PIECE GOODS AND YARNS TO PRINCIPAL COUNTRIES 1898-99 FEBRUARY AND FROM OCTOBER 1 TO FEBRUARY 23.**

To Japan since September 1 shipments have been 66,546 bales from Pacific Coast, 15,073 bales from New Orleans, 13,960 bales from Galveston and 200 bales from New York.

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, &c.

COLLEGIAN, steamer (Br.), from New Orleans for Liverpool, with 8,052 bales of cotton, stranded on Riding Rocks, Bahama Banks, March 17, but floated March 18, after having jettisoned and lighted part of cargo. She re-loaded and proceeded. Ship not damaged.

CONDE WILFREDO, steamer (Span.), from New Orleans for Barcelona, with 5,614 bales of cotton. A barge containing 200 bales of cotton from the Conde Wilfredo, which arrived at Barcelona March 10, caught fire and was sunk March 17, and has since been raised. Considerable damage was done.

OSWESLEY, steamer (Br.), from Norfolk, Va., Feb. 22, for Manchester, with 2,311 bales of cotton, stranded in the fog A. M. of March 12 in Dunlough Bay, Ireland. The cargo is washing ashore and the vessel is a total wreck. Some cotton has already been saved.

POLYMITIS, steamer (Gr.), from New Orleans, Jan. 31, for Genoa, with 9,700 bales of cotton. Fire broke out, while on a voyage, in the cargo of the Polymitis, which arrived at Genoa, March 10. It was still burning on her arrival, but has since been extinguished. The cotton in hold No. 1 is supposed to be completely damaged.

Cotton freights at New York the past week have been as follows.

## BREADSTUFFS.

FRIDAY, March 24, 1899.

A moderate volume of business has been transacted in the market for wheat flour. There has been, however, no spirit to the demand, as buyers, as a rule, have continued to show a disposition to keep their purchases close to immediate wants, awaiting the opening of navigation. Higher prices have been asked, reflecting an improvement in grain values, and this, too, has had a tendency to hold buyers in check, as they have been slow to place confidence in an advance in prices. The demand for rye flour has been on a limited scale only, but values have been unchanged and steady. The buckwheat flour season has closed. Corn meal has had a more active sale and there has been a better tone to the market, but prices have not advanced.

Speculation in wheat for future delivery has been fairly active, and there has been an upward turn to values. The liquidation by the outside long interest which was the feature of the trading last week appears to be largely over. Crops accounts from the winter wheat belt have been of a less favorable nature, fear of damage by a fall in temperature being general. The world's shipments for last week were below expectations. European cable advices have been stronger, and there have been crop damage reports received from Europe, particularly France. The movement of the crop has shown a falling off, and there has been a revival of the export demand. The developments above noted have had a tendency to revive confidence in the situation, and there has been moderate buying for investment account. The principal demand, however, has come from shorts, as they have shown more of a disposition to cover their sales, particularly as the indications have been that the outside long interest has been largely liquidated. The spot market has been more active. Exporters have shown renewed interest, and on their purchases, and following the rise in futures, prices have steadily advanced. Today the market opened easier on quiet foreign advices; turned stronger and advanced sharply on buying for Western account, crop damage reports and reports that Russia was to prohibit exports. The spot market was fairly active and firmer. The sales for export late yesterday and to day were 330,000 bushels.

Indian corn futures have been only moderately active, but the tone of the market has been firmer. There has been a demand for investment account, based primarily on the falling off of the crop movement, receipts in the interior steadily diminishing, and country acceptances have been reported as light. Cable advices have been stronger, and there has been a fairly brisk export demand; these developments also have had their influence in favor of better values. The spot market has been fairly active, as exporters have been buyers, and they have paid higher prices. To-day the market was firmer, in sympathy with the advance in wheat. The spot market was firm, and exporters were fairly large buyers, their purchasers amounting to 539,000 bushels.

### DAILY CLOSING PRICES OF NO. 2 MIXED CORN IN NEW YORK.

Sept. delivery in elev.....	35 3/4	35 3/4	35 3/4	36 3/4	36 3/4	36 3/4

Oats for future delivery at the Western market have been quiet, but prices have advanced. The movement of the crop has been lighter, offerings have been limited, the cash demand has been fairly good and sympathy with the improvement in other grains has had a strengthening influence, and prices have advanced. Locally the spot market has been fairly active, as there has been some demand from exporters and the home trade has been a moderate buyer; prices have advanced. To-day the market was firmer but quiet.

NOTE.—All the above figures are based on the monthly preliminary returns issued by the Bureau of Statistics, and cover about 98 per cent of the total exports.

For other tables usually given here see page 554.

## THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., March 24, 1899

The general market has shown quieter conditions prevailing during the past week than for some time past. The jobbing trade has been less brisk and retail business rather disappointing under the influence of adverse weather conditions. This has told upon the volume of business doing at first hands in all lines. A quiet interval at this time of the year in the latter market is generally looked for; in view of this, the large business already done, and the tangible advance in prices current, results even on their reduced scale are decidedly encouraging. The tone of the cotton goods market here continues quite firm, but in some print cloth yarn goods there is a weaker tendency. Stocks are limited throughout and production still well covered for some time to come. In the woolen goods division of the market combination projects still take up much of the attention of the trade, but beyond the American Woolen Company, previously referred to, none has yet taken concrete form. Collections are favorably reported upon.

WOOLEN GOODS.—The volume of business transacted in the men's wear woolen and worsted goods division of the market has reached fair proportions this week, but this has been due in a considerable degree to re-orders on light-weights for quick delivery and not to any expansion of buying of heavy weights for fall. Conditions in the former are generally good, stocks light and prices firm, but in the latter they are disappointing, sales so far for the season not having come up to expectations, and prices showing some weakness outside of most popular lines. The market for overcoatings and cloakings is quiet and unaltered in prices. Dress goods

are in fair demand, with worsted makes firm in price. Flannels have sold in considerable quantities for new season at 5 to 10 per cent decline. Blankets quiet.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending March 20 were 1,762 packages, valued at \$105,802, their destination being to the points specified in the tables below:

NEW YORK TO MARCH 20.	1899.		1898.	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.
Great Britain.....	40	582	59	906

Total.....	1,762	90,623	11,090	66,957

\* From New England mill points direct.

The value of the New York exports for the year to date has been \$3,162,033 in 1899, against \$3,405,844 in 1898.

Actual business in heavy sheetings and drills has been moderate at firm prices, bids for fair sized quantities being turned down where not fully up to sellers' quotations. Print cloth yard wide goods have sold at ¼c. to ½c. decline. Sales of duck moderate and of Osnaburgh indifferent, but prices unchanged. The bleached cottons situation shows no sign of weakening. The demand is moderate, but stocks are easily controlled and prices firmly upheld. A firm market throughout is reported in wide sheetings and cotton flannels and blankets. There has been a slight improvement in the demand for denims and plaids; other coarse-colored cottons quiet but prices maintained throughout. Kid-finished cambrics dull and unchanged. Cotton damasks and quilts in limited supply and firm. Prints have been in quieter demand in both staples and fancy but market continues in a strong position. Gingham also are strongly situated. Dark napped goods for fall in good request. Regular print cloths have been inactive but firmly held at 2½c. Wide odds weak and ¼c. to ½c. lower.

FOREIGN DRY GOODS.—The market shows no material change in foreign dry goods. Jobbers and retailers are doing a fair business, but original importers have only an indifferent demand coming forward for either quick or fall deliveries.

#### Imports and Warehouse Withdrawals of Dry Goods

The imports and warehouse withdrawals of dry goods at this port for the week ending March 23, 1899, and since January 1, 1899, and for the corresponding periods of last year are as follows:

Imports entered for consumption for the week and since January 1, 1899 and 1898.	Week ending March 23, 1899.		Since Jan. 1, 1899.		Week ending March 24, 1898.		Since Jan. 1, 1898.

STANDING BUSINESS CARDS.	Six Months (26 times) .. 50 00
Two Months (6 times) .. \$22 00	Twelve Months (52 times) .. 87 00

**Arizona.**—*Legislature Adjourns.*—The State Legislature has concluded its session of 1899.

**California.**—*Legal Rate of Interest.*—The Legislature has passed Senate Bill No. 145, amending the following section of the Civil Code relating to the legal rate of interest and making it read as follows:

1917.—Unless there is an express contract in writing stating a different rate, interest is payable on all moneys at the rate of 6% per annum, after they become due on any instrument of writing, except a judgment, and on moneys lent or due on any settlement of accounts, from the day on which the balance is ascertained, and on moneys received to the use of another and detained from him. In the computation of interest for a period less than a year, 360 days are deemed to constitute a year.

1918.—Parties may agree in writing for the payment of any rate of interest not exceeding 6% per month, and it shall be allowed according to the terms of the agreement until the entry of judgment. (Any agreement violating any provisions of this section shall be void as to the interest.)

1920.—Interest is payable on judgments recovered in the courts of this State at the rate of 6% per annum and no greater rate, but such interest must not be compounded in any manner or form.

**Bill to Disorganize Irrigation Districts.**—It is stated that a bill has passed the State Assembly providing for the disorganization of irrigation districts, the discharge of their indebtedness and for the distribution of their property.

**Legislature Adjourns.**—The Legislature concluded its session on March 18, 1899.

**Council Bluffs, Iowa.**—*Litigation.*—Judge Towner recently handed down a decision in the suit brought by J. J. Shea against the city of Council Bluffs, to determine whether the city had not exceeded its limit of indebtedness. These suits of J. J. Shea have extended over a period of several years and have been referred to from time to time in the CHRONICLE. Judge Towner, in his decision, holds that the general city bonds, and the intersection, sewer, grading and paving bonds constitute an indebtedness of the city within the meaning of the constitution, and that of such bonds issued by Council Bluffs, \$107,156 have been issued in excess of the constitutional limit. The Judge holds, however, that all the holders of such bonds should have been made party defendants and for that reason refuses to decide as to the validity of these bonds. He is willing to grant Shea an injunction restraining the city from issuing any more such bonds or from levying tax to pay for same.

**Cripple Creek, Col.**—*Warrants Illegal.*—On March 7, 1899, Judge Lunt, in the District Court, declared null and void the ordinance passed May 16, 1898, appropriating \$65,000 for the purchase of the sewer system of the Cripple Creek Sewerage Co. Under this decision the company is commanded to return the warrants issued in payment for the system, and the city is to make out a deed conveying the works back to the company. The ground for the decision was that the issue of the warrants would cause an excess of indebtedness beyond the debt limit, and also that cities such as Cripple Creek have no right under their charters to acquire sewers as public works unless they build them themselves. The plaintiffs contended also, it is stated, that the sewerage system was worth nearer \$15,000 than \$65,000.

**Cuyahoga County, Ohio.**—*Possible Litigation.*—A communication has been received from the holders of \$195,000 bonds of the \$235,000 issue made for the armory in Cleveland, calling the attention of the County Commissioners to the fact that none of the interest had been paid on these bonds and making the request that something be done. The law under which these bonds were issued has been declared illegal by the State Supreme Court, as stated in the CHRONICLE Feb. 12, 1899, and the Commissioners are therefore powerless to act. It is expected that the corporations owning the above bonds will commence suit against the county to recover.

**Maine.**—*Legislature Adjourns.*—The Legislature of this State has adjourned.

**Nevada.**—*Legislature Adjourns.*—The Nevada Legislature has adjourned.

**New Jersey.**—*Bonds Authorized by House.*—House bill No. 236, authorizing villages to renew matured or maturing bonds, has passed that body.

**New Mexico.**—*Bonds Authorized by Legislature.*—A bill has passed the Legislature allowing city councils to issue 45 bonds for public improvements in denomination of \$100.

The bill authorizing the refunding of the territorial indebtedness has also passed.

**Interest Bill Defeated.**—The Legislature has tabled indefinitely a bill to reduce the legal rate of interest to 10%.

**New York City—Town of Hempstead.**—*Bill Relative to Greater City.*—The State Senate has passed the Doughty Assembly bill transferring that portion of the town of Hempstead now contained in the Greater New York to the county of Nassau. Senator Stranahan, in explaining the purpose of the bill, stated that when the consolidation was made the boundary line was defined in the charter as the centre of an inlet at Rockaway Beach, which had since changed by the action of the elements, and had been moved a mile westward. The bill was intended mainly to correct this defect.

**North Carolina.**—*Extension in Time for Exchange of Bonds.*—State Treasurer W. H. Worth has given notice extending until January 1, 1901, the privilege of exchanging the old debt of this State, under the Act of the General Assembly ratified March 4, 1879, as amended by the Act ratified March 8, 1899.

**Rio Grande County, Col.**—*Warrant Litigation.*—The warrant suit of E. H. Rollins & Sons against the county of Rio Grande, mention of which was made in the CHRONICLE Dec. 11, 1897, is still before the courts. We are now advised by C. M. Corlett, County Attorney, that the case has been remanded back to the Federal Court for a new trial in August. Mr. Corlett says that the County Commissioners are about to consider a compromise by paying face value for the warrants, without any of the back interest.

**Sacramento, Cal.**—*Funded Debt Commission Abolished.*—Assembly Bill No. 611, recently signed by the Governor, abolishes the Funded Debt Commission of this city.

**Wisconsin.**—*Bill Limiting School Loans.*—The Senate has passed a bill authorizing loans to school districts by the State for erecting school buildings and refunding indebtedness, such loans not to exceed 5% of the average assessed valuation of the district for three years preceding the application for the loan.

## Bond Calls and Redemptions.

**Bethany, Mo.**—*Bond Call.*—This city has called for payment March 27, 1899, 6% bonds Nos. 1 to 30, inclusive. Securities are in denomination of \$1,000, dated March 26, 1894.

**Cass County, Mo.**—*Bond Call.*—This county has called for payment April 1, 1899, \$250,000 5% bonds, dated April 1, 1899. Bonds are in denomination of \$1,000 and are numbered from 1 to 250, inclusive.

**Cincinnati, Ohio.**—*Bond Calls.*—The Sinking Fund Commissioners have passed resolutions calling for payment the following bonds:

\$250,000 4% city hall bonds, dated June 1, 1891, and maturing June 1, 1902, but subject to call June 1, 1899. Bonds are numbered A1 to A50 and interest will cease Jan. 1, 1899.

100,000 4% granite pavement fund bonds, dated June 1, 1899, and maturing June 1, 1901, subject to call after June 1, 1901. Bonds are numbered 1 to 100 and interest will cease June 1, 1899.

2,000 7% Westwood town hall bonds, Nos. 90 to 95, inclusive, dated July 1, 1895. Interest will cease July 1, 1899.

500 6% Westwood town hall bonds, Nos. 211 to 215, inclusive, dated Feb. 1, 1899. Interest will cease Aug. 1, 1899.

**Columbus, Ohio.**—*Bond Call.*—The trustees of the sinking fund, Martin A. Gemunder, Clerk, have called for payment on April 1, 1899, at which time all interest will cease, \$18,600 street-improvement bonds.

**Cooper County (Mo.). Pilot Grove and Clear Creek Townships.**—*Bond Call.*—This county has called for payment April 1, 1899, the following township bonds:

Pilot Grove Township 6% bonds dated Jan. 1, 1890, Nos. 185 to 191, inclusive, each for \$500.

Clear Creek Township 5% bonds dated Jan. 1, 1890, Nos. 222 to 225, inclusive, each for \$500.

**Denver, Col.**—*Bond Call.*—Paul J. Sonrs, City Treasurer, has called for payment April 10, 1899, the following bonds:

Capital Hill Sanitary Sewer Dist. No. 1, bonds Nos. 172 to 179, both inclusive.

South Side Sanitary Sewer Dist. No. 1, bonds Nos. 178 to 218, both inclusive.

South Side Sanitary Sewer Dist. No. 2, bond No. 17.

North Denver Sanitary Sewer Dist. No. 2, bonds Nos. 150 to 196, both inclusive.

Downing Avenue Sanitary Sewer Dist. No. 4, bonds Nos. 16 and 17.

Fifteenth Paving Dist. No. 1, bonds 11, 12 and 13.

Broadway Paving Dist. No. 2, bonds Nos. 6 to 8, both inclusive.

Alley Paving Dist. No. 1, bond No. 20.

Thirteenth Street Sanitary Sewer Refunding Warrants Nos. 116 to 121, both inclusive.

Lower Sixteenth Street Paving Dist. No. 1, bonds Nos. 1 to 4, both inclusive.

Broadway Storm Sewer Dist. No. 1, bonds Nos. 1 and 2.

Nineteenth Street Paving Dist. No. 2, bonds Nos. 104 to 111, both inclusive.

Larimer Street Paving Dist. No. 1, bonds Nos. 104 to 127, both inclusive.

Larimer Street Paving Dist. No. 2, bonds Nos. 156 to 170, both inclusive.

Colfax Avenue Paving Dist. No. 1, bond No. 71.

Colfax Avenue Paving Dist. No. 1, bonds Nos. 7 to 13, both inclusive.

Upon request from the holders of any of the above bonds ten days before the expiration of this call, the Treasurer will arrange for their payment at the Mercantile Trust Co., New York City, but not otherwise.

**Hotliad County, Texas.**—*Bonds Redeemed.*—The State Treasurer has canceled \$64,000 court-house bonds of this county.

**Iowa.**—*Warrant Call.*—State Treasurer John Herriott has called for payment April 20, 1899, all outstanding warrants, amounting to about \$400,000.

**Jackson County (Mo.). Van Buren Township.**—*Bond Call.*—Interest ceased on March 4, 1899, on the 4% bonds Nos. 23 to 26, inclusive, each for \$1,000. Bonds bear date Jan. 4, 1893.

**Knox County, Mo.**—*Bond Call.*—Interest ceased on March 15, 1899, on 5% bonds Nos. 200 to 259, inclusive, each for \$500. Bonds bear date Sept. 15, 1894.

**Lewis County, La Belle Township, Mo.—Bond Call.**—Harry B. Smith, Clerk of County Court, has called for payment La Belle Township bonds Nos. 22, 26, 27 and 28, issued Sept. 26, 1881. Bonds will be paid at the Bank of Commerce, now the National Bank of Commerce, St. Louis.

**Lincoln County, Mo.—Bond Call.**—This county called for payment Feb. 1, 1899, \$500 5% bonds Nos. 126 to 225, inclusive, dated May 15, 1888.

**Seattle, Wash.—Warrant Call.**—A. H. Foote, City Treasurer, has called for payment the following warrants:

East Terrace Street, Ordinance No. 4352, warrant No. 272; Twenty-third Avenue South, Ordinance No. 4837, warrants Nos. 731, 734; Boren Avenue et al., Ordinance No. 4873, warrant No. 765; Westlake Avenue et al., Ordinance No. 4881, warrant No. 831; Blanchard Street, Ordinance No. 5070, warrant No. 961; Thirteenth Avenue, Ordinance No. 5036, warrant No. 1011; Fourteenth Avenue, Ordinance No. 5037, warrant No. 943; Fifteenth Avenue, Ordinance No. 5038, warrant No. 940, 981, 997, 998, 999; Taylor Avenue, Ordinance No. 5094, warrant No. 810; Dearborn Street, Ordinance No. 4999, warrant No. 964; South Fourteenth Street, Ordinance No. 1278, warrant No. 831.

**South Orange, N. J.—Bond Call.**—T. G. Conway, Village Treasurer, has called for payment April 1, 1899, at the National Park Bank, New York City, water bonds Nos. 4, 7, 13, 14, 15, 19 and 32.

**Vanderburgh County, Ind.—Bond Call.**—The County Commissioners have called for payment May 1, 1899, at the Farmers' Loan & Trust Company, New York City, one hundred \$1,000 5% bonds, dated May 1, 1889.

**Warren County, Miss.—Bonds Redeemed.**—The county has redeemed \$10,000 Baldwin's Ferry bridge bonds issued April 1, 1893. Securities are in denomination of \$500.

**Washington.—Warrant Call.**—State Treasurer C. W. Young has called for payment general fund warrants Nos. 30,046 to 31,200, inclusive. Amount of call, \$76,855.

**Wood County, Texas.—Bonds Redeemed.**—Bridge bonds to the amount of \$1,000 have been redeemed.

## Bond Proposals and Negotiations this week have been as follows:

**Akron, Ohio.—Bond Sale.**—On March 18, 1899, \$34,100 of the \$49,100 bonds for which proposals were asked were awarded as follows:

\$25,000 5% refunding bonds at 114.589 and \$3,000 Malden Lane Alley bonds at 105.166 to Rogers & Son, Chagrin Falls.  
\$5,600 Crosby Street improvement bonds to the Dollar Savings Bank, Youngstown, at 105.850.

For full description of these issues see CHRONICLE Feb. 18, 1899, p. 342.

**Albany, N. Y.—Bonds Proposed.**—The State Senate has under consideration the issuance of \$30,000 bonds to continue work on Beaver Park.

**Allen County, Ky.—Bond Sale.**—This county recently sold \$175,000 4% 20-year refunding bonds to John J. McHenry at par, according to reports.

**Atchison County, Kan.—Bond Sale.**—On March 15, 1899, the \$231,000 refunding bonds were awarded to Mason, Lewis & Co., Chicago, at par and other considerations for 4 per cents. Following bids were received:

For 4½% Bonds—	Premium.	For 4½% Bonds—	Premium.
Atchison Savings Bank.....	Par	Farson, Leach & Co., Chicago....	Par
<b>For 4½% Bonds—</b>		Ends Brokerage Co., St. Louis....	Par
E. H. Rollins & Sons, Boston.....	\$5,775 00	<b>For 5% Bonds—</b>	
Little & Hayes, St. Louis.....	2,343 32	W. J. Hayes & Sons, Cleveland....	\$4,855
S. A. Keen, Chicago.....	2,310 00	Lamprecht Bros. Co., Cleveland....	Par
Spitzer & Co., Toledo.....	250 00		

Bonds mature July 1, 1929, subject to call after July 1, 1914. For further description of bonds see CHRONICLE March 4, 1899, p. 439.

**Attleboro, Mass.—Bonds Voted.**—At the recent town meeting, in addition to the \$15,000 pump bonds which were then voted, \$30,000 30-year water bonds were authorized.

**Auburn, Ind.—Bonds Proposed.**—This place is considering the issuance of about \$30,000 sewer bonds.

**Baraboo, Wis.—Bond Election.**—Pursuant to a resolution adopted by the Common Council on March 9, 1899, an election will be held on April 18, 1899, to vote on the question of issuing \$30,000 high-school bonds.

**Bellefonte, Pa.—Bond Sale.**—The Borough Council has accepted an offer made by a New York firm to refund the \$100,000 4% bonds, now subject to call, with a like amount of 3½% bonds.

**Bellevue (Ohio) School District.—Bond Election.**—At the spring election the question of issuing \$40,000 school-building bonds will be voted upon.

**Blughamton, N. Y.—Temporary Loan.**—This city has negotiated a six-months' loan of \$10,679 78 with the Binghamton Savings Bank at 4.25% interest. This money is to pay the balance of contract price for brick pavement laid last year.

**Boone County, Iowa.—Bonds Authorized.**—The Board of Supervisors has authorized the issuance of the \$10,000 5% jail bonds which were voted at the November election. Securities are in denomination of \$1,000, dated April 1, 1899. Interest will be payable April 1 and October 1 at the County Treasurer's office and the principal will mature April 1, 1904.

**Brainerd, Minn.—Certificates Authorized.**—The City Council has authorized the issuance of \$1,500 6% certificates of indebtedness to rebuild a bridge destroyed by storm last year. Securities are in denomination of \$500 dated March 6, 1899. Interest will be payable annually at the office of the City Treasurer. Principal will mature \$500 each six months from June 24, 1900, to June 24, 1904.

**Bridgeton, N. J.—Bond Sale.**—On March 21, 1899, the \$15,000 4% school bonds were awarded to the Cumberland Trust Co., Bridgeton, at 108.38. Following are the bids:

Cumberland Tr. Co., Bridgeton.....	108.38	Lamprecht Bros. Co., Cleve.....	105.41
New Brunswick Savings Bank.....	107.50	Benwell & Ward, New York.....	105.31
Ida F. Combs (for \$2,500).....	107.50	Bridgeton National Bank.....	105.25
Sailer & Stevenson, Phila.....	106.75	S. A. Keen, Chicago.....	105.00
Dick Bros. & Co., Philadelphia.....	106.61	Walter Stanton & Co., N. Y.....	103.125
Edw. C. Jones & Co., Phila.....	106.53	L. W. Morrison, New York.....	102.88
E. H. Gay & Co., Philadelphia.....	106.52	W. J. Hayes & Sons, Phila.....	102.38
E. H. Rollins & Sons, Boston.....	106.037	Seasongood & Mayer, Cincinnati.....	101.05
N. W. Harris & Co., New York.....	105.68		

Bonds mature \$3,000 yearly on April 1 from 1914 to 1918, inclusive. For further description of bonds see CHRONICLE March 4, 1899, p. 440.

**Buffalo, N. Y.—Bond Offering.**—Proposals will be received until 12 M. April 3, 1899, by Erastus C. Knight, City Comptroller, for the following bonds:

\$12,708 45 3/4% registered grade-crossing bonds, dated March 1, 1890. Interest will be payable March 1 and September 1 and the principal will mature March 1, 1910. Securities are authorized by Section 16, Chapter 345, Laws of 1888.  
100,000 00 5/4% registered consolidated school-loan bonds, dated March 1, 1890. Interest will be payable March 1 and September 1 and the principal will mature \$5,000 yearly on March 1 from 1900 to 1910, inclusive. Securities are authorized by Chapter 253, Laws of 1888.  
100,000 00 3/4% registered refunding water bonds, dated April 26, 1899. Interest will be payable April 26 and October 24 and the principal will mature \$5,000 yearly on April 26 from 1900 to 1910, inclusive. Bonds are authorized by Section 7 of the General Municipal Law of New York as amended by Chapter 51, Laws of 1897. These bonds are exempt from taxation.

Interest on the above bonds will be payable at the office of the City Comptroller or at the Gallatin National Bank, New York City. Separate proposals must be made for the whole or part of each issue. A certified check for 2% of the amount of bonds bid for, payable to the City Comptroller without conditions, must accompany proposals.

**Camden, N. J.—Bonds Authorized.**—On March 22, 1899, the City Council authorized the issuance of \$50,000 4% 20-year paving bonds.

**Canon City, Fremont County, Col.—No Election to be Held.**—According to newspaper reports an election was to be held in this city in the near future for the purpose of voting on the question of issuing \$40,000 refunding bonds. Upon inquiry we learn from the City Treasurer that there will be no new bonds issued for at least two years.

**Canonsburg, Pa.—Bonds Proposed.**—The question of issuing bonds for a water-works system is being agitated. We are advised that nothing definite has been done as yet in the matter, and that bonds will not be issued for some time.

**Cape May, N. J.—Bond Sale.**—On March 20, 1899, the \$13,000 5% refunding bonds were awarded to Edward C. Jones & Co., N. Y., at 111.27. Following are the bids:

Edw. C. Jones & Co., N. Y.....	111.27	Charlotte Bridenthae, Cape May	108.00
Maurice Cresce, Cape May City.....	111.0825	City.....	108.00
H. H. Church, Cape May City.....	110.00	Mrs. Abbie Dunn, Merchantville.....	108.00
Walter Stanton & Co., N. Y.....	105.50	Clinton H. Hand, Cold Spring.....	105.00

Principal will mature April 1, 1924. For further description of bonds see last week's CHRONICLE, p. 537.

**Catskill, N. Y.—Bonds Authorized by House.**—The House of the State Legislature at Albany has passed a bill providing for the issuance of bonds for a village hall.

**Cattaraugus County, N. Y.—Bond Offering.**—Proposals will be received until 12 M. March 27, 1899, by William Ely, County Treasurer, Franklinville, for \$50,000 4% refunding bonds. Securities will be issued in denomination of \$500 and upwards to suit purchasers. Interest will be payable annually, and the principal will mature \$10,000 yearly on March 1 from 1900 to 1904, inclusive.

**Clinton, Mass.—Bonds Proposed.**—A committee has been appointed to consider the question of issuing bonds for a new school house, and we are advised will report at an adjourned meeting of the Council to be held April 1, 1899.

**Clio, S. C.—Bond Offering.**—Proposals will be received at any time by E. Sternberger for \$2,000 7% 10-20-year (optional) gold refunding bonds, issued in denomination of \$200.

**Cocke County, Tenn.—Bonds Authorized by Legislature.**—The Legislature has granted to this county the necessary authority to issue bonds to pay its indebtedness.

**Colorado Springs, Col.—Bond Sale.**—On March 20, 1899, the \$50,000 4% 10-15-year (optional) water-works bonds and \$85,000 4% 15-30-year (optional) refunding bonds were awarded to the Lamprecht Bros. Co., Cleveland, at 105.565. For description of bonds see CHRONICLE March 11, 1899, p. 488.

**Davidson, Mecklenburg County, N. C.—Bond Election.**—An election will be held early in May to vote on the question of issuing the street and water-works bonds authorized by the last Legislature.

**Defiance, Ohio.—Bond Election.**—At the coming election the city will vote upon the question of issuing \$25,000 4% bonds for a municipal electric-light plant. If the proposition carries the bonds will probably run 15 years from 1900 and the interest will be payable at Defiance.

**Denver, Col.—Bonds Proposed.**—This city is seeking Legislative action on the question of issuing bonds for the construction of a library building and auditorium.

**Dixon (county School District No. 1), Ponca, Neb.—Bond Sale.**—On March 15, 1899, the \$12,000 5% school bonds were awarded to C. H. Imhoff, Lincoln, at 108.75. Following are the bids:

C. H. Imhoff, Lincoln.....	\$12,450 00	S. A. Keene, Chicago.....	\$12,121 00
Minn. L'n & Tr. Co., Minn'is.....	12,450 00	Denison, Prior & Co., Cleve.....	12,000 00
F. E. Halstead.....	12,445 00	W. J. Hayes & Sons, Cleve.....	12,000 00
First Nat. B'k. Barnesville, O.....	12,385 00	Geo. H. Rogers.....	12,052 00
Geo. M. Brinkerhoff.....	12,251 50		

Principal will mature \$1,000 yearly on January 1 from 1907 to 1918, inclusive, all bonds being subject to call after Jan. 1, 1904. For further description see CHRONICLE Feb. 25, 1899, p. 390.

**Dysart (Iowa) School District.—Bonds Defeated.**—At a recent election the proposition to issue \$2,500 school bonds was defeated.

**Everett, Mass.—Bond Sale.**—On March 19, 1899, the \$25,000 4% sewer bonds were awarded to E. H. Gay & Co., Boston, at 116-03. Following are the bids:

E. H. Gay & Co., Boston.....115-03	Blodgett, Merritt & Co., Boston.....114-07
Adams & Co., Boston.....115-85	Blake Bros. & Co., Boston.....113-71
H. L. Day & Co., Boston.....115-09	W. J. Hayes & Sons, Boston.....113-39
E. H. Rollins & Sons, Boston.....115-02	Henry S. Dorr.....113-00
N. W. Harris & Co., New York.....114-25	

Bonds are dated March 1, 1899, and mature March 1, 1929.

**Fosteria (Ohio) School District.—Bond Election.**—At the general election to be held April 3, 1899, this district will vote upon the question of issuing \$25,000 school building bonds. Securities, if issued, will bear interest not to exceed 4½%, payable semi-annually, and the principal will mature \$2,500 March 1 and Sept. 1, from 1905 to 1909, inclusive.

**Fulton, Mo.—Bond Offering.**—Proposals will be received until April 10, 1899, by G. F. Yancey, City Clerk, for the \$10,000 5% 30-year (optional) city-hall and electric-light bonds which were recently voted.

**Garfield, Whitman County, Wash.—Bond Offering.**—Proposals will be received at any time for the \$10,000 (not \$100,000, as previously reported,) 6% gold bonds issued for the purpose of redeeming outstanding warrants. Securities will be in denomination of \$1,000. Bonds will mature July 1, 1919, subject to call after July 1, 1914. H. D. Irwin is the City Treasurer.

**Golden, Jefferson County, Col.—Bonds Voted.**—On Feb. 28, 1899, the citizens voted to issue \$40,000 5% 15-30-year (optional) refunding water bonds and \$45,000 5% 10-15-year optional bonds for the improvement of the water works system. Interest will be payable semi-annually in New York City or in Golden. Date of sale not yet determined.

**Green Bay, Wis.—Bond Offering.**—Proposals will be received until 4 p. m. March 27, 1899, by W. L. Kerr, City Clerk, for \$6,500 4% refunding bonds and \$15,000 4% school bonds. Securities are in denomination of \$500, dated Jan. 1, 1899. Interest will be payable January 1 and July 1 at any national bank designated by purchaser. The refunding bonds mature \$500 yearly on January 1 from 1900 to 1912, inclusive. The school bonds mature \$1,000 yearly on January 1 from 1900 to 1914, inclusive. Bidders are required to satisfy themselves as to the legality of the bonds before bidding. A certified check for \$200, payable to the City Treasurer, must accompany proposals.

**Green Lake County (P. O. Dartford), Wis.—Bond Offering.**—Proposals will be received until 10 a. m. April 7, 1899, by George N. Clark, County Treasurer, for \$25,000 4% court-house and jail bonds. Securities are in denomination of \$500, dated April 1, 1899. Interest will be payable annually at the County Treasurer's office. Principal will mature \$5,000 yearly on April 1 from 1901 to 1905, inclusive. A certified check or a certificate of deposit upon some bank in Green Lake County for \$500, payable to the County Treasurer, must accompany proposals.

**Greensport, N. Y.—Bonds Voted.**—On March 21, 1899, the citizens of this place voted to issue \$22,000 bonds for the purchase of the Greensport Water Company's plant and \$5,000 bonds for the purchase of the Greensport Electric Light & Power Company's plant.

**Greenville, Pa.—Bonds Proposed.**—A. J. Gillespie, Borough Secretary, writes us that the borough contemplates the issuance of paying bonds within a short time, but that no action has as yet been taken in the matter.

**Guthrie, Logan County, Okla.—Bond Election.**—At the election to be held April 4, 1899, the question of issuing \$45,000 6% 10-20-year sewer bonds will be submitted to the tax-payers.

**Hammonton (N. J.) School District.—Bonds Voted.**—At a recent meeting of the school district the issuance of \$13,000 refunding bonds was authorized.

**Hartford (Conn.) Washington School District.—Bonds Authorized by House.**—The House has passed the bill authorizing the issuance of \$25,000 bonds.

**Houston, Texas.—Bond Offering.**—At 12 m. April 4, 1899, the Finance Committee of this city will sell \$100,000 5% paving and sewer bonds. Securities are in denomination of \$1,000, dated Jan. 2, 1899. Interest will be payable January 1 and July 1 at the Union Trust Co., New York City. Principal will mature Jan. 1, 1939. Par and a premium of \$10,000 must be offered or the bid will not be considered. A check for \$3,000, duly certified by a Houston bank, must accompany each bid, which must be verbal. Sealed or written bids will not be considered.

**Jackson, Miss.—Bonds Re-awarded.**—We are advised that the \$20,000 5½% bridge and school bonds awarded to F. R. Fulton & Co., Chicago, on January 3, 1899, were refused by that firm on the ground that the city cannot legally issue bridge bonds. The bonds have since been re-awarded to a local investor.

**Johnson City, Tenn.—Bonds Authorized by Legislature.**—Public building bonds to the amount of \$10,000 have been authorized by the Legislature.

**Johnson County, Iowa.—Bond Sale.**—On March 15, 1899, this county sold the \$100,000 8½% court-house and jail bonds which we reported some time since they had under consideration to Denison, Prior & Co., Cleveland, at 100-99. Other bidders were: First National Bank, Chicago; N. W. Harris & Co., Chicago; The Lamprecht Bros. Co., Cleveland; Merchants' Loan & Trust Co., Chicago; Johnson County Savings Bank, Iowa City, and Mason, Lewis & Co., Chicago. Bonds will bear date of April 1, 1899; interest will be payable at the First National Bank, Chicago. Principal will mature as

follows: \$40,000 April 1, 1904; \$10,000 April 1, 1905; \$10,000 April 1, 1906; \$10,000 April 1, 1907; \$15,000 April 1, 1908; \$15,000 April 1, 1909.

**Jonesboro, Tenn.—Bonds Proposed.**—This place will issue \$10,000 electric-light bonds, provided the bill recently introduced in the Legislature becomes a law.

**Joplin, Mo.—Bond Sale.**—On March 18, 1899, the \$30,000 5% electric-light plant bonds were awarded to the First National Bank of Joplin, at par, for bonds subject to call at any time. Other bids received based on 5-20-year (optional) bonds were as follows:

W. J. Hayes & Sons, Cleve.....\$22,004 00	Trowbridge, Macdonald & Niver Co., Chicago.....\$31,305 00
Seasongood & Mayer, Cin. ....31,543 00	
Feder, Holzman & Co., Cin. ....31,506 75	
Denison, Prior & Co., Cleve. ....31,450 00	R. Kleybolte & Co. (for 5%) 31,245 00
	(for 4½%) 30,875 00
	(for 4%) 30,075 00

The following bids were received too late to be considered: S. Kuhn & Sons, Cincinnati, \$31,350, and The Lamprecht Bros. Co., Cleveland, \$31,317. For description of bonds see CHRONICLE March 11, 1899, p. 489.

**Kane (N. D.) School District (P. O. Lakota).—Bond Offering.**—Proposals will be received until 12 m. April 1, 1899, for \$6,500 4% bonds for building and furnishing a school house in this district. Securities will be in denomination of \$500, dated about April 15, 1899; interest will be payable semi-annually and the principal will mature in 1919. A. E. Sheets is Clerk of the district.

**Kansas.—Bond Bill Defeated.**—In the CHRONICLE March 4, 1899, we stated that a bill had passed the House authorizing the issuance and sale of bonds to the Commissioners of the Permanent School Fund for the purpose of paying \$77,000 Quantrell-raid bonds. This bill, we are now advised, was defeated in the State Senate.

**Kenton Union School District, Hardin County, Ohio.—Bond Offering.**—Proposals will be received until 12 m. April 14, 1899, by the Board of Education at the office of Melvyn G. Furney, Clerk, for \$10,000 6% school bonds. Securities will be in denomination of \$500, dated April 1, 1899; interest will be payable April 1 and October 1 at the office of the District Treasurer. Principal will mature \$5,000 Oct. 1, 1916, and \$5,000 Oct. 1, 1917. Five hundred dollars in cash must be deposited with each bid. Bonds are issued under authority of sections 3991, 3992 and 3993, Revised Statutes of Ohio.

**Knox County, Tenn.—Bonds Authorized by House.**—The House has passed the bill authorizing the issuance of \$100,000 refunding bonds.

**Knoxville, Tenn.—Bonds Authorized by Legislature.**—The bill authorizing the issuance of \$30,000 hospital bonds has passed the State Legislature.

**La Fayette, Ala.—Bond Offering.**—Proposals will be received at any time by J. C. Griffio, Town Treasurer, for \$8,000 5% bonds for an electric light plant and other improvements. Securities are in denomination of \$1,000, dated May 1, 1899. Interest will be payable annually at the Bank of La Fayette. Principal will mature \$1,000 yearly, beginning Jan. 1, 1901. We are advised that the bonds will be sold within two weeks.

**Lake County, Tenn.—Bonds Proposed.**—A bill has been introduced in the State Legislature providing for the issuance of \$100,000 levee bonds.

**Lake Linden, Mich.—Bonds Defeated.**—At an election held in this city March 13, 1899, the proposition to issue \$30,000 sewer bonds was defeated.

**Lexington, Tenn.—Bonds Proposed.**—The Legislature has under consideration a bill permitting the issuance of bonds for school purposes.

**Logan County (P. O. Bellefontaine), Ohio.—Bond Offering.**—Proposals will be received until 2 p. m. April 7, 1899, by C. D. Campbell, County Auditor, for \$10,000 4% county bridge bonds and \$20,000 4% county ditch bonds. Securities will be in denomination of \$500, dated April 1, 1899; interest will be payable semi-annually at the County Treasurer's office. The bridge bonds will mature Jan. 1, 1905, and the ditch bonds will mature \$2,500 January 1 and \$2,500 July 1 in the years 1900, 1901, 1902 and 1903. Bonds are issued pursuant to sections 4479, 4481 and 4482, Revised Statutes of Ohio, and the laws amendatory and supplementary thereto. Each bidder will be required to deposit \$250 cash with the County Treasurer and satisfy himself as to the legality of the issue before filing his bid. The official circular states that this county has never defaulted in payment of principal or interest.

**Luzerne County (Pa.) Central Poor District.—Bond Sale.**—On March 22, 1899, the \$200,000 3½% gold building bonds were awarded to The Lamprecht Bros. Co., Cleveland, at 102-311. Following are the bids:

Lamprecht Bros. Co., Cleve.....102-311	R. Kleybolte & Co., Phila. ....100-84
Heck Bros. & Co., Philadelphia 101-73	Edw. C. Jones & Co., Phila. ....100-65
Denison, Prior & Co., Cleve.....101-29	Mason, Lewis & Co., Boston.....100-109
E. H. Gay & Co., New York.....101-25	

Bonds mature \$10,000 yearly on April 1 from 1903 to 1922, inclusive. For further description of bonds see CHRONICLE March 11, 1899, p. 489.

**Lyon County, Kan.—Bond Sale.**—This county recently sold \$167,000 4½% 10-20-year (optional) bonds and \$25,000 4% 5-20-year (optional) bonds issued for the purpose of refunding outstanding securities. The new bonds will be dated July 1, 1899, and were awarded to Spitzer & Co., Toledo, at 101-488.

**Madison, Wis.—Bids.**—The following are the bids received on March 14, 1899, for the \$10,000 sewer bonds which were awarded, as stated last week, to Duke M. Farnon, Chicago, at 102-15 for a 8½% bond:

## For a 3½% Bond.

Duke M. Farson, Chicago.....\$40,000 00 Merch. L'n & Tr. Co., Chicago..\$40,212 00  
N. W. Harris & Co., Chicago..40,266 00 Denison, Prior & Co., Cleve.. 40,100 00

## For a 4% Bond.

Duke M. Farson, Chicago.....\$42,565 00 C. P. Phelps & Co., Boston ..\$41,564 00  
State Bank, Chicago..... 42,100 00 Minnesota Loan & Trust Co. 41,450 00  
Lamprecht Bros. Co., Cleve... 41,976 00 Seasongood & Mayer, Cincln. 41,370 00  
N. W. Harris & Co., Chicago.. 41,916 00 Feder, Holzman & Co., Cin. 41,306 00  
W. J. Hayes & Sons, Cleve... 41,911 00 R. Kleybolte & Co., Cincln... 41,255 00  
Merchants' Loan & Tr. Co... 41,876 00 Briggs, Todd & Co., Cincln... 41,255 75  
Denison, Prior & Co., Cleve.. 41,740 00 C. H. White & Co., New York. 41,250 00  
S. A. Kean, Chicago..... 41,650 00 Mason, Lewis & Co., Chicago. 41,616 00  
Briggs, Todd & Co., Cincln... 41,360 00 Chas. B. Coffin..... 40,501 00  
Farson, Leach & Co., Chicago. 41,600 00

For description of securities see CHRONICLE March 4, 1899, p. 441.

**Mankato, Kan.—Bond Offering.**—Proposals will be received until 8 P. M. April 8, 1899, by J. B. Will, City Clerk, for \$20,000 water-works bonds. Securities were authorized at the election held Jan. 17, 1899. They are in denomination of \$200, dated March 1, 1899. Interest will be payable March 1 and September 1 in New York exchange. Principal will mature \$2,000 yearly on March 1 from 1911 to 1917, inclusive, and \$3,000 March 1, 1918 and 1919. Each proposal must be accompanied by an unconditional check drawn upon a bank doing business in the city of Mankato and certified by an officer thereof, or by New York draft, either to be in the amount of \$1,000, in favor of the city of Mankato. The city has no indebtedness whatever. The assessed valuation is \$184,937 and the population 1,200.

**Marmaton Township (P. O. Moran), Kan.—Bonds Not Sold.**—We are advised that the \$20,000 4% refunding bonds for which proposals were asked until March 15, 1899, were not sold, as there was no bid received which the officials could accept. Under the law the bonds could not be sold below par, and no such offer was received for a 4% bond. They may be advertised again in a short time. Meanwhile H. B. Smith, Township Clerk, will receive any propositions for the bonds bearing 4% (or higher) interest. A description of the bonds was given in the CHRONICLE Feb. 25, 1899.

**Melrose School District, Alameda County, Cal. (P. O. Oakland).—Bonds Defeated.**—At the election held on Feb. 11, 1899, the question of issuing \$10,000 5% school bonds was not approved. We are advised that the location of the school site was the cause of defeat.

**Meer County, Mo.—Bond Election.**—An election will be held March 28, 1899, to vote on the question of issuing \$3,000 court house bonds.

**Mifflin Township (P. O. Munhall, Allegheny County, Pa.) School District.—Bond Offering.**—Proposals will be received until March 29, 1899, by Joseph Myford, Secretary, for \$35,000 4% coupon bonds. Securities are in denomination of \$1,000; interest will be payable April 1 and October 1. Principal will mature yearly on April 1 as follows: \$2,000 from 1905 to 1908, inclusive, and \$3,000 from 1909 to 1917, inclusive. A certified check for 1% of the bid must accompany proposals.

**Monroe, La.—Bond Offering.**—Proposals will be received until 8 P. M. April 17, 1899, by A. A. Forsythe, Mayor, for the \$155,000 5% improvement bonds voted last November. Securities will be in denomination of \$500, to be dated about June 1, 1899; interest will be payable at the office of the United States Mortgage & Trust Co., New York City, which company will also certify to the genuineness of the securities. Bonds will be issued in serial form, maturing annually as follows: \$1,000 in 1900, \$1,500 from 1901 to 1906, \$2,000 from 1907 to 1911, \$2,500 from 1912 to 1915, \$3,000 from 1916 to 1919, \$3,500 in 1920 and 1921, \$4,000 from 1922 to 1924, \$4,500 in 1925 and 1926, \$5,000 from 1927 to 1929, \$5,500 in 1930, \$6,000 in 1931 and 1932, \$6,500 in 1933, \$7,000 in 1934 and 1935, \$7,500 in 1936, \$8,000 in 1937 and 1938 and \$8,500 in 1939. All bonds not matured are subject to call after 25 years. Bonds are issued pursuant to Article 281 of the State Constitution of 1898. Proposals must be accompanied by a certified check on some responsible bank, payable to the Treasurer of the city, for 1% of amount of bid. This proposed bond issue represents the total indebtedness of the city, and payment of principal and interest is amply provided for. Proposals are asked for as follows: First, for the total amount to be issued at once, with interest payable annually; second, for the total amount to be issued at once, with interest payable semi-annually; third, for \$65,000 to be issued at once and \$90,000 to be issued in from 6 to 18 months, interest payable annually; and, fourth, for the same, with semi-annual interest.

**Morgan County, Ala.—Bond Offering.**—Proposals will be received until March 27, 1899, by W. E. Skeggs, Probate Judge, Decatur, for the \$265,000 bonds voted Jan. 17, 1899. Securities will be in denomination of \$500 and the interest (rate to be named by the purchaser) will be payable semi-annually. Principal will mature one half in 30 years and one-half in 40 years, subject to call after 20 years.

The official notice of this bond offering will be found among the advertisements elsewhere in this Department.

**Mount Vernon, N. Y.—Bond Offering.**—Proposals will be received until 8 P. M. April 4, 1899, by the Common Council for \$30,000 3½% sewerage loan bonds. Securities will be in denomination of \$1,000, dated March 1, 1899, and will be numbered from 214 to 243, inclusive; interest will be payable semi-annually at the office of the City Treasurer. Principal will mature \$10,000 on March 1 in the years 1922, 1923 and 1924. Bonds are issued pursuant to Chapter 608, Laws of

1886, also Chapter 182, Laws of 1892. Proposals must be accompanied by a certified check in the sum of \$1,000, made payable to the city of Mount Vernon. These bonds were advertised for sale and awarded on Feb. 27, 1899. We are not advised why the bonds are re-advertised, there being no change in the issue except the maturities, which are one year later.

**Nashville, Tenn.—Bond Offering.**—Proposals will be received until 3 P. M. April 10, 1899, by the Bond Commissioners (care J. P. Byrne, City Recorder), for \$100,000 4½% bridge approach bonds. Securities are in denomination of \$1,000, dated Oct. 1, 1898. Interest will be payable Jan. 1 and July 1. Principal will mature Oct. 1, 1918.

The official notice of this bond offering will be found among the advertisements elsewhere in this Department.

**Neosho, Mo.—Bonds Voted.**—This place has voted to issue \$25,000 water-works bonds, according to reports.

**Newport, Ark.—Bonds Authorized by Legislature.**—The Legislature has passed a bill authorizing this town to borrow \$5,000 for levee purposes.

**Niles, Ohio.—Bond Sale.**—On March 6, 1899, the \$12,000 4½% 16-year sewer bonds were awarded to Rudolph Kleybolte & Co., Cincinnati, at 102-5125. Following are the bids:

Premium.	Premium.
R. Kleybolte & Co., Cincinnati..\$301 50	New 1st Nat. Bank, Columbus...\$255 01
German Nat. Bank, Cincinnati. 354 00	Feder, Holzman & Co., Cincln... 242 50
Seasongood & Mayer, Cincln... 321 00	Lamprecht Bros. Co., Cleve..... 240 10
Dollar Sav. & Tr. Co., Youngst'n. 287 00	Denison, Prior & Co., Cleve..... 222 22
W. J. Hayes & Sons, Cleveland. 257 00	First National Bank Niles..... 45 00

**Oneonta, N. Y.—Bond Bill Signed.**—The Governor has signed a bill recently passed by the State Legislature authorizing the issuance of \$5,000 street and highway improvement bonds.

**Petoskey, Mich.—Bond Election.**—The City Council has passed a resolution to submit the question of issuing \$15,000 city hall and jail bonds to a vote of the people at the next annual election.

**Pike County, Ohio.—Bond Offering.**—Proposals will be received until 12 M. April 1, 1899, by the County Commissioners for \$30,000 5% refunding bonds. Securities are in denomination of \$1,000, dated April 1, 1899. Interest will be payable semi-annually at the office of the County Treasurer. Principal will mature \$15,000 six years from date of issue and \$15,000 in seven years. Bonds are issued pursuant with section 2834a Revised Statutes of Ohio. A certified check for 5% of the gross amount of bonds bid for must accompany proposals. P. P. Hammon is the County Auditor.

**Portland, Conn.—Bonds Authorized.**—Legislative authority to issue \$100,000 3½% bonds has been obtained by this town.

**Poultney (Town) Vt.—Bonds Proposed.**—This town has under consideration the issuance of bonds for the purpose of funding its present indebtedness and to build a town hall. Securities will be in denomination of \$1,500, dated June 1, 1899; interest will be at the rate of 4%, payable semi-annually at the First National Bank, Poultney. Principal will mature \$1,500 yearly on June 1, beginning in 1910. Date of sale not yet decided upon.

**Pratt City, Ala.—Bond Election.**—An election will be held to-day (March 25, 1899,) to vote on the question of issuing \$25,000 water-works bonds.

**Providence, R. I.—Bonds Authorized.**—The City Council has authorized the issuance from time to time of \$100,000 notes for highway purposes.

**Putnam, Conn.—Bonds Authorized.**—This city has obtained authority from the Legislature to issue \$10,000 street-improvement bonds.

**Raleigh, N. C.—Bond Election.**—On June 12, 1899, an election will be held to vote on the question of issuing street-improvement bonds.

**Raleigh (N. C.) School District.—Date of Election Changed.**—The date of the election to vote on the question of issuing \$50,000 school bonds has been changed from May 1 to June 12, the date on which the question of issuing \$100,000 30-year street-improvement bonds will be voted upon.

**Rhineland, Wis.—Loan Authorized by Senate.**—The Senate has passed a bill authorizing the commissioners of public lands to loan \$30,000 to the city of Rhineland to refund her bonded indebtedness.

**Roanoke, Va.—Bond Offering.**—Proposals will be received until 12 M. April 1, 1899, for \$15,000 4% 15-30-year (optional) refunding bonds. Securities are in denomination of \$1,000, dated April 1, 1899. Interest will be payable April 1 and October 1 at the office of the City Treasurer.

**Rockingham County, N. H.—Bond Sale.**—On March 21, 1899, the \$35,000 3½% coupon bonds were awarded to W. E. Pierce & Co., Portsmouth, N. H., at 102-903. Following are the bids:

W. E. Pierce & Co., Portsmouth..102-908	Blodget, Merrill & Co., Boston..101-69
Geo. A. Fernald & Co., Boston..102-718	J. Morse.....101-67
E. H. Rollins & Sons, Boston..102-677	Adams & Co., Boston.....101-12
N. W. Harris & Co., Boston.....102-9250	Hlake Bros. & Co., Boston.....101-10
H. L. Day & Co., Boston.....101-977	Jose, Parker & Co., Boston.....100-971
Denison, Prior & Co., Boston..101-2079	S. A. Kean, Chicago.....100-00
E. H. Gay & Co., Boston.....101-035	

Principal will mature \$7,000 yearly on April 1 from 1903 to 1910, inclusive. For further description of bonds see last week's CHRONICLE, p. 538.

**Rocky Mount (Town), Edgecombe County, N. C.—Bond Election.**—At the May election the question of issuing the \$40,000 water-works bonds recently authorized by the State Legislature will be submitted to the people. If the vote is

favorable the securities will be in denomination of \$100; interest will be payable on Jan. 2 in Rocky Mount. Principal will mature 20 years from date of issue.

**Rockville Centre, N. Y.—Bonds Defeated.**—At the election held March 21, 1899, the proposition to issue \$2,000 electric-light bonds was defeated by a vote of 32 for to 33 against.

**Saint Paris, Ohio.—Bond Offering.**—Proposals will be received until 8:30 P. M. April 17, 1899, by Jas. J. Richeson, Corporation Clerk, for \$3,000 6% electric-light plant bonds. Securities will be in denomination of \$1,000, dated April 1, 1899; interest will be payable April 1 and Oct. 1 at the First National Bank, St. Paris. Principal will mature \$1,000 yearly on Oct. 1 from 1902 to 1909, inclusive. Bonds were authorized by a vote of 295 to 33 at the election held Feb. 21, 1899, and are issued pursuant to sections 2837 and 2837a, Revised Statutes of Ohio. The official circular states that there is no pending nor contemplated litigation affecting these securities. Assessed valuation \$471,280. Bonded debt (including this issue) \$11,000, \$3,000 of which is for fire-engines. Other debts \$2,400. Population (estimated) 1,450. Tax rate \$22 40 per \$1,000.

**Salem, Ohio.—Bond Offering.**—Proposals will be received until 12 M. April 10, 1899, by George Holmes, City Clerk, for \$144,193 20 improvement bonds, as follows:

\$21,750 00 West Main Street paving bonds, in denomination of \$7,175 00  
7,175 00 Gersfeld Avenue paving bonds, in denomination of \$7,175 00  
9,500 00 Mill street paving bonds, in denomination of \$950 00  
8,230 00 East Fourth Street paving bonds, in denomination of \$823 00  
2,000 00 West School Street paving bonds, in denomination of \$200 00  
2,000 00 East School Street paving bonds, in denomination of \$200 00  
\$3,125 00 East Fifth Street paving bonds, in denomination of \$312 50  
\$1,125 00 East Sixth Street paving bonds, in denomination of \$112 50  
\$6,000 00 East High Street paving bonds, in denomination of \$2,400 00  
\$7,450 00 Ellsworth Street paving bonds, in denomination of \$745 00  
\$3,515 00 Ellsworth Street sewer bonds, in denomination of \$703 00  
1,3 4 30 East Fourth Street sewer bonds, in denomination of \$134 30

All of the above bonds will bear date of April 1, 1899. Interest at the rate of 5% will be payable annually and the principal will mature one bond of each series yearly. These issues are authorized by State laws and by city ordinances passed Feb. 27 and March 7, 1899. The official circular states that the city has never defaulted in payment of bonds or interest, and that no action is pending to enjoin the payment of bonds or execution of contracts.

**Saline County (P. O. Salina), Kan.—Bond Sale.**—This county has recently sold \$100,000 4½% refunding railroad-aid bonds. Securities are in denomination of \$1,000; interest will be payable at the Kansas fiscal agency, New York City. Bonds will mature part yearly after 1900.

**Sandusky, Ohio.—Bonds Authorized.**—The City Council has authorized the issuance of \$10,000 4% refunding water-works bonds. Securities will be in denomination of \$500, dated April 15, 1899. Interest will be payable semi-annually at the American Exchange National Bank, New York City. Principal will mature April 15, 1900.

**Sea Cliff, N. Y.—Bonds Voted.**—This village on March 21, 1899, voted to issue \$4,000 sidewalk and street-improvement bonds.

**Shamokin (Pa.) School District.—Bond Offering.**—Proposals will be received until 7 P. M. April 3, 1899, by the School Board of the borough of Shamokin—John F. Osler, President—for \$46,400 3½% bonds. Interest will be payable semi-annually and the principal will mature 30 years from date of issue, subject to call after 20 years. Securities will be in the following denominations:

Four bonds of \$1,000 each, dated May 1, 1899.  
Five bonds of \$1,000 each, dated May 3, 1899.  
Two bonds of \$1,000 each, dated May 5, 1899.  
Four bonds of \$1,000 each, dated May 6, 1899.  
Five bonds of \$500 each, dated May 8, 1899.  
Ten bonds of \$1,000 each, dated May 9, 1899.  
Five bonds of \$500 each, dated May 9, 1899.  
Two bonds of \$1,000 each, dated May 18, 1899.  
Four bonds of \$1,000 each, dated May 17, 1899.  
Two bonds of \$1,000 each, dated May 24, 1899.  
Four bonds of \$500 each, dated May 26, 1899.

Proposals will also be received at the same time and place for \$12,000 3½% refunding bonds. Securities will be in denomination of \$1,000 and the interest will be payable semi-annually. Principal will mature 30 years from date of issue, redeemable after 20 years at the option of the School Board.

**Sioux City, Iowa.—Bond Issue.**—Hon. J. H. Quick, Mayor, writes us that the \$325,000 funding bonds, mentioned in the CHRONICLE Jan. 14, 1899, are now signed and ready for issuance. About \$225,000 have already exchanged, and whether or not, the Mayor says, the city will wish to go on the market with the balance will be known within a short time.

**South Norridgewock, Me.—Bond Offering.**—Proposals will be received at any time by C. H. Hussey, Agent, for \$10,000 3½% refunding bonds. Securities were authorized at an election held March 6, 1899. They are in denomination of \$500, dated July 1, 1899. Interest will be payable January 1 and July 1 at the First National Bank, Portland. Principal will mature \$2,000 yearly on July 1 from 1905 to 1924, inclusive. The net debt of the town on March 6, 1899, was \$45,488.

**Sparta, Wis.—Bonds Voted and Sold.**—On Feb. 28, 1899, this city voted to issue \$3,500 bonds, and we are advised that the same were sold on March 18, 1899.

**Steelton, Dauphin County, Pa.—Bond Offering.**—This borough will sell on April 5, 1899, \$15,000 1-10-year and \$35,000 10-30-year 4% coupon bonds. John D. Young is Secretary of the Council and may be addressed on the subject.

The official notice of this bond offering will be found among the advertisements elsewhere in this Department.

**Tarboro (Town), Edgecombe County, N. C.—Bond Election.**—On April 17, 1899, the people will vote upon the ques-

tion of issuing \$40,000 bonds for water-works and sewerage and \$10,000 bonds for an electric-light plant.

**Taunton, Mass.—Bond Sale.**—On March 21, 1899, the \$50,000 4% sewer bonds and \$5,000 4% electric-light bonds were awarded to E. H. Rollins & Sons, Boston, at 117-183. Following are the bids:

E. H. Rollins & Sons, Boston.....117-183	Blake Bros. & Co., Boston.....115-10
N. W. Harris & Co., New York.....116-375	Denison, Prior & Co., Boston.....115-00
Blodgett, Merrill & Co., Boston.....116-08	Rines & Cummings, Boston.....114-39
R. L. Day & Co., Boston.....115-687	W. J. Hayes & Sons, Boston.....114-30
Adams & Co., Boston.....115-56	W. H. Champin, trustee, N. Y.....113-00
W. Holman Cary & Co., Boston.....115-267	

Bonds mature Dec. 1, 1928. For description of bonds see CHRONICLE last week, p. 539.

**Tecumseh, Neb.—Bonds Defeated.**—At the election held March 15, 1899, the proposition to issue \$21,000 4½% refunding water bonds was defeated by a vote of 149 against to 53 in favor of the bonds.

**Tekamah (Neb.) School District.—Bonds Voted.**—At the election held on March 17, 1899, this district by a vote of 279 to 40 authorized the issuance of the \$19,000 school bonds. Interest will be at the rate of 4%, payable semi-annually, and the principal will mature 20 years from date of issue.

**Tennille School District, Washington County, Ga.—Bond Offering.**—Bids will be received at any time for \$1,500 6% bonds of this district. Securities will be in denomination of \$100, and principal will mature one bond yearly from 1900 to 1914, inclusive.

**Tiffin, Ohio.—Bond Offering.**—Proposals will be received until 12 M. April 3, 1899, by J. B. Ehrenfried, City Clerk, for \$3,600 4½% alley-improvement bonds. Securities will be in denomination of \$400, dated April 1, 1899; interest will be payable semi-annually at office of the City Treasurer. Principal will mature \$1,200 on September 1 in the years 1899, 1900 and 1901. Bonds are issued pursuant to Section 2704, Revised Statutes of Ohio, and an ordinance passed by the City Council. Proposals must be accompanied by a certified check for 20% of the amount bid for, without condition.

**Tollahoma, Tenn.—Bonds Proposed.**—Bills have been introduced in the Legislature providing for the issuance of bonds for water works, sewers and a light plant.

**Umatilla County, Ore.—No Bonds to be Issued.**—We are advised that the County Court has decided not to issue the bonds to fund outstanding warrants which they had under consideration.

**Vicksburg, Warren County, Miss.—Bonds Voted.**—We are advised that this city recently voted to issue \$15,000 5% bonds for the purpose of building a medical university. Details of the issue are not yet determined.

**Vineland (N. J.) School District.—Bonds Voted.**—At the annual school meeting held March 21, 1899, the issuance of \$8,500 school bonds was authorized.

**Wappingers Falls, N. Y.—Bonds Defeated.**—On March 21, 1899, the citizens of this village defeated the propositions to issue \$50,000 water-works and \$15,000 electric-light plant bonds.

**Washington County, Ala.—No Bonds to be Issued.**—We are advised that the \$15,000 jail bonds authorized by the last Legislature will not be issued, as there was some flaw in the bill.

**Watertown, Mass.—Bond Offering.**—Proposals will be received until 12 M. March 29, 1899, by Chas. W. Stone, Town Treasurer, for a loan of \$100,000 in anticipation of the collection of taxes. Notes will be issued in denominations to suit purchaser and the principal will mature Nov. 1, 1899.

**Westminster (Town) Windham County, Vt.—Bonds Defeated.**—At the election held March 21, 1899, the proposition to issue \$20,000 bonds was defeated by a large majority.

**Whitman, Mass.—Loan Authorized.**—The Town Treasurer has been authorized to borrow \$50,000 in anticipation of the collection of taxes.

**Williston (N. D.) School District.—Bond Sale.**—This district has recently sold \$10,000 6% bonds for the erection of a new school house. Securities are in denomination of \$1,000; interest will be payable semi-annually and the principal will mature 20 years from date of issue.

**Winchester, Mass.—Bond Sale.**—The sale of \$12,500 4% bonds maturing in 1928, to George A. Fernald & Co., Boston, at 115-45, is reported.

**Woodsville (N. H.) School District.—Bonds Authorized by Legislature.**—School bonds have been authorized by the Legislature.

**Woonsocket, R. I.—Bond Sale.**—On March 21, 1899, the \$150,000 4% gold refunding water-works bonds were awarded to the Third National Bank, Boston, at 111-23. Following are the bids:

Third National Bank, Boston.....111-23	C. P. Phelps & Co., Boston.....108-15
Geo. A. Fernald & Co., Boston.....111-17	Benjamin Fisher, Boston.....108-07
E. H. Rollins & Sons, Boston.....110-537	W. H. Champin, trustee, N. Y.....108-00
Denison, Prior & Co., Boston.....110-329	R. L. Day & Co., Boston.....107-639
N. W. Harris & Co., Boston.....109-59	Blodgett, Merrill & Co., Boston.....107-52
E. H. Gay & Co., Boston.....109-57	Blake Bros. & Co., Boston.....107-51
Street, Wykes & Co., New York.....108-216	

Principal will mature April 1, 1919. For further description of bonds see CHRONICLE of last week, p. 540.

**Yonkers, N. Y.—Bond Offering.**—Proposals will be received until 3 P. M. March 29, 1899, by Leslie Sutherland, Mayor, for \$14,900 4% street-paving bonds, dated April 1, 1899. Principal will mature \$6,000 April 1, 1917 and \$8,900 April 1, 1926. Bonds are issued pursuant to Section 40 of Title VII. of the City Charter, passed May 11, 1895, as amended by Chapter 275 of Laws of 1898.

Proposals will also be received at the same time and place for \$10,000 4% assessment bonds, dated April 1, 1899. Prin-

cial will mature February 1, 1902. Bonds are issued under the provisions of Section 36 of Title VII. of the City Charter passed May 11, 1895.

## STATE AND CITY DEBT CHANGES.

**Kansas Debt Statement.**—We give below a list of debt statements for minor civil divisions in the State of Kansas reporting an indebtedness of over \$10,000 (excepting only those appearing in detail in our STATE AND CITY SUPPLEMENT), corrected by means of official returns received since the publication of the October issue of our SUPPLEMENT.

Location.	Bonded Debt. \$	Rate of Interest. %	Date of Maturity.	Popu- lation. (1895.)

## CLEARING HOUSE RETURNS.

The following table, made up by telegraph, etc., indicates that the total bank clearings of all the clearing houses of the United States for the week ending to-day, April 1, have been \$1,900,361,465, against \$1,339,431,576 last week and \$1,271,001,973 the corresponding week of last year. The partial observance of Good Friday as a holiday has served to diminish somewhat this year's total.

CLEARING HOUSES. Returns by Telegraph.	Week Ending April 1.		
	1899.	1898.	Per Cent.
New York	\$1,193,991,913	\$807,056,302	+47.4
Boston	10,419,029	79,402,996	+36.6
Philadelphia	55,801,183	53,926,954	+3.8
Baltimore	14,870,398	13,301,633	+11.5
Chicago	100,739,031	80,332,133	+25.4
St. Louis	34,032,954	20,766,134	+15.7
New Orleans	6,432,937	6,416,228	+0.3
Seven cities, 5 days	\$1,508,714,699	\$982,002,309	+75.2
Other cities, 5 days	168,978,974	144,977,206	+16.6
Total all cities, 5 days	\$1,677,713,673	\$1,003,979,575	+66.8
All cities, 1 day	222,647,792	265,095,395	-16.9
Total all cities for week	\$1,900,361,465	\$1,271,004,973	+49.5

The full details of clearings for the week covered by the above statement will be given next Saturday. We cannot, of course, furnish them to-day, bank clearings being made up by the various clearing houses at noon on Saturday, and hence in the above the last twenty-four hours of the week are to be in all cases estimated, as we go to press Friday night.

We present below our usual detailed figures for the previous week, covering the returns for the period ending with Saturday noon, March 25, and the results for the corresponding week in 1898, 1897 and 1896 are also given. In comparison with the preceding week there is a decrease in the aggregate exchanges of thirty-seven and a-half million dollars, the gain at New York being one million. Contrasted with the week of 1898 the total for the whole country shows an increase of 74.8 per cent. Compared with the week of 1897 the current returns record a gain of 107.3 per cent, and the excess over 1896 is 110.5 per cent. Outside of New York the increase over 1898 is 34.4 per cent. The excess over 1897 reaches 55.5 per cent, and using comparison with 1896 the gain is seen to be 52.2 per cent.

Clearings at—	Week ending March 25.				
	1899.	1898.	P. Cent.	1897.	1896.

### THE FINANCIAL SITUATION.

Stock Exchange business this week has been chiefly distinguished by another excited speculative movement in a certain class of investment properties which were prominent in a similar way in January. When New York Central on March 15th had declined ex-dividend to 131 $\frac{1}{2}$  and on the same day Chicago & North Western had dropped to 146 $\frac{1}{2}$  and Union Pacific to 43 $\frac{1}{2}$ , a little more eager buying for those properties set in. But it was not until this week, Wednesday, that the incident culminated in sales of New York Central of 64,920 shares, with the highest price of the day 144 $\frac{1}{2}$ , Chicago & North Western sales 19,512 shares, highest price 166, and Union Pacific sales 25,746 shares with highest price 49 $\frac{1}{2}$ . This activity was not an exceptional affair, but in accord with the more confident and venturesome spirit that has recently prevailed. During previous weeks the change has been distinctly evident in the rise in other investment properties, especially in the anthracite coal stocks, and in more speculative classes, as for illustration American Sugar Refining, and the steady and sensational appreciation of Brooklyn Rapid Transit, which ever since the third of March, when for the last time it went below 90 (to 89 $\frac{1}{2}$ ) the stock has been steadily advancing, having touched 136 $\frac{1}{2}$  on Wednesday of this week.

But the event of chief interest has been the movement narrated above of the New York Central, the Chicago & North Western and the Union Pacific. It has special interest and significance because it is the second incident of the kind these properties have participated in this year. Another feature is a marked difference in the two occurrences; the earlier movement was engineered almost wholly on the report of a consolidation or some sort of intimate arrangement in prospect between these companies for a through route across the Continent, whereas that idea does not seem to have formed the basis of this week's advance. Our readers remember the former occurrence. It began about the 7th of January, on which day the lowest point New York Central sold at was 121 $\frac{1}{2}$ , while the highest it touched in the transactions which followed was 141 on January 23d; Chicago & North Western in that movement reached its highest, 152 $\frac{1}{2}$ , on the same day; whereas the highest on the same day of Union Pacific was 50. It will consequently be noticed that Wednesday of this week New York Central and Chicago & North West. sold several points higher than in January, whereas Union Pacific sold  $\frac{1}{2}$  of 1 per cent lower; besides that, it is a fact that Union Pacific has been since January still higher than it was in that month, or has been the current week, having touched 50 $\frac{3}{4}$  on February 21st, or  $\frac{1}{4}$  of 1 per cent above the point reached on Wednesday.

That fact is important because it tends to confirm the change in opinion since January respecting these properties. At the earlier date, as we have already said, the advance was interpreted as based upon a union of the three companies, whereas the movement of this week seems to indicate that any change in prospect relates solely to the New York Central and the Chicago & North Western. In that view the advance permits of a more reasonable interpretation than previously entertained. For it would not be an unnatural connection if some such arrange-

ment between these two companies should be carried out as that now existing between the New York Central and the Lake Shore. Or, if legal difficulties stood in the way of that consummation, it is among the possible, may we not say the expected, events that the New York Central dividend rate should be increased. With traffic rates stable, that road could easily earn 6 per cent on its present business. More than that, what is to become of the surplus the Lake Shore is sure to earn? A road that has built a second track its whole length out of earnings and carried forward other extensive improvements without a dollar's addition to its bonded debt, and now has lowered its fixed charges by funding its old bonds at a lower rate of interest, must have in reserve a surprising productive power, which general prosperity cannot fail to develop.

A gradually hardening and sensitive money market with an occasional higher spurt has been the record for the past month. The extreme rates have been due to special causes which we have from time to time recorded; but dearer money has no doubt become a permanency—a conclusion the reasons for which were stated in this column in our issue of the eleventh of March. We may say in brief that such a result is always inevitable, wherever an inflexible paper currency is in use, when business is increasing in activity and volume. We have, too, in the month just closed a development which is significant in its bearing on the future of money. Hitherto since trade revival began the money in circulation has been receiving fresh supplies every month from the Treasury, the Government revenue having been all the time very considerably short of the disbursements. In March, apparently, there has been an absolute reversal of this condition. The Treasury receipts of revenue are very greatly enlarged, both in the department of customs dues and of internal taxes, the receipts for the month (one day being estimated, the last day not being reported as we write) indicating that the net revenue for March will be a million dollars or more in excess of the disbursements. That means (leaving out of the account the payment on the Central Pacific agreement) that the Government has in March taken out of the channels of commerce a million dollars or more of currency instead of emitting eight or ten million dollars, the average for many months heretofore.

A feature of the situation which should not escape notice is that current returns of railroad gross earnings are again beginning to make very satisfactory comparisons. This is certainly not surprising, since trade is active and rates are well maintained, there being in fact no disturbance in the rate conditions anywhere except the trouble as to passenger rates between the Great Northern and its competitors. But the improved results shown attract attention nevertheless, because comparison is now with enlarged earnings in 1898 and because during all recent weeks, and in fact back to January, the showing had been generally quite indifferent, treating the roads as a whole. It was known that the bad weather had been a retarding influence, checking the movement of freight while increasing the cost of rendering the service; but very naturally there were many who were skeptical as to whether the unfavorable results could be entirely ascribed to that circumstance. It is now seen that to that fact alone

must be attributed the temporary change in the character of the returns. Of course many roads continued to report enlarged earnings, even while the conditions were strongly adverse. But in certain sections the returns were quite uniformly bad. This is particularly true of the Southwest. There we now see a complete transformation. Thus the Missouri Kansas & Texas, the St. Louis Southwestern and the Texas & Pacific all report substantial gains for the second and third weeks of March, after almost continuous decreases since the beginning of February. For the third week of March our compilation, covering 79 roads, records 7.28 per cent gain in the aggregate. This is the largest percentage of improvement shown in any weekly compilation since that for the fourth week of January, when the percentage of addition was 10.65 per cent. It contrasts with only 3.73 per cent increase for the second week of March, 1.79 per cent for the first week of March, 2.76 per cent for the fourth week of February, 0.50 per cent for the third week of that month, and with 11.28 per cent decrease for the second week of February. To complete the story and emphasize the favorable nature of the present results, it is only necessary to add that the gain of 7.28 per cent for the third week of March the present year is in addition to 16.46 per cent gain for the corresponding week last year.

The effects of the unusually bad weather experienced in February appear very clearly in the statements of gross and net earnings for that month received the present week. Very naturally Eastern roads, which suffered most from the blizzard that passed over the country, make the poorest exhibits. Such roads as the Pennsylvania, the Erie, the Chesapeake & Ohio, the Lehigh Valley, the Reading, Central of New Jersey, all show either losses in gross or additions to expenses; and generally both combined. The augmentation in expenses of course reflects the cost of removing snow and keeping the lines open. Northwestern roads, like the Milwaukee & St. Paul and the Burlington & Quincy, and particularly the former, have on the whole very satisfactory exhibits. The St. Paul, indeed, has only a very small loss in net, with a substantial gain in the gross. The situation in the Southwest is fairly well reflected by the return of the St. Louis & San Francisco, with its loss of \$49,478 in gross and of \$54,401 in net. The Atchison Topeka & Santa Fe, in much the same territory, has a strikingly good statement, and reports \$188,312 increase in net. But there the situation is exceptional. The improvement is the result of a reduction of \$284,962 in expenses, gross earnings having fallen off \$96,650. In January, too, it will be remembered, there had been a reduced operating percentage on this road. The result is in accordance with expectations. In the six months from July to December expenses on this system were heavily augmented, and it was then stated that many exceptional outlays were being included in the expense accounts, but that after the 1st of January there would be a corresponding saving. This saving is now being experienced. For the eight months of the fiscal year to February 28 the company is \$933,095 ahead in the gross earnings and \$712,533 ahead in the net earnings.

The Pennsylvania Railroad, as already stated, suffered a heavy reduction of its earnings. Nothing is needed to explain the loss, however, except the bad weather. The falling off in the gross earnings can hardly be considered large in view of all the circumstances, it amounting on the lines east of Pittsburg to \$260,700, but as this was accompanied by an addition to expenses of \$251,700, the decrease in the net exceeds half a million dollars—\$512,400. On the lines west of Pittsburg and Erie, where the weather was evidently much less of an influence, the showing is quite different, and instead of a decrease there is a small increase in both gross and net—\$71,600 in the former and \$54,900 in the latter. Last year the result for the combined Eastern and Western lines in February was \$680,300 increase in gross and \$106,400 increase in net. The following is a six-year comparison for the lines east of Pittsburg—the only part of the system for which such a comparison can be made.

LINE EAST OF PITTSBURG.	1899.	1898.	1897.	1896.	1895.	1894.
February.

We referred last week to a decision of the United States courts in a case involving the construction of the long-and-short-haul clause of the Inter-State Act. The decision was adverse to a contention which the Inter-State Commerce Commission sought to enforce. This week the Commission has itself made a ruling with reference to the application of the same clause in a case involving a slightly different state of facts. In this case the Commission had for its guidance a previous decision of the U. S. Supreme Court, and its ruling is made to conform with that decision. The complaint was with reference to the relative rates on export traffic and domestic traffic on grain from Chicago to Boston. The carriers make two rates on grain and sixth-class merchandise from Chicago to Boston. If the commodity is for local consumption the rate is two cents above the rate to New York; if it is intended for export the Boston rate is the same as the New York rate. This export rate, however, is essentially the inland carriers division of a through export tariff from Chicago to Europe. The Commission rules that as its decision in the Import Rate cases was overruled by the U. S. Supreme Court, it follows that carriers are not as a matter of law prohibited from making rates from points in the United States to points in foreign countries, or from points in foreign countries to points in the United States, on which the inland division, or share accruing to carriers within the United States, is less than the tariff rate of such carriers on domestic shipments of similar commodities. The Commission also points out that through tariffs showing total charges on export traffic from interior points in the United States to foreign destinations cannot, owing to the fluctuation in ocean rates, usually be determined and published in accordance with Section 6 of the Inter-State Act; and that if the inland carrier publishes and maintains its division of

the through export rate, it apparently does all it can do and all that is required under the law.

Money on call has been extremely active this week. Among the influences operating upon the market, in addition to the demand incident to the feverish advance in specialties on the stock market, were the payment of about \$4,000,000 of Chicago & Alton money and of more than \$1,800,000 for new Manhattan Elevated stock on Monday. This was followed later in the week by the payment, under the Baltimore & Ohio Southwestern reorganization plan, of about \$2,400,000, and by the disbursement of a like amount in settlement of other corporation requirements. The accumulation of money for these adjustments naturally helped to disturb the market, especially as toward the end of the week there was more or less of calls by the banks preparatory to the 1st of April settlements. It is not surprising, therefore, that money should have been forced to high rates, especially on the last business day of the week, when the borrowing was until Monday, the Stock Exchange closing for Good Friday. Money on call, representing bankers' balances, loaned on the Stock Exchange during the week at  $3\frac{1}{2}$  per cent and at 12 per cent, averaging about 6 per cent. The range for money on Monday and on Tuesday was from 4 per cent to 6 per cent, with the bulk of the business at  $4\frac{1}{2}$  per cent. On Wednesday the range was from  $3\frac{1}{2}$  per cent to 8 per cent, with the majority of the loans at  $5\frac{1}{2}$  to 6 per cent. On Thursday the range was from 5 per cent to 12 per cent, with the bulk of the business at 6 per cent, and the higher rate was recorded in the last hour, though at the close money was offered and loaned at 5 per cent; as noted above, the borrowing was until Monday. Banks and trust companies have supplied the greater part of the money at the Stock Exchange during the week and the minimum of loans over the counter was  $4\frac{1}{2}$  per cent until Thursday, when the rate was marked up to 6 per cent and some of the institutions obtained 8 per cent. Time contracts on good mixed Stock Exchange collateral are quoted at 4 per cent for sixty to ninety days and  $4\frac{1}{2}$  per cent for four to six months. Brokers making a specialty of loaning money on time quote loans on dividend-paying stocks  $3\frac{1}{2}$  to 4 per cent, on good mixed Stock Exchange collateral  $4\frac{1}{2}$  per cent and on industrial security  $5\frac{1}{2}$  to 6 per cent, according to the character of the collateral. All the above-named rates are for periods from three to six months. The offerings are liberal, while the demand is reported good. The supply of commercial paper is only moderate, merchants being inclined to withhold offerings until after the beginning of April. The demand is good and it is quite general, but rather more urgent from out-of-town than from city buyers. It is worthy of note that last week's bank statement was somewhat influenced by the report of the Astor National Bank, which made returns for the first time on Saturday, and showed \$3,464,000 loans, \$708,000 specie, \$375,000 legal tenders and \$4,000,000 deposits. The Comptroller of the Currency is reported to be seeking to arrange with the superintendents of banks in the leading States to make reports of their banks on the same date in October as reports are made by national banks. The superintendents of banks in New York, Pennsylvania and Illinois have made favorable responses to the Comptroller's request, and it is hoped that offic-

ials in other prominent States will do the same. The remarkable increase in the number of State banks throughout the country makes it more than ever desirable that statistics of State and national banks should, if possible, be procured for a uniform date at least once a year.

There has been no feature of importance in the European political situation this week, and the foreign financial markets toward the close of the week assumed a partial holiday character. The Bank of England minimum rate of discount remains unchanged at 3 per cent. The cable reports discounts of sixty to ninety day bank bills in London  $2\frac{3}{4}$  to  $2\frac{1}{2}$  per cent. The open market rate at Paris is  $2\frac{1}{4}$  per cent and at Berlin and Frankfort it is  $4\frac{1}{8}$  to  $4\frac{1}{4}$  per cent. According to our special cable from London, the Bank of England lost £1,669,000 bullion during the week and held £30,808,500 at the close of the week. Our correspondent further advises us that the loss was due to shipments of £1,597,000 net to the interior of Great Britain, to the export of £100,000 to Natal, and to imports of £28,000, of which £10,000 were bought in the open market, £10,000 imported from Holland and £7,000 from Australia.

There has been a remarkable advance in the foreign exchange market, and chiefly for sterling, this week, posted rates moving upward one cent and a-half for sixty day and one cent for sight, while rates for actual business rose one cent and a-quarter for long and for short and one cent and a-half for cables, compared with the close on Friday of last week. The strength of the market is the more remarkable because of the fact that concurrently there was activity in money, which ordinarily would have caused a decline in exchange, but it was not until Thursday that the tone seemed to be influenced by the higher money rates, and even then there was a reaction of only one-quarter of a cent. One of the important influences operating on the market has been the apparent conviction that preparations were making for the remittance of the \$20,000,000 gold to be paid to Spain in accordance with the terms of the Treaty of Paris. It was admitted by bankers that they had no knowledge of any buying of exchange which could be traced to houses who would be likely to make the remittance, but still there seemed to be a feeling that the transfer of the money in the form of sterling was really impending, though there had been no formal exchange of ratifications of the treaty as a necessary step preliminary to the payment of the money by this Government. The fact that two at least of the large banks of this city, having exchange departments, were not sellers of sterling gave color to a report that one of these banks would probably supply part of the exchange for this remittance, and therefore that it was accumulating sterling for this purpose. There seemed to be an entire absence of fact in support of the rumors which were circulated connecting the movement in the market with the remittance of the \$20,000,000, but nevertheless this was believed to be the controlling influence. Another important factor was reported to be a demand for sterling to remit for American securities sold for European account. Though there was no recent evidence in the arbitrage operations of such selling, it was regarded as possible that the sales might have been made directly through large banking houses,

who were now remitting. The change from the almost stagnant market of last week to the abnormal activity and strength this week was so marked that any explanation which seemed reasonable was accepted as correct. The market was insufficiently supplied with bills, not only bankers' but commercial drafts being scarce, and therefore any unusual inquiry from whatever cause would result in an advance more or less sharp, according to the urgency of the demand. The imports of gold for the week were \$218,037, of which \$193,000 was from Europe.

Nominal rates for exchange ranged from 4 84 to 4 85 for sixty day and from 4 86½ to 4 87 for sight on Monday. Then followed an advance more or less sharp until Thursday, when the range was from 4 85 to 4 85½ for sixty day, and from 4 87 to 4 87½ for sight. Rates for actual business opened on Monday at an advance, compared with those at the close on Friday, of one-half a cent for long and for cables, and of one-quarter of a cent for short, to 4 83½@4 84 for long, 4 85½@4 86 for short and 4 86½@4 86½ for cables. The market was quite strong, and it so continued on the following day, when there was an advance in rates for actual business of one-quarter of a cent for long to 4 84@4 84½, of half a cent for short to 4 86½@4 86½, and of one-quarter of a cent for cables to 4 86½@4 87. The market was even stronger on Wednesday and there appeared to be an urgent demand, which resulted in an advance in rates for actual business of half a cent in long and short to 4 84½@4 84½ for the former and to 4 85½@4 87 for the latter, while cables moved upward three-quarters of a cent to 4 87½@4 87½, and the market closed very strong with some excitement. On Thursday the tone was quieter, and then the market seemed to be affected, for the first time during the week, by the activity in money, and it was also influenced by a natural tendency to react after the rapid advance. Rates fell off one-quarter of a cent all around to 4 84½@4 84½ for long, 4 86½@4 86½ for short and 4 87½@4 87½ for cables. On Friday the market was steady. The following shows daily posted rates for exchange by some of the leading drawers.

The market closed steady on Friday with rates for actual business 4 84½@4 84½ for long, 4 86½@4 86½ for short and 4 87½@4 87½ for cables. Commercial on banks 4 83½@4 84 and documents for payment 4 83½@4 84½. Cotton for payment 4 83@4 83½, cotton for acceptance 4 83½@4 84 and grain for payment 4 83½@4 84.

The following statement gives the week's movement of money to and from the interior by New York banks.

Week Ending Mar. 31, 1899.	Received by N. Y. Banks.	Shipped by N. Y. Banks.	Net Interior Movement.
Currency.....	\$4,184,000	\$5,232,000	Loss \$1,070,000
Gold.....	828,000	980,000	Loss 97,000
Total gold and legal tenders.....	\$5,054,000	\$6,212,000	Loss \$1,157,000

With the Sub-Treasury operations the result is as follows.

Week Ending Mar. 31, 1899.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.
Banks' interior movement, as above.....	\$5,054,000	\$6,212,000	Loss \$1,157,000
Sub-Treasury operations.....	21,600,000	24,900,000	Loss 3,300,000
Total gold and legal tenders.....	\$25,654,000	\$31,112,000	Loss \$5,457,000

The following table indicates the amount of bullion in the principal European banks.

Bank of	Mar. 30, 1899.			Mar. 31, 1898.

### CHINA AND THE EUROPEAN POWERS.

The comment rather generally made by the English press on the latest developments along the coast of China is, that if serious trouble is to be avoided, the control of China must very soon be portioned out to the States of Europe, much as Africa was distributed four years ago. The recent move of Italy to obtain a footing on the Chinese coast similar to that already occupied by Germany, England, Russia and Japan, has drawn attention to the fact that, except for the gulf at the head of which lies the capital of the Chinese Empire, the entire coast-line of that moribund State has passed under the control of European governments. Some of these foreign coast possessions are held through absolute cession, as in the case of Great Britain's occupancy of Hong Kong since 1841, or Formosa, acquired by Japan in the war of 1895. Others—notably the more recent Russian acquisitions on the northern coast—are held under what, by a diplomatic fiction, is called a "lease." But whatever the form or legal nature of the title, the control has in every case passed permanently out of the unresisting hands of the Chinese Empire. The new fact with which the world is confronted, as a result of the so-called "colonial movement" of the European Powers during the last few years, is a Mongol empire virtually shut off from the sea, with its access to other markets controlled by a group of foreign Powers.

If this were all of the problem, it would be curious and novel enough. The question of free access to these Oriental ports is involved in the mere occupation of the coast by rival European governments. But, as in most problems of the kind, the resultant complications did not stop with the most obvious consequences. At the very moment when the question of exclusive or common rights to the trade of the appropriated ports was under vigorous discussion, disputes arose as to the privileges of the several European nations in the interior of China. English financiers, not waiting for the settlement of title to the Chinese coast line, had been at work obtaining "concessions" for the construction of railways in the interior with English capital. One of these "concessions" affected the Chinese province of Manchuria, lying between Russia's possessions of Eastern Siberia and Russia's possessions of Chinese territory in Port Arthur. Objection was vigorously made by the Russian Government. Our readers will recall the

changing phases of the controversy—the cry that the English Government had been outwitted in the Far East, the threats of war, the mysterious palace conspiracy at Peking, and so on. At length, so far as can be gathered from the despatches, England has consented to recede from any claim to an exclusive right to railway control in Manchuria, and Russia has agreed, with this stipulation, to withdraw its objections to the existing English projects.

Thus far the situation is simplified, and makes for peace. But it will be observed that this very settlement is a more than tacit recognition of what in Africa the English call the “sphere of influence” and the Germans the “hinterland.” In other words, the principle over which France and England nearly came to blows in Africa a year ago—that the imperial title distinctly recognized in a coast province involves a general claim to the land stretching inward as far as the ascertained boundaries of another Power’s territory—is having its first formal recognition in Eastern Asia. The appeal of the English press for an international conference which will “delimit” these various Asiatic spheres of influence is a natural result.

But it will at once be recognized that the question of the hinterland is very different in China from what it has been in Africa. The right to seize and appropriate unsettled land, or land occupied only by savage tribes, has in one form or another been recognized and exercised during several centuries. In this regard, therefore, the African acquisitions, even in their relations with such diplomatic conceptions as the “Kingdom of Sokoto,” were simple matters. But in the case of China, the outside Powers have to deal with an organized government, civilized if not modernized—with a government, moreover, standing in formal diplomatic relations with each one of them and holding assurances of their friendly purposes. This different situation has been recognized by the carefully maintained fiction of a “lease” of coast land in the case of Germany and Russia, something about which none of the colonizing Powers troubled themselves in Africa. How, then, is this position to be maintained in an advance on the interior of China? The answer to this question undoubtedly involves a good deal of future history.

There are two historical precedents, apart from the methods pursued in the partition of savage Africa, which have undoubtedly been present in the minds of the Powers now occupying the coast of China. One is the English conquest of India a century and a-half ago, the method then pursued by the conquering government being the pensioning of the native rulers from the British exchequer, the recognition of their hereditary titles but not of their sovereignty, and the administration of the territory in the interests of English trade. The other precedent, of more recent occurrence, is the establishment of a British protectorate over Egypt, with the sovereignty of the Khedive technically allowed, but the financial, the judicial and, for the most part, the diplomatic management of the State retained in foreign hands.

It is conceivable that one or the other of these two methods might, under certain circumstances, be applied to China; for it is now pretty universally recognized that the vast inert mass of population and bureaucracy in native China is incapable of serious resistance unless in the remote chance of a division of belligerent European Powers for and against the in-

dependence of China. But in some important respects the situation in Asia is unlike either of the two historical precedents cited. The conquest of India meant the subjugation of a score or more of native States, each of which might be dealt with separately, and any of which might in certain contingencies be turned against the other. The Chinese Empire, decayed and tottering as the structure is, nevertheless remains a single Power which must be dealt with singly. On the other hand, the Egyptian protectorate is exercised by a single foreign Power, the joint foreign control over the Government’s finances being now little more than an antiquated and purely formal expedient. But in the case of European control in the interior of China, at least five rival States would be contending for a voice in the new administration. The very possible dangers of such a situation were forcibly illustrated a few months ago by the collision of English and Russian diplomacy at Peking—an episode which instantly started both London and St. Petersburg into talk of war. It is, of course, with this in mind that the diplomatists are now prudently using the old phrase “spheres of influence.” But a diplomatic euphemism does not by any means remove the cause of material friction, and it has sometimes seemed to us that except for Russia—whose purpose of acquiring a navigable ocean outlet for Siberia is plain enough—all of the rival Powers are doing little more than grope their way, with the one resolve of securing what financiers would call an “option” in whatever the final distribution of territory and privileges may be.

Perhaps the most striking part of this whole so-called “colonial movement” of the present time is the fact that no one has yet demonstrated that from a trade standpoint the gain will equal the cost. Certainly none of the recent colonial experiments on the Chinese coast—the French administration of Tonquin, for instance—have paid for themselves, even through increased trade. This problem, however, so far as China is concerned, is a matter of legitimate experiment—more feasible than the similar experiments in Africa, since China’s four hundred million population is at all events civilized, with some of the needs of European consumers and the possibility of developing others.

But even in this regard it is not easy to discover how far the “colonizing” movement is a genuine industrial venture and how far a mere episode of international politics. The “Cape to Cairo” railway scheme of Mr. Cecil Rhodes, for instance, which has been again brought forcibly into public notice by the recent personal conference and rumored agreement between its projector and the German Emperor, is admitted by most experienced railway men to be wholly impracticable from the profit-earning point of view. It runs through hundreds upon hundreds of miles of jungle, inhabited by savage tribes and its freight, except for relatively short stretches south of Cairo and northward from Cape Colony, can be only expensive through traffic. Yet the projectors hardly try to insist upon the argument of profit; they base their reasoning almost wholly upon the political functions of such an enterprise. On this basis, the argument for the railway through Africa appeals for Government subvention in the same way and on much the same specific grounds as the advocates of the Nica-

ragua Canal have used in Congress. It must be confessed, however, that if trans continental railways are to be added to the forts and fleets and armies as an item of public disbursement on the diplomatic expense account, the future budgets of European governments will provide some curious spectacles.

### THE RAILROAD DEVELOPMENTS IN TEXAS.

An interesting and somewhat curious situation has developed in the State of Texas. For some time past Governor Joseph D. Sayers, from whom so much was expected in the way of an enlightened administration, has busied himself sending in to the Legislature vetoes of bills passed by that body. The vetoes have nearly all been of measures providing for railroad consolidations. We do not mean consolidations of large magnitude, but simply bills giving legislative permission in certain specific cases for the absorption of branch roads by the parent company. We say branch roads, because the roads in question are all small pieces of line, and can be dignified by no other name. Thus the Sherman Shreveport & Southern, which the Missouri Kansas & Texas was to have the right to acquire, is only 155 miles long; the Tyler Southeastern Railway, which the St. Louis Southwestern was to be allowed to take, but 89 miles; and the Austin & Northwestern, which with some other roads was to be combined with the Houston & Texas Central, only 107 miles, etc., etc.

The lines mentioned are all controlled in the interest of the roads with which it was proposed to consolidate them, and the object of amalgamation in each instance was to allow of a simplification of administration and to dispense with a double set of officials. The loss will therefore, in any event, be that of the people of the State—that is, those who use the roads; for the ultimate cost of maintaining the lines must fall upon them. This is so even in Texas, where the rights of the carrying interest have been peculiarly disregarded in the past, since though rates are fixed by the State Railroad Commission, in the event of consolidation there would be a single set of freight rates instead of, as at present, a double, and hence higher set, covering two lines.

But the interesting, the striking, feature in this instance is that in his action the Governor has set by the ears both the Railroad Commission and a large section of the legislators. This is something quite uncommon. Hitherto sentiment has appeared to be almost unanimous in opposition to railroad interests and against everything else, in fact, wearing the corporate form, so much so that little heed has been given to appeals on behalf of these properties. It is therefore a wholesome development to find a division of sentiment at last. The majority of the Railroad Commission, and Judge Reagan in particular, declares in the most outspoken way against the course of the Governor. As for the legislators, the feeling in the Senate is shown by the action of the Committee on Internal Improvements, to which the veto measures had been referred, in recommending that two of the bills (being all that had been acted on, according to the latest reports,) become a law despite the opposition of the Governor.

Governor Sayers is everywhere admitted to be honest and sincere in his purpose and intentions. In this case however he has evidently been carried away by

the old craze against the railroads, which appears to have taken possession of his mind at a time when it is waning elsewhere. To be sure, in the case of the Sherman Shreveport & Southern consolidation, in which the Governor's position from an argumentative standpoint seems stronger than in any of the others, he contends that the bill violates the Constitutional inhibition against the consolidation of parallel or competing lines, and furthermore that the Courts have once already decided as to this road that it could not be combined with the Kansas & Texas. But Judge Reagan and the Senate Committee show very clearly that the Governor is in error in both these contentions. The Committee in their report take up the Governor's arguments seriatim, and overthrow them all. They point out, moreover, that the bill does not stifle, but will create competition. What is now a weak and local highway, they say, will become part of a great system in competition with the other great systems of railway and give an important section of the State direct connection with the markets of the United States.

By no stretch of the imagination can either the Sherman Shreveport & Southern or the Tyler Southeastern be regarded as "parallel" to the road with which it was proposed to unite, and it would be a violent assumption which would make them "competing." In arguing the case Judge Reagan asks the question: "What are parallel and competing lines within the meaning of the Constitution and laws?" Plain common sense, he declares, would say it would be two railways beginning at places near each other and ending near some other common point and running substantially parallel with each other. But the Missouri Kansas & Texas and the Sherman Shreveport & Southern run at right angles with each other and lack thirty miles of a connection. A branch of the Kansas & Texas, to be sure, crosses the Sherman Shreveport & Southern, but Commissioner Reagan well says that these two lines of railway accommodate the commerce and afford transportation for distinctly different parts of the people of the State, and they do not begin or end at the same points, or run in the same direction, and are in no sense competing lines. With reference to the Tyler Southeastern, this road is so insignificant that the Austin correspondent of the "Galveston News" says it has been called "the blackberry feeder" of the St. Louis Southwestern; it has its terminals at Tyler, and does not compete with anything, and is perhaps as inoffensive, he says, as any road in the State. Judge Reagan plainly shows that in this case, too, there can be no pretense that the two roads are either parallel or competing—that the Tyler Southeastern runs nearly at right angles with the St. Louis Southwestern.

We have space only for reference to one other of the railroad bills which have met with Executive disapproval. We refer to the bill for the consolidation of the Gulf Beaumont & Great Northern and the Gulf Beaumont & Kansas City. This is perhaps the most striking veto of the whole lot, and here the harm to the State seems likely to prove direct and tangible. The facts of the case and the reasons calling for consolidation are set out in an interview with Mr. John H. Kirby, the President of the first-named road and the Vice-President of the other. The story is an interesting one. Concerning this veto it is proper to say the Railroad Commission and the Governor are of one

mind, and indeed it is significant of the Governor's general and indiscriminate attitude of hostility towards the idea of railroad amalgamation that in this instance he is able to adduce no reasons of his own for withholding his approval, but simply refers to the objections of the Railroad Commissioners. These objections appear to the outsider to be very trivial and mainly technical, relating merely to certain words with reference to the regulation of the reports of the company and the issue of bonds. President Kirby declares that he acted only after consultation with the Chairman of the Commission, and in view of that fact the opposition of the Board now would be inexplicable, except that it becomes very evident as one reads their letter that their objections are based mainly on the idea that, as far as this particular road is concerned, the Commission might, through the bill, be shorn of some of its powers—a thing very naturally which they do not want to have happen. However, the damage to the interests of the State is none the less real because opposition rests on untenable ground and the error is shared in by the Commission as well as the Governor.

We say "damage" to the interests of the State because President Kirby's words plainly imply that the scheme for building additional mileage may have to be abandoned if the vetoed bill or some other similar measure is not allowed to become a law. He says that when the Gulf Beaumont & Kansas City was organized, provision was made for the issuance of bonds on but 75 miles of road, carrying the line only as far as Newtonville, from Beaumont. Any bonds issued on the line north of Newtonville would therefore be second mortgage bonds and unsalable. To get around this difficulty, Mr. Kirby says, he conferred with Judge Reagan, who suggested that a new corporation be organized, and that when the Legislature convened the two be consolidated. Acting on this suggestion he took out the second charter at considerable expense, and also expended a large sum of money in making surveys and permanent locations from Newtonville northward, all of which outlay, he declares, he bore personally and individually. When the Legislature convened he applied for an act of consolidation, and the bill passed the House without a dissenting vote and there was but one opposing vote in the Senate.

The rest of the story may be told in Mr. Kirby's own words: "All I sought at the hands of the Legislature was authority to build this road coupled with the privilege, under the orders, guidance and action of the Railroad Commission, of issuing sufficient securities to provide the means to pay construction bills. The refusal of the Governor to permit the bill to become a law is a serious disappointment to me and will be a more serious one to the counties through which the road was to be built and which stand greatly in need of transportation facilities. I have labored in this effort for six years, practically without compensation, and had made my financial arrangements for pressing forward with the work as soon as the bill became a law. This veto destroys all prospects, as without some such measure as the one proposed it is impossible to get outside help to build the line, and neither I nor the people whom the road will serve have the money with which to build it."

As already stated, the developments here noted are not without some encouraging features. The most

important fact is that sentiment on this occasion is not wholly against the roads; that for the first time in a long while at least a portion of the public is arrayed on the side with the roads. Perhaps it is too much to expect that the bills can pass the Lower House over the Governor's veto. We observe that political meetings are being held to endorse the action of the Governor, but we also note some meetings where his course has been disapproved. The action of the Senate Committee on Internal Improvements in recommending that the bills as to Sherman Shreveport & Southern and the Tyler Southeastern be passed notwithstanding the veto, is at least significant. No less significant is the outspoken way in which Chairman Reagan has declared himself in opposition to the vetoes. He expresses the belief that the Governor has made a mistake which, if adhered to, "will be most hurtful to the honor and interests of our beloved State." Moreover, he declares, "it will be impossible even for great names, exalted position and the highest character to sanctify such a violation of principles and such a wrong to the best interests of Texas."

Perhaps after all, therefore, good will come out of the present experience. One beneficial effect we see is already evident: the public is thinking for itself, and it may be that hereafter instead of being guided wholly by those who, for their own purposes, are seeking to keep alive prejudices against the roads, it will look carefully into the merits of each proposition, and be its own judge as to what is best for the people's interests. We have unbounded faith in the fair-mindedness and intelligence of the Texas people, and in the event mentioned there would, we are sure, be a speedy awakening to the folly of the course which the politicians, professing to serve the public, have been pursuing for so long.

#### GROWTH OF MEXICAN ROADS.

There has been a sudden revival of speculation the present week on the Stock Exchange in the shares of several of the Mexican roads, and this gives special interest to the annual reports of two of the companies, which we print nearly in full on subsequent pages. It has been suggested recently that as a result of the combination of the leading smelting interests of the United States, under the name of the American Smelting & Refining Company, a material advance in the price of silver might be looked for. Such an advance would certainly mean a great deal to the Mexican roads, who lose such a large part of their revenues each year in converting depreciated silver into gold. As a matter of fact, however, there has been no recovery in the price of the metal, which was quoted yesterday at 27 7-16d. per ounce in London, against 27½d. March 1 and 27¼d. at the beginning of the year.

The renewed interest, therefore, shown in the Mexican stocks must be due to a recognition or appreciation of the fact that the Mexican roads have been steadily adding to their traffic and gross receipts, thus sharing in the growth and development of the Mexican country. Under the wise rule of Gen. Diaz, Mexico has been enjoying great prosperity. The extension and development of her railroad mileage has of course been an important element in this growing activity. At the same time the roads, while contributing very largely to the country's material advancement,

have themselves experienced the largest benefits from the prosperity which they have done so much to promote. Few persons realize what a steady and large growth the Mexican roads have had. We know of no better way of illustrating the expansion in progress than by means of the revenue returns of the two roads whose annual reports we publish to-day. Hence we give herewith the following table, in which we go back just ten years. The amounts are all stated in Mexican currency.

Year—	—Mexican International—		—Mexican National—	
	Average Kilometers.	Gross Earnings.	Gross Earnings.	Net Earnings.
1898.....	1,060	\$3,497,074	\$6,330,919	\$2,991,789
1897.....	1,060	3,034,128	6,090,663	2,986,237
1896.....	1,011	2,900,925	5,299,025	2,525,957
1895.....	947	2,664,126	4,513,206	2,071,408
1894.....	922	2,189,121	4,320,078	1,801,962
1893.....	922	2,050,934	4,224,804	1,638,437
1892.....	746	2,095,726	4,756,029	1,700,113
1891.....	658	1,197,856	4,206,422	1,159,021
1890.....	637	1,126,366	3,754,966	827,004
1889.....	636	911,698	3,660,124	666,892

Here we thus have a record of growth and expansion which is akin to that experienced by our own roads at home. The only break in the upward movement, it will be observed, occurred in 1893, when the panic and depression, from which the United States suffered so much, developed. The recovery, however, began the very next year, and since then a new high total has been established each year. In 1898 the Mexican International, on top of almost continuous increases in the years preceding, made a further addition of \$462,947, or 15.25 per cent, to its gross receipts, bringing the aggregate up to \$3,497,074. Nine years before, in 1889, the gross receipts of this same road were only \$911,698. The growth on this road is the more noteworthy as the International has been built without any aid or subvention whatever from the Mexican Government. It owes its success and advancement entirely to the faith, enterprise and energy of Mr. C. P. Huntington. Of course present earnings are on a larger mileage, but lest undue importance should be attached to this fact, we have in the foregoing added a column to show the change in average mileage each year. By applying these figures to the totals of gross receipts, it will be discovered that even on a mileage basis there has been a wonderful growth, the average gross per kilometer standing for 1898 \$3,299, against only \$1,433 per kilometer in 1889. In 1898 the average mileage operated was precisely the same as in 1897, namely 1,060 miles, the Monterrey extension, from which such good results are expected, having been opened on December 25 1898—too late to count in the year's results. We notice that in an interview at New Orleans Mr. Huntington is quoted as saying that if surveys are satisfactory, the International will also be extended from Durango to the Pacific.

The Mexican National of course is a much larger system (comprising 1,219 miles or about 1,950 kilometres), but under President Raoul's wise management there has been equal progress. The further increase in 1898 in this case has not been so striking, being only \$250,256, but it should be remembered that in comparing with 1897 we are comparing with a year when on account of the failure of the corn crop in Mexico there were large importations of corn into that country, the revenue from which to the Mexican National amounted to \$329,413. In 1898 all this was lost, no corn being imported. The gain in total gross receipts of \$250,256 is in face of this large loss on that single item of traffic. It will further be noted that

the total of the gross receipts, at \$6,330,919 for 1898, compares with only \$3,660,124 for 1889. In the same interval the total of the net has risen from \$666,692 to \$2,991,789—without any increase in mileage.

The chief difficulty in the management of the Mexican roads has been in the constant depreciation of the Mexican silver dollar. Traffic and revenues have been growing fast enough, we see, but the shrinkage in the value of silver has come in to nullify the increase in revenue through the steadily growing loss sustained in converting revenues into gold. Even in the late year there was a further shrinkage, Mr. Huntington's Mexican International having realized an average of only 45.58 cents for its silver dollars, against 47.80 cents in 1897. Only few understand what this depreciation means as compared with what the situation would be if silver had its old value and ruled on a parity with gold, a situation which seemed in prospect for a brief period during the silver speculation of 1890.

It is difficult to state in exact figures what the loss is per annum from the depreciation in silver, because besides the loss in converting net earnings there is a further loss by reason of the increase in expenses occasioned through the higher price that has to be paid for needed materials that have to be bought outside of Mexico. The Mexican National, as a matter of convenience in book-keeping, has been taking the dollar at the uniform value of 80 cents, all depreciation in excess of 20 per cent being charged as a separate item against income. This excess depreciation alone amounted in the late year to \$1,474,999 in Mexican currency. Could this have been saved, the company could have paid the full 6 per cent interest on the \$24,530,000 of second mortgage Class "A" and Class "B" incomes, and the same amount on the \$7,040,000 of third mortgage incomes. At present neither the Class "B" nor the third mortgage bonds receive anything.

Considering the growing magnitude of this shrinkage in the Mexican standard of values, the Mexican roads have all been doing surprisingly well. The Mexican National, besides meeting its obligatory interest, has found it possible to pay 3½ per cent on the 2d mortgage class "A" bonds. The Mexican International re-arranged its funded debt in 1897, and thereby effected a material reduction in its fixed charges. Having also during 1898 considerably enlarged its net income, it is able for that year to make a very handsome showing. With net in American money of \$652,051 it had fixed charges of only \$488,375 to meet, leaving a surplus of \$163,675, against only \$38,288 in the calendar year 1897.

#### COTTON CONSUMPTION AND OVERLAND MOVEMENT TO APRIL 1.

With more favorable weather conditions, the marketing of cotton has been on a more liberal scale during March than in the preceding month, but the movement has not been so free as in March of 1898. There has come into sight during the month 632,563 bales, against 667,177 bales in March of 1898 and 378,297 bales in 1897. The aggregate amount of the crop of 1898-99 now visible is 9,953,611 bales, against 10,107,381 bales on April 1, 1898. Spinners' takings have been of lesser volume during the month than in 1898, and their aggregate takings for the seven months fall behind those for the same period of last year.

44,796 bales; contrasted with 1896-97, however, there is a large excess.

#### OVERLAND MOVEMENT TO APRIL 1.

The gross movement overland in March has been 151,713 bales, which compares with 162,680 bales last year and 86,569 bales in 1897. The excess over a year ago in the total for the season to date now reaches 152,322 bales, and contrasted with 1896-97 the increase is 605,777 bales. The net for the month has reached 84,304 bales, or a loss from 1898 of 23,251 bales, the total then being 107,555 bales. In 1897 the net reached 62,277 bales. The aggregate for the seven months records an increase over last year of 70,078 bales and the gain compared with two years ago is 385,243 bales.

#### OVERLAND FROM SEPT. 1 TO MARCH 31.

	1898-99.	1897-98.	1896-97.
<b>Amount shipped—</b>

Virginia ports, inland and local mills.	14,917	9,536	6,361
<b>Total to be deducted.....</b>	<b>543,153</b>	<b>460,899</b>	<b>322,619</b>
<b>Leaving total net overland*</b>	<b>1,151,420</b>	<b>1,081,342</b>	<b>766,177</b>

\* This total includes shipments to Canada by rail, which since September 1, 1898-99, amounted to 88,107 bales, in 1897-98, were 103,104 bales and in 1896-97 were 59,611 bales.

#### RECEIPTS, EXPORTS AND SPINNERS' TAKINGS.

In common with the overland movement, the net receipts of cotton at the outports have been less than in the month of 1898, only that the diminution here is much greater. The total for March 1899 has been but 426,430 bales, whereas in March last year it was 567,622 bales and in 1887 335,022 bales. The aggregate for the seven months is 340,677 bales less than that of last year, and 1,353,235 bales in excess of 1896-97. The exports to foreign ports have been much less free than in March of any of the past eleven years, only excepting 1892-93 and 1893-94, the shipments for the month this year being but 367,461 bales, against 812,234 bales in 1898 and 432,968 bales in 1897. For the season to date the total exports are 17,294 bales more than in 1897-98 and exhibit a gain of 1,129,525 bales over 1896-97.

Movement from Sept. 1, 1898, to Mar. 31, 1899.	Receipts since Sept. 1, 1898.	Receipts since Sept. 1, 1897.	EXPORTS SINCE SEPT. 1, 1898 TO—				Stock, Mar. 31.

\* Great Britain's exports include the following:

\* Great Britain exports include to the Channel.

Using the facts disclosed by the foregoing statements, we shall find that the portion of the crop which has reached a market through the outports and overland, and the Southern consumption, since September 1 this year and the two previous years, is as follows:

	1898-99.	1897-98.	1896-97.
Receipts at the ports to April 1....bales.	7,652,392	7,993,039	6,299,127
Net shipments overland during same time	1,151,420	1,081,342	766,177
<b>Total receipts.....bales.</b>	<b>8,803,782</b>	<b>9,074,381</b>	<b>7,065,304</b>
Southern consumption since September 1	790,000	675,000	613,000
<b>Total to April 1.....bales.</b>	<b>9,593,782</b>	<b>9,749,381</b>	<b>7,678,304</b>

The amount of cotton marketed since September 1 in 1898-99 is thus seen to be 155,599 bales less than in 1897-98 and 1,915,478 bales more than for 1896-97. To determine the portion which has gone into the hands of Northern spinners during the same period we have prepared the following:

<b>Total receipts to Mar. 31, 1899, as above.....bales.</b>	<b>9,593,782</b>
<b>Stock on hand commencement of year (Sept. 1 1898) —</b>	
At Northern ports.....	61,054
At Southern ports.....	114,952
At Northern interior markets.....	10,266
<b>Total supply to Mar. 31, 1899.....</b>	<b>9,730,054</b>
<b>Of this supply there has been exported</b>	
to foreign ports since Sept. 1, 1898.....	6,243,205
Less foreign cotton included.....bales.	52,717
Sent to Canada direct from West.....	88,107
Burnt North and South.....	714
<b>Stock on hand end of month (Mar. 31, 1899) —</b>	
At Northern ports.....	203,161
At Southern ports.....	608,066
At Northern interior markets.....	12,207
<b>Total takings by spinners since Sept. 1, 1898.....</b>	<b>2,677,251</b>
Taken by Southern spinners.....	790,000
Taken by Northern spinners since September 1, 1898.....	1,887,251
Taken by Northern spinners same time in 1897-98.....	1,932,047
<b>Decrease in takings by Northern spinners this year.....bales.</b>	<b>44,796</b>

The above indicates that Northern spinners had up to Mar. 31 taken 1,887,251 bales, a decrease from the corresponding period of 1897-98 of 44,796 bales and an excess over the same time of 1896-97 of 470,153 bales.

#### AMOUNT OF CROP NOW IN SIGHT.

In the foregoing we have the number of bales which has already been marketed this year and the two previous seasons. An additional fact of interest is the total of the crop which was in sight on April 1 compared with previous years. We reach that point by adding to the above the stock remaining at that date at the interior towns less stock held by them at the beginning of the season. In this manner we find the result for three years on April 1 to be as follows:

	1898-99.	1897-98.	1896-97.
<b>Total marketed, as above.....bales.</b>	<b>9,593,782</b>	<b>9,749,381</b>	<b>7,678,304</b>
Interior stocks in excess of Sept. 1.	339,829	358,000	143,000
<b>Total in sight.....bales.</b>	<b>9,933,611</b>	<b>10,107,381</b>	<b>7,821,304</b>

This indicates that the movement up to April 1 of the present year is 153,770 bales less than in 1897-98 and 2,132,307 bales greater than in 1896-97.

As it will interest the reader to see what has come into sight each month of the season during this and previous years, we have prepared the following, which shows the movement for the last four seasons.

Months.	1898-99.	1897-98.	1896-97.	1895-96.
September.....	982,766	1,069,800	1,222,287	542,394
October.....	2,293,808	1,871,654	1,891,562	1,722,122
November.....	2,353,009	2,337,112	1,634,210	1,321,097
December.....	2,089,594	1,950,210	1,549,705	1,338,080

March.....	632,563	687,177	378,297	357,525
<b>Total 7 months.</b>	<b>9,953,611</b>	<b>10,107,381</b>	<b>7,821,304</b>	<b>6,880,567</b>
<b>Balance season.....</b>	<b>1,073,579</b>	<b>892,767</b>	<b>892,767</b>	<b>781,908</b>
<b>Total crop.....</b>	<b>11,027,190</b>	<b>11,000,148</b>	<b>8,714,071</b>	<b>7,662,475</b>

## WEIGHT OF BALES.

To furnish a more exact measure of the receipts up to Mar. 31 we give below our usual table of the weight of bales. We give for comparison the figures for the same time in the two previous years.

	Seven Months End Mar. 31, 1899.			Same period in 1897-98.	Same period in 1896-97.
	Number of Bales.	Weight in Pounds.	Average Weight.	Average Weight.	Average Weight.
Texas .....	2,260,660	1,206,740,308	533.80	529.93	528.44
Louisiana .....	1,951,841	1,018,041,229	521.58	510.25	508.22
Alabama .....	237,690	124,074,190	522.09	511.00	504.00
Georgia .....	1,465,122	731,157,983	501.09	495.59	487.05
South Carolina .....	377,303	186,804,201	495.10	491.08	485.00
Virginia .....	620,441	303,004,771	488.37	490.43	481.05
North Carolina .....	291,156	145,444,068	499.54	500.60	489.22
Tennessee, &c. ....	2,389,566	1,191,783,000	500.00	500.00	498.40
Total .....	9,593,782	4,913,049,740	512.11	507.08	502.73

\*Including Florida

It will be noticed that the movement up to March 31 shows an increase in the average weight as compared with the same period of last year, the average this year being 512.11 lbs. per bale, against 507.08 lbs. per bale for the same time in 1897-98 and 502.73 lbs. in 1896-97.

## DRY GOODS TRADE IN MARCH.

The early part of the month showed a good demand for the general run of cotton goods, but during the latter half business in the primary market fell away considerably. The aggregate, however, makes a very favorable comparison with the corresponding month last year. At the close stocks of all descriptions are in excellent condition. In no quarter are supplies of any moment reported; in a number of directions the market is bare and oversold. Brown cottons and print cloths show no material change in price, but in bleached cottons, coarse colored goods and prints prices are frequently  $\frac{1}{4}$  to  $\frac{1}{2}$  c. higher on the month.

MARCH	1899.					1898				
	Ool'n low mid-ling	Print-ing cloth, 64x64	Sheet-ings, stand-ard.	Lan-caster ging-hams.	5th's 3-yd. sheet-ings.	Ool'n low mid-ling	Print-ing cloth, 64x64	Sheet-ings, stand-ard.	Lan-caster ging-hams.	5th's 3-yd. sheet-ings.

On the above prices are—For cotton, low mid-ling uplands at New York; for printing cloths, manufacturers' net prices; for sheetings and ginghams, agents' prices, which are subject to an average discount of 6 per cent., except when otherwise stated; Southern sheetings net.

## ITEMS ABOUT BANKS, BANKERS AND TRUST CO'S.

—The Clearing House Committee settled on Thursday an important difference of opinion which has existed among bankers as to the construction to be placed upon the language of the fifth section of the rules adopted by the New York Clearing House Association, to become operative Monday, regarding collections outside the city of New York. This section reads as follows: "In case the charge upon any item at the rates above specified does not equal ten cents the collecting bank shall charge not less than that sum; but all items received from any one person at the same time and pay-

able at the same place may be added together and treated as one item for the purpose of fixing the amount chargeable."

The words which we have italicized have from the first been held by some bankers to mean that items received which are payable at different points or cities in the same State, or in different cities in different States in the same group may be added together, &c. For example, items received from any one person at the same time and payable at New Haven, Hartford, Bridgeport, or other cities in Connecticut; or items received from any one person at the same time and payable at New Haven, Ct., Newport, R. I., Springfield, Mass., may be added together and charged as one item where the charge upon each item does not equal ten cents. Some of the bankers who maintained that this was the correct interpretation of the section were instrumental in formulating the first draft of the new rules, and were consulted from time to time while the rules were being considered by the Clearing House committee. Moreover, the rules were based upon those in force by the St. Louis Clearing-House Association, and it is understood that the above is the interpretation placed by that Association upon a similar section in the St. Louis rules.

On the other hand the bankers who opposed this interpretation of Section 5 contended that the language of the section was plain and unmistakable; that the word "place" meant a city or a town in a State, and not different cities in a State or in a group of different States. This contention, it may be noted, was sustained by some members of the Clearing House Committee and by prominent officers of the Association who construed the language of the section literally. The fact that some of the banks were advising their correspondents that charges would be made in accordance with the less liberal interpretation of the language of Section 5 noted above, while other banks were inclined to adopt the more liberal interpretation referred to, led to efforts by prominent bankers to obtain an official interpretation of the section in order to secure uniformity in practice. Individual members of the Clearing House Committee were conferred with, and as a result of this conference the following was issued by the Committee on Thursday:

NEW YORK CLEARING HOUSE ASSOCIATION, }  
77-83 Cedar Street, March 30, 1899.

DEAR SIR :

The attention of the Clearing House Committee having been called to the fact that different interpretations have been made of the meaning of the words "at the same place," in Section 5 of the rules regarding collections, as formulated by this Committee, and it not having been intended that the word "place" in the said section should have the same meaning as the word "point" used in the preceding Sections 3 and 4: therefore, this Committee declares that the said Section 5 shall be read so as to permit all items payable within the States, Territories and districts enumerated in either Sections 3 or 4 to be added together and treated as one item when "received from any one person at the same time."

By order,

W. A. NASH,  
Chairman Clearing House Committee.

WILLIAM SHERER,  
Manager.

The foregoing shows that the Committee has adopted the more liberal view. We do not need to say that this construction effects a material modification in the arrangement as generally understood by depositors.

—Mr. James C. Bell was this week elected Vice-President of the Nassau Bank, a State institution, located on the corner of Beekman and Nassau streets. Mr. Bell comes from an old banking family. His grandfather, Mr. Abram Bell, established a banking house in this city early in the century, and after his death the business was conducted by his sons, William and James C., under the firm name of Abram Bell's Sons. Mr. James C. Bell, the father of the present Vice-President, was one of the organizers of the Nassau Bank and he was a member of the Board of Directors until November, 1898, when he resigned and was succeeded by his son, who, as above stated, has now been made Vice-President.

## Monetary and Commercial English News

(From our own correspondent.)

LONDON, Saturday, March 18, 1899.

Trade continues to improve very steadily, and each week shows better results than the preceding. But strange to say the stagnation upon the Stock Exchange, which has now

lasted for fully a month, after the slight apurt that set in immediately on the opening of the new year, gives no sign of being dissipated. Everybody is surprised at the apathy of the public, and nobody is able to suggest an adequate explanation.

One cause undoubtedly is the belief in this country that speculation has carried prices too fast and too far in the United States. Because of the continuous war scares which prevailed here up to the end of last year, the British public did not take any part, or, at all events, took but a small part, in American investments while prices were rising after Mr. McKinley was installed in office. Now that political confidence is restored and the people here are of opinion that the danger of war is passed, investors think that prices have been carried too high, and especially they are alarmed by the reports they receive of the extraordinary amalgamations of trust and new formations of industrial companies. It reminds them of what occurred here at home just before 1890, and they do not feel inclined to invest in a market which to them seems to be no longer controlled by far-sighted prudence. The abstention of investors from the American market and the weakness that has prevailed in New York for several weeks together account to a large extent for the stagnation that is apparent here.

Then there is a fear that money may become scarce and dear. A recovery both in the mining market and in the Argentine market had made considerable progress up to the middle of February, when operators found that it was almost impossible in some cases to carry over their accounts, and the season then received has been taken to heart and most operators are unwilling to put themselves in a position in which they may be compelled quite suddenly to surrender at discretion.

Over and above this there are a great number of arrangements being negotiated concerning the true nature of which the public is in the dark, and which lead the public to think that they had better wait for some more information. Mr. Rhodes, for example, suddenly left South Africa for this country. He stopped here only a couple of weeks; then hurried across to have an interview with the King of the Belgians. In a few days he started for Egypt and the Soudan, having interviews with Lord Cromer and Lord Kitchener. Since then he has hastened back to Europe and travelled on to Berlin to communicate with the German Emperor. That negotiations are going on with both Germany and Belgium on the one side and this country and Egypt on the other, in which Mr. Rhodes is taking a very active part, is evident enough; and that those negotiations have for their object, so far at all events as Mr. Rhodes is concerned, the completion of his great plans for the construction of a railway and a telegraph system to connect Capetown with Alexandria, is open to very little doubt. But before the public commits itself in any way it would like to know whether there are any political arrangements in addition to the railway, and if so, what? And, furthermore, to what extent and in what way will the arrangements with Germany affect the British character of the proposed enterprises.

In addition to all this there are negotiations going on between the Chamber of Mines and the Transvaal Government having for their aim the abrogation of the Dynamite monopoly, or, if that is impossible, then such a re-modeling of the monopoly as will give a larger revenue to the Government and cheaper dynamite to the mining companies. It is believed that the negotiations are going on satisfactorily; that all the great mining magnates in London are interested in them; that they hold almost daily consultations, and that the communications between them and the Chamber of Mines at Johannesburg are very frequent. But the public is quite in the dark as to what the result may be, and in their perplexity they are leaving the market alone for the present.

In Germany, moreover, money continues very scarce and dear, and German enterprise for the moment is not making itself felt in London. The French Bourse is inactive, or so far as there is any action it is confined to a few specialties like Spanish bonds and copper securities. Lastly, although there is a very general belief that peace will be maintained, the negotiations going on with Russia on the one hand and with France on the other have not come to a conclusion. That both are proceeding satisfactorily is known. But that neither is completely arranged is believed.

The Directors of the Bank of England, although they made no change in their rate of discount this week, intimated to the bill brokers that they were no longer willing to lend at 3%, and on Thursday began to charge 3½%. It is generally understood that, in the opinion of the Directors, gold shipments to New York are likely to begin soon, and therefore that it is essential to take measures without delay to protect the reserve. The reserve is small considering all the obligations of the Bank of England. Yet the Directors are not so convinced that gold shipments will take place as to have felt it obligatory on them to put up their rate of discount. They have just taken a provisional half measure which they hope may be sufficient. Besides the danger of large gold shipments to New York, the Directors have always to bear in mind that money continues still both scarce and dear in Germany. The discount rate in the open market in Germany is fully 4%. Although it is hardly likely that the Imperial Bank will be compelled to raise its rate before July, it is not quite impossible.

Much depends upon the action of the American banks which have been lending largely in Germany, and even more depends upon the action of the French banks. They have invested very large sums in Germany, and if they were to begin to withdraw upon an extensive scale it is quite possible that there might be serious stringency in Germany. On the other hand, although just for the moment money is comparatively dear in France, it is not likely to remain at the present rate. Last week the Credit Lyonnais bought from the Russian Government and offered to its own customers three millions sterling worth of Russian Internal 4% bonds. It is understood that the bonds have now been placed and the Russian Government is employing the money, or, at all events, part of it, in buying gold in London, which is being remitted to St. Petersburg. That is, of course, a small operation. But it does actually remove about three millions sterling from Paris to London, and about three-quarters of a million sterling has been paid to London for three or four blocks of South African mining shares.

Altogether not far short of four millions sterling is thus passing at present from Paris to London. And as the usual spring demand in France is in operation, this for the time being tends to harden the market. But it is not likely that the hardening will continue. In Russia itself there is required a great deal of money, both to fight the famine and to complete the various enterprises undertaken by the Government, as well as for the army and the navy. But Russia for the time being is not in a position to borrow on a large scale either upon the Continent or in London, and no very large amounts of gold, therefore, are likely to go thence from this country.

In truth the immediate course of the money market depends mainly upon the course of events in the United States. If money were to become so dear there that gold were withdrawn from Germany, not only would there be gold shipments to New York, but Germany might have to obtain money in London at any cost.

Meantime the India Council continues to sell its drafts exceedingly well. It offered for tender on Wednesday 70 lacs, and the applications amounted to 1,261 lacs. The whole amount offered was disposed of at rates ranging a trifle over 1s. 4d. per rupee for bills and 1s. 4 1/2d. per rupee for telegraphic transfers.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

	1899. Mar. 16	1898. Mar. 15	1897. Mar. 17	1896. Mar. 18

## Commercial and Miscellaneous News

**NATIONAL BANKS.**—The following information regarding national banks is from the Treasury Department.

## LIQUIDATION.

2,261.—The Citizens' National Bank of New Bedford, Massachusetts has gone into voluntary liquidation, by resolution of its stockholders dated February 21, 1899, to take effect immediately.

5,033.—The Simpson National Bank of Eagle Pass, Texas, has gone into voluntary liquidation, by resolution of its stockholders, dated March 1, 1899, to take effect March 4, 1899.

**IMPORTS AND EXPORTS FOR THE WEEK.**—The following are the imports at New York for the week ending for dry goods Mar. 23 and for the week ending for general merchandise Mar. 31; also totals since the beginning of the first week in January.

## PORTION IMPORTS AT NEW YORK.

For week.	1899.	1898.	1897.	1896.
Dry Goods....	\$2,624,131	\$2,961,857	\$2,371,340	\$2,576,121
Gen'l mer'chise	8,704,205	8,232,011	5,978,722	6,881,354
Total.....	\$11,328,336	\$11,193,868	\$8,350,062	\$9,457,475
Since Jan. 1.				
Dry Goods.....	\$29,260,428	\$29,012,184	\$29,804,038	\$37,835,371
Gen'l mer'chise	91,665,153	80,863,904	82,855,611	81,902,332
Total 12 weeks.....	\$123,925,587	\$109,876,088	\$112,659,679	\$119,737,703

The imports of dry goods for one week later will be found in our report of the dry goods trade.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending Moh. 27 and from January 1 to date:

## EXPORTS FROM NEW YORK FOR THE WEEK.

	1899.	1898.	1897.	1896.
For the week.....	\$10,109,819	\$10,645,301	\$8,876,389	\$7,839,927
Prev. reported.....	105,308,420	101,058,201	85,173,170	84,308,377
Total 12 weeks.....	\$115,418,239	\$111,703,502	\$94,049,559	\$92,148,304

The following table shows the exports and imports of specie at the port of New York for the week ending Moh. 25 and since January 1, 1899, and for the corresponding periods in 1898 and 1897.

## EXPORTS AND IMPORTS OF SPECIE AT NEW YORK.

WALL STREET, FRIDAY, MAR. 31, 1899.—3 P. M.

**The Money Market and Financial Situation.**—The security markets have been more buoyant this week than in any week since January, and reflect a state of public sentiment similar to that which then existed. No doubt a larger proportion of the transactions are now of a speculative character, but the eager absorption of many leading railway shares at rapidly advancing prices shows an increased investment demand. This is evidently based on a hopeful view of the general situation, and the consensus of opinion among those most competent to judge seems to favor such a view.

Railway net earnings for February show the results of the heavy snow storms during that month, but returns of gross earnings for March are unmistakable evidence of a large general traffic movement in nearly all parts of the country. There are reports of damage to the wheat crop in some parts of Kansas, but if such should prove to be true the effect will be chiefly local. The money market has continued to be a matter of interest in Stock Exchange circles, but in the record of the week there is evidence that a comparatively high rate for call loans is not necessarily a barrier to a strong, active stock market. Rates for money have been somewhat unsteady, but have averaged at a point which a few weeks ago would have been thought too high to admit of such buoyancy in the security markets as is noted above.

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 3½ to 12 per cent. Thursday's rates on call were 6 to 12 per cent. Prime commercial paper quoted 3½ to 5 per cent.

The Bank of England weekly statement on Thursday showed a decrease in bullion of £1,069,235, and the percentage of reserve to liabilities was 33.10, against 41.40 last week; the discount rate remains unchanged at 3 per cent. The Bank of France shows a decrease of 8,350,000 francs in gold and an increase of 1,725,000 francs in silver.

The New York City Clearing-House banks in their statement of March 25 showed an increase in the reserve held of \$333,000, and a surplus over the required reserve of \$18,557,425, against \$19,074,175 the previous week.

	1899. Mar. 25.	Difference from Prev. week.	1898. Mar. 26.	1897. Mar. 27.
Capital	\$58,222,700		\$59,022,700	\$59,772,700
Surplus	75,872,100		74,252,100	73,933,800
Loans & discounts	779,481,800	Inc. 5,530,000	600,168,400	504,474,200

Surplus reserve	13,557,425	Dec. 516,750	33,851,475	44,803,750

**Foreign Exchange.**—The foreign exchange market has been firm, and rates advanced on a better demand for bills. The tone was steadier at the close.

To-day's actual rates of exchange were as follows: Bankers' sixty days' sterling, 4 84¼ @ 84¼; demand, 4 86¼ @ 86¼; cables, 4 87¼ @ 87¼; prime commercial, sixty days, 4 83¼ @ 83¼; documentary commercial, sixty days, 4 83¼ @ 84¼; grain for payment, 4 83¼ @ 84¼; cotton for payment, 4 83¼ @ 83¼; cotton for acceptance, 4 83¼ @ 84¼.

Posted rates of leading bankers follow:

	Mar. 31.	Sixty days.	Demand.
Prime bankers' sterling bills on London	4 85 @ 4 85½	4 87 @ 4 87½	
Prime commercial	4 83¼ @ 84		
Documentary commercial	4 83¼ @ 84¼		
Paris bankers' (france)	520½ @ 191½	518½ @ 177½	
Amsterdam (guilders) bankers	40 @ 40½	40½ @ 40¾	
Frankfort or Bremen (reichmarks) bankers	94½ @ 94¾	95½ @ 95¾	

**United States Bonds.**—Sales of Government bonds at the Board include \$203,000 4s, comp., 1-25, at 129 to 129½; \$12,000 4s, comp., 1907, at 113 to 114; \$6,000 4s, reg., 1907, at 112½; \$28,000 3s, comp., at 108 to 108½, and \$1,000 ditto (small bonds), at 107½ to 107¾. For yearly range see seventh page following.

\*This is the price bid at the morning board; no sale was made.

**State and Railroad Bonds.**—Sales of State bonds at the Board include \$95,000 Virginia fund, debt 2-3s of 1891 at 83¼ to 85 and \$34,000 Tennessee settlement 3s at 97¼ to 97½.

The railway bond market was strong on a volume of business much larger than that of last week, although made up almost wholly of low-grade issues. There were fractional recessions from the best prices of the week in some cases, but the tendency was upward and a few issues made substantial gains. Manhattan Railway consol. 4s closed at 109½, 3½ points above the close last week. Norfolk & Western con. 4s and Southern Railway 1st 5s are among the few issues which show a net gain of 2 points or more. The list of active bonds which advanced a point or more includes Central Georgia con. 5s, Chesapeake & Ohio gen. 4½s, Kansas City Pittsburg & Gulf 1st, St. Louis Southwestern 2ds, San Antonio & Aransas Pass 4s, Texas & Pacific 1sts, Union Pacific 4s and Wabash debenture series B.

**Stock and Bond Sales.**—The following shows the volume of business in stocks and bonds on the New York Stock Exchange for the past week and since January 1.

Sales	Week ending Mar. 31—1899.	Jan. 1 to Mar. 31—1899.
N. Y. Stock Exch.	1899.	1899.
Government bonds	\$349,500	\$309,800
State bonds	189,000	40,300
R.R. & misc. bonds	10,059,900	11,318,500
		819,658,100
Total	\$10,437,900	\$11,758,300
Stocks—No. shares	4,918,330	8,819,154
Par value	\$483,997,400	\$325,449,550
Bond shares, par val.	\$38,490	\$300
		\$199,835
		\$80,900

We add the following daily record of the transactions:

	Week ending Mar. 31, 1899.	Shares.	Par value.	Railroad, &c. Bonds.	State Bonds.	U. S. Bonds.
Saturday	\$539,036	\$53,939,700	\$2,694,500	\$80,000	\$102,500	
Sunday	1,844,835	181,637,350	4,892,000	58,000	10,500	
Tuesday	1,083,914	106,187,350	4,972,500	89,000	97,000	
Wednesday	1,186,966	118,381,450	4,149,700	10,000	104,000	
Thursday	918,637	89,911,700	2,977,500	7,000	6,000	
Friday						

Total.....\$483,997,400 \$10,059,900 129,000 \$240,900

The sales on the Boston and Philadelphia Exchanges were:

	Listed shares.	Unlisted shares.	Bond sales.	Listed shares.	Unlisted shares.	Bond sales.
Saturday	58,306	8,904	\$53,337	39,449	96,555	\$48,500
Monday	108,439	8,378	109,400	66,149	49,519	116,400
Tuesday	94,793	10,075	104,989	42,181	41,144	218,480
Wednesday	113,903	8,666	114,180	44,260	49,269	258,200
Thursday	108,198	13,610	130,300	55,046	53,189	187,481
Friday						

Total.....476,109 47,630 631,176 981,485 199,689 917,011

NOTE.—The total of sales on the Boston Exchange for the week ending March 24, omitted last week on account of non-receipt of our telegram for Friday, were as follows: Listed shares, 266,073; unlisted shares, 103,223; bonds, 334,204.

**Railroad and Miscellaneous Stocks.**—The stock market was more active again this week. Transactions averaged over 1,000,000 shares per day, or nearly 50 per cent more than last week, and were better distributed than of late. There was a revival of interest in railway shares, some of which were exceptionally buoyant. At the highest quotations of the week North West showed an advance of 17 points since the close last week, New York Central 8¼ points, Pennsylvania 3½ points, and other issues, including Atchafalaya preferred, Burlington & Quincy, St. Paul, Rock Island, Northern Pacific and Union Pacific, an advance of between 2 and 3 points. In this respect, however, the city traction stocks were most prominent, led by Brooklyn Rapid Transit, which advanced 23¾ points; Metropolitan Street, 17 points; Third Avenue, 17 points; Manhattan Elevated, 6¾ points; and the advance of this group was well held up to the close. Generally, however, the extreme high quotations mentioned were not maintained. The anthracite coal stocks were weak.

The industrial stocks moved in harmony with other departments, but were relatively less erratic than usual. American Tobacco moved up 19¼ points and lost only 3¼ of the gain. The Federal Steel issues were again prominent, the common gaining 14½ points. Other active features of the list were strong except General Electric, which shows a small net loss.

our year (1898).

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every **ITEM** railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

† Includes Chesapeake & Ohio So. western, Ohio Valley and Chicago and Texas for both years. Results on Yazoo Branch excluded in 1899 but included in 1898 until July 1.

‡ Mexican currency.

§ Covers results of lines directly operated east of Pittsburg.

**Latest Gross Earnings by Weeks.**—The latest weekly earnings in the foregoing are separately summed up as follows:  
For the third week of March our preliminary statement covers 78 roads and shows 7.28 per cent increase in the aggregate over the same week last year.

**Net Earnings Monthly to Latest Dates.**—The table following shows the gross and net earnings of STEAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained, is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of March 18, 1899. The next will appear in the issue of April 22, 1899.

## STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

Wilkes & Wy. Val.....	February	31,851	36,351	72,567

\* Includes Baltimore Traction and City & Suburban for both years.

**Street Railway Net Earnings.**—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—

that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday) we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONICLE of March 18, 1899. The next will appear in the issue of April 22, 1899.

Roads.	Gross Earnings.		Net Earnings.	
	1899.	1898.	1899.	1898.
Lake St. Elev. (Chlo) Feb.			24,657	17,876
Jan. 1 to Feb. 28....			53,670	38,165

## ANNUAL REPORTS.

**Annual Reports.**—The following is an index to all annual reports of steam railroads, street railways and miscellaneous companies which have been published since the last editions of the INVESTORS' and STREET RAILWAY SUPPLEMENTS.

This index does not include reports in to-day's CHRONICLE.

## Mexican National Railroad.

(Report for the year ending Dec. 31, 1898.)

The annual report of President Raoul will be found on subsequent pages of the CHRONICLE. The company has adopted an arbitrary rate of 80 cents to the dollar as a basis of converting its Mexican dollars into United States gold, but the actual loss of late years has been much greater, and this loss is charged in the item of "Exchange." In 1892 this item amounted to \$248,622 in gold; in 1893 to \$434,242, in 1894 to \$703,120, in 1895 to \$389,345, in 1896 to \$793,403, in 1897 to \$1,156,792 and in 1898 to \$1,180,000, these sums representing the loss in converting into gold that portion of the silver dollars needed to meet its gold payments, etc.

## EARNINGS AND EXPENSES (MEXICAN CURRENCY).

**Grand Rapids & Indiana Railway.**

(Report for the year ending Dec. 31, 1898.)

President James McCrea says in part:

The increase of \$103,150, or 9.78 per cent, in gross earnings is gratifying, and is the result of the continued activity in business that began in July, 1907. Nearly 55 per cent of this increase was in passenger business, a large portion of which was due to increased summer travel to Michigan resorts. The advance in the price of hard wood lumber, and larger demand for same, which began in the latter part of 1908, has caused much activity in all of the towns on the Northern Division of your line; has added materially to your freight earnings, and promises well for increase of business for the coming season.

The increase in expenses is due to increased business and liberal expenditures for maintenance of the property. After the coming year we hope that very decided reductions can be made in the charges against income account on account of betterments. Income account includes charges for the year as follows: Four new locomotives, \$28,213; safety appliances to freight cars, \$47,110; advances, C. R. & F. W. R.R., account interest, \$14,101; real estate purchased, \$8,005; terminals at Kalamazoo, \$6,027; two new passenger cars (additional equipments), \$4,982; purchase and improvement Widdicomb Branch, \$3,738.

The advance of one third of the amount necessary to meet the guaranteed interest on bonds of the Cincinnati Richmond & Fort Wayne R.R. is in continuation of the policy referred to in the annual report of last year. The expenses on this line have been heavy, and will continue so for two years longer, because of the necessity for the rebuilding of important bridges.

**American Bell Telephone Co.**

(Report for year ending Dec. 31, 1898.)

The report read at the annual meeting this week said in substance:

"The underground system has been extended greatly in recent years; 358,000 miles or nearly half of the exchange wire in the country is now operated underground. The long distance company [the American Telephone & Telegraph Co.] shows a gain during the year of 1,301 miles of pole line and cables, 7,159 miles of wire and 47 offices. To Dec. 31, 1898, the Long Distance Company has invested in line construction, franchises, equipment and supplies, \$14,847,587. The company shows an increase in gross earnings in 1898 over 1897 of 17-33 per cent, the amount for 1898, gross, being \$2,205,706.

"In all there are thirty eight companies whose systems furnish our long line terminals. These companies report a total of 409,250 stations, of which 200,528 (49-98 per cent) are equipped with metallic circuits; and of these 200,528 stations, 25,158 are equipped with long distance cabinet sets. The new construction completed in 1898 by companies with which we have contract relations amounted to \$12,105,921, including \$7,447,495 for exchange construction and equipment and \$4,658,426 for toll lines. In addition \$1,107,285 was invested in real estate for company and exchange purposes. The entire expenditure for construction, including real estate, to the close of 1898 has been \$111,159,309.

The companies operating under our licenses present a record of growth greater than ever before. More than 80,000 subscribers have been added, requiring 146,000 miles of new exchange conductors, and the toll-line system has been increased by some 61,000 miles of wire. The number of exchange conversations for the year, computed from daily averages reported, has reached 1,231,000,000. Toll revenue all companies for the year exclusive of the Long Distance company was \$5,571,710. Out of the 465,000 subscribers in the United States, 90,143 are now connected under measured service contracts.

**Plant.**—The statistics for the Long Distance Co. and also for all the licensee companies follow:

**Akron Street Ry. & Illuminating Co.—Akron Traction & Electric Co.—Sold.**—At the foreclosure sale on Tuesday the property was purchased for \$1,050,000 by James H. Dempsey, of Cleveland, representing the reorganization trustees of New York. The property will be transferred to the recently organized Akron Traction & Electric Co., whose capital stock is to be increased to \$2,000,000, of which \$1,000,000 to be 5 per cent preferred. For reorganization plan see STREET RAILWAY SUPPLEMENT.—V. 68, p. 425.

**American Beet Sugar Co.—Incorporated.**—This company was incorporated at Trenton on March 24 with a capital stock of \$20,000,000, of which \$5,000,000 is 6 per cent non-cumulative preferred stock. Spencer Trask & Co. and Kuhn, Loeb & Co. are interested in the enterprise, the prospectus of which was cited quite fully in the CHRONICLE of Feb. 11, page 280.—V. 68, p. 280.

**American Bell Telephone Co.—American Telephone & Telegraph Co.—\$50,000,000 New Stock.**—The American Telephone & Telegraph Co.—the long-distance company controlled by the American Bell Telephone Co.—on March 27 certified to the Secretary of State, at Albany, an increase of its capital stock from \$25,000,000 to \$75,000,000. The capital actually paid in is \$23,500,000, and the debts and liabilities amount to \$902,736. The capital stock of the American Bell Telephone Co. being \$50,000,000 authorized and \$25,886,300 issued, it appears highly probable that the increase in the capital of the American Telephone & Telegraph Co. is preparatory to the carrying out of the plan suggested several weeks ago of merging the American Bell Telephone Co. in the American Telephone & Telegraph Co. The report of the American Bell Telephone Co. for the year 1898 is cited above.—V. 68, p. 128.

**American Steel Hoop Co.—National Tube Co.—Iron Company Consolidations.—Negotiations.**—The "Iron Age" on Thursday said:

"Prices on hoops and cotton ties have been withdrawn pending the consummation of the consolidation among the mills, which is now close to a settlement. The consolidated company, which will probably be called the American Steel Hoop Co., will take in the three Pittsburg plants, with the three blast furnaces belonging to one of them, one concern in the Shenango Valley, the Youngstown Mill, which is to be transferred by the National Steel Co., and the Duncansville Works. The relations between the National Steel Co. and the American Steel Hoop Co. are very close.

The subscription books of the consolidation of the Western and Southern bar mills were opened to day. A furnace property in the Birmingham district is included, but none of the Pittsburg or Eastern mills are in the consolidation. The sheet mill negotiations are still hanging fire, but it is believed that ultimately something will be done with this interest. The tube consolidation is reported to have reached the point that subscription books will be opened in a few days."—V. 63, p. 429.

**American Woollen Co.—Incorporated.**—This company, whose prospectus was in the CHRONICLE of March 11, page 472, was incorporated at Trenton on Mar. 29. Incorporators:

S. B. Lawrence, John B. Summerfield, Henry C. Everdell, Armitage Matthews, Henry M. Haviland, George E. Spencer, Leavitt J. Hunt, Charles B. Hill, and Robert Barry, Jr., of New York, and James C. Woodhull of Newark.

The New York offices will probably be at 74 Worth Street. The authorized capital stock is \$55,000,000, of which \$25,000,000 is 7 per cent cumulative preferred. New acquisitions, it is said, are being made.—V. 63, p. 472.

**American Tobacco Co.—Union Tobacco Co.—Stock Increased.**—The stockholders on Tuesday authorized the proposed issue of \$35,000,000 new common stock, (par \$50), thereby increasing the capital stock from \$35,000,000 to \$70,000,000, of which \$14,000,000 is 8 per cent preferred. The new stock will be used to acquire the Union Tobacco Co. and for other purposes. It was also voted to amend the charter of the company so as to raise the number of directors from twelve to fifteen, and the following new directors were elected on Wednesday: P. A. B. Widener, Thomas F. Ryan and Anthony N. Brady.

**Doubt Regarding Liggett & Myers' Plant.**—The New York "Sun" on Thursday said:

The break in the tobacco stock elicited the fact that the acquisition of the Union Tobacco Co. by the American Co. does not include the option on the Liggett & Myers plant, which was secured and is still held by a syndicate of capitalists that were active in promoting the Union Tobacco Co. As two or three of the members of that syndicate were elected directors of the American Tobacco Co. to-day, it would appear that the Street was rather hasty in jumping to the conclusion that the option referred to is likely to be exercised to the detriment of the American and Continental companies. It may be, however, that the managers of those companies consider the price named in the option too high, and that it may therefore be allowed to lapse. In that case there would possibly be a renewal of hostilities between the Continental Co. and the St. Louis concern. Still another plausible view is that the Liggett & Myers plant may be taken over by the syndicate holding the option and operated as an independent concern, yet in harmony with the two companies that control practically the entire tobacco business of the United States.

**Option to Holders of Scrip.**—The option is given holders of the company's scrip to have their scrip redeemed at par during May, or extended for three years at 6 per cent interest.—V. 63, p. 471.

**Baltimore & Ohio RR.—Coupons.**—Coupons of Baltimore & Ohio RR. extended 4 per cent bonds will be paid at maturity at the offices of Messrs. Speyer & Company, 30 Broad Street, New York.—V. 63, p. 570.

**Bethlehem Iron Co.—Bethlehem Steel Co.—New Company.—Lease.**—The incorporators and directors of the Bethlehem Steel Co., as shown by the application for a charter at Harrisburg, are: Joseph Wharton, Elisha P. Wilbur, Robert H. Sayre, Robert S. Linderman, Beauveau Borie, Edward T. Stotesbury, John Lowber Welsh.

On Wednesday the directors of the Bethlehem Iron Co. declared a stock dividend of 50 per cent out of accumulated earnings, payable in scrip to stockholders of record at 3 P. M. March 29. They also called a special meeting of the stockholders for April 15 to vote on the proposition to lease the company to the Bethlehem Steel Co., at a guaranteed dividend rental of 6 per cent per annum, with the privilege for Iron Co. stockholders to subscribe to the \$15,000,000 stock of the new Steel Co. The stock of the steel company is divided into shares of \$50 each.—V. 63, p. 523.

**Brooklyn Rapid Transit Co.—Brooklyn Union Elevated RR.—Possession Taken.—New Officers.**—On Saturday last the Brooklyn Rapid Transit Co. took formal possession of the Brooklyn Union Elevated RR., Receiver Uhlmann being discharged. The following directors were elected for the new company:

Frederic P. Drott, Clinton L. Rossiter (President), T. S. Williams (Secretary and Treasurer), William Halla, Jr., Frederic Uhlmann, William F. Sheehan, Nicholas F. Brady, Fred S. Flower, John S. George, Ira A. Kip, Jr., John R. Taylor, John V. Clark and Harry Folger.

**New Securities.**—The securities of the Brooklyn Union Elevated RR. are ready for delivery at the Central Trust Co.

**Offer to Minority Stockholders.**—H. B. Hollins & Co. make the following announcement to the stockholders of the Brooklyn Union Elevated RR. Co.:

"Some months ago a contract was entered into between the holders of a majority of the stock (both preferred and common) of the newly organized Brooklyn Union Elevated RR. Co., for the sale of a controlling interest in said stock, for cash, to a syndicate. The majority holders selling said stock reserved the privilege that all holders of both classes of stock should have the opportunity for a limited time of disposing of their holdings to the same syndicate at the same price at which the majority sold. We are therefore authorized by Mr. Wm. Halla, Jr., representing the majority stockholders who have sold, to offer the minority stockholders the privilege until 3 o'clock P. M. April 3, 1899, to deliver their stock to us, and receive payment therefor in cash, upon delivery of certificates properly assigned and with proper revenue stamps affixed, without commission."

The "Brooklyn Eagle" says: "The terms offered were on a basis of 39 a share for the common stock and 60 for the preferred. Of this amount the syndicate pays 75 per cent in cash. For the remainder it gives Rapid Transit stock at 60."

**Introduction of Trolley.**—Work was begun by the Brooklyn Rapid Transit Co. on Wednesday on the change of the Brooklyn & Brighton Beach road into a trolley line. The laying of the third rail for the electric service on the Brooklyn Union Elevated Railroad was begun on the Fifth Avenue line several days ago.

**"On Unlisted."**—The New York Stock Exchange has admitted to dealings 81,635 shares of additional stock of the Brooklyn Rapid Transit.—V. 63, p. 570.

**Central Pacific RR.—Southern Pacific Co.—Plan Operative.**—Further Deposits to be Received till April 6.—A large majority of each class of bonds and over 97½ per cent of the stock of the Central Pacific having assented to the plan and agreement for the readjustment of the company, dated Feb. 8, 1899, the readjustment managers give notice that the said plan is declared operative. The time for further deposits of stock and bonds, without additional charge, has been extended to and including April 6, 1899, after which date deposits will be accepted only upon a cash payment of one per cent of the par value of bonds, and an additional cash payment of \$1 per share of stock deposited.

As to the Central Pacific first mortgage bonds, Series A, B, C, D, E, F, G, H and I, holders of certificates of deposit issued under bondholders' agreement, dated Aug. 14, 1897, are notified that in order to accelerate the carrying out of the plan holders should present their certificates promptly at the offices of the readjustment managers to be stamped as assenting to the plan of readjustment. Any holder desiring to accept cash for his bond rather than the new securities as provided in the plan must present his certificate of deposit to be stamped accordingly, on or before April 6, 1899. See advertisement in another column.—V. 63, p. 523.

**Listed.**—The New York Stock Exchange has listed the engraved certificates issued by Speyer & Co. for the following securities:

\$2,196,000 Western Pacific RR. first mortgage bonds, series A and B; \$9,152,000 California & Oregon RR. first mortgage bonds, series A and B; \$5,156,000 Central Pacific RR. San Joaquin Valley branch, first mortgage bonds, and \$1,703,000 Central Pacific Ry. land bonds. The amount of bonds on the list is to be reduced accordingly, and the Committee on Stock List is empowered to add to the list additional certificates as officially notified that they have been issued in accordance with the plan.

**Large Sale of Stock.**—A press despatch from San Francisco on March 27 says: "Mrs. Stanford has sold her Central Pacific RR. stock for \$1,594,000 to Speyer & Co. She disposed of 10,000 shares at \$16 a share, or a total of \$1,600,000, a short time before her departure from San Francisco on Jan. 27. Early in March she sold the remaining 22,000 shares for \$12 a share, or a total of \$1,144,000."—V. 63, p. 323, 378.

**Central Vermont RR.—Sale Confirmed.**—The United States Circuit Court at Brattleboro, Vt., has confirmed the sale of the road to the reorganization committee.—V. 63, p. 570.

**Chicago & Alton RR.—Formal Transfer.**—The formal transfer of the property to the purchasing syndicate will be made at a meeting of the directors of the company in Chicago next Monday.

**President Blackstone Sells His Stock.**—T. B. Blackstone, President of the Chicago & Alton, has accepted the terms of the syndicate for the Chicago & Alton stock, and it is understood will retire from the management at the annual meeting to be held on Monday.—V. 63, p. 523.

**Chicago Burlington & Northern RR.—First Mortgage Bonds Called.**—The company has formally called for payment its \$3,053,500 first mortgage 5 per cent bonds, due April 1, 1896. The loan will be paid at the Merchants' National Bank, 28 State Street, Boston, Mass., at 105 and accrued interest on Oct. 1, 1899.—V. 63, p. 570.

**Cleveland Canton & Southern—Offer to Purchase Road.**—Holders of the Mercantile Trust Company's certificates of deposit for first mortgage 5 per cent bonds of the Cleveland & Canton RR. Co. are notified that a general meeting of said holders will be held at Room No. 325, No. 32 Nassau Street, New York City, on April 5, 1899, at 8 o'clock, to consider an offer which the committee has received for the purchase of the railroad and property, which were acquired by the committee at the recent foreclosure sale.—V. 63, p. 379.

**Continental Tobacco Co.—Official Statement.**—The following is from an official statement:

**Organization.**—Organized Dec. 9, 1894, under laws of N. J. Authorized capital: pref. non-cumulative 7 per cent stock, \$37,500,000 common stock, \$17,500,000. Par value of shares \$100 each. No personal liability. Amount outstanding: preferred, \$31,145,000; common, \$31,145,000. Registrar, Chase National Bank, New York; Transfer Agent, Manhattan Trust Co.

Owne the properties, rights, trade marks, trade names and assets of every kind heretofore owned by the following concerns, viz.: John Finzer & Brother, Louisville, Ky.; P. H. Mayo & Co. (Incorporated), Richmond, Va.; Daniel Scotten & Co., Detroit, Mich.; C. J. Borg Co., Middletown, Ohio; Drummond Tobacco Co., St. Louis, Mo.; Brown Tobacco Co., St. Louis, Mo.; J. Wright & Co., Richmond, Va.; Wright Brothers Tobacco Co., St. Charles, Mo. Also owne the common stock amounting to \$3,000,000 par value, of the P. Lorillard Co., Jersey City, N. J., and the plug tobacco business and assets pertaining thereto of the American Tobacco Co. The preferred stock of the P. Lorillard Co., of the par value of \$1,000,000, is exchangeable for the preferred stock of the Continental Tobacco Co. in the proportion of seven shares of the former for eight of the latter.

**CERTIFICATE OF ORGANIZATION.**—The certificate of organization provides that upon dissolution of the corporation and after the payment of its debts, the preferred stock shall be redeemed at par if the assets are sufficient. If the assets are not sufficient, then they shall be distributed ratably among the holders of the preferred stock. "If the assets are more than sufficient to redeem the preferred stock at par, all remaining after such redemption shall be divided ratably among the holders of the general or common stock." The directors shall be classified, and at the first election the several classes shall be elected as follows: Five for one year, five for two years and five for three years, and at the expiration of their respective terms their successors shall be elected for three years, so that the term of each director, after those elected at the first election, shall be three years. If the number of directors shall be at any time changed, the board of directors shall have power to re-arrange the classification of the directors. The board of directors have the power, by vote of a majority of all the directors, and without the assent or vote of the stockholders, to make, alter, amend and rescind the By-Laws, to fix the amount to be reserved as working capital, and to fix what number of directors shall constitute a quorum of the board.

**OFFICERS.**—James B. Duke, President; Harrison I. Drummond, First Vice-President; Frank P. Ray, Second Vice-President; Oren Scotten, Third Vice-President; P. Lorillard, Jr., Treasurer; D. A. Keller, Secretary.

**DIRECTORS.**—James B. Duke, Oren Scotten, Herbert L. Terrell, Marks Leopold, Robert B. Dula, Harrison I. Drummond, Pierre Lorillard, Jr., Oliver H. Payne, Basil Doerhoefer, Joseph B. Hughes, Frank H. Ray, John H. Cohn, Thomas Atkinson, Grant B. Schley, Paul Brown.

The \$31,145,000 7 per cent non cumulative preferred stock and \$31,146,500 common stock was recently admitted to quotation in the Unlisted Department of the New York Stock Exchange.—V. 68, p. 523.

**Consolidated Street Car Co.—Street Car Manufacturing Consolidation.**—Incorporated.—This company, with authorized capital of \$18,000,000, has been incorporated at Trenton by William B. Chapman, New York; A. G. Ridley, Brooklyn, and Frank B. Pollak, Jersey City. William Nelson Cromwell, of the law firm of Sullivan & Cromwell, is quoted as saying that he is not ready to make a statement touching the plans of the new company, but that the intention is to have it unite the interests of nearly all the street-car builders of the United States.

**Dallas (Tex.) Consolidated Electric Street Ry.—Sold.**—President C. H. Alexander on March 21 authorized the following announcement:

The Dallas Consolidated Electric Street Railway plant, franchises, etc., were sold to-day to a syndicate of Iowa capitalists on a basis of \$300,000. The new owners will take possession of the property tomorrow morning. They are: G. Von Ginkel, T. M. Earl and P. H. Bousquet of Des Moines.—V. 67, p. 176.

**Federal Sewer Pipe Co.—Sewer Pipe Consolidation.**—The consolidation of the leading manufacturers of clay sewer pipe, firebrick chimney tops and linings, and similar products, has been definitely arranged by Attorneys John R. Dos Passos and Leopold Wallach, and will take place under the title of the Federal Sewer Pipe Co., with a capital of \$25,000,000, half of which to be 7 per cent preferred. Of each class of stock, \$10,750,000 is to be issued at present. More than 80 per cent of the underwriting has been taken by those engaged in the industry. Simon Borg & Co. and P. J. Goodhart & Co. of New York and Cincinnati, it is stated, have charge of the financial end of the consolidation.—V. 68, p. 426.

**Galveston City RR.—Sale Sept. 5.**—The foreclosure sale under the first mortgage has been set for Sept. 5, the upset price to be \$500,000. The priority of the city's claim will be determined by the Court after the sale of the property.—V. 65, p. 728.

**Galveston Laporte & Houston RR.—Purchase Completed.**—A press despatch on Wednesday from Galveston says that T. J. Smith has completed the purchase of this road by paying the final \$375,000 of the \$425,000 bid by him at the receiver's sale on Oct. 6, 1898. The presence of C. P. Huntington in Galveston has revived the rumor that the Southern Pacific is the real purchaser.—V. 67, p. 955.

**Herring-Hall-Marvin Co.—Safe Consolidation.—Negotiations Pending.**—Twelve of the fourteen leading manufacturers of safes, it is understood, have agreed to a consolidation, the consolidated company to issue \$10,000,000 common and \$7,000,000 preferred stock. The manufacturers will retain a large part of their securities of the new company, and only about \$3,000,000 will need to be underwritten, \$1,000,000 of which will be for cash capital. The underwriters will receive for each \$1,000 subscribed \$1,000 in preferred stock and \$1,000 in common stock. The stockholders of the reorganized Herring-Hall-Marvin Safe Manufacturing Co. will be allowed to exchange their securities for the securities of the new company on certain terms.—V. 68, p. 232.

**Indiana & Illinois Southern Ry.—St. Louis Indianapolis & Eastern RR.—Illinois Central RR.—Possession Surrendered.**—A press dispatch says that the formal transfer of the St. Louis Indianapolis & Eastern RR. [better known by its former name, the Indiana & Illinois Southern Ry.] to the Illinois Central occurred March 25. The road is 90 miles long, and extends from Effingham, Ill., to Switz City, Ind. A representative of the Illinois Central has been stationed at Sullivan, Ind.—V. 68, p. 331.

**Indianapolis Street Ry.—Prospectus.**—The new prospectus, it is understood, provides that the present stock (\$5,000,000) shall be retired, and that there shall be issued 4 per cent bonds and stock to cover same. The present bonded indebtedness, which will remain undisturbed, is shown in our STREET RAILWAY SUPPLEMENT. The prospectus printed last week was one submitted to the public by Verner & McKee in about 1892, when they bought the company from the former Chicago stockholders. There has not been a mile of

road operated by horses or mules in Indianapolis for several years.—V. 63, p. 571.

**International Steam Pump Co.—Incorporated.**—This company filed articles of incorporation on March 24 in the County Clerk's office at Jersey City. The capital stock is \$27,500,000, of which \$12,500,000 is 6 per cent cumulative preferred. Various facts from the company's prospectus and the names of the proposed officers and directors were shown in the CHRONICLE of March 11, page 473. Lehman & Co. received subscriptions to the underwriting.—V. 63, p. 473.

**Jacksonville Tampa & Key West Ry.—Bonds Reported Sold.**—It is understood that the Philadelphia bondholders' committee has arranged to sell at 50 the first-mortgage bonds deposited with it.—V. 68, p. 572.

**Kansas City Pittsburg & Gulf Ry.—April Interest.**—The Mercantile Trust Co. will advance to depositing bondholders, for account of the reorganization committee, the face of the April 1 coupon due on that date.

**Committee Enlarged.**—Messrs. E. H. Harriman, George Coppell and W. E. Glyn have been added to the Reorganization Committee. (See advertisement in another column.) It is understood that the plan of reorganization will deal first with the K. C. P. & G. road only and later the terminal properties.

**Port Arthur Canal Opened.**—On March 25 the Port Arthur Canal was opened, by means of which the K. C. P. & G. road is brought in direct connection with the deep water of the Gulf of Mexico. The canal is seven miles long and has at present a varying depth of from 18 to 25 feet. This depth by July 1 will be made 25 feet its entire length.—V. 68, p. 524.

**Long Island RR.—Unified Mortgage.**—The stockholder will vote April 11 upon a proposition to make a unified mortgage to secure \$15,000,000 of bonds to bear interest at not exceeding 4 per cent per annum, and to be payable, principal and interest, in fifty years in gold coin of the United States.

President William H. Baldwin, Jr., in a circular, says in substance: "The management believe that the time has now come for the adoption of a permanent financial policy which shall provide, so far as desirable, for bringing together all the various properties, now under one general control, into a single ownership—that of the Long Island RR. Co.—and for a conversion of their securities, so far as practicable, into a single security issued by the Long Island RR. Co., by which also adequate provision will be made for the future needs of the company. They have no doubt that a wise expenditure in the direction of permanent improvements and betterments will largely increase the earning power of the company. They accordingly recommend the execution of a mortgage of \$15,000,000 of fifty-year gold bonds, to bear interest not to exceed 4 per cent per annum, and to be secured by a mortgage upon the entire property of the company. The bonds are to be issued for the following purposes:

To be reserved to exchange or retire all the existing bonded indebtedness of the company and to acquire the securities of its leased and controlled lines, and to provide for the liquidation of all existing floating debt, real estate mortgages and equipment notes. [All securities acquired through the use of any part of this twenty-eight millions will be held by the trustee of the mortgage as additional security].....	\$28,000,000
To pay for improvements and additions recently made to the property, about.....	1,000,000
For the improvement of Atlantic Avenue, as provided for in the bills now pending before the Legislature.....	1,250,000
For equipping the Atlantic Avenue Division for electrical operation.....	1,250,000
For the abolition of grade crossings under the statute applying thereto.....	1,000,000
Reserved to pay the cost of change of motive power in case a change to electricity or other power should be deemed advisable.....	8,500,000
To be issuable, together with any bonds not used for the Atlantic Avenue improvement and the abolition of grade crossings, for permanent betterments and improvements, and the acquisition of additional property, at not exceeding the rate of \$100,000 per annum.....	4,000,000

"The mortgage as prepared contains provisions carefully guarding the issue of bonds, and provides for vesting with the trustees the title to all improvements and additions as additional security.

"Your directors have arranged to sell on favorable terms sufficient bonds to pay the floating debt of the company, and all of its real estate mortgages and equipment notes; and to exchange upon a favorable basis over \$2,000,000 bonds for securities of various issues now outstanding, which will result in an annual saving in interest charges to the company of about \$21,000 per annum."—V. 68, p. 572.

**Manhattan Ry.—New Stock.**—Of the \$15,000,000 new stock offered at par to shareholders, about 97 per cent was taken by them and the balance by the underwriting syndicate.

**Listing.**—The New York Stock Exchange has ordered that the additional issue of capital stock, \$18,000,000, be admitted to dealings on April 3.—V. 68, p. 524.

**Mexican National RR.—Payment on "A" Bonds.**—Secretary Andrew Anderson, Jr., gives notice that holders of second mortgage "A" bonds are entitled to a payment of 3½ per cent on account of past-due interest from the earnings of 1898, which will be paid on presentation of coupons Nos. 4 and 5 at the National City Bank, 52 Wall Street, N. Y., on and after April 20, 1899. The same amount was paid in April, 1898, but in 1897 only 3 per cent was paid, and in 1896 1½ per cent. The "A" bonds aggregate \$12,265,000 and the payment consequently calls for \$429,375.—V. 67, p. 1110.

**Metropolitan R.R. of Washington.—Columbia Ry.—Offer for Stock.**—Frederick C. Stevens has sent out a circular, offering, it is said, \$230 a share for Metropolitan and \$150 a share for Columbia stock, provided that the certificates be deposited with the American Security & Trust Co. of Washington by April 15. This is understood to be in accordance with the plans of the Crosby syndicate, mentioned last week, for a general consolidation.—V. 68, p. 572.

**Milwaukee Electric Ry. & Light Co.—Belle City Electric Co. of Racine, Wis.—Milwaukee Racine & Kenosha Electric Ry.—Purchased.**—General Manager John I. Beggs of the Milwaukee Electric Railway & Light Company on March 23 made the following announcement:

"The owners of the Milwaukee Racine & Kenosha Electric Ry. have purchased about 90 per cent of the stock of the Belle City Electric road and about 80 per cent of the entire issue of bonds of that company. In pursuance of our agreement with the owners of the Milwaukee Racine & Kenosha property we will commence to operate, in connection with the Milwaukee Racine & Kenosha line, the Belle City line, together with that company's lighting plant, on April 1. Considerable money is to be spent on the Belle City Road by the new owners in order to put it in the best condition. One of the agreements we have with the owners is that they will cancel their coupons of the \$250,000 bonds for at least two years to come, and pay assessments on the \$200,000 stock of from \$20 to \$25 per share, in order to provide the \$75,000 needed to put the property in shape."—V. 67, p. 128; V. 68, p. 1113; V. 68, p. 954.

**Missouri Pacific Ry.—St. Louis Iron Mountain & Southern Ry.—Texas & Pacific Ry.—Official Statement as to New Loan and Terms of Exchange.**—President George J. Gould of the St. Louis Iron Mountain & Southern Ry. on Monday issued a statement regarding the proposed new loan, and the terms of exchange for the second mortgage bonds of the Texas & Pacific. Each \$1,000 T. & P. bond, he announces, can be exchanged for \$650 in the new loan, and a syndicate offers to purchase at 85 the new bonds received in this exchange. The new bonds are to be a lien on the main line, its equipment, etc., subject only to the general consolidated mortgage of 1881 for the authorized amount of \$45,000,000, and will be a first lien on the Texas & Pacific seconds and on other securities, as also on all branches, extensions, etc., hereafter constructed or acquired with the proceeds of the loan. They are to be thirty-year 4 per cent gold bonds, and \$30,000,000 of them will be issuable, mostly at once, to retire the Texas & Pacific seconds and certain other securities, and about \$1,636,000 will be applicable to improvements, etc.; an additional \$10,000,000 will be issuable in the future, at not exceeding \$12,000 per mile, for the construction and equipment of branches and extensions.

President Gould says:

The St. Louis Iron Mountain & Southern Railway Co., having made provision to retire its bonds prior to lien to the general consolidated mortgage and land grant mortgage now proposes to create an issue of \$30,000,000 of thirty-year 4 per cent gold bonds, which are to be used to fund and retire the company's 5 per cent gold funding notes, to retire the existing car trust certificates; to acquire the outstanding mortgage securities of certain companies owning lines leased to the St. Louis Iron Mountain & Southern, aggregating a mileage of more than 310 miles; to acquire all or any part of the issue of the second mortgage 5 per cent bonds of the Texas & Pacific Railway; to make improvements, betterments and additions, and for other corporate purposes. The above amount of the issue of new bonds may be increased by not to exceed \$10,000,000 of additional bonds, which will be reserved so that they can be issued from time to time only for the acquisition or construction and equipment of extensions and branches at a rate not exceeding \$17,000 per value of such additional bonds for each mile of completed railroad constructed or acquired upon which the new mortgage shall become a first lien directly or by pledge of the bonds and stock representing ownership.

The new bonds are to be secured by a mortgage (subject to the general consolidated mortgage) on all the railroads, terminals and equipment owned by the company, and covering, as a first and only lien, all stocks and bonds embraced in the trust of the gold funding note indenture, upon satisfaction of said indenture, and all leased and branch line bonds and stocks (or the properties on which they rest) and all Texas & Pacific second mortgage bonds which shall be taken up or acquired by the use of the new bonds or their proceeds, and all betterments, improvements, additions, extensions and branches so constructed or acquired.

Holders of second mortgage bonds of the Texas & Pacific Railway Co. who shall, on or before April 15th, 1899, deposit their bonds, with coupons pertaining thereto attached, with the Mercantile Trust Co., No. 120 Broadway, New York City, will receive therefore negotiable certificates entitling the holders to receive prior to Sept. 1st, 1899, an amount of the new bonds equal at par to 85 per cent of the par amount of the deposited bonds, the new bonds to bear interest from July 1st, 1899. Depositors have the privilege at the time of depositing their bonds to elect to sell to a syndicate at 85 per cent of their par value in cash the new bonds which they will be entitled to receive, such price to be payable at the office of the Mercantile Trust Co., at the time of the issue of the new bonds. Bonds not deposited on or before April 15th, 1899, will be received (if at all) only upon such terms and conditions as the railway company hereafter may fix. It is expected that the new bonds will be issued and delivered against the certificates of deposit during the first week of July.

Of the \$30,000,000 new 4s there are reserved \$16,250,000 to retire the entire issue of Texas & Pacific seconds, while \$13,114,000 are to be applied to the retirement, at or before maturity, of the other bonds referred to in the above notice, leaving, as already stated, \$1,636,000 available for improvements, etc. The "other bonds" so to be retired include the following, which are to be replaced at once by the new 4s, dollar for dollar, viz.: gold funding notes, subject to call at par, \$3,952,000, and Kansas & Arkansas Valley first 5s, \$3,412,000, and also the following, aggregating \$3,914,000, for the retirement of which \$4,750,000 of the new 4s are reserved, and will eventually be applied, viz.: Little Rock & Fort Smith bonds and funded coupon 7s, due Jan. 1, 1905, \$2,596,000; Little Rock Junction first 6s, due April 1, 1916, \$435,000; car trusts, \$683,000; Baring Cross Bridge bonds, \$200,000. Of the \$1,636,000 available for improvements, \$1,000,000 will be issued at once.—V. 67, p. 572, 573.

**Muscatine (Ia.) Electric Ry.—Sold.**—A press dispatch says that this property, comprising the street railway, elec-

tric light and gas plants of the city, has been sold to Harry W. Huttig, General Manager of the Huttig Bros. Manufacturing Co.—V. 67, p. 480.

**National Gramophone Co.—American Graphophone Co.—Incorporated in New York.**—The National Gramophone Company, having its principal office in Yonkers, was incorporated at Albany on March 10, with authorized capital stock of \$300,000, to manufacture machines for recording and reproducing sound. The directors are Charles B. Seabury, Francis E. Burrows, W. A. S. Clarke, Emil Modick, William T. Hepper, William F. Steller and David Jennings, of New York City. The new company will succeed to the business of the old National Gramophone Co. There are no bonds outstanding.

**Decision.**—The United States Court of Appeals recently handed down a decision in the case of the American Graphophone Co. against the National Gramophone Co., which decision was favorable to the latter company. As to this decision, O. D. La Dow, Secretary of the old National Gramophone Co., said:

The decision is a decisive victory for the gramophone. The main fact which led to the litigation was that the manufacturers of certain talking machines which used wax cylinders sought, by a clause in an opinion in a case won by them over a party using their own process, to acquire for their own use the advantages peculiar to our records. In this attempt they undertook to read into the decision of the former case an interpretation which the Court of Appeals has refused to entertain. The use of "the universal joint" is also allowed the Gramophone Company, although we consider that of secondary importance. The chief feature of the decision is that the process of making sound records upon flat, hard, indestructible disks remains in the entire control and sole ownership of the Gramophone Company.

The American Gramophone Co. has capital stock to the amount of \$1,200,000 common and \$300,000 preferred listed on the Washington Stock Exchange.—V. 67, p. 72.

**National Steel Co.—On Unlisted.**—The company's \$32,000,000 common and \$36,000,000 of its \$27,000,000 preferred stock have been admitted to dealings in the unlisted department of the New York Stock Exchange.—V. 68, p. 429.

**National Woolen Co.—New Consolidation Pending.** Arrangements are being made by Brown & Adams, of Boston, to unite under this title, as a companion company to the American Woolen Co. [operating woolen mills exclusively], various concerns producing chevots, cassimeres, cloakings, overcoatings, and other products of carded wool.

**Newburyport (Mass.) & Amesbury Street Ry.—Sold.**—This property was sold at auction at Newburyport, Mass., March 28, for \$190,000 to E. P. Shaw.—V. 67, p. 690.

**Norfolk & Atlantic Terminal Co.—Mortgage for \$500,000.**—The company has filed a mortgage to the Maryland Trust Co. as trustee to secure \$500,000 5 p. c. 30-year gold bonds. D. Lowenburg is President of the Terminal Company, which, it is stated, has made a contract for the construction of an electric street railway from Norfolk to Sewell's Point, Va.

**Norfolk & Western Ry.—\$5,000,000 Bonds Sold.**—Kuhn, Loeb & Co. have purchased \$5,000,000 of the company's first consolidated mortgage 4 per cent gold bonds, of which \$1,500,000 are to be used for betterments, double-tracking and additional rolling stock, and the remainder to take up the underlying bonds which mature up to July 1, 1900. The first consol. bonds, besides being a lien upon the entire railroad property, subject to previous mortgages, are a first lien on about 833 miles of railroads, upon the terminals near Norfolk, upon the Roanoke Machine Works, and upon a large amount of valuable securities. This sale causes no increase in the company's fixed charges.—V. 68, p. 233.

**North Shore Traction Co.—Lynn & Boston R.R.—Sale of Assets—Dissolution.**—A special meeting of the stockholders of the North Shore Traction Co. will be held on April 11 for the purpose of authorizing the directors to sell all the assets and interest of the company in the Lynn & Boston R.R. and all other assets. Another meeting will be held April 28 to authorize the dissolution of the North Shore Traction Co.—V. 68, p. 279.

**Peoria Decatur & Evansville Ry.—Interest.**—The first mortgage bondholders' committee, Mr. Walston H. Brown, Chairman, notifies holders of Central Trust Co. certificates of deposit for first mortgage bonds of both divisions, that six months' interest at the rate of 5 per cent per annum will be advanced to the holders of the above-named certificates on presentation of the same at the office of the Central Trust Co. on and after April 1st, 1899.—V. 68, p. 475.

**Rapid Transit in New York City—Metropolitan Street Ry.—Offer to Build Tunnel Railway.**—At a meeting of the Rapid Transit Commission on Monday Mayor Van Wyck and Comptroller Coler being present, a final proposition was received from friends of the Metropolitan Street Railway Co. to build the tunnel road, the line to be leased when completed to the Metropolitan Street Railway Co. at a rental of 5 per cent on actual cost. The scheme provides that the tunnel shall be built on the plan of the Commission (see V. 64, p. 84, 135, and V. 65, p. 925), and that work on that first section from City Hall to Fort George shall be begun within three months after the right is acquired, and shall be completed within three years from the beginning. The second section is to be built within two years after the first has demonstrated its capacity to earn for the tunnel company 5 per cent on the actual cost of construction and equipment.

The tunnel is to form part of the general system of the Metropolitan Company, and passengers on the surface lines are to be transferred to the tunnel and vice versa, on pay-

ment of 3 cents extra fare, which is considered equivalent to furnishing the transferred passengers with the additional transportation at cost. Moreover, it is proposed to run part of the surface cars at certain points into the tunnel to remove the congestion on the surface lines and to facilitate transit between points on the East and West Sides and the City Hall, thus (1) 34th Street Ferry, Lexington Avenue and Second Avenue cars would enter at 33d Street; (2) Madison Avenue cars at 42d Street; (3) 8th Avenue and 59th Street crosstown cars at 59th Street, and (4) Columbus Avenue and Boulevard and Amsterdam Avenue cars at 55th Street. Provision is also made for express trains on separate tracks, the fare on such trains to be 10 cents, with free transfer to surface cars or local tunnel trains. The company will pay the city an annual toll equal to 5 per cent on the gross receipts of the new road; but this amount is to be paid only in so far as earned after meeting all operating expenses, taxes, and the 5 per cent to the tunnel company on the cost of its property.

Accompanying the proposition was a memorandum stating that the directors of the Metropolitan Street Railway Co. approved the offer, and reciting seven considerations on account of which the Metropolitan Street Railway, unlike others, is able to undertake the project to advantage. Mr. Orr also made a statement favorable to the proposition.

The Commission by a unanimous vote directed its counsel to prepare amendments to the Rapid Transit law, which, with a formal memorial, were sent to Albany on Thursday. The experts in the employ of this company estimate the cost of the tunnel at about \$50,000,000. The intention is said to be to lay six tracks, at least in some portions of the tunnel.

A long franchise is considered essential if the plan is to be carried out, and one of the stipulations made is that the road shall be leased "in perpetuity, or for a term practically equivalent thereto," to the Metropolitan Street Ry. Co. The proposition will be published in full in this column next week.—V. 68, p. 188, 429.

**Seaboard & Roanoke RR.—Seaboard Ry.—Ryan Suit Withdrawn.**—Thomas F. Ryan, who, as owner of about one-fourth of the company's capital stock, has long been endeavoring in the courts to get control of a majority of the shares to which he alleged he was entitled, under a certain agreement (see V. 63, p. 924), has notified his counsel, D. Lawrence Groner to withdraw all pending suits. Mr. Ryan is quoted as saying that he is convinced that under the new management the former abuses will be rectified, and that he does not wish to embarrass the Williams syndicate, which recently acquired control of the Seaboard system. It seems probable that a new company, to be known as the Seaboard Railway Co., will be organized to finance by means of a collateral trust loan the recent stock purchases of the Williams syndicate.—V. 68, p. 423.

**Southern Electric Ry. of St. Louis.—National Railway.—Consolidation Authorized.**—Mayor Ziegenhein of St. Louis has signed the bill providing for the consolidation of these companies and for the changing of the motive power of the Broadway line from cable to electricity.—V. 67, p. 1267, 1263.

**Southern Railway.—Extension.**—President Samuel Spencer said on Tuesday: "The company has had under consideration for some time the desirability of reaching Savannah by its own lines, and this seems to be an opportune time for doing so. Orders have been given therefore for surveys both from Columbia, S. C., and from Augusta, Ga., in order to determine upon the most advantageous route. There is no intention at present of going beyond Savannah.—V. 68, p. 429

**Springfield (Mass.) Breweries Co.—Consolidation.**—Robert A. Knight, of Springfield, one of the promoters says: "The new company will include the present Springfield Brewing Co., the Consumers' Co. and the Hampton Co. It will have a capitalization, actual issue, of \$2,400,000, of which \$750,000 will be 8 per cent cumulative preferred stock, \$700,000 common stock, and \$950,000 6 per cent 20-year bonds, redeemable after 10 years at 5 per cent premium. The securities are all underwritten, and it is expected that the whole matter will be closed up within the next three weeks. The bankers agree to place in the treasury \$50,000 in cash, in addition to the cash and other quick assets of the three companies.

On March 23 the Highland Brewery was also acquired.

**Standard Distilling & Distributing Co.—New Directors.**—S. M. Rice, President of the American Spirits Manufacturing Co., and Edson Bradley, Chairman of the Board of Directors of the Kentucky Distilleries & Warehouse Co., were on Thursday elected directors of the Standard Distilling & Distributing Co. Mr. Rice was also elected First Vice-President and Mr. Bradley a member of the Executive Committee. This action is supposed to be in line with the plan for the common control of the various spirits and whisky companies of the country.—V. 68, p. 86.

**United Fruit Co.—Incorporated.**—This company, with an authorized capital of \$20,000,000, filed articles of incorporation at Trenton, N. J., on March 31. The incorporators are Kenneth K. McLaren, William H. Brearley and H. W. Mead, all of Jersey City.

**United Railways & Electric Co. of Baltimore.—Income Bonds Authorized.**—The directors on Thursday authorized the issue of mortgage income bonds to the amount of \$14,000,000, to be issued dollar for dollar in place of the \$14,000,000 of preferred stock. These bonds bear 4 per cent interest, cumulative, payable semi-annually, June and December, out of any net earnings remaining after payments of taxes,

operating expenses, necessary repairs and maintenance, and the interest on the prior bonded indebtedness.—V. 68, p. 574.

**United States Cast Iron Pipe & Foundry Co.—Officers.**—On Monday the following were elected:

**Directors.**—Colgate Hoyt, A. C. Overholt, B. T. Overholt, L. R. Le-moine, George B. Hayes, C. E. Burge, E. C. Fuller, W. C. Proctor, B. F. Haughton, George J. Long, A. F. Callahan and F. C. Miller.  
**Officers.**—President, A. C. Overholt; Vice-Presidents, A. F. Callahan and Colgate Hoyt; Secretary, B. F. Haughton; Treasurer, George B. Hayes.—V. 68, p. 430.

**United States Mortgage & Trust Co.**—The New York Stock Exchange has listed the company's new issue of 5 20 year real estate first mortgage collateral trust 4 per cent gold bonds, \$1,000,000 Series I.—V. 68, p. 189.

**Union Station Ry. of Buffalo.—Proposed Station.**—Lewis Stockton, one of the directors says:

"The company is formed for the purpose of obtaining for the City of Buffalo a modern union station in time for the Pan-American Exposition. The company proposes to build a plant to cost \$1,500,000, exclusive of land and elevated structure for tracks. The demand for a union station of adequate size is one of long standing."—V. 68, p. 525.

**United Zinc & Lead Co.—Zinc & Lead Consolidation.—Incorporated.**—This company, with \$6,000,000 of authorized capital stock in \$25 shares (of which \$1,000,000 is to be 8 per cent preferred), filed articles of incorporation at Trenton, N. J., on March 29. The incorporators are Franklin Plater, Washington; F. B. Tibbitts, Boston, and Samuel Wandell, New York. The company, it is stated, has acquired the Get There Mines, at Webb City, Mo.; the Chitwood Holley, at Joplin, Mo., etc.

**United Electric Co. of New Jersey—People's Light & Power Co.—Deposits—New Securities.**—The Fidelity Trust Company of Newark has issued a circular containing the terms on which the United Gas Improvement Co. will purchase the People's stock. The circular states that the United Electric Company of New Jersey has been incorporated with a capital of \$20,000,000 and an authorized issue of \$20,000,000 of fifty-year 4 per cent gold collateral trust bonds, a portion of which will be issued in exchange for People's stock on the following terms:

The holder of each \$1,000 of the stock of the People's Company will receive \$1,750 in the above-mentioned bonds upon the surrender by him of his certificate of stock and the payment by him of \$200 in cash, which payment will be due and payable about May 31, 1899.

The circular adds that the gas company has executed a contract with the Fidelity Company guaranteeing the payment of the interest on the United Electric Company's bonds for five years, and will turn into the treasury of that company all of the 20 per cent cash payments by stockholders. The gas company will sell stock of the new company to the stockholders of the People's who pay the 20 per cent cash, to the amount of 25 per cent of their holdings of People's stock, at the rate of \$30 per share of \$100 par value. The People's stock must be surrendered by April 15. The bonds of the new company will be ready for delivery on June 1 next, and the new stock must be paid for on or before May 14. See further particulars in CHRONICLE of March 11, p. 476.

The capital stock of the People's Company has been increased to \$5,500,000, holders of March 6 having had the option to subscribe to the new issue of \$500,000 at par, viz., \$10 per share.—V. 68, p. 476.

**West Virginia & Pittsburg RR.—Interest Payment.**—Owing to delay in perfecting the arrangement outlined in their circular of Feb. 2, 1899, Brown, Shipley & Co. have arranged to advance to the holders of their certificates of deposit representing first mortgage 5s due 1900 an amount in cash equivalent at face value to the coupons falling due April 1, 1899, October 1, 1899, and April 1, 1899, with interest on the overdue coupons at the rate of 5 per cent per annum (at the rate of 49½ pence per dollar). Holders of certificates may receive such cash payment, on and after April 1, 1899, on presentation of said certificates, which must be left three clear days for examination, and to be stamped either at the office of Brown, Shipley & Co., in London, or at the office of Brown Bros. & Co., 59 Wall St., New York.—V. 68, p. 87.

**Wilmington & Chester Traction Co.—Securities Listed in Philadelphia.**—The company's \$2,000,000 capital stock and \$1,705,000 collateral trust gold 5s (authorized issue \$4,000,000) have been listed on the Philadelphia Exchange.

—The facts regarding the pending consolidation of the leading brewery companies of Pittsburg were given in our issue of Feb. 25, page 331. The consolidation, it is stated, has been successfully consummated, George B. Hill & Co. being the bankers who conducted the negotiations. The new company is known as the Pittsburg Brewing Co.

—Messrs. F. J. Lisman & Co. advertise on page x the names of a number of inactive steam railroad stocks in which they are prepared to trade. This firm makes a specialty of dealing in all inactive steam railroad stocks and bonds.

—It is announced that the \$1,962,000 St. Louis & San Francisco Central Division first mortgage 4 per cent gold bonds offered by Redmond, Kerr & Co. were largely over-subscribed.

—Messrs. N. W. Harris & Co. announce that the bonds of the Edison Electric Co. of New Orleans, recently offered, were largely over-subscribed.

## Reports and Documents.

### PITTSBURGH CINCINNATI CHICAGO & ST. LOUIS RAILWAY COMPANY.

NINTH ANNUAL REPORT—FOR THE YEAR ENDING DECEMBER 31, 1898.

PITTSBURGH, PA., April 11th, 1899.

The Directors submit to the stockholders of the Company the following statements of the operations of their road and of the other roads in which you are interested for the year ending December 31st, 1898, showing the physical condition of these properties and the financial condition of your Company at that date.

#### OPERATING RESULTS OF ALL THE LINES FOR THE YEAR ENDING DECEMBER 31ST, 1898.

EARNINGS.	
From freight traffic.....	\$13,311,819 09
" passenger traffic.....	4,585,243 27
" express traffic.....	545,157 39
" transportation of mails.....	844,029 56
" miscellaneous sources.....	207,583 87
" rents.....	185,744 70

Total earnings.....\$19,679,577 88

EXPENSES.	
For maintenance of way and structures.....	\$2,929,796 21
" maintenance of equipment.....	2,550,376 87
" conducting transportation.....	7,529,736 85
" general expenses.....	352,158 63
" taxes.....	846,072 84

Total expenses.....14,147,141 40

Net operating results.....\$5,532,436 48

The gross earnings from the operations of the Pittsburgh Cincinnati Chicago & St. Louis Railway Company and roads controlled by it for the year ending December 31st, 1898, were.....\$19,679,577 88  
And for the previous year.....19,352,491 37

Showing an increase in gross earnings of.....\$1,327,086 51

The expenses for the same period were.....\$14,147,141 40  
And for the previous year.....12,657,372 73

Showing an increase in expenses of.....\$1,489,769 17

The net operating results for the same period were.....\$5,532,436 48  
And for the previous year.....5,695,119 14

Showing a decrease of.....\$102,682 66

#### OPERATING RESULTS OF EACH LINE.

	450,623 64

Balance to credit of profit and loss Dec. 31st, 1898.....\$7,568,216 73

The tonnage transported was 13,468,789 tons, against 11,729,877 in 1897, an increase of 1,738,912 tons, the greater portion being in the through traffic. The largest items of increase were flour and other mill products, cotton, bituminous coal, coke, ores, stone, sand, lumber, pig and bloom iron, bar and sheet metal, cement, brick, agricultural imple-  
ments, and miscellaneous merchandise. The largest items of decrease were grain, anthracite coal, and iron and steel rails.

There was an increase in freight earnings of \$639,794 16, or 6 3-100 per cent. The average rate received was 5 9-10 mills, as compared with 6 3-10 mills in 1897, and as there was no change in the cost of movement, there was a decrease of 4 10 mill in the net profit as compared with 1897. There was an increase of nearly 13 per cent in the ton mileage, mostly in the through traffic.

There were carried 5,620,813 passengers, as compared with 5,371,754 in 1897, an increase of 249,059, mainly in the local travel. There was an increase in mileage of 14 12-100 per cent, and in revenue of 11 36 1-10 per cent. The average rate received was 2 cents, as compared with 2 5-100 cents in 1897, a decrease of 5-10 of a mill, but the cost having decreased 8-10 of a mill, there was an increased profit of 3-10 of a mill.

There was an increase in the average number of tons, and of passengers per car and per train.

It will be noted that there is a considerable increase in expenses in all departments. In Maintenance of Way and Structures the increase was due in a measure to the repairs consequent upon the heavy floods in the latter part of March, 1898, and to the renewals of bridges necessary to put them in condition to carry the heavy motive power and equipment now in use upon your lines. Owing to the largely increased amount of tonnage, the expenses of Conducting Transportation were also greatly augmented. The increase in Maintenance of Equipment expenses was due to heavier repairs on cars and engines, and to the outlay demanded by the requirements of the Inter-State Commerce legislation in regard to air brakes and safety couplers.

There were 19,489 tons of new steel rails and 428,672 cross-ties used in renewals during the year, and in addition, 1922 tons of new and partly worn steel rails and 38,877 cross-ties in the construction of second track, sidings and yard tracks; 194 miles of track were ballasted with gravel, 34 with stone and 47 with cinder. The actual increase in second tracks, sidings and branches was 14-22 miles.

The work upon the bridges on the different divisions was important both in quantity and character. Several prominent structures were either wholly or partially rebuilt, notably that over Sawmill Run, where two of the piers and two of the spans were reconstructed. Many light iron bridges were replaced by steel structures, and considerable repairs made to trestles and wooden bridges at various points.

It having become absolutely necessary to increase the second track on the Pittsburgh Division to accommodate your traffic, quite a large expenditure was made on the grading and sub-structure between Port Washington and Coshocton, and the work between those points will be completed this year. It has also become necessary to complete the four-track system from Broadhead Cut to Carnegie, which was authorized in 1891, and this work is now in progress.

On the Chicago Division the grading for the second track between Calumet River and Lansing was practically completed, and the residue of the work has so far progressed as to ensure its completion in the early part of the present year.

In constructing the second track on the Chartiers Railway between Carnegie and Woodville, and providing for the connection with your main line and its protection by an interlocking plant, a large sum was expended, of which a small portion was borne by your Company. This improvement was a necessary but very expensive one to the Chartiers Company, as it involved the reconstruction of one of its bridges, the conversion of Glenn's Tunnel, about 300 feet long, into an open cut, a reduction of grade, and the construction of two overhead bridges. The total cost of this work to the Chartiers Railway Company was \$101,225 14.

A new interlocking plant was also put in at the crossing of the Cleveland & Marietta Railway at New Comerstown, and one at Morgan Run, at the crossing of your line by the Cleveland Canton & Southern Railroad.

There now remain but two grade crossings by steam roads on your Pittsburgh Division not protected by interlocking arrangements, and when these are equipped it will be possible to run trains over the entire division without stopping, except for fuel and water.

There was but little work done on stations during the year. The Midway station, which was destroyed by fire, was rebuilt, new stations put in service at Hartford and Hartsdale, and a new combined passenger and freight station erected at North Vernon.

The condition of the motive power and equipment was generally maintained. Eleven new engines were purchased to supply the place of others sold and condemned; and there were various changes in the passenger equipment, through the filling of vacant numbers by combined passenger and baggage, baggage, mail and express cars, and transfers from one class to another. There were 374 freight cars, 19 cabin and 2 miscellaneous cars destroyed, and 121 cars rebuilt.

As already noted, your line suffered heavy damage from the floods that prevailed in the latter part of March, 1898, the interference with traffic exceeding that arising from any similar cause in the history of the road. The Pittsburgh Division was closed between Pittsburgh and Columbus from the morning of March 22d to the evening of the 30th; the New Cumberland Branch and the Pittsburgh Wheeling & Kentucky Railroad were impassable for three days, and the other divisions suffered materially,

though not to so large an extent, except on the Louisville Division, where the main line was closed from the 22d to the 29th and the Cambridge City Branch from the 23d to the 31st of March. The bridges and tracks were washed out at various points, and for nearly two days no trains between Columbus, Ohio, and the West could enter or leave that city. During this blockade the necessary arrangements were made for detouring your trains by other lines, so that, although the movement of the traffic was delayed, no serious loss resulted therefrom.

Your facilities in the neighborhood of Pittsburgh were further extended, and the Ohio Connecting Railway Company is permanently and substantially improving its entire roadway. The double track trestle over Cork Run, on the east approach, was filled during the year, and considerable work done in building retaining walls at the east end of the low-grade connection with your line. The same policy will be pursued with the wooden trestle on the west approach to the bridge.

#### LITTLE MIAMI RAILROAD.

Extends from Columbus, Ohio, to Cincinnati, Ohio, a distance of 119 35 miles, with branches from Xenia, Ohio, to Springfield, Ohio, 19 31 miles, and Xenia to Indiana State line, near Richmond, Ind., 53 34 miles. Total length, 193 miles.

Leased to the Pittsburgh Cincinnati Chicago & St. Louis Railway Company.

Miscellaneous income.....	22,682 40

Deduct:—	\$440,401 62
----------	--------------

One year's rent of road.....	662,826 56
------------------------------	------------

Net loss for 1898.....	\$222,224 94
Net loss for 1897.....	230,645 40

Decreased loss.....	\$8,420 46
---------------------	------------

The earnings increased \$102,804 24, but the expenses having increased \$98,242 61, the gain in net earnings was but \$4,561 63.

The tonnage carried was 1,632,590 tons, as compared with 1,522,718 tons in 1897, an increase of 109,872 tons, or 7 22-100 per cent. There was a material increase in the items of cotton, stone, sand, lumber, pig and bloom iron, castings and machinery, bar and sheet metal, cement, brick, agricultural implements, and miscellaneous merchandise, and a decrease in grain, live stock, anthracite coal, and iron and steel rails. The average rate received per ton per mile was 3 10 mill less than in 1897, and the cost having increased 1-10 mill, the net result was a profit of 1 5 10 mill, as compared with 1 9 10 mill in 1897.

There was but a slight increase in the number of passengers carried, but there was an increase of 11 8-10 per cent in the mileage. There was also an increase of nearly 11 per cent in the revenue. The average earnings decreased 1-10 mill, and the cost 1 6-10 mills, the result being a decreased loss of 1 5 10 mills, as compared with 1897.

There were 2,047 tons of new steel rails and 84,003 ties used in renewals, and 393 tons of new and partly worn steel rails and 3,246 ties in the construction of yard tracks, sidings, &c. Fourteen miles were ballasted with gravel and six with cinder. The second track was extended from the Scioto River Bridge to the Baltimore & Ohio crossing, a distance of 1-26 miles, and put in operation August 2, 1898.

A new interlocking plant was constructed at South Charleston to control the crossing with the Ohio Southern lines.

At Pendleton the work of remodeling the shops, engine house and yard was continued, thus providing the necessary facilities for running repairs to the equipment. Under this arrangement a large saving has been effected in the expense heretofore incurred at that point.

The condition of the equipment is about the same as for the preceding year. Two engines were sold, three condemned, and four purchased in their place from the Pittsburgh Cincinnati Chicago & St. Louis Railway Company. Four passenger cars and five express cars were also purchased to fill vacant numbers.

In order to furnish the facilities required for the accommodation of your business at Cincinnati, a new yard was completed in the month of July at Front Street and Broadway, for the handling of produce and perishable freight.

It is believed that this improvement will materially increase the revenue from that class of traffic over your lines.

There was expended on Capital Account the sum of \$88,730 03, of which \$23,730 03 was in the purchase of real estate at Cincinnati and \$65.00 in providing a connection with the Ohio Southern Railroad at Springfield, Ohio.

#### PASSENGER AND FREIGHT STATISTICS.

##### PASSENGER.

The number of individual passengers on all the lines in 1898 was 7,808,849, equivalent to 222,720,194 passengers carried one mile, showing an increase of 328,298 individual passengers and an increase of 25,885,231 carried one mile.

#### GENERAL REMARKS.

It will be noted that there is a large increase in the freight traffic of all the lines embraced in your system, the aggregate volume being 20,204,683 tons for 1898, as compared with 17,279,154 in the preceding year, an increase of 2,925,529 tons, or nearly 17 per cent. The tonnage mileage shows a gain of 12-93 per cent, but the rate per ton per mile shows a further reduction, the average earnings on all lines being but 6-2 mills, as against 6-6 mills for 1897. The cost of movement was the same, so that the net profit was reduced from 2 mills to 1-6 mills per ton per mile.

The passenger traffic shows an increase in volume, due in a measure to the military transportation growing out of the Spanish war. Your system carried 328,298 more passengers than in 1897, and there was an increase in the mileage of 13 15-100 per cent. As with the freight traffic, however, the passenger traffic shows a decrease in rates, the average receipts for your system being 1-99-100 cents per mile, as against 2-03-100 cents for 1897.

The aggregate revenue of all the lines operated directly or indirectly was \$19,679,577 88, an increase over 1897 of \$1,327,086 51. The increase on your main line was \$1,092,494 46, but, as already noted, the traffic was carried at exceptionally low rates, and it was necessary to largely increase the expenditures in all departments, so that the expenses show an advance of 1,307,994 32. It is essential that your property should be carefully and conservatively managed and maintained at a high standard of efficiency, without an undue increase of Capital Account, in order to enable it to meet its obligations and earn fair and permanent returns for the shareholders. With this view there has been charged against your income the sum of \$222,721 99, representing extraordinary outlay in revision of grades and alignment and other work not properly chargeable to Capital, while a further sum of \$200,000 has been set apart to meet like expenditures in 1899.

In the belief that your Profit and Loss Account had now to its credit a sum sufficient to protect your property against any probable depreciation in its value, and against contingent claims, a dividend of 1½ per cent was declared on your preferred stock, payable March 20th, 1899. It is hoped that a continuance of the prosperous conditions now prevailing in industrial pursuits, and the further growth of your traffic, will justify the payment of regular dividends thereon.

The only changes in your funded debt during the year were the retirement of \$236,000 of first mortgage 7 per cent bonds of the Jeffersonville Madison & Indianapolis Railroad Company through the operation of the Sinking Fund. No further redemptions could be made of your consolidated mortgage bonds under the terms of the trust. There were issued in accordance with the agreements of reorganization and consolidation \$88,566 68 of common and \$6,433 32 of preferred stock, in exchange for stock of constituent companies.

The Chartiers Railway shows about the same gross earnings for 1898. Its expenses, as already noted, were largely increased by the construction of the double track between Carnegie and Woodville, but its net earnings were sufficient after meeting the interest on its funded debt to pay a liberal dividend to its shareholders. The Waynesburg & Washington Railroad, which is an extension of the Chartiers Railway and is controlled by that company, shows a satisfactory result, and a slight gain in net earnings.

The Pittsburgh Chartiers & Youghiogheny Railway, which is owned jointly by your Company and the Pittsburgh & Lake Erie Railroad Company, shows a large increase in tonnage and much improved net results. The tonnage of this line and of the Chartiers Railway consists largely of bituminous coal from the Pittsburgh district.

The Pittsburgh Wheeling & Kentucky Railroad, which forms your direct connection with Wheeling, West Virginia, reflects the improved condition of the iron industries, and shows a material gain in both gross and net earnings.

In the reorganization consequent upon the sale of the Cincinnati & Muskingum Valley Railway, June 29th, 1898, under foreclosure proceedings, your company secured the control of that property, which parallels your main line and your Little Miami Divisions between Morrow and Trinway, and which it is therefore important to have worked in harmony with your interests. Under the reorganization the rate of interest upon its funded debt has been reduced from seven to four per cent, and its general condition is now quite satisfactory.

The Supreme Court of the United States having decided that under the provisions of the Anti Trust Act the agreement of November 19th, 1895, providing for the formation of the Joint Traffic Association, to which your company was a party, was illegal, the same has been formally canceled and the Association dissolved. The railways of this country are therefore not now permitted to make agreements for the establishment and maintenance of reasonable rates on traffic.

Mr. Frank G. Darlington having resigned as Superintendent of the Indianapolis Division of your line, July 1st, 1898, Mr. P. A. Bonebrake was appointed to fill the vacancy thus created, and Mr. B. W. Taylor promoted to be Superintendent of the Louisville Division in Mr. Bonebrake's place.

The Employees' Voluntary Relief Department shows an increased membership at the close of the year, the gain being 126, or about 1½ per cent.

The amount contributed by the members was \$158,902 72; the receipts from interest were \$4,083 60, and the amount contributed by the Pittsburgh Cincinnati Chicago & St. Louis Railway Company was \$30,391 53, which, added to the balance on hand at the beginning of the year—viz., \$96,968 71—makes a total of \$280,346 61. Out of this amount there was paid to families of members, in death benefits and for sickness and accident, the sum of \$140,538 35, and for operating expenses \$26,423 98, leaving a balance of \$113,384 28, from which should be deducted \$18,769 65 to cover amount of outstanding and unadjusted claims, leaving a surplus of \$64,614 63. The amount contributed by the Pittsburgh Cincinnati Chicago & St. Louis Railway Company was, as stated above, \$30,391 53, of which \$26,423 98 was used for payment of operating expenses of the Department, and \$3,967 60 for payment of extra benefits to members whose disability continued over 52 weeks, and who were therefore no longer entitled to regular benefits from the Department.

During the year there were 6,616 benefits paid, viz., 6,617 account of sickness and accident and 79 death benefits.

The General Balance Sheet, together with the usual traffic statements, is hereto appended.

It affords the Board great pleasure to acknowledge the efficiency of the officers and employees during the past year.

By order of the Board,

FRANK THOMSON,

President.

#### PITTSBURGH CINCINNATI CHICAGO & ST. LOUIS RAILWAY COMPANY.

##### General Balance Sheet December 31, 1898.

Debit.		
COST OF ROAD, EQUIPMENT, &c.		
Cost of Pittsburgh Cincinnati Chicago & St. Louis Railway, equipment, &c., at date of consolidation, Oct. 1, 1890.....		\$83,975,741 10

J. W. RENNER, Comptroller.

\* Includes fifty-one bonds drawn for Sinking Fund on which interest has ceased, but which have not yet been presented for redemption.

## THE MEXICAN NATIONAL RAILROAD CO.

TWELFTH ANNUAL REPORT—FOR THE YEAR  
ENDING DECEMBER 31, 1898.CITY OF MEXICO OFFICE,  
PASEO DE LA REFORMA.NEW YORK OFFICE,  
NO. 6 WALL STREET.

MARCH 15th, 1899.

To the Stockholders and Bondholders:

The following report of the operation of your property for the year ending December 31, 1898, is respectfully submitted by the Board of Directors:

STATEMENT OF EARNINGS FROM ALL SOURCES, AND DISBURSEMENTS UPON ALL ACCOUNTS, FOR THE YEAR  
ENDING DECEMBER 31st, 1898.

Earnings from the operation of the road, in Mexican currency.....	\$6,330,919 69
Cost of working the road.....	3,339,130 67
Net over cost of working.....	\$2,991,789 02
Equivalent in gold.....	\$2,393,431 22

From which deduct extraordinary repairs and replacements, not properly chargeable to Capital Account.

	U. S. Currency.
Replacement of rails.....	\$10,960 00
Replacement of locomotives.....	18,921 77
Replacement of cars.....	33,840 00
Replacement of bridges.....	1,615 67
Stations and warehouses.....	10,129 41
Additions to tracks and right-of-way grounds	4,624 73
Additions to shops.....	4,062 45
Increasing permanent water facilities.....	1,095 81
Change of line and gradient.....	46,836 91
	129,183 75

Balance remaining.....\$2,264,241 47

From which deduct the following general expenses, not included in the cost of working the road:

Expenses, collection and distribution of subsidy.....	\$606 37
Expenses London Agency.....	4,958 90
Exchange.....	1,175,980 77
Interest and discount.....	4,018 98
Proportional charge on account of final settlement of debts of old company.....	10,000 00
	\$1,195,565 02

Net over all exp's, renew's and repl'm'ts.....\$1,068,679 45

Interest on Prior Lien Bonds for 1898.....674,110 00

Balance for year 1897.....\$460,737 09

Less 3½ per cent dividend declared on "A" bonds in 1898.....425,775 00

34,962 09

Balance remaining on hand.....\$429,531 54

The Treasurer's report gives the same information in more detail, and under the head of Operation will be found comparisons with last year of the various features that make up these general results.

Much difficulty has been experienced with the construction of the Uruapan Extension, so far as concerns making progress with the work. This has been occasioned by the scarcity of labor in the country and to the unprecedented rainfall during the wet season from May to November, which made work at times impossible and destroyed considerable earthwork in process of construction.

The rails were, however, carried into the town on the 13th day of February, 1899, and the line will be opened for traffic during the present month. The official measurement of the line as approved by the Government gives its length as 76-161 kilometers, or 47-296 miles. The country traversed by the line till it reaches the valley in which Uruapan is situated is exceedingly rough and mountainous, and the line expensive of construction, but the promise of traffic is encouraging.

The subsidy granted by the Federal Government in aid of the construction of the line was \$5,000 per kilometer in 5 per cent Interior Bonds. \$150,000 has been paid on account and sold, realizing \$109,797. This sum has been credited to the construction account, leaving the account charged with \$953,376 40, Mexican Currency, at the close of the year. The charge against that account of \$763,701 12, shown on the General Balance Sheet, represents the U. S. Currency equivalent at the arbitrary rate for conversion on the books.

In 1889 the State of Texas enacted a law requiring among other things that all companies operating railroads in Texas establish and maintain their general offices and accounting departments within the State, and required the residence there of all the administrative officers, including President or Vice-President. The penalty for violation was forfeiture of charter and fine of five thousand dollars per day during the time any company refused to comply with the law. Under advice of counsel the management of the Texas-Mexican Railway, which had theretofore been practically managed by the Mexican National Railroad Company, was re-arranged and made to conform to the requirements of the law. A year or more after this re-arrangement the Auditor of the Railroad Commission visited and examined the Company's general offices at Laredo, Texas, and no

objection was made to its method of business. In September, 1898, another expert of the Commission made an examination into the affairs of the Company, and although there had been no change from the plan of arrangement inaugurated immediately after the passage of the law, a report was made adverse to our method, and the Commission gave us a written statement wherein they believed we were not in strict compliance with the law. We accepted this without question and re-arranged our affairs in compliance with the Commission's interpretation. Notwithstanding this, however, suit was filed by the Attorney-General of the State on December 30th, 1898, against the Texas-Mexican Railway for an enforcement of penalties for violation of the law. We believed and still believe that we were complying with the statutes of the State, and that this suit against the Texas-Mexican was filed under a misapprehension of the facts. In view of the care on the part of the Texas Mexican Railway Company to comply with the laws, and the obvious good faith of its efforts to conduct the road's affairs in harmony with their spirit, it is believed that the further thorough investigation which the State is making will result in withdrawing the suit.

#### OPERATION.

The following statement gives a comparison of the results of operating with the year 1897:

All Divisions—	Mexican Currency.
Gross earnings.....	\$6,330,919 69

Percentage of increase.....	7 91
Net earnings per mile of road operated.....	2 155 12
Net earnings per mile of road operated last year.....	2 450 57
Percentage of increase.....	-10

The above statement, taken in connection with Tables VIII. and IX. of the Treasurer's Report, furnishes an intelligent review of the operations of the property and a comprehensive comparison with past years.

Prior to 1893 we were using both coal and wood fuel, but chiefly coal. The heavy fall in silver that year made the coal, which was purchased with gold, very much more expensive than wood, and we therefore discontinued the use of coal and adopted wood altogether as a fuel. Very considerable saving was effected in this way up to the beginning of last year, when the wood supply was not sufficient to meet all demands and we again had to resort in part to the use of coal. We are now supplying a large part of the road's fuel with coal from the United States, which has largely increased the fuel account for the past year.

The actual working expenses of the line have increased over the year previous \$244,705 31. Over \$100,000 00 of this has been in the increased cost of fuel. The balance has been distributed quite generally through all the items making up working expenses, and the cause of it may fairly be assigned to some general increase in the cost of working and to the increased service as shown in Table IX.

The following statement gives the items for which was expended the sum of \$129,186 75, U. S. Currency, shown on the first page of this report as charged out on account of "Extraordinary Repairs and Replacements" during 1898:

	Mexican Currency.
<b>Replacement of Rails—</b>	
Purchase of 500 tons of 45-lb. steel rail for Texas Division, less credits from the sale of old rails.....	\$13,700 00
<b>Replacement of Locomotives and Cars—</b>	
Payment made on six locomotives purchased during the year 1898.....	\$20,027 22
Payment made on cars added to equip'm't.....	42,300 00
	62,327 22
<b>Replacement of Bridges—</b>	
Two pairs of 17-foot 6-inch girders on masonry abutments, kilometers 277 and 278.....	\$824 48
One pair 17 feet 6-inch girders to replace wooden stringers, kilometer 286 1/2.....	175 00
Completing Los Muertos pin bridge at kilometer 1017.....	1,020 11
	2,019 59
<b>Stations and Warehouses—</b>	
Building new dyke around shops and station grounds at Acambaro to prevent the Lerma River from overflowing yard.....	\$2,700 07
New stone passenger station and grading for the same at Maravatio.....	8,000 38
New transfer crane at New Laredo.....	1,961 31
	12,661 76
<b>Additions to Tracks—</b>	
Five additional side tracks.....	5,780 91
<b>Additions to Shops—</b>	
Additional shop tools.....	5,078 06
<b>Increasing Permanent Water Facilities—</b>	
Iron tank, stone foundation, Maravatio.....	1,369 78
<b>Change of Line and Gradient—</b>	
Work at Los Muertos Canon, change of line, including tunnel 254 1/2 meters, reducing curvature, removing line from encroachment of stream, shortening line 846 meters, and avoiding crossing of one stream (balance of charge).....	\$38,989 12
Between kilometers 277 and 287 to prevent Lerma River from flooding track. Line changed between kilometers 277 and 282, and grade raised between kilometers 282 and 287.....	19,557 02
	58,546 14
<b>Total.....</b>	<b>\$161,483 44</b>
Reduced to U. S. Currency at arbitrary rate of Exchange.....	\$129,186 75

The above expenditures for extraordinary account, together with what has been expended for ordinary repairs and maintenance, has left the line in very good condition.

In addition to the sum of \$13,700 shown above as having been expended on extraordinary account for rails for the Texas Mexican Railway, there has been expended for rail renewals in Mexico and charged to operating expenses, the sum of \$51,284 10.

The work of improving the line at Los Muertos, referred to in the report for 1896, and the work of strengthening the line at Acambaro, mentioned in the last report, have both been completed.

During the year six additional locomotives were purchased of the Baldwin Locomotive Works, of Philadelphia, under a common form of rental contract, which leaves the locomotives as security for the balance of payments, which are distributed through four years.

The number, class, and condition of the locomotives of the company are given in the Engine Statement at the end of this report; the number now owned being 126.

The car equipment has been well maintained and is in very fair condition.

Two passenger cars condemned were replaced during the year, leaving that class unchanged as to numbers.

In addition to replacing 63 freight cars condemned, destroyed, and sold during the year, 222 have been purchased and built in the company's shops, adding that number to the equipment as it existed at the last report. This additional equipment has been paid for out of the current funds of the company but carried over in suspense account to be charged out over several years in order to avoid burdening any one year's expenses with the whole charge. The amount charged out during the year was \$42,300, as shown in the statement of extraordinary expenses.

Notwithstanding the addition of these locomotives and cars, our equipment was not fully equal to the requirements of the traffic and six additional engines were contracted for on the same terms of payment as those previously purchased and have been delivered since the close of the year. The traffic is still pressing upon our rolling stock and the advisability of making still further additions during the present year is being considered.

The yard and side tracks, which undergo more or less change every year, were all re-measured and the following is a statement of their aggregate lengths in kilometers and miles at the close of the year:

	Kilometers.	Miles.
El Salto Division.....	2 54	2 20
Morelia Branch, including Patzcuaro yard.....	8 20	5 13
Southern Division, Mala Line, and Cintura Branch, including Acambaro yard.....	50 84	31 57
San Luis Division, Acambaro to Saltillo.....	40 37	25 38
Northern Division, including Saltillo and New Laredo yards.....	47 24	29 35
Texas Division.....	25 71	15 97
<b>Total.....</b>	<b>176 40</b>	<b>109 62</b>

#### TRAFFIC.

The agreement under which the competitive traffic of Mexico had been conducted by the Mexican Traffic Association did not work with satisfaction to all the companies through the years of 1897 and 1898; and consequently all parties thereto joined in an effort to reform the situation.

A new agreement was reached in December last with such modification as will, it is hoped, result in more harmony between the lines.

Rates have been fairly well maintained, and as a result slightly higher average rates per ton per kilometer have obtained upon competitive and import traffic. A slightly decreased average rate has obtained upon local traffic. Taken as a whole the increased volume of traffic has not yielded a corresponding equivalent in earnings, but the difference is too slight to be important.

The increased revenue from freight traffic over the year previous was \$150,780 22.

These comparisons are with the year 1897. In that year the failure of the corn crop brought large importations of corn into the country, the revenue from which to your line amounted to \$329,413 80. During the year under report no corn was imported. This fact should be taken into consideration in forming an opinion as to the real increase of the ordinary business of the Company.

#### FIRST MORTGAGE BONDS AND SUBSIDY.

The usual statement of the Trustees of the Subsidy showing the money collected and its application is published herewith.

The following gives the number of bonds which have been drawn up to the close of 1898:

Drawn for redemption in 1891.....	\$319,000 00
" " " " 1892.....	305,000 00
" " " " 1893.....	298,000 00
" " " " 1895.....	46,000 00
" " " " 1896.....	119,000 00
" " " " 1897.....	116,000 00
" " " " 1898.....	106,000 00
<b>Paid and canceled up to close of 1897....</b>	<b>\$1,191,000 00</b>
<b>Paid and canceled during 1898.....</b>	<b>110,000 00</b>
	<b>1,301,000 00</b>
<b>Leaving yet to be paid and canceled.....</b>	<b>\$8,000 00</b>

It is the painful duty of the Board to record in this report the death of Mr. Gustave J. Wetzlar, who had long been a Director of your Company.

In Mr. Wetzlar's death your Company has lost a valuable Director, who was always watchful of its best interest, and each member of the Board a friend whose wise counsel and kindly conferences were ever at their disposal.

Respectfully submitted,

W. G. RAOUL,  
President.

A comparative statement of earnings, expenses, charges, etc., will be found on page 614.

## MEXICAN INTERNATIONAL RAILROAD CO.

### ANNUAL REPORT FOR YEAR ENDING DEC. 31, 1898.

NEW YORK, March 6th, 1899.

The President and Board of Directors submit herewith their report of the Company's transactions for the year ending December 31st, 1898.

#### I. MILES OF ROAD OWNED.

The Company owns and operates the following miles of railroad:

	Miles.	Kilometers.
Main Line—Ciudad Porfirio Diaz to Durango.....	540.44	869.74
" " Reata to Monterey.....	71.80	115.54
Branches—Sabinas to Hondo.....	12.43	20.00
Monclova to Cuatro Ciénegas.....	42.48	68.36
Hornos to San Pedro.....	14.35	23.09
Pedernera to Valardena.....	5.82	9.37
Matamoros to Zaragoza (Tlahualilo Branch).....	43.52	70.04
<b>Total.....</b>	<b>780.84</b>	<b>1,176.14</b>
<b>Sidings.....</b>	<b>71.63</b>	<b>131.12</b>
<b>Total miles of track.....</b>	<b>802.47</b>	<b>1,307.26</b>

The average number of kilometers of road operated for the year was 1,060.60 kilometers (659.04 miles), the same as in the preceding year.

The main line extension from Reata to Monterey was opened to the public for traffic on December 25th, 1898. The inauguration of this extension was participated in by the President of the Republic, and other high officers of the National and State Government. This line has been built in a substantial manner. The rails are 62-lb. steel, and all bridges are metal spans on stone abutments.

The line was opened so near to the end of the year that its operations have no influence on the business for 1898.

#### II. EARNINGS AND EXPENSES.

The transportation earnings and expenses (in Mexican currency) for the year have been as follows:

	This Year.	Last Year.	+ Increase. — Decrease.
<b>Earnings from</b>	<b>\$</b>	<b>\$</b>	<b>\$</b>
Passenger and express.....	514,931 60	420,908 51	+94,023 09

<b>Total charges.....</b>	<b>488,375 68</b>	<b>489,281 30</b>	<b>—905 62</b>
<b>Surplus for the year.....</b>	<b>163,675 57</b>	<b>38,288 61</b>	<b>+125,386 96</b>

The year's operations show an increase of \$462,947 93, or 15.25 per cent in gross earnings, an increase of \$85,247 41,

or 4.40 per cent, in working expenses, and an increase of \$125,386 96 in U. S. currency in the surplus for the year, after payment of all fixed charges.

Earnings from local passengers were \$352,280 75, an increase of \$62,860 43, or 21.72 per cent, and from through passengers, \$96,890 89, an increase of \$24,291 59, or 33.46 per cent, over the preceding year. First class passengers formed 10.38 per cent, second class 22.39 per cent and third class passengers 67.23 per cent of the total number of passengers carried.

Earnings from coal and coke were \$884,539 35, an increase of 110,088 74, or 14.22 per cent, and from local freight, other than coal and coke, \$1,544,328 82, an increase of \$309,384 58, or 25.05 per cent over the preceding year. Earnings from through freight were \$355,730 56, a decrease of \$54,048 93, or 13.19 per cent, against the preceding year.

The working expenses were \$2,021,599 19, an increase of \$85,247 41, or 4.40 per cent over the preceding year. The ratio of expenses to gross earnings was 57.81 per cent, against 63.81 per cent in the preceding year. Included in the year's expenses is the cost of exchanging 72.45 kilometers of new rails, principally 75 lbs., for the lighter-weight rails in the track, which are being used advantageously elsewhere; also \$46,142 53 for cars and value of buildings destroyed by the burning of the paint shop at Diaz December 21st, 1898. The small increase in expenses—taking into consideration that there has been an increase of 22.40 per cent in passengers carried one kilometer, of 7.62 per cent tons of commercial freight carried one kilometer, and of 8.55 per cent in kilometers run by locomotives in traffic service—has resulted largely from the Company's policy of making permanent improvements as renewals became necessary, and adding to its facilities for the purpose of reducing the cost of operation. The constant use of the freight equipment caused by the increased traffic has limited the opportunity for making the desired repairs to this equipment, and these will have to be made during the ensuing year.

The renewals of rails and ties were as follows:

	1898.	1897.
Kilometers of new 50 lb. steel rails.....	.....	66
Kilometers of new 54 lb. steel rails.....	.....	237
Kilometers of new 62 lb. steel rails.....	630	03
Kilometers of new 75 lb. steel rails.....	86.15	.....
<b>Total.....</b>	<b>72.45</b>	<b>3.08</b>
Number of untreated cross-ties.....	66,514	72,934
Number of burnettized cross-ties.....	60,517	59,238
<b>Total number of ties.....</b>	<b>127,031</b>	<b>132,172</b>
Equal to kilometers of track.....	72.18	75.10

Of the ties put in the track during the year 37,829 were obtained in Mexico.

There were renewed during the year 11,512 lineal feet of trestling, in the repairs of which 57,537 lineal feet of piling and 711,322 feet B. M. lumber were used; there were also filled up 820 lineal feet of timber trestling.

The company owns 46 locomotives, 29 passenger cars of all kinds, 1,439 freight cars, having an average capacity of 25.65 tons per car, and 21 road service cars. The locomotives and cars are all equipped with air brakes. Two baggage, express and mail cars, 1 third class passenger and 69 freight cars were added during the year, and charged against the fund for replacement of cars. The unexpended amount to the credit of this fund at the close of the year is \$51,958.11 Mexican.

#### III. GENERAL REMARKS.

The capital account was increased during the year by the issue of \$718,000, face value, 4 per cent First Consolidated Mortgage Gold Bonds, in payment for the main line extension, Reata to Monterey. Also by the issue of \$1,733,200 face value, capital stock due on account of the construction of the branches from Monclova to Cuatro Ciénegas, 42.48 miles, Matamoros to Zaragoza, 43.52 miles, and 44 miles of main line.

The expenditures for additions, betterments and improvements amounted to \$157,989 76, Mexican currency, equal to \$72,675 29 U. S. currency, at the average rate of 45-58 cents on the silver dollar. This latter sum is a charge against the \$300,000 First Consolidated Gold Mortgage Bonds issuable for additions, betterments and improvements, at not more than \$200,000 in any calendar year. The principal expenditures were: \$11,510 94 for converting 29 timber trestles into permanent structures, all with masonry abutments and wing walls; \$16,881 55 for shop buildings of stone at Diaz; \$12,015 32 for fencing 38-03 kilometers of right of way on both sides of track; \$11,413 99 for additional section and tool houses; \$20,046 72 for 4-95 kilometers of additional sidings; \$32,333 48 for station buildings, water stations and other buildings; \$19,033 56 for shop machinery and tools, and \$10,578 23 for equipment. The details of these expenditures are shown on Table No. 7, pamphlet.

The hospital service and medical treatment of the Company's employes, established some years ago, has been maintained with as satisfactory results as in the past. There were treated during the year 2,629 patients. Contributions to the Hospital fund amounted to \$16,799 50, the expenses were \$12,505 63, leaving a surplus of \$4,293 85. The balance to the credit of this fund at the close of the year 1898 amounted to \$11,780 20.

Additional houses for the use of employes have been constructed at various points on the line. A building has been erected at Diaz for the use of the community settled there, and serves for educational purposes and for evening entertainments. This, with the club previously established and the many homes built by the Company, has led to the growth of a spirit of co-operation between the employes and the property which is reflected in many ways in the results herein reported.

Mexican citizens continue to seek employment in this Company's service, and at the end of the year 1,439 held positions in its various offices and departments. In the mining and other interests affiliated with the railroad there are 2,323 Mexican employes, so that the total number engaged in these enterprises is 3,753, an increase of 484 for the year. During the same period there has been an increase of but 39 foreigners in these services.

National, State and local authorities continue to manifest appreciation of the Company's developments and to extend their co-operation in various ways. All accounts between the Company and the Government are promptly and fully settled.

The construction of the new shops, to replace those destroyed in 1896 by fire, adds materially to the economy in this branch of operations and now affords facilities by which all replacements of equipment can be made in Mexico.

There have been ordered to meet the demands of the Company's increasing traffic one 18x24 fifty-ton 6-wheel switching locomotive and five 20x28 Mogul freight locomotives, weighing 144,260 lbs. each, of which 124,400 lbs. are on the drivers. Also 2 baggage, express and mail cars, 1 combined first and second class passenger car, 1 third class passenger car, 100 box, 100 gondola and 100 flat cars of 30 tons capacity, all equipped with air brakes and automatic couplers.

The accompanying tables (in pamphlet) show in detail the variations occurring during the year in the transportation of both passengers and freight.

The increase over last year in the movement of passengers as well as in comparison with that year's increase over its predecessor is equally interesting both as to numbers traveling and as to the revenue returned. The increased tonnage for the year has been 40,529 tons and the increase in revenue from freight as compared with the increase from the previous year is equally marked.

Traffic exchanged with our connections is of growing importance, and foreign business continues to move over this railroad in large volume.

An examination as to the origin of traffic shows that at the various junction points with other roads the tonnage delivered from this road exceeded that received by it by 11,637 car-loads. There has also been a steady increase in business between the stations on the line of this road, especially at Durango and Torreon, in each of which places several new and important industries have developed during the year. The city of Diaz also shows an increase of activity as compared with previous years. To meet the requirements of various enterprises along the road nearly five kilometres of new sidings have been constructed, and in other respects local business shows important progress and indicates the prosperity of the country tributary to the road.

This growth of traffic from the territory tributary to the road warrants the company in continuing its past policy of giving to local shippers the fullest opportunities for their prosperity, and of resisting all efforts which enterprises at a distance may make of controlling traffic to the disadvantage of the local producer.

For details in regard to receipts and disbursements, traffic, character, condition and service of rolling stock, and working results, reference is made to the tables accompanying the report of the Controller, in pamphlet.

The Board of Directors desires to acknowledge its indebtedness to the officers and employes for the faithful discharge of their duties.

By order of the Board,  
THOS. H. HUBBARD,  
President.

## CAPITAL ACCOUNT DECEMBER 31, 1898.

—Frederick T. Chandler and Percy M. Chandler, members of the Philadelphia Stock Exchange, have issued a handsome pamphlet containing a descriptive and statistical analysis of the history and finances of the Union Traction Co. of that city. The pamphlet contains a fine map, and, so far as we know, is much the most exhaustive compilation that has appeared regarding Philadelphia's great trolley system. We understand that J. P. Crittenden, well known as the editor of the "Philadelphia Red Book," was responsible for the preparation of the pamphlet, a fact that ensures for it a high degree of accuracy.

# The Commercial Times.

## COMMERCIAL EPITOME.

FRIDAY NIGHT, March 31, 1899.

The closing of the foreign markets on Thursday in observance of the Easter holidays, and the observance of Good Friday by most of the leading commercial and financial exchanges, had a tendency to interrupt, to some extent, business activity during the latter part of the week. In general, however, healthy business conditions have been experienced: trade is steadily growing, and in the main prices are on a remunerative basis. The situation in the Far East has attracted considerable attention. The advancement of the American troops upon and the taking of the capital of the Philippines, and the bombardment of Samoa by the English and American warships, have been topics of considerable interest. Weather conditions in the interior and Southwest have been less favorable, a sharp fall in the temperature being reported.

Lard on the spot has been quiet, as both exporters and refiners have been slow buyers; still, as there has been no pronounced pressure to sell, values have held to a fairly steady basis, closing at 5-52½c. for prime Western and 5-15c. for prime City. Refined lard has been in more active demand, and steady, closing at 5-70c. for refined for the Continent. Speculation in lard for future delivery has been quiet and there has been an easier undertone on expected large stocks to be shown by the monthly statement on April 1st. The close was dull.

### DAILY CLOSING PRICES OF LARD FUTURES.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
March.....	5-52	5-62	5-52	5-55	5-52	....

Pork has continued in fairly active demand, and has sold at steady prices, closing at \$3 87½@3 75 for mess, \$10 50@11 for family and \$10 50@10 75 for short clear. Cnt meats have been quiet but steady, closing at 4¼@4½c. for pickled shoulders, 7@7½c. for pickled hams and 5@5½c. for pickled bellies, 14@10 lbs. average. Beef has been in less active demand but steady, closing at \$3 50@3 59 for mess, \$9@10 50 for packet, \$9 50@11 50 for family and \$14 50@15 00 for extra India mess in tcs. The demand for tallow has been quiet, but values have held steady at 4¼c. Oleo-stearine has been quiet and unchanged at 5¾c. Lard stearine has been easier, closing at 6¼@6½c. for prime City. Cotton seed oil has weakened slightly, closing at 25½@26c. for prime yellow. Butter has had a fair sale, and values have been well maintained, closing at 14@22c. for creamery. Cheese has had a good sale, and prices have advanced slightly, closing at 9@13c. for State factory, full cream. Fresh eggs have weakened under large receipts, closing at 12¾c. for choice Western.

Brazil grades of coffee have had only a limited sale; still there has been a slight improvement in the demand from that recently experienced, and the tone has been steadier, closing at 6½c. for Rio No. 7. W. I. growths of coffee have been in moderate demand and steady, closing at 7¼@8c. for fair Cutcuta. East Indian growths have been well held for desirable grades, closing at 25@25½c. for standard Java. Speculation in the market for contracts has been quiet, but on some buying by shorts to cover contracts and a slight falling off in the crop movement prices have held steady. Friday was a holiday. Following are final asking prices:

April.....	4-95c	July.....	5-20c.	Oct.....	5-45c.
May.....	5-00c.	Aug.....	5-30c.	Dec.....	5-65c.
June.....	5-15c.	Sept.....	5-35c.		

Raw sugars have been in demand and prices have advanced, closing at 4-7-10c. for centrifugals, 96-deg. test, and 3½@3 15-10c. for muscovado, 89-deg. test. Refined sugar has been fairly active and firm at 5½c. for granulated. Other staple groceries have been firm, but generally quiet.

Kentucky tobacco has been quiet but steady. Seed leaf tobacco has been in fair demand and values have held to a steady basis. Sales for the week were 2,320 cases, as follows: 400 cases 1897 crop, Wisconsin Havana, 8½@10c.; 600 cases 1896 crop, Wisconsin Havana, 9½@11½c.; 300 cases 1895-96 crops, Pennsylvania seed leaf, 12½@13½c.; 200 cases 1897 crop Pennsylvania seed leaf, 11¼@11¾c.; 150 cases 1896 crop, Onondaga, 12½@14c.; 100 cases 1898 crop, New England Havana, forced sweat, 30@60c.; 450 cases 1898 crop, Wisconsin Havana fillers, p. t., and 120 cases 1897 crop, Zimmers, 17@22c.; also 500 bales Havana, 70@95c. in bond, and 75 bales Sumatra, 80c.@1 65 in bond.

Business in the market for Straits tin has been fairly active and prices have advanced in response to stronger foreign advices. The close was firm at 24@24½c. Ingot copper has been in better demand and prices have advanced, closing at 17¼c.@17½c. for Lake. Lead has had a fair sale at steady prices, closing at 4-40c. for domestic. Spelter has had a moderate sale at unchanged values, closing at 6¼c. for domestic. Pig iron has been in demand and firm, closing at \$14 50@16 for domestic.

Refined petroleum has been easier, closing at 7-25c. in bbls., 4-75c. in bulk, and 8c. in cases. Naphtha steady at 10c. Crude certificates have been neglected; credit balances have been unchanged at \$1 13. Spirits turpentine has been quiet and easier, closing at 42½@43c. Rosins have been steadier, closing at \$1 35@1 37½ for common and good strained. Hops have been in limited demand and steady. Wool in slightly better demand and steady.

## COTTON.

FRIDAY NIGHT, March 31, 1899.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 101,801 bales, against 108,622 bales last week and 95,510 bales the previous week, making the total receipts since the 1st of Sept., 1898, 7,652,362 bales, against 8,003,343 bales for the same period of 1897-8, showing a decrease since Sept. 1, 1898, of 350,986 bales.

**Helena, Arkansas.**—Planting is very backward, in fact but few have commenced plowing. The weather is cold this morning. We have had rain on two days of the week, the rainfall reaching seventy-five hundredths of an inch. Average thermometer 46.5, highest 63, lowest 34.

**Memphis, Tennessee.**—Pickling is yet going on. Preparations for the new crop are active but very backward. The river is thirty-five and three-tenths feet on the gauge, or two and three-tenths feet above the danger line, and stationary. Rain has fallen on six days during the week, to the extent of fifty-nine hundredths of an inch. The thermometer has averaged 48.3, the highest being 68.8 and the lowest 32.

**Nashville, Tennessee.**—There has been rain during the week to the extent of two inches and thirty-six hundredths. The thermometer has averaged 59, ranging from 27 to 72.

**Montgomery, Alabama.**—Freezing weather occurred early in the week, but latterly the temperature has been warmer. We have had rain on one day during the past week, the precipitation being forty-six hundredths of an inch. Average thermometer 60, highest 87 and lowest 32.

**Selma, Alabama.**—It has rained on two days of the week, the rainfall being one inch and twenty-five hundredths. The thermometer has averaged 52, the highest being 77 and the lowest 34.

**Mobile, Alabama.**—Farm work is making fair progress, but is from three to four weeks late. Rain fell in the interior the latter part of the week. We have had rain here on two days of the week, to the extent of one inch. The thermometer has ranged from 42 to 76, averaging 61.

**Madison, Florida.**—Sales of fertilizers have been about the same as last season, and the acreage planted will show little or no difference. There has been rain on one day during the past week, the rainfall being one inch and forty hundredths. The thermometer has averaged 68, ranging from 42 to 83.

**Savannah, Georgia.**—We have had rain on three days of the week, to the extent of one inch and two hundredths. The thermometer has ranged from 40 to 85, averaging 63.

**Augusta, Georgia.**—Rain has fallen on two days of the week to the extent of fifty-nine hundredths of an inch. Average thermometer 58, highest 81, lowest 34.

**Charleston, South Carolina.**—There has been rain on four days during the week, to the extent of forty-eight hundredths of an inch. The thermometer has averaged 61, the highest being 77 and the lowest 40.

**Stateburg, South Carolina.**—Preparations for planting, although very backward, are progressing rapidly now. There has been rain on two days of the past week, the rainfall reaching fifty-seven hundredths of an inch. The thermometer has averaged 57.8, ranging from 35 to 82.

**Greenville, South Carolina.**—There has been rain on two days during the week, to the extent of two inches and three hundredths. The thermometer has ranged from 40 to 65, averaging 52.

**Wilson, North Carolina.**—The weather is more favorable for farming operations. There has been rain on two days of the past week, the precipitation reaching sixty-five hundredths of an inch. Average thermometer 50, highest 72 and lowest 33.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock March 30, 1899, and March 31, 1898.

	Mar. 30, '99.	Mar. 31, '98.
New Orleans.....	Above zero of gauge.	15.5

All others—						
1898-99..	1,000	1,000	4,000	62,000	66,000	
1897-98..	.....	.....	10,000	24,000	34,000	
1896-97..	2,000	3,000	17,000	50,000	67,000	
Total all—						
1898-99..	18,000	18,000	12,000	351,000	366,000	
1897-98..	12,000	12,000	16,000	183,000	192,000	
1896-97..	22,000	22,000	44,000	407,000	454,000	

According to the foregoing, Bombay appears to show an increase compared with last year in the week's receipts of 7,000 bales. Exports from all India ports record a gain of 6,000 bales during the week and since September 1 show an excess of 167,000 bales.

**ALEXANDRIA RECEIPTS AND SHIPMENTS OF COTTON.**—Through arrangements we made with Messrs. Davis, Benaichi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, March 29	1898-99.	1897-98.	1896-97.
Receipts (cantars)*...			
This week .....	70,000	105,000	30,000
Since Sept. 1.....	5,312,000	6,253,000	5,408,000
Exports (bales)—			
To Liverpool.....	10,000	219,000	6,000
To Continent.....	5,000	241,000	7,000
Total Europe.....	15,000	460,000	13,000
	490,000	591,000	11,000
	555,000		

\* A cantar is 98 pounds.

† Of which to America in 1898-99, 33,704 bales; in 1897-98, 33,331 bales; in 1896-97, 43,477 bales.

This statement shows that the receipts for the week ending Mch. 29 were 70,000 cantars and the shipments to all Europe 15,000 bales.

**MANCHESTER MARKET.**—Our report received by cable to-night from Manchester states that the market is quiet for both yarns and shirtings. Merchants are buying very sparingly. We give the prices for to-day below and leave those for previous weeks of this and last year for comparison.

**JUTE BUTTS, BAGGING & C.**—There has been no important development in jute bagging since our last report, business being very quiet. Prices are nominal at 5 1/2¢ for 1 1/2 lbs. and 6 1/2¢ for 2 lbs., standard grades. Jute butts continue dull. Quotations are 1 05¢ for paper quality and 1 1/2¢ for mixing to arrive.

**SEA ISLAND COTTON MOVEMENT.**—We have received this (Friday) evening by telegraph from the various ports the details of the Sea Island cotton movement for the week. The receipts for the week ending to-night (March 31) and since Sept. 1, 1898, the stocks to-night, and the same items for the corresponding periods of 1897-98, are as follows.

Receipts to March 31.	1898-99.		1897-98.		1896-97.	
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.
Savannah.....	153	50,203	70	56,380	5,918	14,285

Total.....	705	415	1,120	18,995	8,199	27,193	1,184	33,019
Total 1897-98.....	978	115	1,093	26,238	7,238	33,476	408	28,393

A considerable portion of the Sea Island cotton shipped to foreign ports goes via New York, and some small amounts to Boston and Baltimore. Instead of including this cotton for the week in which it leaves the Southern outports, we follow the same plan as in our regular table of including it when actually exported from New York, &c. The details of the shipments of Sea Island cotton for the week will be found under the head "Shipping News," on a subsequent page.

Quotation March 31: 40¢ for Florida, common, 90¢; medium fine, 100¢; choice, 130¢.

Charleston, Carolina, medium fine, 180¢; fine, 200¢; fully fine, 22 to 25¢; extra fine, 10 to 50¢.

OVERLAND MOVEMENT, &C., TO APRIL 1.—In our editorial columns to-day will be found our regular statements of overland movement, receipts, exports, spinners' takings, &c., brought down to April 1.

NEW ENGLAND MILLS SITUATION.—PROPOSED CONSOLIDATION OF COTTON YARN MILLS.—Reports from New Bedford, Mass., indicate that the representative of a British syndicate is making efforts to combine all the cotton yarn mills of the United States under one control.

EXPORTS OF YARN FROM INDIA TO CHINA AND JAPAN.—We give below a statement of the shipments of yarn from India to China and Japan during the calendar years 1878 to 1898, inclusive:

	To China (bales 400 lbs. each.)	To Japan (bales 400 lbs. each.)	Total bales.
1878.....	45,933	1,745	47,678
1879.....	45,530	4,842	50,372
1880.....	63,194	4,527	67,721
1881.....	61,783	7,378	69,161
1882.....	81,434	9,854	91,288
1883.....	94,982	17,421	112,403
1884.....	127,318	13,846	141,164
1885.....	154,517	19,020	173,537
1886.....	199,407	20,543	219,950
1887.....	204,148	39,730	243,878
1888.....	234,071	52,697	286,768
1889.....	254,697	62,220	316,917
1890.....	325,060	37,722	362,782
1891.....	365,038	10,939	375,977
1892.....	385,771	21,415	407,186
1893.....	317,000	14,102	331,102
1894.....	369,089	10,654	379,743
1895.....	403,075	2,830	405,905
1896.....	509,898	2,138	512,036
1897.....	427,520	750	428,270
1898.....	489,819	475	490,294

From the above it will be seen that the shipments to China during the year 1898 show an appreciable increase over 1897, but are less than in 1896. The exports to Japan, however, were the smallest for any year included in the statement.

SHIPPING NEWS.—As shown on a previous page, the exports of cotton from the United States the past week have reached 89,521 bales. The shipments in detail, as made up from mail and telegraphic returns, are as follows:

	Total bales.
NEW YORK.—To Liverpool, per steamers Cymric, 2,180 upland and 200 Sea Island.....	2,380
To New York, per steamer Ohio, 674.....	674
To Newcastle, per steamer Salerno, 1,381 upland and 230 Sea Island.....	1,611
To Havre, per steamers La Touraine, 165 Sea Island.....	165
To Massapequa, 157 upland.....	157
To Marseilles, per steamer Victoria, 100.....	100
To Bremen, per steamer Kaiser Friedrich, 100.....	100
To Antwerp, per steamer British Trader, 1,297.....	1,297
To Lisbon, per steamer Oevenum, 100.....	100
To Genoa, per steamers Kaiser Wilhelm II., 890.....	890

## BREADSTUFFS.

FRIDAY, March 31, 1899.

Only a limited volume of business has been transacted in the market for wheat flour, but the tone has been firmer in sympathy with the advance in wheat, and buyers have found that to make purchases it has been necessary to pay slightly higher figures. Owing, however, to the fact that there has continued to be an absence of confidence in the stability of ruling prices, buyers as a rule have been disposed to operate on a hand-to-mouth basis. Rye flour has had only a small sale, as buyers and sellers have been apart in their idea of values. The demand for corn meal has been quiet, but no changes have been made in quoted prices, and at the close the tone of the market was steady.

Speculation in wheat for future delivery has continued fairly active and there has been a further advance in prices. The principal strengthening factor in the situation has been the unfavorable crop account from the Southwest, accounts received reporting damage to the plant by the cold weather experienced. These reports have been accompanied by buying orders, St. Louis in particular being a good buyer. At the advance Chicago bear operators were disposed to sell the market with some show of freedom, although at the close of the week the selling pressure had subsided to a considerable extent and there was a general inclination shown by shorts to cover contracts, which also helped to carry values to a higher basis. Foreign markets have been stronger, and this, too, has had a strengthening influence. The volume of export business transacted, however, has been small, as shippers have been

slow buyers at the higher prices ruling. A slight squeeze in March contracts has attracted some attention in the local market. To-day there was a dull market. There were no cable advices, no reports from the interior markets and prices gradually sagged. The spot market was dull, no sales being reported.

July delivery in elev.....	69½	71½	70½	73½	73	day.

Indian corn futures have been quiet. Early in the week there was a slight advance in prices based on a light movement of the crop and small country offerings; then came a reaction under moderate selling for Western account, elevator people in particular being conspicuous sellers, and easier foreign advices had a weakening influence. Subsequently, however, following the advance in wheat and some talk as to the possibility of a delay in planting the new crop, the market turned stronger, and prices again advanced. Business in the spot market has been fairly active, as exporters have continued buyers. To-day there was a dull, featureless market. The spot market was quiet and unchanged. Sales reported for export were 50,000 bushels.

Oats for future delivery in the Western market have been quiet and the course of prices has followed closely after corn. Early in the week there was a fractional advance on some buying by shorts to cover contracts and reports of delayed seeding; then came a slight reaction under liquidation by longs, but later the market again turned firmer in sympathy with other grains, and prices advanced slightly. To-day the market was dull and unchanged.

## THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., March 31, 1899.

The quieter conditions referred to last week have been prolonged through this, and for the matter of that little change is expected for two or three weeks to come so far as the primary market is concerned. This is not disturbing sellers to an appreciable extent. The close of the first quarter of the year is always a quiet time and more natural this year than usual on account of the very extensive business transacted during the past three months in most lines of dry goods. The record in the cotton goods division has probably never been exceeded. As a result the latter is in an unusually strong position and well able to stand a lull in the demand without prices suffering to any extent. Bad weather has again told against the local jobbing trade, but the reports coming to hand from other quarters are still encouraging, distribution continuing on quite a liberal scale and keeping stocks between the primary market and the retail trade from accumulating. In the woolen goods division new dress fabrics for fall are doing well, but the men's-wear division continues quiet. Silks are strong. Collections satisfactory.

WOOLEN GOODS.—The business in men's-wear woolen worsted fabrics in heavy-weights continues quiet in the aggregate. Some lines of heavy serges have sold well enough to be withdrawn, but the majority of agents are still decidedly

short of orders on both plain and fancy fabrics. Prices are not notably lower, but there is considerable quiet irregularity, particularly in low and medium grade fancies. Re-orders for spring weights are unusually good for the time of year, and fabrics available for quick delivery are firm. Overcoatings are quiet. Cloakings occasionally firmer. Fall dress goods in free request, fancies promising well. Flannels show an upward tendency and blankets steady.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending March 27 were 2,923 packages, valued at \$132,473, their destination being to the points specified in the tables below:

New York to March 27.	1899.		1898	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.
Great Britain.....	26	608	47	953
Other European.....	47	206	28	333
China.....	52,109	12,002	38,804	3,990
India.....	978	6	10,510	5,642
Arabia.....	975	9,779	218	3,574
Africa.....	2,220	143	1,080	1,548

Total.....	2,923	93,546	13,637	80,594
China, via Vancouver.....	.....	.....	.....	.....
Total.....	2,923	93,546	13,637	80,594

\* From New England mill points direct.

The value of the New York exports for the year to date has been \$3,291,516 in 1899, against \$2,829,302 in 1898.

Heavy brown sheetings and drills continue very firm and actual business is restricted thereby, orders on both home and export account being frequently turned down. There has been some irregularity in light grey goods, but tone steadier at the close. Heavy coarse colored cottons are firm, denims particularly so, few leading makes being in stock. There has been a quiet demand for bleached cottons in all grades, but the market preserves its firmness, and in wide sheetings also a quiet demand has no effect upon the tone. Cotton flannels and blankets and quilts are quiet but firm. No change in kid finished cambrics or other cotton linings. Business in prints moderate. Stocks of both fancy and staple lines are much smaller than usual at this time of year, and prices are firmly maintained. Staple and dress ginghams scarce and firm. There is a good demand for new fall lines of fancy cotton dress goods.

FOREIGN DRY GOODS.—General demand moderate. Dress goods steady. Silks tending against buyers. Ribbons firm. Linens also firm. Men's wear woollens and worsteds quiet.

#### Importations and Warehouse Withdrawals of Dry Goods

The importations and warehouse withdrawals of dry goods at this port for the week ending March 30, 1899, and since January 1, 1899, and for the corresponding periods of last year are as follows:

Imports Entered for Consumption for the Week and Since January 1, 1899 and 1898.	Week Ending March 30, 1899.		Since Jan. 1, 1899.		Week Ending March 31, 1898.		Since Jan. 1, 1898.

# STATE AND CITY DEPARTMENT.

## TERMS OF SUBSCRIPTION.

The INVESTORS' SUPPLEMENT will be furnished *without extra charge* to every annual subscriber of the COMMERCIAL AND FINANCIAL CHRONICLE.

The STATE AND CITY SUPPLEMENT will also be furnished *without extra charge* to every subscriber of the CHRONICLE.

The STREET RAILWAY SUPPLEMENT will likewise be furnished *without extra charge* to every subscriber of the CHRONICLE.

The QUOTATION SUPPLEMENT, issued monthly, will also be furnished *without extra charge* to every subscriber of the CHRONICLE.

TERMS for the CHRONICLE with the four Supplements above named are Ten Dollars per year within the United States and Twelve Dollars in Europe, which in both cases includes postage.

## Terms of Advertising—(Per Inch Space.)

Transient matter (each time)	\$4 20	Three Months (13 times)	\$29 00
STANDING BUSINESS CARDS.		Six Months (26 times)	50 00
Two Months (8 times)	\$22 00	Twelve Months (52 times)	87 00

**California.—Legislative Bills.**—Among the bills passed by the State Legislature recently adjourned was one providing for a Constitutional amendment (known as Senate No. 14) exempting from taxation all bonds that shall hereafter be issued by the State of California, or by any county, city, municipal corporation or district in the State.

**Camden—Stockton, N. J.—Annexation Bill Passed.**—The State Senate has passed House bill No. 154, annexing the town of Stockton to the city of Camden.

**Cape May Point, N. J.—Borough Re-created.**—Senate bill No. 95 re-creating the borough of Cape May Point has passed the House.

**Colorado.—Refunding Bond Bills Passed by Senate.**—The State Senate has passed bills enabling counties and school districts to refund their bonded indebtedness.

**Minnesota.—School Bonds Authorized.**—The State Legislature has passed a bill providing for the issuance of bonds for the purchase of sites and erecting school houses in independent districts.

**School Fund Investments.**—Senate bill No. 373, providing for the purchase of municipal bonds for the permanent school and university fund has passed that body.

**Nebraska.—Bond Bill Signed.**—The Governor has signed a bill recently passed by the State Legislature authorizing cities of the second class and villages to issue bonds in aid of internal improvements.

**New Jersey.—Legislature Adjourns.**—The State Legislature adjourned on March 24, 1899.

**School Fund Investments.**—The House has passed Senate bill No. 219, authorizing the State Treasurer to invest the public school funds in the bonds of the several school districts.

**New York State.—Biennial Sessions Defeated.**—On March 28, 1899, the motion to take from the table the resolution providing for biennial sessions of the State Legislature was defeated. The vote was 25 in favor and 24 against, but the motion was lost in accordance with an agreement made last week that unless the advocates of the measure could muster 26 votes—a majority of the Senate—the resolution should be regarded as killed for this year.

**South Dakota.—Bill Reducing Legal Rate of Interest Defeated.**—We are advised that the State Legislature failed to pass the bill reducing the legal rate of interest to 10% on contract and 7% without.

**Tennessee.—Contracts Payable in Legal Tender.**—The State Legislature has passed a resolution reading as follows:

Be it enacted by the General Assembly of the State of Tennessee, That all contracts hereafter executed or payable in this State for the payment of any sum of money, whether in gold, silver or coin, may be discharged by any money which is by law a legal tender for the payment of debts when the contract matures; provided, that nothing in this Act shall apply to existing contracts.

It will be remembered that early in the year Governor McMillan vetoed several bills providing for the issuance of bonds payable in gold.

**Constitutional Convention Bill.**—A bill has been introduced in the State Legislature providing for an election to vote on the question of holding a Constitutional Convention.

**Wisconsin.—Municipal Bonds Authorized by Senate.**—The Senate has passed a bill permitting municipalities to issue bonds for the purchase and maintenance of telephone lines.

## Bond Proposals and Negotiations this week have been as follows:

**Allen County (P. O. Scottsville), Ky.—Bonds Not Yet Sold.**—It has been reported that this county had sold \$175,000 bonds. Upon inquiry we learn that the bonds are not yet sold. W. N. Cook, County Treasurer, writes us that "the contract to sell the bonds has been made with Jno. J. McHenry, Attorney at Law, Louisville, Ky. The Court has advertised its intention to issue bonds, and if the 30 days

required by law for such advertisement should expire and no petition for an election be filed (thus showing that no objections are entertained against the bond issue), then Mr. McHenry will be ready to receive bids at once."

**Anderson, S. C.—Bond Sale.**—On March 25, 1899, the \$8,000 city-hall bonds were awarded to W. J. Hayes & Sons, Cleveland, at 102-40 for a 4½% 20 year bond. Securities will be dated April 1, 1899.

**Andover (Town), Mass.—Bonds Voted.**—This town recently voted to issue \$30,000 3½% sewer-extension bonds. Securities will be in denomination of \$1,000, dated April 1, 1899; interest will be payable April 1 and October 1 at the National Bank of the Commonwealth, Boston. Principal will mature April 1, 1904. Date of sale is not yet determined; we are advised it will probably be within three weeks.

**Arlington, Ore.—Bonds Voted.**—At the election held on March 8, 1899, the vote was favorable for the issuance of the \$10,000 funding bonds. Details of the issue are not yet determined upon.

**Atascosa County, Texas.—Bonds Approved.**—The Attorney General has approved the issuance of \$19,000 refunding jail bonds and \$2,500 refunding bridge bonds.

**Atlantic County, N. J.—No Bonds to be Issued.**—It has been stated that this county will issue bonds for the extension of the insane asylum. Upon inquiry we find that no bonds will be issued, but that the amount needed for this purpose will be included in the budget for 1899.

**Bellevue (Borough), Pa.—Bonds Proposed.**—The issuance of street-improvement bonds will be considered at the next meeting of the Borough Council.

**Bexar County, Texas.—Bond Call.**—John W. Tobin, County Treasurer, has called for payment March 28, 1899, at the National Park Bank, New York City, or at D. & A. Oppenheimer's Bank in San Antonio, Texas, fourteen \$1,000 court-house bonds Nos. 1 to 14, inclusive, and dated June 15, 1883. Interest ceased on March 28, 1899.

The official notice of this call will be found among the advertisements elsewhere in this Department.

**Boone County, Iowa.—Bond Offering.**—Proposals will be received until 10 A. M. to-day (April 1, 1899), by B. M. Huntley, County Treasurer, for \$10,000 5% jail bonds. Securities are dated April 1, 1899. Interest will be payable semi-annually, and the principal will mature April 1, 1904.

**Boone County School District No. 6, Belvidere, Ill.—Bond Sale.**—On March 17, 1899, the \$20,000 5% bonds were awarded to Farson, Leach & Co., Chicago, at 108-535. Securities will mature yearly as follows: \$1,000 from 1900 to 1905, \$3,000 from 1906 to 1909 and \$2,000 in 1910.

**Boston, Mass.—Bonds Proposed.**—The House of the State Legislature is considering a bill allowing the city of Boston to issue outside of the debt limit \$500,000 park bonds.

**Bradock, Pa.—Bond Sale.**—On March 23, 1899, the \$81,500 4½% reservoir coupon bonds were awarded to Edw. C. Jones & Co., Philadelphia, at, it is stated, 115-92. For description of bonds see CHRONICLE March 11, 1899, p. 488.

**Buffalo, N. Y.—Bond Sale.**—The Comptroller has been authorized to issue a bond for \$1,230 for the payment of claims, which bond is to be taken by the Park Bond Redemption Sinking Fund at par. Bond is dated March 15, 1899, and bears interest at 3%. Principal matures July 1, 1900.

**Buffalo County, Neb.—Bond Sale.**—On March 22, 1899, \$54,000 4% 10-20-year (optional) refunding bonds were awarded to C. H. Imhoff, Lincoln, at 103-31.

**Callender (Iowa) School District.—Bond Offering.**—Proposals will be received until May 1, 1899, by Samuel Bollinger, Secretary, for \$3,000 school bonds which were voted on March 4, 1899. Interest will be payable semi-annually, and the principal will mature in ten years, subject to call after five years. Bidders will be asked to name the rate of interest at which they will take the bonds.

**Carlton (Town), Orleans County, N. Y.—Bonds Voted.**—This town recently voted to issue \$14,000 bridge bonds. The details of this issue and date of sale have not yet been determined.

**Carthage, Mo.—Bond Sale.**—On March 21, 1899, the \$25,000 electric-light plant bonds were awarded to the Trowbridge, MacDonald & Niver Co., Chicago, at 107-55, for a 5% bond and blank bonds. Following are the bids:

For a 5% Bond—	Premium.	For a 4% Bond—	Premium.
Trowbridge, MacDonald & Niver Co., Chicago.....	\$1,887 50	Feder, Holzman & Co., Cincinnati.....	\$390 00
		G. M. Brinkerhoff, Springfield, Ill.....	376 51
For a 4% Bond—		Briggs, Todd & Co., Cincinnati.....	262 50
W. J. Hayes & Sons, Cleveland.....	\$773 00	Denison, Prior & Co., Cleveland.....	249 00
		S. A. Kean, Chicago.....	63 50

\* Blank bonds.

Principal will mature May 1, 1919, subject to call \$10,000 after five years, \$10,000 after ten years and \$5,000 after fifteen years. For further description of bonds see CHRONICLE March 18, 1899, p. 537.

**Cass County, Mo.—Bond Sale—Bond Redemption.**—We are advised that of the \$250,000 5% bonds called for payment on April 1, 1899, \$100,000 will be paid in cash on that date, and the remaining \$150,000 will be refunded at par into 4% 20-year bonds, the bonds to be issued in denomination of \$1,000.

**Catskill, N. Y.—Bonds Authorized by Legislature.**—The State Legislature has authorized the issuance of bonds for a village hall.

**Cattaraugus County, N. Y.—Bond Sale.**—On March 27, 1899, the \$50,000 4% refunding bonds were awarded to Joseph E. Gavin, Buffalo, at 102-325. Following are the bids:

Joseph E. Garlin, Buffalo.....\$51,162 50  
 Erie County Savings Bank.....\$1,754 00  
 I. W. Sherrill, Poughkeepsie.....\$1,098 00  
 Allen, Sand & Co., New York.....\$1,053 50  
 Farson, Leach & Co., N. Y.....\$5,010 00  
 Fidelity & Guaranty Co.....\$5,972 00  
 Geo. M. Hahn, New York.....\$7,925 00  
 W. J. Hayes & Sons, Cleveland.....\$5,917 00

Benwell & Everitt, N. Y.....\$50,210 00  
 Bertrou & Storrs, N. Y.....\$5,850 00  
 R. B. Smith & Co., N. Y.....\$5,825 00  
 Jose, Parker & Co., Boston.....\$5,754 00  
 Denison, Prior & Co., Boston.....\$5,765 00  
 S. A. Keen, Chicago.....\$5,715 00  
 Edw. C. Jones & Co., N. Y.....\$5,250 00

Principal will mature \$10,000 yearly on March 1 from 1900 to 1904, inclusive. For further description of bonds see CHRONICLE of last week, p. 582.

**Centerville (Iowa) School District.—Bonds Proposed.**—This district has under consideration the issuance of from \$15,000 to \$18,000 refunding bonds. Interest will be from 3½ to 4%, and the principal will mature in ten years from date, subject to call after five years.

**College Hill (Village), Ohio.—Bond Offering.**—Proposals will be received until 12 M. May 1, 1899, by J. E. Bruce, Mayor, at the office of E. F. Layman, 32 East Third Street, Cincinnati, for \$40,000 5% water-works bonds. Securities are in denomination of \$500, dated May 1, 1899. Interest will be payable semi-annually at the Citizens' National Bank, Cincinnati. Principal will mature May 1, 1929.

**Colorado Springs, Col.—Bids.**—Following are some of the bids received on March 20, 1899, for the \$50,000 4½ 10-15-year (optional) water-works bonds and \$55,000 4½ 15-30-year (optional) refunding bonds:

<b>Premium.</b>	<b>Premium.</b>
Lamprecht Bros. Co., Cleveland.....\$1,513	Griggs, Todd & Co., Cincinnati.....\$1,485
N. W. Harris & Co., Chicago.....\$1,478	Farson, Leach & Co., Chicago.....\$1,403
E. H. Rollins & Sons, Denver.....\$1,418	Mason, Lewis & Co., Chicago.....\$1,240
W. J. Hayes & Sons, Cleveland.....\$1,490	

As stated last week, bonds were awarded to the Lamprecht Bros. Co., Cleveland, at 103-565.

**Columbus (Ohio) School District.—Bond Sale.**—On March 28, 1899, the \$12,000 4½ school bonds were awarded to Feder, Holzman & Co., Cincinnati, at 109-903 and accrued interest. Following are the bids:

Feder, Holzman & Co., Cin.....\$13,188 87	W. J. Hayes & Sons, Cleve.....\$12,043 00
Lamprecht Bros. Co., Cleve.....\$13,190 20	R. Kleybolte & Co., Cin.....\$12,427 50
New Nat. Bk. of Cin.....\$13,188 87	Clinton Nat. Bk., Columbus.....\$12,768 00
Seasongood & Mayer, Cin.....\$13,191 78	First Nat. Bank, Cincinnati.....\$12,848 00
Denison, Prior & Co., Cin.....\$13,110 00	Ohio Nat. Bank, Columbus.....\$12,858 00
Griggs, Todd & Co., Cin.....\$13,085 00	Mahoney & Martin, Columb.....\$12,000 00

Bonds mature March 1, 1917. For further description of bonds see CHRONICLE March 18, 1899, p. 537.

**Columbus, Wis.—Bond Election.**—On April 4, 1899, this city will vote upon the question of issuing \$10,000 (or less) electric-light plant bonds. If the vote is favorable the securities will bear 4% interest, payable at Columbus, and the principal will mature within ten years.

**Council Bluffs (Iowa) School District.—Bond Offering.**—Proposals will be received until 12 M. May 1, 1899, by Geo. S. Davis, Treasurer, for the \$67,000 4½ school-building bonds which were voted March 13 (not March 1, as reported), 1899. Securities will be in denomination of \$1,000, dated July 1, 1899; interest will be payable semi-annually at the office of the United States Mortgage & Trust Co., New York City. Principal will mature July 1, 1909, subject to call after July 1, 1904. Bonds will be issued under Section 2812 of the Code of 1897, as amended by Chapter 95 of the Laws of the 27th General Assembly. Proposals must be accompanied by a certified check for \$500, and the bidder will be required to furnish blank bonds. The official circular states that the district has never defaulted in the payment of interest.

**Cranston, R. I.—No Bonds Sold Recently.**—It has been reported in a number of the papers that \$50,000 of the \$150,000 4½ funding bonds voted in 1897 were recently sold by this town to the State Treasurer. In reply to our inquiry D. D. Waterman, Town Clerk, writes us that no bonds have been sold since 1897, and that the town officers do not expect to issue any more soon.

**Creston, Iowa.—No Bonds to be Issued.**—We are advised by S. A. Brewster, City Clerk, that the report in some of the newspapers that an election would soon be held in this city to vote on issuing \$18,000 bonds in aid of the M. & St. L. Railroad is incorrect. No bonds of any kind are to be issued.

**Danville, Pa.—Bond Election.**—On April 25, 1899, the citizens of this place will vote on the question of issuing \$15,000 bonds for the purpose of purchasing or erecting an electric-light plant.

**Denver, Col.—Bond Election Proposed.**—The question of voting on the issuance of \$100,000 bonds for an auditorium is being considered.

**Detroit, Mich.—Bond Sale.**—On March 27, 1899, \$38,000 4½ public-building bonds were awarded to the Detroit Sinking Fund Commission at 123-09. Following are the bids received:

Detroit Sinking Fund Commission.....\$112-09	Edw. C. Jones & Co., New York.....\$116-10
W. J. Hayes & Sons, Cleveland.....\$118-289	Seasongood & Mayer, Cin.....\$116-05
Duncomb & Jenkinson, N. Y.....\$117-72	C. H. White & Co., New York.....\$115-47
Denison, Prior & Co., Cin.....\$117-81	Pennecular Rev. Bank, Detroit.....\$111-18
R. Kleybolte & Co., Cincinnati.....\$117-00	John T. Shaw, Detroit.....\$106-34
Lamprecht Bros. Co., Cin.....\$116-68	J. L. Harper, Detroit.....\$109-274
Bertrou & Storrs, New York.....\$116-17	

Securities are in denomination of \$1,000, dated April 1, 1899. Interest will be payable semi-annually and the principal will mature April 1, 1929. Mr. Blades, City Comptroller, writes us that, to the best of his knowledge, this is the first time in the history of the city of Detroit in which the Sinking Fund Commissioners were bidders for an original issue of Detroit bonds. The price paid nets the Commission about 2-85%. They are receiving at present from their depository 2-55% on daily balances.

**On Bois (Pa.) School District.—Bonds Voted and Sold.**—This district has sold at private sale to The Lamprecht Bros. Co., Cleveland, \$40,000 school bonds on a 3½% basis. Securities will mature \$5,000 every five years from 1904 to 1929,

inclusive. These bonds were voted at the election held Feb. 21, 1899.

**Durand, Mich.—Bond Offering.**—Proposals will be received until 6 P. M. April 24, 1899, by W. H. Putnam, Village Clerk, for the \$3,000 5% village hall bonds voted at the annual election held March 18, 1899. Securities will be in denomination of \$500; interest will be payable January 1 and July 1 at the Shiawassee County Bank, Durand. The principal will mature \$1,000 yearly on July 1 in the years 1910, 1911 and 1912. Proposals must be accompanied by a certified check for 10%, par value, of the bonds bid for.

**Evanston, Ill.—Bond Sale.**—On March 14, 1899, \$6,000 4½ judgment bonds were awarded to Farson, Leach & Co., Chicago, at 102-10. One other bid was received—that of the State Bank of Evanston at 101-523. Securities are in denomination of \$1,000, dated Feb. 1, 1899. Interest will be payable February 1 and August 1, and the principal will mature \$1,000 yearly.

**Evanston (Ill.) School District.—Bonds Voted.**—This district recently voted to issue \$72,000 4½ school-building bonds.

**Franklin County, Ohio.—Bond Sale.**—On March 25, 1899, the \$120,000 4½ bridge bonds were awarded to the New First National Bank of Columbus at 102-604. Bonds mature \$6,000 yearly on April 1 from 1900 to 1919, inclusive. For further description of bonds see CHRONICLE March 18, 1899, p. 537.

**Fresno, Cal.—Bond Proposition Defeated.**—We are advised that the calling of an election to vote on the question of issuing \$100,000 city hall bonds has been defeated for the present. The question will most likely be taken up again in the fall.

**Georgetown, Ky.—Bond Offering.**—Proposals will be received until 12 M. April 15, 1899, by A. H. Sinclair, Mayor, for the \$12,000 4½ public-building bonds which were authorized at the election held Nov. 8, 1898. Securities are in denomination of \$500, dated March 1, 1899. Interest will be payable March 1 and September 1 at the Deposit Bank of Georgetown. Principal will mature \$1,000 yearly on March 1 from 1900 to 1905, inclusive, and \$1,500 yearly on March 1 from 1906 to 1909, inclusive.

Proposals will be received at the same time and place (provided that the ordinance now pending passes the Council) for \$8,000 4½ funding bonds. Securities will be in denomination of \$500. Interest will be payable May 1 and November 1 and the principal will mature \$1,000 yearly on November 1 from 1910 to 1917, inclusive. The total debt at present is the \$5,000 about to be funded. The assessed valuation is \$1,613,418.

**Gloucester, Mass.—Temporary Loan.**—This city has negotiated an eight-months loan of \$50,000 at 3 04%.

**Goliad County, Tex.—Bond Sale.**—The \$65,000 5½ refunding court-house bonds recently approved by the Attorney-General have been sold to J. B. Oldham, Dallas, at 102-01 and other considerations. Securities are in denomination of \$1,000, dated March 10, 1899. Principal will mature March 10, 1919, subject to call \$2,000 yearly from two to nine years, and the balance after ten years. Interest will be payable April 10 of each year at the Hanover National Bank, New York City, or at the office of the State Treasurer.

**Green Bay, Wis.—Bond Sale.**—On March 27, 1899, the \$6,500 4½ refunding bonds and \$15,000 4½ school bonds were awarded to Farson, Leach & Co., Chicago, at 103-52. Following are the bids:

Farson, Leach & Co., Chic.....\$122,256 75	Kelly Nat. Bk., Green Bay.....\$122,000 00
W. J. Hayes & Sons, Cleve.....\$121,011 00	Feder, Holzman & Co., Cin.....\$11,640 20
N. W. Harris & Co., Chicago.....\$121,011 00	Citizens' Nat. Bk., Green Bay.....\$11,500 00
Denison, Prior & Co., Cin.....\$121,011 00	McCarty Nat. Bk., G. Bay.....\$11,500 00
S. A. Keen, Chicago.....\$121,011 00	

The refunding bonds mature \$500 yearly on January 1 from 1900 to 1912, inclusive, and the school bonds \$1,000 yearly on January 1 from 1900 to 1914, inclusive. For further description of bonds see CHRONICLE March 25, 1899, p. 583.

**Green County, Tenn.—Bonds Authorized by House.**—The House of the State Legislature has passed a bill authorizing the issuance of \$100,000 road bonds.

**Hamblen County, Tenn.—Bonds Proposed.**—A bill has been introduced in the State Legislature providing for the issuance of bonds.

**Hartford, Conn.—Loan Negotiated.**—The loan of \$118,666 47 which we recently reported as having been authorized has been negotiated with the Society for Savings of Hartford at 3½% on a demand note.

**Herman, Neb.—Bond Sale.**—This village has sold the \$2,000 4½ 5-20-year (optional) water-works bonds to J. H. Chambers, Cashier Plateau Bank, Herman, at par less \$150 commission.

**Humphrey, Neb.—Bonds Voted.**—This place has voted to issue \$5,600 6½ 5-20-year (optional) water works bonds. Securities will be issued in denomination of \$400 and the interest will be payable annually. The bonds, we are advised, will be sold in about thirty days, the exact date of sale not yet being determined.

**Idaho Falls, Idaho.—Bond Sale.**—This city recently sold to Duke M. Farson, Chicago, at par \$30,000 6½ coupon water-works bonds. Securities are in denomination of \$1,000 and mature April 29, 1919, subject to call after April 29, 1909. The bid of the Chicago firm was the only unconditional one received, although a number of others were presented.

**Jackson County, Ind.—Bond Sale.**—According to reports this county recently sold \$115,736 gravel road bonds to A. F. Ramsey & Co., Crawfordsville, at 104-501.

**Jackson County (P. O. Edna), Texas.—Bond Offering.**—Proposals will be received until 2 P. M. June 18, 1899, by John O. Rowlett, County Judge, for \$15,000 4½% 10-20-year (optional) refunding bonds. Securities are in denomination of \$500, dated April 10, 1899. Interest will be payable semi-annually. A draft or certified check for \$300, payable to the County Judge, must accompany bids.

**Johnson City, Tenn.—Bonds Authorized by Senate.**—The Senate has passed a bill authorizing this city to fund its judgment indebtedness.

**Kalamazoo, Mich.—Loan Negotiated.**—On March 8, 1899, this city borrowed \$20,000 from the City National Bank, Kalamazoo, at 3¼%. Loan will mature five months from date.

**Kearney, N. J.—Loan Authorized.**—At a recent meeting of the Common Council the Town Treasurer was authorized to borrow \$3,000 in anticipation of the collection of taxes.

**King County, Texas.—Bonds Redeemed and Bonds Sold.**—This county has redeemed \$3,000 bridge bonds. We are advised that the same amount of refunding bonds have been issued and sold.

**Lac Qui Parle County, Minn.—Bond Issue.**—We are advised that this county will negotiate a loan of \$30,000 at 4% for the erection of a court house. Loan will be made with the State.

**Lebanon, Pa.—No Bonds at Present.**—In the CHRONICLE Feb. 11, 1899, we stated that the City Council had under consideration the refunding of outstanding water bonds. We are now advised that the Council for various reasons has abandoned the project for the present.

**Lewis County, Tenn.—Bonds Proposed.**—A bill now before the State Legislature provides for the issuance of bonds.

**Lexington, Tenn.—Bonds Authorized by House.**—The House has passed the bill authorizing the issuance of \$5,000 school bonds.

**Llanõ County, Texas.—Bond Sale.**—Randolph Kleybolte & Co., Cincinnati, have been awarded \$61,000 4½% refunding court-house and bridge bonds of this county.

**Lowville, N. Y.—Bonds Voted.**—At the election held March 23, 1899, the issuance of \$30,000 town-hall bonds was authorized.

**Lynn, Mass.—Bond Sale.**—This city recently awarded to Blake Bros. & Co., Boston, \$30,000 4% 20-year registered bonds at 112½. Following are the bids:

Blake Bros. & Co., Boston.....112 55	Blodget, Merritt & Co., Boston.....111 75
E. H. Rollins & Sons, Boston.....112 557	Parolson & Burr, Boston.....111 98
Estabrook & Co., Boston.....112 05	R. L. Day & Co., Boston.....111 589
W. Holman Cary & Co., Boston.....111 873	Adams & Co., Boston.....111 543
Rines & Cummings, Boston.....111 79	N. W. Harris & Co., New York.....111 50

**Marlborough, Mass.—Bond Offering.**—Proposals will be received until 10 A. M. to-day (Apr. 1, 1899,) by C. F. Robinson, City Treasurer, for \$20,000 4% coupon notes. Securities are in denomination of \$2,000, dated March 30, 1899. Interest will be payable March 30 and September 30 at the Winthrop National Bank, Boston. Principal will mature \$2,000 yearly on March 30 from 1900 to 1909, inclusive.

**Martin's Ferry, Ohio.—Bond Election.**—On April 3, 1899, the question of issuing \$35,000 water-works improvement bonds and \$3,500 fire department bonds will be voted upon.

**Maryville, Mo.—Bond Election.**—An election will be held to vote on the question of issuing bonds for a public library.

**Mason City (Iowa) School District.—Bond Sale.**—On March 3, 1899, \$20,000 of the \$23,000 refunding bonds for which proposals were asked until March 2 were awarded to H. A. Merrill, President of the City National Bank, Mason City, at 102-075 for 4% bonds. The remaining \$3,000 will be paid by the district. Securities mature April 2, 1909, subject to call after April 2, 1904. For further description of bonds see CHRONICLE Feb. 18, 1899, p. 344.

**Massena, St. Lawrence County, N. Y.—Bonds Authorized by Legislature.**—This village has been authorized to issue \$20,000 bonds by Act of the Legislature.

**Mattoon, Ill.—Bond Election.**—It is stated that an election will be held to vote on the question of issuing \$15,000 4% refunding bonds.

**Media, Pa.—Bond Offering.**—Proposals will be received until 8 P. M. April 5, 1899, by the Finance Committee of the Borough Council, for \$100,000 bonds. Of this issue \$75,000 are for the purpose of redeeming existing indebtedness and \$25,000 for water-works improvements. Interest will be at a rate not exceeding 3½%, payable semi-annually. Bonds are dated May 1, 1899, and mature as follows: \$5,000 in 1904, \$10,000 in 1909, \$15,000 in 1914, \$20,000 in 1919, \$20,000 in 1924 and \$30,000 in 1929.

*The official notice of this bond offering will be found among the advertisements elsewhere in this Department.*

**Memphis, Tenn.—Bonds Proposed.**—The Legislative Council has passed a resolution directing the City Attorney to draw up a bill for presentation in the State Legislature, providing for the issuance of \$300,000 bonds for a new city hall.

**Minneapolis, Minn.—Certificates Authorized by House.**—The House of the State Legislature has passed a bill authorizing the issuance of \$150,000 certificates of indebtedness for furnishing the two lower stories of the new City Hall.

**Montpelier, Vt.—Bond Offering.**—Proposals will be received at any time for \$40,000 3½% 20-year (optional) refunding bonds. Interest will be payable semi-annually at Montpelier. This city is also in the market for a loan of \$30,000 in anticipation of the taxes which are payable prior to Oct. 1, 1899.

**Moore County (P. O. Carthage), N. C.—Bond Offering.**—Proposals will be received until 1 P. M. April 3, 1899, by the Board of County Commissioners, J. E. Buchan, Chairman, for \$7,000 to \$8,000 6% refunding bonds. Interest will be payable annually at Carthage, and the principal will mature \$1,000 in 1907 and \$1,000 every January thereafter until paid.

**Nashville, Tenn.—Bond Ordinance Vetoed.**—The Mayor has vetoed an ordinance recently passed by the City Council providing for an election to be held April 27, 1899, to vote on the question of issuing \$150,000 3% bonds for the purchase of park land. The Mayor in his message stated that the price asked for the ground (\$150,000) was excessive, and if paid would leave nothing for the improvements thereon. The Council sustained the veto.

**New Britain, Conn.—Bonds Authorized.**—A resolution has passed the State Legislature authorizing the issuance of \$150,000 bonds.

**New Hampshire.—No Loan at Present.**—Hon. Solon A. Carter, State Treasurer, writes us that he will probably not be obliged to negotiate any part of the loan recently authorized by the State Legislature for two years at least. The law was only passed to provide for a possible emergency. At present, Mr. Carter says, the treasury has funds for all obligations in sight.

**Noblesville (Ind.) School District.—Bonds Proposed.**—This district has under consideration the issuance of from \$20,000 to \$25,000 high-school bonds. We are advised by the Clerk of the Board of Education that these bonds may not be issued before the spring of 1900.

**Norfolk, Conn.—Bonds Authorized by House.**—The House has passed the bill authorizing the issuance of sewer bonds.

**Northfield, Minn.—Bonds Defeated.**—At the election held on March 7, 1899, the city voted against issuing bonds for sidewalks.

**North Stonington, Conn.—Loan Negotiated.**—On March 16, 1899, this town negotiated a loan of \$21,000 with E. H. Kuowles, a local investor, at 3½%. Loan will mature in 20 years, the town having the option of paying it in ten years.

**Norwalk, Ohio.—Bond Election.**—At the spring election April 3, 1899, the proposition to issue \$11,000 bridge bonds will be voted upon by the citizens of this place.

**Oakman (Ala.) School District.—Bond Sale.**—The \$5,000 6% school bonds for which proposals were asked until March 11, 1899, have been awarded to the Noel-Young Bond & Stock Co., St. Louis. Principal will mature March 1, 1919. For further description of bonds see CHRONICLE March 4, 1899, p. 442.

**Orono (Town), Me.—Loan Authorized.**—At a recent town meeting Albert White, Town Treasurer, was authorized to borrow \$12,000.

**Palestine, Texas.—Bonds Approved.**—The Attorney-General has approved an issue of \$15,500 refunding school bonds.

**Palo Pinto (Texas) School District.—Bond Sale.**—The district has sold to the Austin National Bank the \$2,500 school bonds recently approved by the Attorney-General.

**Pawtucket, R. I.—Bonds Authorized.**—On March 22, 1899, the City Council authorized the issuance of \$150,000 3½% gold street-improvement and school-house bonds. Securities are dated April 1, 1899, and will mature April 1, 1939.

**Peekskill, N. Y.—Bonds Voted.**—This village has voted to issue one \$2,500 bond for the purpose of placing a fire-alarm system—wire, boxes, etc. Bidder will be asked to name the lowest rate of interest at which he will take the bond. Bond will probably mature in 30 years from date of issue. Date of sale has not yet been determined upon.

**Pembina County, N. Dak.—Bonds Refused.**—It has been reported that this county has sold \$12,000 drainage bonds. We are advised by the County Auditor that there were \$12,400 6% drainage bonds sold recently to the Minnesota Loan & Trust Co., but after the company gave the matter closer attention they declined taking the bonds, as there were some irregularities in their issuance.

**Pleasant Ridge, Ohio.—Bond Sale.**—On March 17, 1899, the \$7,534 5% refunding bonds were awarded to Briggs, Todd & Co., Cincinnati, at 112-589. Bonds mature March 1, 1909. For further description of securities see CHRONICLE Feb. 18, 1899, p. 345.

**Plymouth (Town), Mass.—Bonds Proposed.**—This town has under consideration the issuance of \$6,000 4% notes for the purpose of building new roads. Securities will be dated July 1, 1899, and will be payable \$600 yearly. The Town Treasurer, E. L. Burgess, writes us that the loan will most likely be placed with one of the local banks.

**Polk County, Tenn.—Bonds Proposed.**—A bill providing for the issuance of \$25,000 bridge and highway bonds has been introduced in the State Legislature.

**Putnam, Conn.—Loan Negotiated.**—This city has negotiated a small short-time loan with the Putnam Savings Bank. The money was borrowed to meet current expenses.

**Proposed Bond Issue.**—We are advised that \$20,000 of the \$40,000 street-improvement bonds recently authorized by the Legislature will probably be issued within a month or so. It is probable that they will bear 3½% interest and mature in 30 years.

**Reldsville, N. C.—Bond Offering.**—Proposals will be received until May 2, 1899, for \$25,000 5% and \$7,500 6% improvement bonds. The \$25,000 bonds will mature May 1, 1929, and the \$7,500 July 1, 1921. Proposals must be accompanied by 2% of the amount bid for.

**Rutland, Vt.—Bonds Voted.**—This city recently voted to issue \$20,000 city hall bonds. We are advised that the matter is in the hands of the Mayor and Board of Aldermen, and no details of the issue have yet been settled.

**Sandusky, Ohio.—Bond Offering.**—Proposals will be received until 12 M. April 29, 1899, by A. W. Miller, City Clerk, for \$10,000 4% refunding water-works bonds. Securities are dated April 15, 1899. Interest will be payable semi-annually at the American Exchange National Bank, New York City. Principal will mature April 15, 1909. A certified check for \$500 must accompany proposals.

**Sibley, Iowa.—Bonds Voted.**—On March 27, 1899, this place voted to issue \$16,000 water-works bonds.

**Sing Sing, N. Y.—Bond Offering.**—Proposals will be received until 7 P. M. April 4, 1899, by John M. Terwilliger, Village Clerk, for \$8,076 05 4% street and sewer-improvement bonds, as follows:

\$5,274 60 Spring Street improvement, one bond of \$774 50 and nine bonds of \$500 each.

666 90 Hamilton Avenue and South Malcolm Street improvement, one bond of \$71 90 and nine bonds of \$75 each.

2,144 65 Spring and State Streets and Lafayette Avenue sewer improvement, one bond of \$215 65 and nine bonds of \$214 each.

All of the above bonds will bear date of April 1, 1899; interest will be payable April 1 and October 1. Principal will mature one bond yearly (in their regular order) on April 1 from 1900 to 1909, inclusive. Bonds are issued pursuant to Chapter 83, Laws of 1896, as amended by Section 46 of Chapter 496, Laws of 1897, being the charter of the village.

**Stevens Point, Wis.—Bond Offering.**—Proposals will be received until 4 P. M. April 15, 1899, by Geo. E. Oster, City Clerk, for \$15,000 3½% refunding school bonds and \$7,000 3½% sewer bonds. Securities are in denomination of \$500. Interest will be payable semi-annually and the principal will mature 20 years from date of issue, subject to call after 10 years. Total indebtedness of district is \$95,000; the assessed valuation, \$2,500,000; tax rate, \$29 per \$1,000 of valuation. Population in 1890 was 7,896 and is about 10,000 at present. A certified check for 1% of face value of bonds must accompany proposals.

**Tarentum (Pa.) School District.—Bond Sale.**—On March 27, 1899, the \$35,000 4% high-school bonds were awarded to

the Lamprecht Bros. Co., Cleveland, at 108-37. Bonds mature May 1, 1929. For full description of bonds see CHRONICLE March 18, 1899, p. 539.

**Titusville, Pa.—Refunding Bond Issue.**—We are advised that the city is refunding its entire debt of \$116,000, represented by 4% bonds, with a new issue of 3½ 10-20-year (optional) bonds. Under the law holders of the old bonds have 60 days in which to exchange the old bonds for the refunding issue, and after that time those bonds not exchanged will be sold to the highest bidder.

**Tremont, Me.—Loan Authorized.**—The Town Treasurer has been authorized to negotiate a 4% loan of \$4,500 for the purpose of building two school houses.

**Tullahoma, Tenn.—Bonds Authorized by House.**—The issuance of \$6,000 electric-light bonds and \$25,000 sewer bonds is provided for in bills recently passed by the House. The bill providing for the issuance of water-works bonds has also passed the House.

**Utah County, Wyo.—Bonds Proposed.**—It is stated that this county will refund \$91,000 bonds at a rate of interest not exceeding 5%. The assessed valuation of the county is \$3,500,000 and the bonded debt \$101,000.

**Upper Sandusky, Ohio.—Bond Sale.**—On March 25, 1899, the \$8,000 6% refunding bonds were awarded to Briggs, Todd & Co., Cincinnati, at 116-25. Bonds mature April 1, 1907. For further description of securities see CHRONICLE March 4, 1899, p. 442.

**Van Wert (Village), Ohio.—Bond Offering.**—Proposals will be received at the Council Chamber of this village until 7:30 P. M. April 24, 1899, for \$52,000 4½% and \$64,000 4½% coupon Main Street improvement bonds. Securities of both issues will be dated May 1, 1899; interest will be payable semi-annually and principal will mature in from two to eleven years. The intention being to sell only one of the above sets of bonds, the Council expressly reserves the right to reject all bids on either and consider bids on the other, this to be done within five days of the above date. Proposals must be unconditional and be accompanied by a certified check for \$2,000, payable to the Village Treasurer. Bonds are issued under Section 2704, Revised Statutes of Ohio. The official circular states that there is no litigation pending nor threatened concerning the validity of these

bonds, and that principal and interest of all previous issues have been promptly paid.

**Walker (Village), Cass County, Minn.—Bond Offering.**—Charles Kinkele, Village President, will sell at 8 p. m. April 10, 1899, \$6,000 5% 10 year water-works bonds. Interest will be payable semi-annually.

**Washington (Conn.) School District.—Bonds Authorized.**—The State Legislature has passed a resolution authorizing this district to issue \$25,000 bonds.

**Watertown, Mass.—Temporary Loan.**—On March 29, 1899, the loan of \$100,000 was awarded one-half to R. L. Day & Co. and one-half to Rogers, Newman & Tolman, both firms of Boston, at 3%. Following bids were received:

Rogers, Newman & Tolman.....3'00%	Blodget, Merritt & Co., Boston.....3'00%
R. L. Day & Co., Boston.....3'00%	Estabrook & Co., Boston.....3'12%
Jose, Parker & Co., Boston.....3'03%	Boston Safe Dep. & Trust Co.....3'14%
W. O. Gay & Co., Boston.....3'06%	

Loan matures Nov. 1, 1899.

**Waverly, N. Y.—Bonds Defeated.**—At the election held March 21, 1899, the proposition to issue \$5,900 bonds was defeated.

**Wayne County (P. O. Detroit), Mich.—Bond Election.**—William H. McGregor, County Clerk, has given notice that an election will be held on April 3, 1899, to vote on the question of issuing \$500,000 bonds for the purpose of completing and furnishing the Court House.

**Westerly, R. I.—Loan Negotiated.**—We are advised that only \$10,000 of the \$15,000 which the Treasurer was authorized to borrow has been placed. The loan was negotiated with a local bank in anticipation of some receipts and will run but a short time. The money was used in the payment of interest on bonds.

**Williams County, N. Dak.—Bond Sale.**—On March 6, 1899, the \$10,000 6% court house and jail bonds were awarded to C. C. Gowran & Co., Grand Forks, at 104. Following are the bids:

C. C. Gowran & Co., Grand Forks.....104'01	Denison, Prior & Co., Cleveland.....103'00
New 1st Nat. Bank, Columbus.....103'75	S. A. Kean, Chicago.....101'00
Lewis Bros., Glasgow, Mont.....103'15	Kane & Co., Minneapolis.....100'00

Securities will be in denomination of \$500 and the principal will mature April 1, 1919.

**Vonkers, N. Y.—Bond Sale.**—On March 29, 1899, the \$14,900 4% street-paving bonds and \$10,000 4% assessment bonds

were awarded to N. W. Harris & Co., New York, at 114'65 and 102'67 respectively. Following are the bids:

	\$14,900 Bonds.	\$10,000 Bonds.
N. W. Harris & Co., New York.....	114'65	102'67
Edw. C. Jones & Co., New York.....	114'25	102'05
Bertron & Storrs, New York.....	114'25	101'50
Benwell & Everett, New York.....	114'09	102'09
W. J. Hayes & Sons, Cleveland.....	113'775	101'00
Farson, Leach & Co., New York.....	113'445	101'875
Jose, Parker & Co., Boston.....	112'873	101'786
Vonkers Savings Bank.....	11'95	102'01
People's Savings Bank.....	11'71	102'215
Geo. M. Hahn, New York.....	111'48	101'95
Dan'l A. Moran & Co., New York.....	111'26	
S. A. Kean, Chicago.....	109'25	101'50

Allen, Sand & Co., New York, bid 119'27 for the entire amount. The street-paving bonds mature \$6,000 April 1, 1917, and \$8,900 April 1, 1926. The assessment bonds mature Feb. 1, 1903. A full description of bonds will be found in the CHRONICLE last week, p. 585.

## CLEARING HOUSE RETURNS.

For the month of March the clearings make an extremely satisfactory exhibit. Contrasted with the month of 1898, the aggregate for the whole country records an excess of 54.5 per cent. For the three months the gain is 40.5 per cent.

The week's total for all cities shows a gain of 46.8 per cent over 1898. The increase over 1897 is 35.6 per cent and the increase over 1896 is 93.9 per cent. Outside of New York the excess compared with 1898 is 16.5 per cent, the gain over 1897 is 30.3 per cent, and the excess over 1896 reaches 31.3 p. c.

### THE FINANCIAL SITUATION.

Speculators in stocks have found this week that money was the condition more than all others to be reckoned with. Ever since the early days of March the crisis, which has now at length enforced liquidation to a very considerable extent, has been steadily approaching. General nervousness over the situation seemed to be the prevailing feeling Monday. On that day and Tuesday an effort to unload made some progress; the share market was very irregular but active, sales on Monday reached 1,262,447 and on Tuesday 1,061,244 shares. Money on call those days ruled from 5 to 7 per cent. Wednesday there was less doing, the total sales being 884,105 shares; the early transactions were distinguished by numerous advances—mainly in railroad properties; but as the day progressed the severe discrimination became more marked against industrial stocks and other new specialties, the close being extremely irregular, with transactions in money for industrials at 12 to 15 per cent, or 5 per cent higher than on good Stock Exchange collateral. Thursday the market opened feverish, with money continuing in active request, ruling at 12 to 13 per cent before noon. A general selling movement set in, attended with heavy declines throughout the list, chiefly in industrials and in specialties like the Brooklyn Rapid Transit, more recently conspicuous for their rapid and extreme advances. The better class of railroad shares also declined, but to a less extent. Yesterday the market opened in pretty much the same ragged state, with a large further decline in prices, but with a substantial recovery at the close.

There are two facts that have existed side by side during this disturbance disclosing a notable contrast which are worth calling attention to because they interpret the real situation more accurately than any words could do it. One is the extremely high rate at the Stock Exchange for call money, already remarked upon, and the other the unchanged and easy state of the time branch of the market. Abundance of money for every legitimate want could be had during the period when call money could not be procured on many speculative securities at even 12 to 15 per cent. This contrast tells us where the seat of the disease is, and more than that how sound and healthy the larger business interests are. The closer scrutiny that has been observed by lenders and greater discrimination used in accepting collaterals in placing loans, and the change from a sluggish to an active money market, were consequently wholly natural. These were inevitable incidents of excessive speculation. Of course the first securities to be thrown out in such a contingency would be those about which the earning power was comparatively little known, those whose price was subject to widest fluctuations and consequently whose value is the least stable. It so happens on this occasion that the class designated industrials was the main sufferer. As is well known, within the last three months an immense body of these stocks of varying degrees of merit has been placed upon the market. A year or two hence it will be better known which of them are entitled to credit and which are not. In the meantime it could not be otherwise than that all should be in some measure under a ban.

To explain this attitude by claiming, as has been done, that the banks are exhibiting a feeling of hostility towards that class of organized capital conveys a very incorrect idea of the situation. The suggestion also that either Secretary Gage or Mr. Depew, in his remarks at the dinner of the Manhattan Bank, urged or favored any such attitude is equally unfounded. Mr. Depew, in speaking of the immense capitalization these creations represented estimated that four-fifths of the accumulated savings of the country were invested in industrial enterprises and that two-thirds of the labor of the country was employed by such corporations. We presume those percentages were not intended to be exact, but they serve to bring out forcibly the vastness of these interests and organizations, and the absurdity of any assumption of hostility on the part of financial institutions. Besides our banks have not the power if they had the will. Funds seeking employment come from too many sources in these days.

Money lenders, in accepting or rejecting a loan, are influenced by their idea of the intrinsic worth of the security offered. Worth cannot be determined by the current market value—that may be speculative, fluctuating and temporary—but by an acquaintance with facts that determine character and assets or earning power and its perpetuity. On the market there are always every degree of preference in every class of security. This is true even of railroad obligations. It is notoriously true of merchants' paper and mill notes. There are banks, also, that show more favor for one bond or stock or class of note than for another, perhaps in cases of equal worth, because of a better knowledge of its qualities. We may illustrate our meaning by what we said a few weeks since—that certain banks give a preference to leather paper, others to grocery paper, to the exclusion of some other classes they have studied less, but which may be perhaps equally meritorious. As long as the market is burdened with an over-supply of loanable funds, when the lender seeks the borrower, almost every thing goes; but when securities multiply, competition for money sets in, preferences become manifest, and finally only the assured is taken. The uncurrent class has sometimes been railroad stocks, and perhaps even railroad bonds when there has been a season of over-capitalization by railroads, or of too rapid construction, or both; or it might be, as often happens, mercantile paper that falls into discredit, in times of over-trading when all offerings are rejected except a few of the very best; or the discrimination may fall as now, and for like reasons, against what we call industrials and specialties. Any individual can see from this mere recital how unreasonable it would have been to interpret the rejection or discrimination which has heretofore prevailed at various times in the loan market against any of these over-issues as hostility towards that class on the part of capitalists. If that be true of previous occasions, is it not doubly true in the present case? There certainly never was a year when any kind of security was multiplied so rapidly as industrial shares have been during the last few months; and there never was a class of organizations that had capitalized to the same extent so unsubstantial an asset as good will, about which time and experience alone can afford the test of productiveness. Notwithstanding these facts, many of the properties referred to have been run up to prices which are warranted only on the assumption of a very large

earning capacity that is by no means assured as yet and may never be realized.

All the trade indications still betoken a large, an active and a very satisfactory state of general business. Our tables of bank clearings tell a story of progress and expansion in every direction. For the month of March the aggregate of the clearings for the whole country reaches the unprecedented amount of 8,726 million dollars, this comparing with an aggregate of only 5,647 million dollars for the corresponding month in 1898. In other words, there is an increase of over 54 per cent. Financial operations and Stock Exchange speculation being so very prominent at this point, very naturally the increase outside of New York is not so heavy, and yet even there the expansion is over 26 per cent. The best previous monthly total was that for January of the current year, when the amount reached 8,492 million dollars, as against the present total for March of 8,726 million dollars. It is rather noteworthy that though stock speculation played a very important part in swelling the bank exchanges in both the months mentioned, yet the aggregate of the stock sales in March fell much below that for last January. The further growth in clearings, therefore, in face of that falling off, is quite significant. The share sales for March were, roughly, 17½ million shares—a very large figure, comparing with only 10 million shares in March 1898, but for January 1899 the sales exceeded 24½ million shares. It is worth pointing out, too, that the ratio of gain in the clearings then was only 41.1 per cent, where now for March it is 54.5 per cent, while outside of New York the gain then was 20.1 per cent as against 26.7 per cent now. Nor is there any indication of any shrinkage. On the contrary, the total for the current week ending to-day is likely to exceed the highest total ever before reached in any one week. For the six days ending January 28 the clearings for the whole country footed up 2,138 million dollars, making a new and very exceptional high record. For the present week, based on telegraphic returns up to to-night, we estimate the total at 2,176 million dollars.

But these clearings returns do not stand alone in showing a large and growing volume of trade. All the other statistical evidence is to the same effect. Contemporaneously the records of mercantile disasters are highly gratifying. In fact it is many years since we have had such encouraging exhibits in that particular. Messrs. R. G. Dun & Co. have this week compiled their usual statements of mercantile failures, covering the first quarter of the current calendar year, and they have very kindly favored us with an early copy of the figures as they will appear in "Dun's Review" to-day. It seems that in number the insolvencies for the three months the present year were only 2,772, against 3,687 in the like three months of 1898, 3,932 in 1897 and 4,031 in 1896. The comparison is no less favorable so far as the aggregate amount of the liabilities of the failed traders is concerned. For 1899 the disasters are for the amount of \$27,152,031, as against \$32,946,565 for 1898, \$48,007,911 for 1897 and \$57,425,135 for 1896. In the case of some of the separate geographical divisions, the 1899 figures, in one or two instances, are larger than those of 1898, but taking the country as a whole the showing is the best for nearly two decades;

to be exact, the number of the failures has not been so small in the first quarter of any year since 1882, and the amount of the liabilities has not been so small since 1881.

In view of the prominent part in affairs played by the industrial organizations, or trusts, we furnish in a subsequent article to-day a statement showing the combinations of this kind formed the present year. The results will be found interesting. The subject of these "trusts" is an important one and deserves broad treatment. Combinations per se are not objectionable, but there is danger that unless caution is exercised great abuses may grow up in connection with them. Mr. F. B. Thurber, in a paper which he read yesterday before the Industrial Commission of the United States, discussed the subject in a rational and broad-minded way. One remark of his deserves wide circulation. He says the only additional safeguards needed are for stockholders, whose interests are often sacrificed through lack of publicity. The average investor is the chief sufferer. So far as the interest of consumers is concerned, this, he well states, is amply protected now; first by competition and secondly by the common law, which if invoked will nullify any contract in unreasonable restraint of trade, besides which any unreasonable combination is subject to indictment for conspiracy.

The rates for money on call daily quoted at the Board uniformly represent those for good mixed Stock Exchange security. But in making the loan it has been, and indeed it still is, understood that a small admixture of a comparatively stable dividend-paying industrial stock would be accepted if amply margined. That is to say, while the rate at which the loan was made was based upon good security, consisting of railroad or other stocks, the loan would not be rejected by the lender if a moderate amount (say 10 per cent) of good industrials of established repute should accompany the collateral. Until Wednesday borrowers desiring to make a loan on a larger proportion of industrials were required privately to inform the lender or his representative upon what kind of industrials he desired to borrow, and in such cases special rates differing from those on good mixed security would be made and no publicity would be given to the transaction. On Wednesday afternoon, however, the precedent was established of publicly bidding for money on call on industrial collateral, and during the flurry in the last hour there was a difference of as much as 5 per cent between rates on good Stock Exchange collateral and those on industrial properties. On the following day, and indeed for the remainder of the week, while the bidding for money on the last-named collateral was also public as before, and at higher rates than for good mixed security, the bidding was less frequent, owing to the fact that the market was quieter. The activity in call loans was reported to be partly due to disturbance caused by the payment on Wednesday of about \$15,000,000 in connection with the financing of the new American Smelting & Refining Company. The activity was also somewhat increased on that day by an error by a Stock Exchange house, whose cashier miscalculated the extent of his

requirements, and therefore was compelled in the last hour to obtain a much larger sum.

The week's range for call money has been 3 to 16 per cent, averaging fully 7 per cent. On Monday and on Tuesday the range was from 5 per cent to 7 per cent, with the bulk of the business at 6 per cent. On Wednesday the range was, as already stated, from 5 per cent to 16 per cent, with the ruling rate at 6 per cent, though considerable sums were loaned in the last hour at 8 and at 12 per cent. Liberal offerings by foreign bankers caused the rate to fall to 5 per cent at the close. On Thursday the range was from 3 per cent to 13 per cent, with the bulk of the business at 6 per cent. The higher rate was recorded in the early part of the day, borrowers apparently fearing that money might be difficult to obtain in the afternoon, but the general early satisfaction of requirements tended to lessen the late demand, and free offerings forced the rate to 3 per cent, though the last loan was at 5 per cent. On Friday the range was from 5 per cent to 15 per cent, with the majority of the business at 9@10 per cent. Banks and trust companies quote 6 per cent as the minimum, though on Wednesday and thereafter loans were made by them at nearly the highest rates on the Exchange. Time contracts on good mixed Stock Exchange collateral are quoted at 4 per cent for sixty to ninety days and 4@4½ per cent for longer periods, according to the date of maturity and the character of the collateral. For loans on industrial security and where contracts are made, they are at special rates. One time contract made during the week by a prominent down-town bank was a loan at 5 per cent for six months on a line of railroad stock and bond collateral with an admixture of a few hundred shares of a dividend-paying industrial stock, the margin required for the whole loan being 40 per cent, instead of the customary 20 per cent on a good mixed security loan. There is a better supply of commercial paper in the market, but at the same time the out-of-town demand is so urgent that the offerings are promptly absorbed and there is no accumulation of names. The local inquiry is only fair. Rates are 3½@4 per cent for sixty to ninety-day endorsed bills receivable, 4@4½ per cent for prime, and 5@6 per cent for good four to six months' single names. The Chicago & Alton syndicate will make another payment on account of the stock on Monday, amounting to about \$8,000,000, and this payment will very nearly complete all the transfer of money required for the purchase.

The European political situation has been without important feature this week. There was the usual decline in money rates at London, following the beginning of the new quarter. The Bank of England minimum rate of discount remains unchanged at 3 per cent. The cable reports discounts of sixty to ninety-day bank bills in London 2¼@2½ per cent. The open market rate at Paris is 2½ per cent, and at Berlin and Frankfurt it is 3¼@3½ per cent. According to our special cable from London the Bank of England lost £717,469 bullion during the week, and held £30,090,796 at the close of the week. Our correspondent further advises us that the loss was due to the import of £218,000 (of which £211,000 were bought in the open market and £7,000 were from Australia) to shipments of £775,000 net to the interior of Great Britain, and to the export of £160,000, of which £100,000 was

to the Cape, £50,000 to Uruguay and £10,000 to Argentina.

The foreign exchange market has been dull and generally easier this week. The absence of urgent inquiry would seem to indicate that the demand to remit for securities, which was reported to be one of the important factors last week, has at least been partially satisfied, and it has probably been ascertained that the remittances for the \$20,000,000 Philippine payment are likely to be somewhat remote. Bankers report the market insufficiently supplied with bills of all kinds, but there seems to have been but little more than an ordinary counter demand for exchange. The only perceptible effect which was produced until Friday by the active market for money was shown in the light inquiry. On that day, however, the tone was weaker by reason of the high money rates. The foreign bankers have been liberal lenders of money during the week, finding it more profitable thus to employ their funds than in the buying of exchange. Gold imports reported at the Custom House for the week were \$72,471.

The range for nominal rates of exchange has been from 4 85 to 4 85½ for sixty-day and from 4 87 to 4 87½ for sight, with the majority of the drawers posting the higher figures. Rates for actual business opened on Monday unchanged compared with those at the close on Friday of last week, at 4 84½@4 84½ for long, 4 86½@4 86½ for short and 4 87½@4 87½ for cables. The market was dull and the tone easy, but there was no quotable change until Wednesday. Then rates for actual business in short were reduced one-quarter of a cent to 4 86½@4 86½, while those for cables were half a cent lower, at 4 86½@4 87. No change was made in rates for long sterling. The market was dull and steady on the following day and weak on Friday, when there was a reduction of one-quarter of a cent in rates for actual business in long and short. The following shows daily posted rates for exchange by some of the leading drawers.

	FRI. Mar. 31.	MON. Apr. 3.	TUES. Apr. 4.	WED. Apr. 5.	THUR. Apr. 6.	FRI. Apr. 7.

### THE WESTERN CITY ELECTIONS.

For various reasons the City of Chicago has in recent years been one of the most important battle grounds of contemporary politics. This is partly because of the violent fluctuation of electoral majorities during recent years. From a Republican plurality of a few hundred votes in 1888, Cook County, Illinois, which is virtually the City of Chicago, swung back to a Democratic plurality of 7,760 votes in 1890 and of 33,350 in 1892. Two years later, in the political reaction of 1894 it polled a Republican plurality of 51,395, which rose in the Presidential election of 1896 as high as 69,913. These are fluctuations quite as remarkable as any in the checkered political history of New York City, which is traditionally cited as an instance of electoral uncertainties.

The mayoralty election of last Tuesday attracted interest partly because of these wide fluctuations of majorities, but chiefly because some reaction from the recent Republican majorities was expected, as a normal incident of politics, and because this expectation threw considerable doubt over the question, what shape the reaction would assume. As it happened, the candidacy at Chicago was such as to emphasize this question. Ex-Governor Altgeld, who is typical of the elements which created and clustered about the Chicago Presidential platform of 1896, entered the field with a vigorous campaign. It was pretty plainly understood that the vote for him would be taken as a measure of the city's endorsement of the principles placed before the voter three years ago. In opposition to Altgeld were nominated Carter H. Harrison, the present Democratic incumbent of the mayoralty, and Z. R. Carter, the Republican candidate.

The most striking part of the result was the relative insignificance of the vote cast for ex-Governor Altgeld. In a total poll of more than 300,000 votes, he received not quite 46,000. His Democratic opponent, Mayor Harrison, was chosen by the handsome plurality of 41,033 over his Republican antagonist, polling a vote more than three times as large as that of Altgeld. This result is interesting as almost the first direct test, in a large electorate, of the relative strength of the two bodies of opinion in the party. Mayor Harrison has taken a conservative position on national issues; he has been publicly proscribed for so doing by the adherents of the platform of 1896; and the division of the vote between him and the typical candidate of the radical faction of the party

is, therefore, an index of peculiar and timely interest. The result of Tuesday's vote seems to be accepted in Chicago as a positive indication that the conservative element is in the ascendancy.

In our judgment the Chicago election means still more than this. In Chicago, as elsewhere, the critical financial issue presented by the platform of 1896 drove a very large contingent of voters away from their old affiliations and into support of the party which had declared for sound money. Except in the way already mentioned, the money issue was not presented in this spring's municipal election. Mayor Harrison chiefly stood for re-election on the plea of competent management of the city and protection of its interests in the line of corporate franchise. It was generally conceded that Mr. Harrison's administration had been successful and that the city would be in safe hands with that administration continued. The result of Tuesday's electoral figures shows that in Chicago there is a very large part of the voting constituency which is not so closely bound by party ties that it will not support one whose administration has been fairly satisfactory and therefore the best candidate, regardless of previous affiliations.

Two other municipal elections of the week have exhibited a similar tendency. At Cleveland, a city where the municipal government of the last few years has created great dissatisfaction among intelligent voters, majorities were reversed last Monday as completely as they were on Tuesday at Chicago, and the reversal is chiefly ascribed to the work of a non-partisan citizens' association. At Toledo, on the same day, a mayor who had been eminently successful in city administration, who had stood for renomination and had been beaten in convention by political leaders of his own party, and who had thereupon taken the field as an independent candidate, was elected by a very large majority.

Various inferences are drawn, as always happens under such circumstances, from these several results. It is natural, for instance, that the re-election of Mayor Jones, of Toledo, should in many quarters be ascribed entirely to his advocacy of municipal ownership of city supply and transportation enterprises. No doubt this attitude had a part in the result; so may the attitude of Mayor Harrison, of Chicago, towards the street-car franchises. But, on the other hand, it must be remembered that the position of these two officers on such questions created opposition in some quarters while it attracted support in others. The great bulk of the vote which shifted from one side to the other in these two city elections was unquestionably influenced by the fact that good city government might safely be anticipated from the candidate in whose behalf the majorities were changed.

It seems to us that the week's Western elections regarded from this point of view are extremely encouraging to people who hope for better municipal government. At Chicago in large part, and in Cleveland and Toledo wholly, the canvass was made on municipal issues, and it was on questions of city policy and the record of candidates in city administration that the majority in the two most interesting votes was won. This of itself is a highly important forward step. We have repeatedly pointed out that good city government can be assured only when national issues are ignored in city elections. The Western city votes this week prove also, we think, that this object can be attained most satisfactorily by

placing municipal elections not only in a different year from State and national contests, but in a different season of the year.

### THE NEW NEED FOR COMMERCIAL SCHOOLS.

Rev. Henry A. Stimson, D.D.

The tropics, as a leading commercial interest, have come to stay. The temperate regions are substantially occupied; and while the increase of population in some parts will develop increased wants, they even now offer no very promising field for large outside investment and enterprise, while the overflow of population will seek tropical outlet, and give new importance to the question of tropical control. On the other hand, the tropics have hitherto lain largely outside the line of modern commercial industry. While possessing far the largest variety of important products and the most productive soil, they have been barely touched, commercially, by the modern world. Climate and distance have to some extent interfered; industrial enterprise has been sufficiently occupied at home, and the rewards of industry and of enterprise have, for the present time, been sufficiently large and sure to justify the neglect of more remote or hazardous adventure.

But now a new day has come. What happened long ago on the shores of the Mediterranean, and sent first the Phœnicians, the Greeks and the Romans, and then the Venetians, the Genoese and the Portuguese, seeking not only new markets but new openings for their young and virile life, finding itself too crowded at home, has occurred in the modern world. The most sluggish nations are caught in the current, and no land is so remote or so barren or unwholesome but it is coveted; and the race for territory and for business is hot. Before the new conditions created by the Spanish War, one-third of the imports of the United States was from the tropics, and the annual export trade, slightly as it was developed, was more than one hundred million dollars.

The best export testimony is to the effect that the dangers of the climate have been greatly exaggerated. Professor Alfred Wallace, after many years of experience in the Valley of the Amazon, in the Orient and in Africa, is emphatic in saying that to-day the tropics offer the very best opportunity for Europeans to live and thrive. He says definitely that the valley of the Amazon and the Rio Negros is the most promising on the globe, and that Anglo-Saxons can live there with one-fourth of the labor and far greater comfort than they can live in the temperate zone. More recently Dr. Sambon has maintained before the Royal Geographical Society that there is nothing inimical to Europeans in tropical countries, which, even in Africa, cannot be prevented by hygienic measures. The chief obstacle is the malarial microbe, and he says that no one can doubt that the careful study now going on as to the life history of this bacillus will greatly reduce the European mortality. As a new illustration of the way in which European people are now dealing with these tropical questions, it is interesting to note that Great Britain is now opening an institution for the study of tropical diseases, in London. It is connected with the branch hospital of the Seamen's Hospital Society, near the Royal Victoria Docks. Thirteen thousand pounds sterling are to be spent on the plant, toward which the Colonial Office contributes thirteen thousand

three hundred and fifty pounds. The maintenance is to cost three thousand pounds per annum, of which one thousand pounds is paid by the Government in fees for the instruction of designated students.

This raises the whole question of the relation of specific education to the business in hand. It is clear that climatic conditions are to be met by expert knowledge, and such knowledge will have absolute control of the situation. This advantage extends to the trade itself. In no part of the world is exact knowledge of the ways of the community more important than in the tropics. In the temperate zones easy and extensive inter-communication has brought about practical uniformity of customs and needs. Yet even here special adaptation of any article to the taste and ways of a particular community always gives a decided advantage. In the tropics this adaptation is essential. To-day in Central America the difference of a foot in the length of a flour sack is sufficient to divert the entire trade in flour from America to Germany, as the long sack is adapted to transportation on the back of a mule, while the short sack, in which American millers insist upon packing their flour, cannot be so carried. The difficulties which in intelligent communities are so small as to be unimportant, will, in ignorant communities, with old and settled ways, become prohibitory. The slight recent mistake of modeling the brand of a game cock upon an article of large consumption in Mexico, after the American bird, trimmed to the last refinement, instead of after the Mexican bird, full feathered, with resplendent comb and wattles, proved a serious obstacle to its introduction. American axe manufacturers do not offer the light, keen, perfected American instrument in tropical markets, but are compelled to imitate the clumsy, crude article to which the people there are accustomed. These are only passing illustrations of conditions which to-day at least are widely prevalent. And the control of the tropics for the future will largely depend upon the quick adaptation and intelligent study of their needs as they are to-day.

This has long been recognized in Europe, and special schools of wide influence already have been established in Austria, Germany, Italy, Switzerland, Belgium and France, while England, in her lethargic manner, is now waking up in the effort to regain advantages which to some extent she has already lost. The question is by no means one of what may be regarded as the ordinary commercial training. We have a great abundance of so-called Business Colleges in the United States; but it may be safely said that not one of the thirty thousand of the young men who to-day are attending them finds any opportunity of gaining the expert training which will enable him to compete with the graduates of the commercial schools across the water. The Business College with us is largely devoted to the technical routine of ordinary business conditions, while in Europe the emphasis of commercial education is thrown upon schools of the highest grade, which in some instances are already worthy of being called universities, where the broadest commercial education is given and the widest opportunities for extensive attainment. So important has this higher form of commercial education come to be regarded, that the great University of Leipzig has already opened a distinct department for commerce, and the cities of Magdeburg and Cologne are preparing to establish definite commercial universities. The Government of Italy subsidizes the higher com-

mercial school of Venice, selecting its consuls from its graduates, as Belgium does from the graduates of the higher commercial school at Antwerp.

The pressure of this new form of highly trained commercial competition is already seriously felt in England. Sir Philip Magnus, in a recent work on industrial education, says: "The increasing severity of the competition, both in our home and in neutral markets, is especially noticeable in the case of Germany. In every quarter the perseverance and enterprise of the Germans makes this felt. In the knowledge of the markets of the world, the desire to accommodate all local tastes and idiosyncrasies, the determination to obtain a footing wherever they can, and the tenacity in retaining it, they appear to be gaining ground upon us. And this advance of German trade does not appear to be owing to any falling off in the efficiency of the British workman, but solely to the superior fitness of the Germans, due exclusively to the more systematic training they receive in mercantile pursuits, and especially the knowledge of foreign languages. \* \* \* Attention has been called in the Government reports to the importance of possessing an army of commercially trained agents who are able to discover foreign markets, to inform English manufacturers in regard to the requirements of those markets, and to follow the style of their home goods."

The founding of the schools which meet this new need has not been left to the European governments. On the contrary, in most instances they have been founded by local boards of trade. The Chamber of Commerce of Paris supports the three great commercial schools of that city, and the London Chamber of Commerce is now planning a commercial college of high grade. The commercial schools of Switzerland are either independent or supported by the cantons, though the State grants them subsidies, and the testimony of the reports is that everywhere in Europe the governments are pressed by the business community to establish these higher commercial schools and support them by State funds. Everywhere they have already formed higher schools of technology, forestry, agriculture and the like; and now that the demands of business have become equally pressing, the governments are recognizing them. The immense progress which the natural sciences, technology and transportation have made in recent years has given to the commercial profession an importance which could not be foreseen. More than ever before it has become the merchants' duty to act as middle men between producer and consumer, and a wider scientific knowledge, as well as a more exact intelligence, has become indispensable.

Testimony like the following is now not uncommon: A French manufacturer, commenting upon the work of the Paris school, says, "You have just organized a system of accounting which has enabled me to reform my system of manufacture. In consequence, I have diminished my capital, reduced my business expenses, cut down the useless general charges, increased the general productive charges, perfected my equipment, interested my personnel and my laborers in the welfare of my enterprise, so that to-day I find it to my advantage to manufacture in Paris, and the foreigners purchase of me."

Without wishing to under-estimate the primary need for experience, it is safe to say that the time when it was sufficient for a business man to grow up

in his business has as completely passed as has the day when it was sufficient for a master workman to have been taught by the rule of thumb. Scientifically-trained engineers, electricians, chemists and machinists are no less needed than are merchants who have the broadest and most thorough education in their special departments. The laws of political economy, the economics of transportation and of cambistry are as essential to the business man as are the laws of celestial mechanics to an astronomer. The time has come when American merchants, whose intelligence and enterprise and fertility of resource have already given them such a world-wide reputation, should recognize the necessity of providing facilities of education for the young men who are to succeed them, which will enable them to take the place which their fathers' ability has opened for them. If our carriage makers, for example, have proved it to their interest for years past to maintain a special school of design, has not the time come when our boards of trade should establish commercial schools worthy to be compared with those of other lands?

#### MULTIPLICATION OF INDUSTRIAL ORGANIZATIONS OR TRUSTS.

Unquestionably there is no more striking or noteworthy feature at the moment in the country's industrial and financial affairs than the prominence which the industrial combinations or trusts have assumed. The influence of that feature has become all pervading. On the Stock Exchange speculation in the securities of these newly-created concerns dominates everything else, and the whole list is held in subjection to their movements. In the money market great derangement has been caused (as the high interest rates attained this week testify), first by the needs of the promoters of the undertakings in their financial operations, and secondly by the quite obvious manipulation of the prices of the shares of some of them, and a growing disinclination on the part of the banks and financial institutions to accept them as collateral for loans. With it all, the ardor of those engaged in forming these industrial corporations has not cooled, and to-day the movement, notwithstanding the obstacles enumerated, is progressing as actively as at any previous time, if not more so.

In our issue of March 4 (pages 399 and 400) we published a statement showing the number and extent of these organizations announced during the first two months of the year. It was found that on a very conservative basis the aggregate authorized capital of the companies formed in this way during these two months represented over 1,100 million dollars. As another month has elapsed since then and the movement has, as stated, continued, and in fact gained in force, it seems desirable to bring this statement forward so as to include the additional new incorporations, and thus cover the first quarter of the current calendar year. It is proper to say that in thus presenting a new exhibit we have adhered strictly to the rules laid down in the preparation of our earlier statement. We have avoided the temptation to swell the list by including companies that do not properly belong in it. Statements have been published showing (or attempting to show) the total of *all* capital incorporations. If we followed this plan we would obviously obtain yet more striking figures, but the real extent of the movement

we are trying to measure would be exaggerated and the value of the compilation (for our purposes) be impaired. The movement is large enough in all conscience without attempting unduly to add to its proportions.

Our purpose has been to indicate only the new incorporations which represent "combines" (that is, the amalgamation of two or more concerns or businesses in a single company), or which aim at a monopoly in the field they are undertaking to occupy. The incorporations in the ordinary way we have disregarded. There are always more or less of these, even in the dullest times, and their number and extent is a matter of comparatively small importance. The owner of a private business will convert it into the corporate form to ensure against the contingency of his death or to facilitate the disposal of a portion of it to new hands. With such incorporations we are not concerned on the present occasion. Nor is it a matter of any moment what companies may have been formed in the carrying out of new ventures or the starting in business of new people.

It may surprise the reader to see how greatly the list is reduced in this way. As indicating what has been excluded, we will say that we have not taken, for instance, the Great Northern Paper Co., organized under a special charter granted by the State of Maine, with a capital stock of \$4,000,000, and which proposes to build mills on the Penobscot River for the purpose of making news paper. The Park Steel Company, with a capital of \$10,000,000 (formed to take over the private business of Park, Brother & Co., of Pittsburg, which has been in continuous existence for 39 years), and a portion of whose securities Messrs. Baring, Magoun & Co. offered for sale last month, should perhaps be included in the list, since it represents the enlistment of outside capital in what was previously a private concern. But, to conform strictly to the rules laid down, we omit it. Then there are such incorporations as the Severy Process Co., with a capital of \$7,500,000, intended to exploit a process for doing away with "making ready" in printing; the Empire Steel & Iron Company, with a capital of \$5,000,000; the Boston & Seven Devils Copper Co., with a capital of \$5,000,000 (to do a general mixing, smelting and manufacturing business); the Columbia Refrigerating Co., with a capital of \$3,000,000 (to manufacture refrigerating cars, appliances, etc.); the American Warp-Drawing Machine Co., with \$3,000,000 capital; the Isle Royale Copper Co., with \$3,750,000 capital; the White Motor Wagon, with a capital of \$10,000,000; the Independent Electric Light & Power Co. of San Francisco, with \$10,000,000 capital; the Acker Process Co. with \$3,000,000 capital; the Acker Process Patent Co., with \$2,000,000 capital; the Continental Cotton Oil Company, with \$6,000,000 capital;—all these and many more are included in some of the published lists, but we exclude them for the reasons already stated, or because we have been unable to learn anything definite about them. The National Cash Register Co., with \$5,000,000 capital, is another incorporation omitted, since the organizers take particular pains to state that the company is not a consolidation of other similar concerns.

Of course, also, we do not include railroad companies or consolidations of street railways and traction companies, the latter of which have been unusually numerous of late. They belong in a

different category. In revising our list, too, we have eliminated some of the companies previously included, but which later developments have shown are not likely to be carried through. Thus the American Brass Company (\$20,000,000 capital) does not appear in the table this time because we cannot find that this undertaking has come to fruition. The American Potteries Company, which on more than one occasion seemed at the point of failure, appears now definitely to have come to grief. The American Cereal Company had already spent a good deal of money in advertising, when, just before the publication of our earlier statement, the announcement came that because of the inability of the organizers to enlist sufficient financial support the plan would, for the present, have to be abandoned, and we therefore left it out then. We need hardly say that combinations which have not yet been definitely matured, like the proposed union of the safe concerns, or that of the fine paper manufacturers, or the carpet trust, or the worsted yarn trust, likewise form no part of our exhibit. We have taken no company with an aggregate capital of less than a million dollars.

With these remarks, we present our table. It should be understood that it covers only the period since the 1st of January. The new combinations announced during the year 1898 were reported in our issue of January 7.

	Com. stock.	Capital Authorized. Pref. stock.	Bonds.
Am. Automatic W.igh't M. Co..	\$875,000	\$875,000 cum.	
American Beet Sugar Co. ....	15,000,000	5,000,000 non-c.

Virginia Iron Coal & Coke Co. ....	10,000,000	None.	10,000,000
Total.....	\$22,475,000	512,975,000	90,875,000
*Total stock issue.			

RECAPITULATION.		
Amount of common stock.....		\$922,475,000
Amount of preferred stock .....		512,975,000
Amount of bonds.....		90,875,000
Grand Total.....		\$1,528,325,000
Add increase in stock of American Tobacco Co. (increased from \$35,000,000 to \$70,000,000).....		35,000,000
Increase in stock of Continental Tobacco Co. (from \$75,000,000 to \$100,000,000).....		25,000,000
		\$1,588,325,000

The foregoing shows an aggregate for the three months of, roughly, one and a-half thousand million dollars—in exact figures, \$1,526,325,000. If to this we add the increase of \$35,000,000 in the stock of the American Tobacco Company and the proposed increase of \$25,000,000 in the stock of the Continental Tobacco Company, we get a grand total of new capital creations on the conservative basis outlined above of \$1,586,325,000. This is at the rate of over 500 millions a month, or six thousand millions a year. That was the rate indicated by our statement for the first two months, and the rate has been more than maintained in March. In the whole of the calendar year 1898 we found new capital additions of 916 million dollars.

While figures of such magnitude plainly suggest caution and a warning against overdoing the thing, an indiscriminate tabooing of industrial enterprises in general would by no means be justified. There are undoubtedly concerns of considerable merit in the list. The good should be differentiated from the bad and from those which have no claim to confidence.

It will be observed that on the present occasion we have carried our analysis a step further and show the amounts of the common and preferred stocks separately. It is customary to say that the preferred stock represents the cash value of the concerns incorporated, the common stock the assumed value of the good-will. But while this may be true in a good many cases, it is not true in all. We might point to several instances where the amount of the preferred stock is so small that it cannot be viewed in that light. Moreover, there are many companies which have issued no preferred stock whatever. In a few cases we have found ourselves unable (the officials being secretive and non-communicative) to indicate whether there was preferred stock or not. Where we know definitely that there is no preference stock the fact is indicated in the table. The bond issues are comparatively small and infrequent. But that simply indicates the present status. We should expect these to increase later on, when business becomes poor and the companies get pinched for cash. Altogether, the total of \$1,586,325,000 is made up of \$969,975,000 common stock, \$525,475,000 preferred stock and \$90,875,000 of bonds.

In connection with the preference shares we have indicated one other fact, namely, whether dividends are cumulative or not. It will be noted that most of them are cumulative. This is very important, since it diminishes the chance of the common stock getting returns. For if we assume that in times of business depression dividends on the preference shares will often have to be reduced or suspended, it follows that with a recurrence of business activity and prosperity the surplus will first be needed to make good such arrears of dividends on these preference stocks, instead of being available for dividends on the common stock,

vance amounting to 7d. in the £, or 2.91 per cent, thus restoring the rate prevailing before the reduction accepted in March 1893, after a prolonged strike. Peace is thus assured in the spinning branch of the industry for some time to come. The advance has been granted upon the understanding that the operatives' unions are to consider seriously a proposal of the employers for the establishment of a permanent joint board, through the medium of which the rates of wages will in future rise and fall, according to the state of the trade and the fluctuations in the margin between the prices of cotton and yarn. This provision is aimed at the position assumed by the unions last summer, when they contended, or at least appeared to contend, that the mere fact that the trade was being carried on unprofitably was not itself sufficient to justify a reduction. If the proposal should be adopted, it will become an additional article of the Brooklands Agreement, already referred to in this correspondence, which has done so much to regulate and to settle peacefully labor difficulties of various kinds in this industry.

It may fairly be claimed that the agreement, together with the calmness and ability of the leading representatives on both sides by whom it is administered, has placed labor negotiations in the English cotton spinning trade on a very high plane so far as the dignity and the reasonableness with which they are conducted are concerned. In addressing the joint conference at which this settlement was agreed upon, the President of the Federation of Master Cotton Spinners presented some interesting figures illustrating the scanty reward falling to the lot of its members during the last ten years. They are shown in the following table, which gives the aggregate balances in the profit and loss accounts of the spinning companies whose accounts were published in each year from 1889 to 1898, inclusive.

Year.	Companies Reporting.	Profit or Loss Account.	Percentage Return or Loss on Capitalization.		
			Per Com.	£	s. d.
1889.....	86.....	Profit... £220,587..	£2,586.....	6	12 0
1890.....	90.....	Profit... 376,041..	4,177.....	10	18 0

1896.....	92.....	Profit... 46,773..	508.....	1	4 4
1897.....	79.....	Profit... 147,724..	1,870.....	4	8 0
1898.....	70.....	Profit... 231,518..	3,309.....	7	11 2

These results refer almost exclusively to mills engaged in spinning medium or low medium counts from American cotton. The production of the finer counts from Egyptian or other long stapled material is almost entirely in the hands of private partnerships, and it is certain that this branch of the industry has fared very much better during the last ten years than that represented in the preceding table. It should also be stated that many of the companies whose accounts are included in it have for many years been accustomed to charge their profit and loss accounts very insufficiently for depreciation of plant. The consequence is that the profits shown are somewhat in excess of their true amount, and the losses correspondingly too little. This is admitted by the representatives of the workpeople, but they contend that it is not their fault if the present more favorable condition of the spinning trade is hampered by an excessive over-valuation of plant which has been at work for some years.

The claim for an advance of wages in the weaving branch of the cotton industry remains still unsettled. It has been increased from 5 to 10 per cent, but little

**THE WAGES DISPUTE IN THE ENGLISH COTTON INDUSTRY—A NEW OFFICIAL COMMERCIAL DEPARTMENT IN LONDON—THE ENORMOUS EXCESS OF BRITISH IMPORTS OVER EXPORTS IN 1898 AND ITS LESSONS.**

MANCHESTER, March 22.

The threatened wages war in the English cotton industry has happily been averted by an agreement arrived at two days ago. The employers have conceded the reduced claim of the workpeople of an ad-

is heard of the claim being pressed, and apparently the workpeople have not yet made up their minds to bring the matter to the point of a firm and resolute demand. The "margin" is on the whole considerably better for the employers than it was six months ago, and the production is to a large extent well sold forward. But their position in respect of profit is widely different in the various departments, and there are some in which, notwithstanding the general improvement in the Manchester market within that period, the prices of yarn and cloth are still too near to afford more than a scanty remuneration to the manufacturer.

A new development in the way of official co-operation between the Government and the commercial and industrial interests of the country was announced by Mr. Ritchie, the President of the Board of Trade, on the 15th instant, at the annual dinner of the National Association of Chambers of Commerce. He presented the scheme only in the barest outline. A Commercial Department is to be established under the auspices of the Board of Trade in which all available information bearing upon commerce, especially that with foreign countries and the British colonies, is to be gathered, arranged and made immediately available for business men. The department is to be under the control of a composite committee whose members will be drawn from the permanent staffs of the Foreign Office, the India Office and the Colonial Office, and a certain number of competent representative men engaged in trade and industry will be added. The precise functions of the committee have not yet been defined.

The scheme appears to have been shaped very much in accordance with one submitted to Mr. Gladstone's Government early in 1893 by the Manchester Chamber of Commerce. At that time it was proposed to form some such committee as that now foreshadowed for the purpose of advising the Government upon questions relating to the external trade of the country in respect of treaties, tariffs and commercial conventions; trade routes and arrangements with foreign railways and shipping companies; transit dues and charges, and trans-shipments. There were to be twelve members, three of whom should be permanent officials, and the rest representatives of the cotton, woollen, iron, hardware, shipping, food and chemical industries, besides one representative each of special Scotch and Irish industries. Five members, including the official ones, were to be appointed absolutely by the Government, and all the remainder by the President of the Board of Trade on the nomination of chambers of commerce, which were to supply names for selection. In commending its scheme, the Manchester Chamber said: "Year by year our foreign trade is becoming more complicated, and if it is to be effectively maintained, it is urgent that foreign commercial questions should be closely watched and considered by a specially appointed expert committee."

The proposal was not adopted by Mr. Gladstone's Government, although it was credibly stated at the time that Mr. Mundella, the then President of the Board of Trade, was entirely favorable to its acceptance. Since then the exigencies clearly discerned by the Manchester Chamber have become more marked and more pressing. International commerce and international industrial rivalry have been accentuated and quickened, demanding greater vigilance, prompter action and special knowledge which per-

sons trained in the public service seldom possess. To changes such as these the departure now announced may be attributed. So far men of business have not discussed it much. They are awaiting the fuller unfolding of the scheme.

The huge proportions reached last year in the excess of imports over exports of merchandise and treasure in the statistical accounts of British external trade have revived an old controversy as to the significance of this constantly recurring feature in the national accounts. Of merchandise the imports were £176,594,207 more than the exports, and of gold and silver, £6,185,558, making altogether an excess of £182,779,765, against £156,106,232 in 1897 and £139,055,327 in 1896. Some deduction ought to be made from these amounts for the value of the shipping built in the United Kingdom for foreign or colonial owners, or transferred to them from the British register. Allowance should be made, too, for the fact that whilst the imports are valued as landed after payment of freight, the exports are entered at their value without freight. But even if it were possible accurately to make these adjustments, they could not materially alter the variation in the excess of imports from year to year. How then are we to explain the enormous difference between the excess of 1898—£182,779,765—and that of 1896—£139,055,327? The difference is £43,724,438, and it would be beyond belief that so large a sum represents nothing more than the increase, within a couple of years, in the earnings and profits of British capital, and payment for British services outside the Kingdom. The conclusion seems inevitable that there was some substantial homeward withdrawal of capital during 1898.

In the course of the discussions to which this phenomenal increase in the excess of imports has given rise, one has occasionally heard echoes of that exploded doctrine that it is an indication that the country is "living upon its capital." But no one seems to take it seriously to heart. There is, however, a possible explanation of it, not hitherto put forward, so far as I am aware, which accords entirely with the general course of English trade, home and foreign, last year. It may be worth while to consider it, because if it be well founded, one may find that it throws much light upon the rationale of fluctuations in the foreign trade of all the great commercial countries having important international trade relations.

The course of British industry and trade during 1898 was marked by two striking facts. In the first place the productive energies of the country, as a whole, were never so fully or so fruitfully employed. In few industries was much time lost. The harvest of the United Kingdom was the most abundant known for a long time past, some experienced observers said for thirty, others for forty years. Yet the imports of food and drink were larger by £14,688,277 than in 1897. Those of raw materials of manufacture were greater by £2,068,308, and of manufactured articles by £1,985,064. Such figures suggest, what is indeed the fact, that the consumption of the means of living, and of the raw materials of industry was unprecedentedly large. In harmony with these indications are the statistics of employment collected by the Labor Department of the Board of Trade, and those of railway traffic and bankers' clearings, all of which afford evidence of activity in the industries and the home distributing trade exceeding any before known.

But, secondly, the exports of British productions during 1898 were less than in either of the two immediately preceding years, having reached only £233,390,792, against £234,219,708 in 1897 and £240,145,551 in 1896. The changes in the general prices of commodities during the last three years go to show that the volume of the exports has diminished to an extent even greater than that shown in these figures. The index numbers of English prices prepared by Mr. Augustus Sauerbeck, the most trustworthy we possess, were 64 for 1898, 62 for 1897 and 61 for 1896. It may fairly be assumed, therefore, that the decline in the exports of British productions was more than is indicated in the official statistics, which are based on current prices as declared by exporters. What is the explanation of the singular fact that whilst the industries of a country engaged to a degree unknown elsewhere in producing for foreign markets have been employed almost to their full capacity, the exports have fallen off to quite a remarkable extent? Unquestionably it is that these industries have been engaged, more than ever they were before, in producing for the home markets. Evidence abounds on all hands of extraordinary activity in investment of capital during the past year in machinery, plant, buildings and other forms, designed to extend and improve the means of future production. There is no more trustworthy sign of variations in this kind of activity than the fluctuations in the consumption of iron and steel in the innumerable forms under which they are utilized. Now it is a well-known fact that the furnaces, forges and engineering and ship-building works of the United Kingdom were never so busily, or so productively, employed as they were in 1898. Yet the entire value of the exports of these materials, notwithstanding a rise of prices, was but a trifle more than that of the year before, although in 1897 the iron and steel industries were completely disorganized, and more or less idle for many months in consequence of the great strike in the engineering industry. The following figures give the value of the exports of iron and steel, engines and machinery in each of these years:

	1897.	1898.
Exports of iron and steel.....	£24,641,516	£22,640,092
Exports of engines and machinery.....	16,255,602	17,380,076
Total.....	£40,897,118	£41,020,168
Increase in 1898.....		123,050

Thus, although the productive capacity was fully employed in 1898, and but very partially employed in 1897, the exports of 1898 were only £123,050, or .3 (3-10 of one) per cent more than in 1897. It is clear, then, that the home demand for these forms of wealth must have been enormous. A very considerable proportion of the iron and steel produced last year was used in the construction of ships and of their engines and general equipment. The number and tonnage of the vessels launched at all of the ship building yards of the Kingdom during each of the past two years were:

	No.	Tons.	No.	Tons.
Merchant and other vessels.....	591	952,486	698	1,159,751
Warships, Government yards.....	4	31,885	3	66,370
Warships, private yards.....	44	63,580	47	97,568
Total.....	639	1,047,591	751	1,323,709
Increase in 1898.....			112	275,758

But in other directions the consumption of iron and steel has also been markedly in excess of previous years. In the metal and engineering industries themselves, manufacturers, stimulated by American example, have been busy improving the blast furnace plant, and all branches of their business in which machinery is employed. The same efforts to

bring their means of production to the highest state of efficiency has been observable in other manufacturing industries. Then, too, building and rebuilding have been exceedingly active in almost every manufacturing and mercantile centre. Railway companies also have bought largely of permanent way materials and rolling stock. And of course the great increase in the aggregate earnings of the masses of the people, implied by all this activity, implies also a substantial enlargement in the quantity of food, clothing and household necessities distributed throughout the country, implying further a greater consumption of imported food and manufactures both imported and of home production.

The general inference to be drawn from the salient features of British trade and industry during the past year is that the prosperity or lack of prosperity of a great industrial and commercial people can never be correctly measured by the fluctuations in its exports from year to year. Its exports may be large because its home trade is slack, and, conversely, they may be small because its home demands for the products of industry are unusually great. It follows, then, that the relative efficiency of various nations as competitors in the markets of the world cannot be justly gauged by a comparison of their exports without reference to the contemporaneous condition of their respective home trades. One may, perhaps, venture to suggest, therefore, that the extraordinary increase in recent years in the exports of American manufactures may be partly accounted for by the comparatively slack condition of the home markets. There is plenty of evidence that the progress in industrial efficiency in the United States has been almost marvelous in these years, and no one can doubt that the increase of competitive power, of which it is a proof, has come to stay, and is destined to grow. But at the same time one ought not to be surprised should the increase of exports of manufactured goods become less marked if the improvement in the home markets and the accompanying advance of prices continues.

#### ITEMS ABOUT BANKS, BANKERS AND TRUST CO.'S.

Bank and trust stocks have this week been bought at public sale to about the usual extent. The total thus sold reaches 952 shares, of which only 100 shares were at the Stock Exchange, the remainder being at auction. Some of the transactions show noteworthy advances. Ten shares of the National City Bank sold at 1,636; the last previous sale was at 1,612 in March 1899. Ten shares of the Fifth Avenue Bank sold at 3,210; the last previous sale was at 3093 in February 1899. Fifty shares of the Hide & Leather Bank sold at 118; the last previous sale was May 1 1898 at 85. Twenty-five shares of the Lincoln National Bank sold at 860; the last previous sale was February 1899 at 760. The following is a statement of all the sales made this week, together with the last previous sale of the same stock. We propose hereafter to give a similar statement in this column each week.

Shares.	Price.	Last previous sale.
3 America, Bank of.....	406	Feb. '99— 404½
100 Bowers Bank.....	306	July '98— 291
200 Chatham National Bank.....	322	Feb. '99— 312
10 City Bank, National.....	1,656	Feb. '99—1,602
20 Corn Exchange Bank.....	322	Feb. '99— 333
10 Fifth Avenue Bank.....	3,210	Feb. '99—3,080
10 Fourth National Bank.....	182	Feb. '99— 175
45 Hanover National Bank.....	675	Feb. '99— 650
50 Hide & Leather National Bank.....	118	May '98— 85
20 Importers & Traders' National Bank.....	549	Feb. '99— 540
25 Lincoln National Bank.....	860	Feb. '99— 760
3 Market & Fulton National Bank.....	236	Feb. '99— 238
100 Mechanics' National Bank.....	202½	Feb. '99— 205
30 Mercantile National Bank.....	189½	Jan. '99— 175
50 Merchants' National Bank.....	165	Feb. '99— 167

4 Guaranty Trust.....	661	Feb. '99— 600
15 State Trust.....	372½	Feb. '99— 380

½ Sale at Stock Exchange, 150 shares of this sold at Stock Exchange.

—The Miles Bill, which sought to fix the legal rate of interest in this State at 5 per cent, was defeated in the Assembly on Tuesday, though by a very narrow majority. The measure was strenuously opposed by the Merchants' Association and by the New York Board of Trade and Transportation, who protested against the passage of the law, claiming that it would not benefit any class of citizens, but that it would be seriously detrimental to all who were seeking loans.

—The social event of the week in banking circles was the banquet given on Monday evening by the Bank of the Manhattan Company in commemoration of the organization of the institution a century ago. The banquet was attended by nearly all the prominent bank and trust company presidents of the city and among the invited guests were Mr. Lyman J. Gage, Secretary of the Treasury; Senator Chauncey M. Depew, and Bishop Potter. The principal speech of the evening was by Secretary Gage. After referring to the dangers to the financial situation which, in his judgment, might result from the excessive over-capitalization of combinations of industrial concerns, he alluded to the valuable assistance which had been rendered the Government by the banks of this city in various crises, and especially in the crisis of 1896. He referred in complimentary terms to the efforts of Mr. John A. Stewart, of the United States Trust Company, in organizing a syndicate to guarantee the \$50,000,000 loan issued in that year, and he concluded by denying that the Treasury Department contemplated a further issue of bonds. He said that there were now \$234,000,000 in the Treasury and after the \$20,000,000 shall have been paid to Spain there will remain a net amount of \$264,000,000, which will be much more than is necessary to meet the estimated deficiencies for the next two years without encroaching upon the \$100,000,000 gold reserve. He believed that financial interests need feel no anxiety. Brief speeches were made by Senator Chauncey M. Depew, Mr. Frederick D. Tappan, Bishop Potter and Mr. John A. Stewart of the United States Trust Company. Mr. Stephen Baker, President of the Bank of the Manhattan Company, gave an historical sketch of the institution. As is generally known, the charter of the bank was obtained April 2 1799 by Aaron Burr. The real object of the charter was concealed under the guise of authority for the organization of a corporation for the construction of a system of water-works for the city, which was then greatly desired, permission being also given for the employment of the surplus capital in the purchase of public or other stock or in any other moneyed transactions. Immediately after the charter was secured the announcement was made that the company would begin the construction of the water-works and that it would likewise open a bank at what was then known as No. 23 Wall Street. Water-works were constructed, the supply being obtained from the Collect pond and from sunken wells, and the works were operated for several years. The most profitable business of the company was, however, in its banking department. The original capital of the bank was \$500,000. The institution was the second organized in the city, the first being the Bank of New York, and it was quite successful from the beginning, being conservatively managed and paying regular and at times large dividends to its stockholders. Among the presidents of the bank have been some of the most prominent financiers of their day.

—A report has been current at intervals since the Corn Exchange Bank made arrangements for the absorption of the Astor Place and the Hudson River banks that the Corn Exchange was negotiating for control of the Fulton Bank of Brooklyn, with a view to its conversion into a branch bank. Early this week it was reported that the Fulton and the Nassau banks of Brooklyn would be consolidated preliminary to absorption by the Corn Exchange. It was announced on Wednesday that instead of such consolidation the Fulton had been purchased by the Mechanics' Bank of Brooklyn, capital \$500,000 and surplus \$389,810. This bank is one of the strongest institutions in that city. Therefore any negotiations which have been opened looking to the absorption of the Fulton Bank by the Corn Exchange may be considered at an end. The Fulton Bank—capital \$200,000 and surplus \$169,043—will be liquidated and its business will be transferred to the Mechanics' Bank.

—The new rules adopted by the New York Clearing House providing for compensatory charges for the collection of country checks went into operation on Monday. Though

there have been exaggerated statements as to the effect, present and prospective, of the enforcement of these rules, they appear to have thus far caused very little friction, and it is thought when they come to be clearly understood by those who are immediately interested in them they will meet with general approval. The country banks can do much to facilitate collections, and at the same time they can very readily make such arrangements with their New York correspondents as will result in profit to themselves. For example, a bank in Syracuse receiving from its New York correspondent items for collection can, by making daily remittances, instead of remitting in ten days or other periods, apply to its own benefit the collecting charge of 1 10 of 1 per cent or any portion thereof, the idea being that the New York correspondent, in consideration of the aforesaid prompt remittance, might waive its claim to certain charges. The Syracuse bank can also, by keeping a sufficient balance with its correspondent, certify checks drawn upon it by its customers for transmission to the creditors in New York of such customers, making the checks payable at the counter of its New York correspondent. In this way the Syracuse bank would retain its own customers on its books and the customer would not be obliged to open a New York account.

—It has been asserted during the week that the Boston Clearing House Association has recently established a sub-clearing house to clear checks for banks in Massachusetts; and it has also been asserted that if it should operate successfully in that State this system of clearing country checks would be extended to all the New England States. The statement that a sub-clearing house or any clearing house for collecting checks has been established in Boston is incorrect. The Clearing House Committee of that Association has had the matter under consideration and has recommended a plan for the establishment of such a system. The Committee recommend that the work shall be done by the Manager of the Clearing House. Those Boston banks who choose to avail themselves of this method of collecting their checks shall deposit them at some fixed hour each day. The checks shall then be assorted—checks on each out-of-town bank in a separate package. The checks will then be sent to the banks on which they are drawn, so far as such banks will undertake to remit for checks on themselves at par by drafts on their Boston correspondents. In case remittances should be delayed so that the Manager should not have sufficient funds to meet the charges against him, he would charge against the several banks their respective amounts of such delayed remittances.

In a letter to the interior banks the Manager of the Clearing House, after explaining the reasons for undertaking the work of country collections in Massachusetts through the Clearing House, concludes as follows: "If the Boston banks are willing to assume the labor and expense required to continue the circulation of New England checks at par, and in so doing to provide for continued collection, without charge, of the New England checks which you receive and send to Boston, they feel that in asking you to remit for checks on your own bank without charge they are not making an unreasonable request." We assume this indicates that the country banks are to receive no compensation for collections but are to bear that expense. The foregoing shows that the Boston plan for the collection of checks through the Clearing House is by no means perfected. Indeed, it has not as yet been passed upon by the Clearing House Association. As the matter at present stands, and after a study of the papers which have been submitted to us, we fail to discover what is to be gained if it goes into operation.

**FAILURES FOR FIRST QUARTER OF 1899.**—The following figures, prepared from Messrs. R. G. Dun & Co's. statement, show the number of failures in the United States and Canada during the quarter ending March 31, 1899. For purposes of comparison like figures for the corresponding periods of the preceding year are given:

States and Territories.	Quarter ending— March 31, 1899.		Quarter ending— March 31, 1898.	
	No. of Failures.	Amount of Liabilities.	No. of Failures.	Amount of Liabilities.
New England States.....	536	\$6,685,080	526	\$6,539,044
Middle States.....	542	5,512,193	750	9,482,264
Southern States.....	508	4,557,835	678	4,029,717
Southwestern States.....	213	1,105,735	293	1,819,395
Central States.....	482	6,706,655	737	5,565,683
Western States.....	236	1,222,792	348	2,088,849
Pacific States and Territories.	255	1,354,691	350	2,187,469
Aggregate United States....	2,772	\$27,152,031	3,687	\$31,710,421
Dominion of Canada.....	370	\$4,257,426	433	\$3,009,270

**Clearings by Telegraph.—Sales of Stocks, Bonds, &c.**—The subjoined table, covering clearings for the current week usually appears on the first page of the CHRONICLE, but on account of the length of the other table is crowded out once a month. The figures are received by telegraph from the leading cities. It will be observed that as compared with the corresponding week of 1898 there is an increase in the aggregate of 90.9 per cent. So far as the individual cities are concerned, New York exhibits an increase of 119.4 per cent, and the gains at other points are: Boston 83.9 per cent, Philadelphia 105.6 per cent, Chicago 29.4 per cent, St. Louis 20.8 per cent, Baltimore 82.3 per cent and New Orleans 33.7 per cent. Good Friday fell in the week of last year.

CLEARINGS. Returns by Telegraph.	Week Ending April 8.		
	1899.	1898.	Per Cent.
New York.....	\$1,354,474,830	\$571,810,939	+119.4
Boston.....	144,158,171	80,983,804	+83.9
Philadelphia.....	99,718,763	49,502,141	+105.6
Baltimore.....	31,354,880	11,467,851	+82.3
Chicago.....	103,027,476	79,607,971	+29.4
St. Louis.....	28,322,918	23,369,754	+20.8
New Orleans.....	7,531,044	5,431,323	+33.7
Seven cities, 5 days.....	\$1,607,378,729	\$631,353,763	+102.6
Other cities, 5 days.....	178,978,487	147,147,622	+21.8
Total all cities, 5 days....	\$1,841,357,216	\$778,501,405	+90.1
All cities, 1 day.....	355,141,452	171,984,699	+95.1
Total all cities for week..	\$2,176,498,667	\$1,140,886,104	+90.9

Another table, our usual monthly detailed statement of transactions on the various New York Exchanges, has also been crowded off of the first page. The results for the three months are, however, given below and for purposes of comparison the figures for the corresponding period of 1898 are also presented.

Description.	Three Months, 1899.			Three Months, 1898.		
	Par Value or Quantity.	Actual Value.	Average Price.	Par Value or Quantity.	Actual Value.	Average Price.
Stocks.....	\$5,500,000	\$183,817.6	74.9	\$5,500,000	\$177,057.6	75.3
B.R. bonds.....	\$1,100,000	\$104,492.4	84.0	\$1,100,000	\$100,499.3	79.7
Gov't bonds.....	\$1,484,000	\$1,054,999.1	113.3	\$1,484,000	\$1,071,984.1	120.0

DEBT STATEMENT MARCH 31 1899.

The following statement of the public debt of the United States on March 31 1899 is made up from official figures issued on that day. Further on we give an interesting exhibit of the Treasury cash holdings of the same date.

INTEREST-BEARING DEBT MARCH 31, 1899.

Title of Loan—	Interest payable.	Amount Issued.	Registered.	Amount Outstanding.	Coupon.	Total.
1891, Fund. loan, 1891, Q.—M.		250,000,000				
Continued at 2 p. c.			25,364,500			25,364,500
1891, Funded loan, 1897, Q.—J.		740,911,380	491,348,600	68,403,900		559,752,500
1891, Refund certifica's, Q.—J.		40,018,750				40,018,750
1891, Loan of 1904, Q.—F.		100,000,000	67,509,950	32,490,050		100,000,000
1891, Loan of 1905, Q.—F.		162,315,400	113,744,600	18,570,800		182,315,400
35, of 1905-1913, Q.—F.		108,406,000	98,348,540	105,057,400		198,406,000
Total, excluding Pacific Railroad Bonds.....		1,491,646,000	791,225,190	254,511,210		1,045,736,400

NOTE.—The denominations of bonds are as follows: Two per cents (registered only), \$50, \$100, \$500, \$1,000, \$5,000, \$10,000, \$20,000, \$50,000; 4s of 1907, registered, \$50, \$100, \$500, \$1,000, \$5,000, \$10,000, \$20,000, \$50,000, coupon, \$50, \$100, \$500, \$1,000; 4s, refunding certificates, \$1, \$5 of 1904, registered, \$50, \$100, \$1,000, \$10,000, coupon, \$50, \$100, \$500, \$1,000, 4s of 1905 registered, \$50, \$100, \$500, \$1,000, coupon, \$50, \$100, \$500, \$1,000; 3s of 1908-1913 registered, \$20, \$100, \$500, \$1,000, \$5,000, \$10,000, coupon, \$20, \$100, \$500, \$1,000.

DEBT ON WHICH INTEREST HAS CEASED SINCE MATURITY.

Funded Loan of 1891, matured September 2, 1891	Feb. 28.	Mar. 31.
	\$111,350.00	\$113,331.00
Old debt matured prior and subsequent to Jan. 1, '91	1,117,320.26	1,045,070.24
Debt on which interest has ceased	\$1,228,670.26	\$1,158,401.24
Bonds issued to Pacific railroads matured but not yet presented: Union Pacific, \$18,000; Central Pacific, \$7,000; Kansas Pacific, \$11,000; Sioux City & Pacific, \$1,000; total....		\$132,000.00

DEBT BEARING NO INTEREST.		
United States notes.....		\$346,681,016.00
Old demand notes.....		53,997.50
National bank notes—Redemption account.....		32,936,798.00
Fractional currency.....		15,289,184.66
Loss amount estimated as lost or destroyed.....		8,375,034.00
		0,843,290.66

Aggregate of debt bearing no interest.....\$346,527,816.10

RECAPITULATION.			
	March 31, 1899.	February 28, 1899.	Increase or Decrease.
Classification of Debt—			
Interest-bearing debt.....	1,445,775,300.00	1,010,735,270.00	Inc. 5,041,030.00
Debt, interest ceased.....	1,319,430.26	1,231,670.26	Dec. 18,760.00
Debt bearing no interest.....	385,544,016.10	385,041,994.64	Inc. 1,513,021.46
Total gross debt.....	1,831,549,726.43	1,427,097,944.90	Inc. 6,450,821.52
Cash balance in Treasury.....	241,035,163.75	269,103,813.21	Dec. 12,068,650.46
Total net debt.....	1,140,505,562.67	1,157,994,131.69	Dec. 8,988,499.02

The foregoing figures show a gross debt on Mar. 31, 1899, (interest-bearing and non-interest bearing) of \$1,433,549,726.43 and a net debt (gross debt less net cash in the Treasury) of \$1,149,505,562.67.

**PACIFIC RAILROAD DEBT.**—These bonds are never included in the official total of the Government debt. To show their present status we have made the following compilation:

UNLIQUIDATED BONDS ISSUED TO PACIFIC RAILROADS—THEIR STATUS APRIL 1, 1899.

Name of Railway.	Railroad Liability.		Repaid by Companies.			Balance Due U. S.
	Bonds Issued by Gov't.	Not Paid by Gov't.	Through Sinking Fund.	Settlement with Government.	Total.	
Central Pacific.....	1,846,170	36,691,385	9,100,452	58,349,953	62,450,405	
Kansas Pacific.....	6,398,000	6,607,435		12,010,158	12,010,158	
Union Pacific.....	27,396,512	31,211,712		5,814,231	5,814,231	
Cent. & U. Pac.....	1,644,000	2,163,174				3,707,174
West. Pacific.....	1,270,469	3,157,108		5,123,663	6,123,663	
Sioux C. & Pac.....	1,024,320	2,562,692				4,229,012
Total.....	64,623,512	82,422,431	9,100,452	120,177,398	129,277,850	7,981,009

\* Government accepted principal of bonds—\$4,908,000—in full payment of all indebtedness.

**TREASURY CASH AND DEMAND LIABILITIES.**—The cash holdings of the Government as the items stood Mar. 31 we take from the Treasury statement of that date. The net cash balance given below is the same as deducted above in reaching the net debt.

CASH IN THE TREASURY.		
Gold—Coin.....		\$154,745,506.31
Bars.....		121,630,812.84
Silver—Dollars.....		410,636,670.00
Subsidiary coin.....		6,944,374.66
Paper—United States notes.....		98,815,325.97
Treasury notes of 1890.....		478,579.00
Gold certificates.....		1,614,181.00
Silver certificates.....		2,753,498.00
Certificates of deposit (Act June 4, 1872).....		560,000.00
National bank notes.....		2,478,451.59
Other—Bonds, interest and coupons paid, awaiting reimbursement.....		31,909.94
Minor coin and fractional currency.....		145,092.42
Deposits in nat'l bank depositories—general acc't.....		42,444,638.47
Disbursing officers' balances.....		5,862,100.29
Aggregate.....		\$919,662,047.32
DEMAND LIABILITIES.		
Gold certificates.....		\$34,520,429.00
Silver certificates.....		402,627,604.00
Certificates of deposit Act June 4, 1872.....		22,466,000.00
Treasury notes of 1891.....		91,551,243.00
Fund for redemption of uncured nat'l bank notes.....		9,241,100.83
Outstanding checks and drafts.....		4,117,944.34
Disbursing officers' balances.....		54,151,738.40
Agency accounts, Ac.....		119,000.00
Gold reserve.....		8,951,320.89
Net cash balance.....		141,043,163.75
Aggregate.....		\$919,642,087.32
Net cash balance in the Treasury February 28, 1899.....		\$249,101,613.81
Net cash balance in the Treasury March 31, 1899.....		\$241,035,163.75
Increase during the month.....		\$14,939,050.54

## FAILURES BY BRANCHES OF TRADE.

We take from Dan's Review the following statement showing the failures in the United States by branches of trade for the quarter ending March 31 in each of the last three years.

## FAILURES BY BRANCHES OF BUSINESS.

Manufacturers.	First Quarter.					
	1899.		1898.		1897.	
	No.	Liabilities.	No.	Liabilities.	No.	Liabilities.
Iron, foundries and mills.	4	298,800	20	627,500	28	2,265,005
Machinery and tools.	25	1,478,384	43	2,022,419	43	1,695,952
Woolens, carpets, & knit goods.	9	820,700	11	311,600	15	678,500
Cottons, lace and hosiery.	6	14,781	7	464,800	20	470,000
Lumber, carpentry & cooper.	55	1,501,819	96	2,023,527	113	2,615,517

Banking.			24	1,697,966	74	12,744,650

NOTE.—Iron, woolens and cottons include all the branches of those manufactures; machinery includes implements and tools; lumber includes saw planing, sash and door mills, carpenters and coopers; clothing includes millinery and furnishings; hats include furs and gloves; chemicals include drugs, paints and colors; printing and books include engraving and map-making; includes baking; leather and shoes include makers of harness, saddlery, trunks and rubber goods; liquors include tobacco, wines, brewers and beer; glass includes earthenware, pottery, brick, lime and cement; groceries include meats and fish; hotels include restaurants; dry goods include carpets and curtains; furniture includes crockery; hardware includes stoves and tools; and jewelry includes clocks and watches. Brokers include all real estate, note, insurance or produce dealers whose main business is not the handling of actual products, with mortgage and other loan concerns, and transporters include all except incorporated railway companies.

## Monetary and Commercial English News

[From our own correspondent.]

LONDON, Saturday, March 25.

For the first half of the week business continued very inactive on the Stock Exchange, although prices remained steady. But the conclusion of the treaty between this country and France for delimiting their respective spheres of influence in Africa greatly increased confidence and some more business occurred, prices generally advancing.

Naturally there is hesitation to deal just at present. Today the fortnightly settlement upon the Stock Exchange in mining securities begins. In other securities it will begin on Monday. And the settlement will not end until Wednesday evening. The Friday and Monday following will be public holidays and the Stock Exchange will be closed from Thursday evening until Tuesday morning. Consequently for business purposes Thursday next will be the last day of the month, the quarter and the Government's financial year. Members of the Stock Exchange will be fully employed until Wednesday with the settlement. And as the House will be closed for so long they are hardly likely to enter into many new engagements. Moreover, money is in good demand and is likely to continue so till the end of the month.

But while, for the time being, both members of the Stock Exchange and professional operators are cautious in what they do, there is a much more hopeful feeling than there was. The French Government, after it agreed to withdraw Major Marchand, seemed inclined to sulk, and there was a fear consequently that the negotiations opened by Lord Salisbury might drag very seriously. Happily the French Government has shown more statesmanship and more knowledge of what the true interests of the country require. The negotiations now concluded complete the work done last year respecting West Africa. And as far as can be judged from the information yet before the world, the agreement arrived at is fair to both parties. Our Government retains the whole of the Sudan, as it was claimed both by the Khaliifa and by the Egyptian Government before him. On the other hand, this country recognizes the French claim to both sides of Lake Chad and practically yields to France the country almost down to the Congo.

The Egyptian question has not been raised apparently in any form. But as France recognizes both the Bahr-el-Ghazal and Darfur to be within the British sphere of influence, indirectly and practically she recognizes the British position on the Nile. It is now hoped here and in Paris that the two governments will without delay attempt to settle the other questions outstanding, especially those referring to New-  
foundland, Siam and Madagascar. And the hope seems to

be confirmed by the fact that the French Government, it is understood, will introduce next Monday a bill ratifying the two African agreements.

The accounts from Russia are very grievous. The famine is even more intense than people in general believed. And especially in the province of Samara it is extremely severe. It is said that tens of thousands of people are without food, without fire, without furniture and to a great extent even without clothes; that disease in various forms, especially typhus and scurvy, is decimating the population, and that the outlook for the immediate future is alarming. It is said, too, that disease is spreading beyond the affected provinces, and it is feared that a regular epidemic may rage throughout Russia. The Russian Government naturally is fully occupied with this state of things. Unfortunately, it cannot borrow very freely. And though it holds an immense amount of gold, it is not showing that energy and activity in combatting the famine which might have been expected. No doubt the resources of Russia are very small. And when foreign countries are not willing to lend, it is difficult for the Government to provide all the funds required. But in a matter of this kind it would seem reasonable to expect that the Government should draw upon its reserves to any extent required.

French investors are no longer willing to lend to Russia, chiefly, no doubt, because they already have invested so much money in that country, but to a large extent, likewise, because they are disappointed at the failure of Russia to support them when the Fashoda incident arose. Germany requires all the capital she has command of and much more. And in this country there is very little inclination to lend to Russia. For the moment, therefore, Russia is not able to play the usual active part in foreign affairs, and the result is seen, amongst other things, in the more reasonable temper of France.

The large collection of the revenue and the extreme activity of trade are leading to a very strong demand for money, and the Bank of England is consequently doing a large business. From the beginning of February up to Wednesday evening last the outside market borrowed from the Bank about 4½ millions sterling. The borrowings since have been on a considerable scale, while all the loans that fell due have been renewed. And during next week it is probable that the borrowings will be on a still larger scale. It looks likely, therefore, that the outside market will owe to the Bank very considerably more than the Bank will pay out to the market on the 5th of April as interest on the national debt.

Until now it was expected that the payment of the interest on the debt and the large expenditure of the Government would at the beginning of April add so much to the supplies in the open market that rates would rapidly fall away and we should have a period of very cheap money. The Government expenditure no doubt will be large. But the Bank will have to receive so much in repayment that the debt interest will make very little difference. It seems most probable, therefore, that there will not be as much ease in April as hitherto has been expected. Towards the end of April the usual spring demands will make themselves felt and will continue well into May. And consequently it looks just now as if at this side of mid-summer, at all events, there will be very little change in rates in this country.

In Germany money is in very active demand and the outside market rate of discount is as high as 4½ per cent. There may be some ease in April. But the spring demand will raise rates again in May and June. In France confidence is at last recovering and there is some improvement in trade. Consequently money is there, likewise, in better demand. Over and above all this there is a fear here that a good deal of gold may by and by be shipped to New York. Meantime trade continues very active throughout the country and is likely to continue so the rest of the year.

In India there is little change in the money market and the demand for India Council drafts here is very great. The Council offered for tender on Wednesday 70 lacs. But it refused to sell under 1s. 4d. per rupee and consequently disposed of very little more than 30 lacs. The truth seems to be that it has already so much money at its disposal that it is trying to force up exchange even higher. According to the Budget statement published in Calcutta on Monday it is expected that the total sales by the Indian Council in the year ending Friday next will realize 19 millions sterling. Next year it is estimated that the Council will sell 17 millions sterling. The Budget is satisfactory, showing a small surplus for the year just ending, and it estimates a further surplus for the next year. The Indian Government hopes that it will not require to borrow either at home or in Europe. It has decided not to reduce taxation, but rather to make up for the deficits caused by the famine and plague.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

	1899. Mar. 23	1898. Mar. 23.	1897. Mar. 24.	1896. Mar. 25.
Circulation.	26,644,035	26,675,455	28,190,305	25,379,580

Messrs. Pixley & Abell write as follows under date of March 23:

Gold—The Bank has received 223,000 and 2240,000 has been withdrawn, of which 2150,000 went to South Africa and 2110,000 to Buenos Ayres. The recent arrivals of bar gold are all being secured by Berlin for Russia. Arrivals: South Africa, 2252,000; Chili, 23,000; Australia, 2220,000; total, 2475,000.

Silver—In spite of 20,000 kilos being required for the French Mint, the price has fallen to 27 1/2 d., but the market closes firm with no seller. Price of silver in India Rs. 70. Arrivals: New York, 2305,000; Chili, 210,000; total, 2315,000.

Mexican Dollars—No business doing in these coin.

The following shows the imports of cereal produce into the United Kingdom during the first twenty-nine weeks of the new season compared with previous seasons:

* Deducted from November "Miscellaneous" 1897.....	\$18,194,418 00
* Deducted from Union Pacific Railroad Purchase.....	\$1,549,868 25
* Deducted from November "Civil and Miscellaneous" 1897.....	\$31,715,304 14
* Deducted from December "Miscellaneous" 1897.....	\$900,000 00
* Deducted from Union Pacific Railroad Purchase.....	\$8,538,401 00
* Deducted from January "Miscellaneous" 1898.....	\$11,798,814 14
* Deducted from March "Miscellaneous" 1899.....	\$3,051,500

To make the figures conform to the Government statement, the amounts mentioned in above foot-notes should be added to the Receipts or Disbursements as indicated therein. We have deducted those items, as they do not belong to the regular income account, and if included would disturb the comparison with former and future years.

**TREASURY CURRENCY HOLDINGS.**—The following compilation, based on official Government statements indicates the currency holdings of the Treasury on the first of January, February, March and April, 1899.

## WALL STREET, FRIDAY, APRIL 7, 1899.—3 P. M.

**The Money Market and Financial Situation.**—The unusual demand for stocks, especially those of a speculative character, which was the prominent feature of the market early in the week, has been reversed, and there is now about as much eagerness to sell as there was to buy. The change came about chiefly as the result of a firmer money market, and an inclination on the part of lenders to discriminate against the industrial stocks as collateral. No doubt the application for loans on that class of collateral was increasing as the tendency to speculation increased, and with a larger demand for loans which has resulted from a broader and more general business activity, it seems perfectly natural for bankers to favor applications of the latter class. Other than the money stringency there is no special cause for such a decline in railway shares as has taken place. It is largely sympathetic. Wide fluctuations have accompanied the active speculation in industrial and traction shares, and all classes of stocks were affected. Railway earnings reported this week have been remarkably good in most cases and the outlook in this particular is decidedly encouraging. Unseasonable weather in the West and its effect upon the winter-wheat crop is made much of by the element which is encouraging lower prices on the Stock Exchange, but in this connection it is well to remember that almost no harvest has been gathered in recent years which Wall Street operators had not long before predicted would be a failure.

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 3 to 16 per cent. To-day's rates on call were 5 to 15 per cent. Prime commercial paper quoted 3¼ to 4½ per cent.

The Bank of England weekly statement on Thursday showed a decrease in bullion of £715,469, and the percentage of reserve to liabilities was 37-20, against 33-10 last week; the discount rate remains unchanged at 3 per cent. The Bank of France shows an increase of 3,550,000 francs in gold and an increase of 3,350,000 francs in silver.

\* This is the price bid at the morning board; no sale was made.

**State and Railroad Bonds.**—Sales of State bonds at the Board include \$50,000 Tennessee settlement 8s at 97¼; \$11,000 Virginia fund. debt 2-3s of 1901 at 84¼ to 84½ and \$2,000 Louisiana consol. 4s at 109¼.

On a volume of business somewhat smaller than last week, but averaging about \$3,650,000 par value per day, the market for railway bonds, in sympathy with that for stocks, showed a tendency to weakness. Declines in this department, where such have occurred, were relatively limited, however, and generally without significance. There were some notable exceptions to the rule, including St. Louis & Iron Mountain 5s, which advanced 2 points, Texas & Pacific 1st 5s, which advanced 1½ points, Wabash debenture series B, which advanced about a point, and Manhattan Railway consol. 4s, which advanced nearly 2 points.

**Stock and Bond Sales.**—The following shows the volume of business in stocks and bonds on the New York Stock Exchange for the past week and since January 1.

	Week ending Apr. 7.	Jan. 1 to Apr. 7.
N. Y. Stock Exch.	1899.	1898.
Government bonds	\$187,800	\$397,000
State bonds	78,000	1,931,300
S. & M. misc.	10,408,500	7,804,050
Total	\$10,674,300	\$34,032,350
Stocks—No. shares	6,081,793	1,777,479
Par value	\$995,979,180	\$184,310,000
Bond shares, par val.	87,500	.....
Total	\$10,674,300	\$34,032,350

	Week ending Apr. 7, 1899.	Shares.	Par value.	Railroad & State Bonds.	U. S. Bonds.
Saturday.....	\$598,791	\$59,933,100	\$1,574,000	\$31,600	\$500

Total.....	677,733	60,904	\$2,623,579	313,142	890,588	793,154

**Railroad and Miscellaneous Stocks.**—The stock market was strong at the opening on Monday, and under a sharp demand the highest quotations of the week were generally recorded. The movement was most pronounced in the industrial and local transportation stocks. The advance, which amounted to from 3 to 10 points in many cases, led to considerable selling to take profits, and the advance noted was not maintained. Since Monday the market has been irregular, with an increasing tendency to weakness and a sharp decline in many issues.

Reports of damage to the winter-wheat crop were used with some success by the bear element to depress the granger shares. The best illustration of the irregularity of the market is found in the extreme fluctuation of some of the most active issues, including Third Avenue, which covered a range of 20 points; Metropolitan street, 32 points; Manhattan Elevated, over 22 points; Brooklyn Rapid Transit, nearly 30 points; American Sugar Refining, 27½ points; International Paper, 16 points; Federal Steel, 17½ points; American Steel & Wire, 12 points, and People's Gas, 18 points. For the movement from day to day and closing prices our readers are referred to the following pages of quotations.

## Inquiries and Corrections.

**ST. PAUL & DULUTH COMMON STOCK.**—A correspondent writes on questioning the correctness of the sale price of 48s reported for this stock on March 28. A sale of 100 shares at this figure was recorded in the Stock Exchange list for that day, and we accordingly used it and incorporated it in our range. On Monday of this week, however, the official list announced that the report of sale referred to was "an error." We therefore now eliminate that sale and make the necessary revision in our range for the year to date.

## New York Stock Exchange—A Daily, Weekly and Yearly Record.

## STOCKS—HIGHEST AND LOWEST SALE PRICES.

Saturday, April 1.	Monday, April 3.	Tuesday, April 4.	Wednesday, April 5.	Thursday, April 6.	Friday, April 7.

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

Net increase (10.49 p. c.)				

For the month of March 85 roads (all that have furnished statements for the full month as yet) show aggregate results as follows:

Month of March.	1899.	1898.	Increase.	Per Cent.
Gross earnings (85 roads)	\$ 39,746,666	\$ 37,478,184	\$ 2,268,482	6.39

It will be seen that there is a gain on the roads reporting in the amount of \$2,268,482 or 6.39 per cent.

**Net Earnings Monthly to Latest Dates.**—The table following shows the gross and net earnings of STEAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained, is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of March 18, 1899. The next will appear in the issue of April 22, 1899.

a Net earnings here given are after deducting taxes.  
b Net earnings here given are before deducting taxes.

† Decrease in earnings due to strike at Panama, which resulted in detention of steamers at that point.  
‡ After deducting "reserve fund for repairs of steamers," balance in February, 1899, was \$6,535, against \$48,053, and from May 1 to February 21, 1899, \$615, against \$487,905. The reserve fund for depreciation and general and extraordinary repairs of steamers has been increased to the standard of the English companies, i. e., five per cent upon the value of the steamers.

**Interest Charges and Surplus.**—The following roads, in addition to their gross and net earnings given in the foregoing, also report charges for interest, &c., with the surplus or deficit above or below those charges

## STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

STREET RAILWAYS AND TRACTION COMPANIES.

 † These figures include results on Brooklyn Rapid Transit, Brooklyn Elevated and Nassau Electric.

**Street Railway Net Earnings.**—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday) we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONICLE of March 18, 1899. The next will appear in the issue of April 22, 1899.

### Fort Worth & Denver City Railway.

(Report for the year ending Dec. 31, 1898.)

Vice-President Morgan Jones says in part:

**General Results.**—The year shows an increase in gross earnings of \$159,604. Of this \$10,196 was from passenger traffic and \$115,626 from freight traffic. About one half of the increase in passenger earnings was from local passenger business, which shows the improved condition of the country tributary to our line. The freight increase was derived largely from the increase in general business growing out of the improved conditions of our country. The live stock interest, which forms one of the heaviest items of the tonnage (being 20 per cent thereof in 1898) showed a large decrease as compared with last year, due to various causes, principally the

building of the Pecos & Northern Texas road, from Amarillo to Roswell. The potato and vegetable business from Colorado, always an important item of tonnage during the fall and winter months, shows a slight decrease, while there is a large increase in the movement of grain, flour, etc., from Colorado to Texas points. The wheat crop tributary to the line was short, both in quantity and quality. The cotton movement for this year was substantially the same as that of 1897, while the acreage was larger. The through merchandise business from the Atlantic seaboard territory to Colorado and Utah was seriously interfered with by the Spanish war, but during the latter part of the year has shown a very gratifying increase.

**Renovations.**—Our operating expenses have increased the last six months, preparing the road for heavier rolling stock and replacing cars destroyed several years ago. We have rebuilt 62 old obsolete stock cars into box cars, so that now the equipment is in good condition, except 175 old stock cars out of use. All our engines are in good condition for service; 452 cars have automatic couplers applied; 20 of our engines have new air-brakes, and provision has been made for over one-half of the air-brakes required on cars out of 1898 earnings.

The road-bed is well tilled, about 90,000 having been put in the last six months, making 156,470 ties placed in track during the year. There has been eighteen miles of 60 and 65 pound rail bought and paid for during the year to replace light rails. One hundred and fifty lineal miles of fencing has been constructed during the year, thus leaving about 27 per cent only of the entire road without fences. Road-bed and rolling stock have been kept in a fairly good condition.

**Prospects.**—The prospects at this time are good for next year's crops, having had an unusual amount of moisture the last two months. The acreage of wheat put in is largely in excess of last year, and the plant now looks healthy.

The revenue per ton per mile was 1.08 cents and per passenger per mile 2.49 cents.

**Statistics.**—Earnings, expenses and charges for the year:

**Panama Railroad Company.***(Report for the year ending Dec. 31, 1893.)*

President J. Elward Simmons says in substance:

**BONDS.**—The redemption of the 7 per cent sterling bonds was entirely completed and the mortgage canceled of record. By the operation of the sinking fund clause of the new  $\frac{1}{2}$  per cent gold bond mortgage (authorized issue of \$1,000,000) the original issue of \$2,000,000 has been reduced by redemption and cancellation of 141 bonds to \$1,859,000, the present total of the company's outstanding mortgage liability. A further issue of 932 of these bonds was authorized in order to provide as may be necessary for contract payments at maturity in 1902, or earlier, at the company's option, on account of indebtedness incurred in the construction of the La Boca terminal. The 6 per cent subaldy bonds, due in 1910, have been reduced by redemption as provided by their sinking fund clause from 1,732 to 1,611.

**PACIFIC MAIL S.S.**—The Pacific Mail Steamship Co. availed, in September last, of its option to extend the contract of Dec. 16, 1893, for a further period of two years to Dec. 16, 1900, and the contract of 1872 with that company, which was an impediment to this company's development, has been abrogated and canceled.

**GENERAL RESULTS.**—The company's business was seriously affected by the war with Spain, which, during its continuance, caused an almost total suspension of passenger traffic by our steamship line, together with a loss of coastwise traffic both ways. Business with our foreign connections was relatively impaired. The company, however, continued to operate its line between New York and Colon (the vessels of which are of American registry) and to meet the large outlay necessary for war-risk insurance upon the steamers. Revolutionary disturbances in South American republics had a damaging effect upon our foreign traffic.

Despite special adverse circumstances, the net earnings for the year, after payment of everything due, represent nearly 4 per cent upon the capital stock (\$7,000,000), but it is deemed prudent for the present that no distribution in dividends should be made to the stock.

**Statistics.**—The earnings and income account have been:

	1898.	1897.	1896.

**GENERAL INVESTMENT NEWS.**

**Reorganizations, Etc.—Defaults, Reorganization Plans, Etc.**—The usual index is omitted this week, but that covering the items published to March 25, inclusive, will be found in the CHRONICLE of April 1.

**Acker Process Co.—Incorporated.**—Articles of incorporation have been filed at Trenton, N. J., by the Acker Process Co. and the Acker Process Patent Co., with authorized capital of \$3,000,000 and \$3,000,000 respectively. Both companies are empowered to manufacture and deal in caustic soda, chloride of lime, lead sodium alloy and chlorine, and have as incorporators Charles E. Acker, Samuel H. Guggenheimer and E. F. C. Young, of Jersey City.

**American Car & Foundry Co.—Circular.**—President Bixby has issued a circular saying:

All the plants of the company are running to their full capacity. Orders on the books to-day aggregate 37,000 cars and 375,000 wheels, besides a large tonnage of bar iron, axles, pipes and castings. Should the business for the entire first fiscal year continue at present rate, which seems altogether probable, the profits for the year will approximate \$6,000,000, an amount equal to 7 per cent on the preferred and 13 per cent on the common. It is the intention to apply to list the securities on the Stock Exchange as quickly as possible. The company proposes to pay quarterly dividends, beginning June 1 next.

The total annual capacity of the company is: Passenger cars, 500; freight cars, 90,000; wheels, 900,000; pipe, 30,000 tons; bar iron and axles, 90,000 tons; castings, 130,000 tons.—V. 68, p. 522.

**American Linseed Co.—Officers.**—The following are the officers and directors:

**Directors:** B. F. Miles, Cleveland; Walter D. Douglas, Cedar Rapids, Ia.; G. E. Highley, Chicago; Guy G. Major, A. H. Larkin, Nutley, N. J.; John L. Severance, Cleveland; Joseph A. Dean, New York; Augustus N. Eddy, Chicago; W. P. Orr, Piqua, O.; Arnold Thayer, New York; George G. Metzger, Toledo; George A. Archer, St. Paul; J. W. Daniels, Buffalo, and G. F. Piper, Minneapolis.

**Officers:** B. F. Miles, President, Guy G. Major, Vice President, J. A. Dean, Second Vice-President, W. D. Douglas, Treasurer, and G. E. Highley, Secretary. Eastern office at 100 William St., N. Y.; general offices in Chicago.

The fiscal year has been fixed to end March 1. For the three months to March 1, it is stated, the company earned its pro rata dividend on the preferred stock. The Company was incorporated in New Jersey last December with an authorized capital stock of \$33,500,000 (half 7 per cent non-cumulative preferred) and took over the plants of the old National Linseed Oil Co. and several independent companies per plan in V. 67, p. 1161. It is said that as soon as the small unpaid balance of the indebtedness of the National Linseed Oil Co. is discharged with the funds provided under the plan, the securities of the American Linseed Co. will probably be listed on the New York Stock Exchange.—V. 68, p. 569.

**American Potteries Co.—Options Lapse.**—The options held by John R. Dos Passos on various pottery plants which it was proposed to merge under the title of the American Pottery Co. expired on April 1. The main obstacle that stood in the way of the consolidation was stated in V. 68, p. 426. Mr. Dos Passos still hopes the consolidation will go through.—V. 68, p. 426.

**American School Furniture Co.—Officers and Property.**—This company, recently incorporated in New Jersey with an authorized capital of \$10,000,000, has completed at Wabash, Ind., its organization with \$1,500,000 of capital stock. Twelve large manufacturing plants, it is stated, have been taken over, including factories at Buffalo, N. Y.; Burlington, Ia.; Walpole, Mass.; Wabash, Ind.; two at Richmond, Ind.; Bloomsburg, Pa.; Grand Rapids, Mich.; Springfield, Ill.; Piqua and Cleveland, O., and Manitowoc, Wis. Samuel Lawrence is President and James Summerfield, Secretary.

**Mortgage.**—The company has executed a mortgage for \$1,500,000 to Walter G. Oakman and George R. Turnbull of the Guaranty Trust Co., as trustees, to secure 20-year 6 per cent gold bonds.—V. 68, p. 532.

**American Smelting & Refining Co.—Incorporated.**—This company was incorporated at Trenton, N. J., on Tuesday, with authorized capital stock of \$33,500,000 preferred 7 per cent cumulative and \$32,500,000 common. The present issue will be: Preferred, \$27,000,000; common, \$27,000,000. The prospectus was given in the CHRONICLE of March 18, page 523. Moore & Schley and Lewisohn Brothers have been concerned in the underwriting.—V. 68, p. 523.

**American Steel & Wire Co.—Vessels Purchased.**—The company has bought the five steamers of the Zenith Transportation Company of Duluth. The boats have been built in the last three years and are of the 6,000-ton class. The price was close to \$1,000,000. The capital stock of the Zenith Company was transferred to the Steel & Wire Company. This purchase gives the latter concern a fleet of thirteen large lake carriers.—Chicago "Economist."

The American Steamship Co., with authorized capital stock of \$1,000,000, filed articles of incorporation recently with the County Clerk of Hudson County, N. J. The incorporators are Frederick P. Voorhees, Floyd E. Patterson, William A. Holland, Paul E. De Fere and Robert S. Green, all or nearly all identified with the American Steel & Wire Co.—V. 68, p. 569.

**American Tobacco Co.—100 Per Cent Stock Dividend.**—In addition to a dividend of 2 per cent in cash the company has declared a dividend of 100 per cent in common stock, both payable on the common shares on May 1, "out of surplus."—V. 68, p. 617.

**Atchison Topeka & Santa Fe Ry.—Interest on Adjustments.**—The executive committee, under authority from the directors, will arrange to make the payment of interest on the adjustment bonds semi-annual, provided the holders of not less than \$15,000,000 of these bonds request the change. Representatives of \$9,000,000 bonds are already on record as seeking the change.—V. 68, p. 570.

**Bangor & Aroostook RR.—Absorption of Leased Line Completed.**—The Bangor & Piscataquis RR., which has been operated under lease, was acquired in fee on April 1 upon payment by the company of the \$1,225,000 bonds on the road, including \$925,000 issued by the city of Bangor. The new loan of the Bangor & Aroostook for \$1,500,000, covering the purchased property, was described in V. 68, p. 84, 329, and V. 67, p. 1306.—V. 68, p. 329.

**Boston Breweries Co.—Incorporated.**—On April 3 papers were filed with the clerk of Hudson County, N. J., organizing this company, with an authorized capital stock of \$11,500,000, of which \$7,500,000 to be 7 per cent cumulative preferred. The company has the right to issue \$7,500,000 of 6 per cent gold bonds. It is understood that the corporation will control fifteen breweries in and near Boston.

**Boston & Montana Consolidated Copper & Silver Mining Receiver.**—The Supreme Court of Montana on March 31 granted the motion to quash the writ that sought to prevent the District Court of Butte from proceeding further in the receivership matter. T. R. Hinds was appointed receiver by Judge Clancy on Dec. 15. The case came up for argument on April 7, when Judge Clancy ordered the receiver to take immediate possession, despite the fact that the grounds for the appointment of a receiver were apparently nullified by the re-transfer of the property from the New York to the Montana corporation.—V. 68, p. 426.

**Brooklyn Gas & Electric Light Co.—Incorporated.**—This company has been incorporated in New Jersey with authorized capital stock of \$1,500,000. Incorporators: H. S. Tounny, Maurice Landauer and Frank M. Weigman, all of New York.

**Brooklyn Rapid Transit Co.—Brooklyn & Brighton Beach RR.—Prospect Park & Coney Island RR.**—\$2,636,000 New Stock Offered at Par.—The Brooklyn Rapid Transit Co. gives notice that it proposes to issue [\$2,636,400] additional capital stock, equal to 7 per cent of its capital stock outstanding [\$37,663,600] April 15, 1899. Such stock is to be issued for the purposes of purchasing and electrically equipping the Brooklyn & Brighton Beach RR. and electrically equipping the railroad of the Prospect Park & Coney Island RR., which by agreement is to be leased for 999 years to a company of the Brooklyn Rapid Transit system, and for such additions and improvements to the railroad properties owned or controlled by the Brooklyn Rapid Transit system as may be deemed desirable. The holders of Central Trust Co. certificates for Brooklyn Rapid Transit Co. stock at 12 o'clock noon on April 15, 1899, will be permitted until noon of April 29 to subscribe at par at the Central Trust Co. for the voting trust certificates representing the new shares to an amount equal to 7 per cent of their respective holdings.

The authorized capital stock of the Rapid Transit Co. was recently increased from \$20,000,000 to \$45,000,000. Of the new stock there was issued in connection with the purchase of the Nassau Electric RR. \$9,500,000 and for the purchase of the Brooklyn Union Elevated \$8,163,600, making the total now outstanding \$37,663,600, and with that now offered \$40,300,000.

**Improved Facilities, Economies.**—Speaking of the company's plans regarding the Brooklyn Union Elevated road, President Roessler is quoted as saying:

With electricity we expect to run the cars at thirty miles an hour. With new cars, electric elevators at the principal stations, all the stations lighted by electricity and with cars running every two minutes, it is expected that there will be no great difficulty in inducing the public to patronize the overhead lines rather than crowd into the surface cars. I expect to take off at least one-third of the surface cars now operated, and this will solve the vexatious problem of the congested state of traffic on Fulton Street. An express train service will be inaugurated, so that on holidays and in the summer time the cars which leave the Brooklyn Bridge (Manhattan end) will go direct to Coney Island, stopping only at three or four principal stations.

As to the expected economies, he says the matter of economy in the joint operation of the elevated and surface properties can hardly be over-estimated. While it is too early to make any accurate statement, yet the saving in general expense, and particularly in the matter of the substitution of electric power for the locomotives, will make a very large item; also in being able to run at greater speed on the elevated structure, and with less fear of accident, will result in a further large and considerable saving.

**Leases.**—The Brooklyn Heights RR. Co., owned by the Brooklyn Rapid Transit recently took one-year leases of the Brooklyn Union Elevated and the Nassau Electric RR.

The injunction granted on Tuesday by Justice Dickey, restraining the lease of the Nassau Electric RR. to the Brooklyn Heights RR. Co. was dissolved yesterday.—V. 68, p. 617 570; V. 66, p. 954.

**Brooklyn Rapid Transit Co.—Long Island RR.—New York Brooklyn & Manhattan Beach RR.—Contracts for Harmonious Action.**—It is officially announced that on Saturday last agreements were executed by the Brooklyn Rapid Transit Co. and the Long Island RR. Co. providing for the operation by each company of certain lines of the other's system, so as to form a number of new through routes. The Brooklyn Rapid Transit Co. becomes the lessee of the Prospect Park & Coney Island RR., of the Prospect Park & South Brooklyn RR. and of the New York & Coney Island RR. and also acquires the right to operate over the line of the New York Brooklyn & Manhattan Beach RR. Company to Manhattan Beach, giving direct connections to Manhattan Beach, etc.

A new express passenger route is to be operated by the Long Island RR. between Jamaica and the Brooklyn Bridge, via Flatbush Avenue, which will bring the Jamaica territory within thirty-five minutes of the City Hall. Cars of both systems will also be operated between the Broadway ferries and Rockaway Beach, via the Brooklyn Elevated, the incline at Chestnut Street and the Long Island Road to Rockaway Beach.—V. 68, p. 617, 618; V. 64, p. 234.

**Buffalo-St. Mary's & Southwestern RR.—Bonds Called.**—Notice is hereby given that the company will redeem the \$1,000,000 first mortgage bonds of 1897 at the Central Trust Co., N. Y., on Sept. 1, 1899, at 105 and interest.—V. 68, p. 523.

**Camden & Philadelphia Ferry Co.—Consolidation.**—The West Jersey Ferry Co. and the Camden & Philadelphia Steamboat Ferry Co. have been consolidated as the Camden & Philadelphia Ferry Co., a New Jersey corporation, with authorized capital stock of \$2,000,000.

**Canada Atlantic Ry.—Consolidation.**—The stockholders will meet on May 1 next to confirm the amalgamation of the Ottawa Arnprior & Parry Sound with the Canada Atlantic. It is proposed to make a new loan to consolidate the debts of the two companies.—V. 68, p. 901.

**Canadian Pacific Ry.—Minneapolis St. Paul & Sault Ste. Marie Ry.—Guaranteed Bonds.**—A press despatch says that at the annual meeting of the shareholders of the Canadian Pacific on April 5 the issue of securities on the Pipestone and Stonewall branches was authorized, and the lease of the Columbia & Western RR. was approved. "An extended agreement," the despatch continues, "with the Minneapolis St. Paul & Sault Ste. Marie Ry. was approved. It provides for taking up certain maturing interest-bearing obligations of that company and for the payment of certain current capital obligations, and for the equipping of terminals and additions, acquired or required, by the creation of \$5,000,000 4 per cent bonds of the 'Soo' company, the interest to be guaranteed by the Can. Pac. Ry. This agreement is calculated to enable the 'Soo' company to apply its surplus earnings to interest and dividends, and to repay from earnings the Can. Pac. interest advances in annual installments. The expenditure of \$728,255 on capital account was authorized. The former officers were re-elected at a meeting of the directors."—V. 68, p. 519, 526; V. 65, p. 617.

**Central Massachusetts RR.—Action as to Lease.**—At a meeting of the directors on March 27, a committee, consisting of J. W. Weeks, Ephraim Stearns, Henry Woods, J. H. Gray and G. W. Morse was appointed to investigate the matter of the lease to the Boston & Maine. The common stockholders propose to bring suit to invalidate this lease on the ground that it was never acted upon by the holders of the common shares.

On April 6 the above mentioned committee voted to recommend that the directors take no action. Suit, it is expected, will now be brought by the stockholders to break the lease.—V. 68, p. 570.

**Chicago Great Western Ry.—Priority Loan to Be Paid Jan. 1, 1900—\$3,360,000 Debenture Stock to Be Issued in 1899.**—The following official statement has been furnished the CHRONICLE:

"In 1898 the articles of incorporation were changed by a vote of 87 per cent of the entire stock of all classes so as to increase the amount of debenture stock allowed by the articles from \$15,000,000 to \$30,000,000, but none of the increased stock can be issued until sanctioned by a vote of the debenture and preferred A stockholders collectively at an extraordinary general meeting called for the specific purpose. On March 1, 1899, only \$12,419,571 of debenture stock had been issued, which is \$2,580,429 less than the \$15,000,000 originally authorized. At an extraordinary general meeting of the debenture and preferred A stockholders collectively, held in London on January 30, 1899, the issue of \$5,000,000 additional debenture stock was authorized to be issued for the purpose of retiring the priority loan, \$2,823,150 (which is the only mortgage indebtedness of the company), and to redeem at the discretion of the board of directors and the Finance Committee, from time to time, as opportunity offers at or before maturity, any or all of the car trusts and other liabilities of the company which are a charge prior to the 4 per cent debenture stock and for improvements. Of the \$8,000,000 thus voted only \$3,360,000 will be issued in 1899, the proceeds of which will be applied to pay all of the priority loan (\$2,823,150) which does not mature until 1934, but by its terms

is redeemable at the option of the company on six months' notice at 105. It will be called and paid Jan. 1, 1900. When this \$3,300,000 is issued, probably in November, 1899, the amount of debenture stock outstanding will be \$15,710,571, which may be slightly increased by exchanges under the plan of reorganization.

"The sale of the \$3,300,000 has been underwritten at 93 and accrued interest. It is the present expectation that no more will be issued until 1901, when certain car trusts mature."—V. 68, p. 186.

**Chicago & Alton RR.—Deposits.**—The deposits of stock with the purchasing syndicate aggregate nearly 95 per cent of the total amount. An additional 20 per cent of the subscriptions of the underwriters has accordingly been called for April 12. This makes 90 per cent, or about \$36,000,000 of the subscriptions called to date. To take up the entire \$22,230,600 stock at the rate offered would require about \$39,773,000.

**New President.**—At the postponed meeting held Friday a temporary board was elected, and E. H. Harriman made President.—V. 68, p. 617.

**Citizens' Gas Light & Heating Co. of Findlay, O.—Purchase of City Plant.**—A press dispatch on March 30 announced the sale of the municipal natural gas plant of Findlay, O., for \$150,000 to the Citizens' Gas Light & Heating Co.

**Citizens' Water Co. of St. Joseph, Mo.—Incorporated.**—This company was recently incorporated in Missouri, with authorized capital stock of \$300,000; half paid. Incorporators: Joseph Morton, Arthur W. Brewster, both of St. Joseph; J. L. Wood, Laclede; Jno. H. Brown and Jno. P. Miller, both of Chicago.

**Cleveland Canton & Southern Ry.—Sale of First Mortgage Bonds Authorized.**—At the meeting on Wednesday the depositing first mortgage bondholders of the Cleveland & Canton RR. authorized the sale to a Cleveland syndicate of the deposited first mortgage bonds at 92 and interest at the rate of 4 per cent, with the option of making the payment on or before the first day of October, 1899. The syndicate is said to be backed by the Cleveland Bank for Savings, the Cleveland Trust Company and Myron T. Herrick. Mr. Herrick is prominently identified with the Wheeling & Lake Erie Road. The bonds sold aggregate \$1,940,000 of the total issue of \$2,000,000.—V. 68, p. 617.

**Columbian Electric Car-Lighting & Brake Co.—Status.**—This company has acquired the stock of the United Electric Co. (see V. 68, p. 185) and so all, or nearly all, the \$5,000,000 stock of the American Railway Electric Light Co. The new company is authorized to issue \$10,000,000 capital stock, and has offices at No. 11 Broadway. F. C. Hollins & Co., of 11 Wall Street, are interested in the enterprise, Mr. Hollins being the company's Treasurer.—V. 68, p. 427.

**Columbus Hocking Valley & Toledo RR.—Distribution of Proceeds of Sale.**—The final report of the Master Commissioners, filed March 31, shows the proceeds of the recent sale to be applicable as follows: Interest on consols of 1881, \$626,400; interest on first mortgage bonds, \$338,188; leaving \$2,965,413 for pro rata payment on 8,000 consols of 1831, equal to \$372 17 on the principal of each.—V. 68, p. 571.

**Compressed-Air Capsule Co.—Incorporated.**—This company with \$15,000,000 of authorized capital stock, of which \$1,500,000 is preferred, was organized at Trenton, N. J., March 27, to manufacture all kinds of compressed and liquefied gases and compressed and liquefied air in capsules. The incorporators are Henry E. Howland, S. Reading Bertram of New York, George L. Prentiss, Montclair, and Charles E. Levy, New Orleans.

**Consolidated Street Car Co.—Prospectus.**—As stated last week this company was incorporated March 27, under the laws of New Jersey, with a capital stock of \$8,000,000 7 per cent cumulative preferred stock and \$10,000,000 common stock, to build street railroad cars, automobiles, omnibuses and other vehicles for conveying passengers, freight or express, and to manufacture trucks, wheels and other railroad supplies. The new company, we are officially informed, will take over the business of the following concerns:

Street Car Manufacturers.—J. G. Brill Co., Philadelphia; St. Louis Car Co., Laclede Car Co., American Car Co. of St. Louis; John Stephenson Co., Ltd., New York City (with a plant at Elizabeth, N. J.); J. M. Jones' Sons, Troy, N. Y.; G. C. Kuhlman Co., Cleveland, O.; J. G. Kuhlman & Co., Cleveland, and the street car building plants of the Pullman's Palace Car Co.

Three makers of trucks for street cars, viz.: J. G. Brill & Co., Philadelphia; Maguire Manufacturing Co., Chicago, and Peckham Motor Truck & Wheel Co. of Kingston, N. Y.

Also the assembling plant of the St. Louis Car Co. at Berlin, Germany.

The company, it is stated, will control 90 per cent of the street car building and truck building in the United States. It is intended to maintain five plants in this country, namely, at St. Louis, Cleveland, Philadelphia, Elizabeth, N. J., and San Francisco [a plant is to be built at the last named place], and also a plant in England. W. C. Sheldon & Co. are concerned in financing the consolidation.—V. 68, p. 618.

**Continental Cotton Oil Co.—Incorporated.**—This company has been incorporated in New Jersey, with authorized capital stock of \$6,000,000, of which \$3,000,000 is 7 per cent cumulative preferred. Incorporators—Samuel B. Lawrence, Jr., B. Summerfield, Henry C. Everell, Robert P. Barry, Jr., and J. C. Young.

**Continental Tobacco Co.—\$25,000,000 New Stock.**—The stockholders will vote, April 21, on a proposition to increase

the common stock from \$37,500,000 to \$50,000,000, and the preferred stock from \$37,500,000 to \$50,000,000. An official statement as to the company was given last week on page 617.

**Incorporated.**—The S. J. R. Reynolds Tobacco Co., with authorized capital stock of \$5,000,000, was incorporated at Trenton, N. J., on April 4, by R. J. Reynolds, W. N. R. Reynolds, J. B. Dukes, J. R. Cobb, George N. Gales, C. K. Faucette and D. A. Keller. The company is understood to be affiliated with the Continental Tobacco Co.—V. 68, p. 617.

**Dallas (Tex.) Consolidated Electric Street Ry.—Mortgages Filed.**—The "Dallas News" gives the following as to the mortgages filed last week:

C. H. Alexander and the Dallas Consolidated Electric Street Railway Co., by C. H. Alexander, President, on April 1 conveyed to E. J. Gannon, Trustee, all the street railway tracks, franchises, etc., in Dallas owned by the grantors, also twenty tracts of land in Dallas and Oak Cliff, "to secure J. B. Wilson on a note for \$365,000, due Sept. 15, 1900, with interest at the rate of 10 per cent, payable Sept. 20 and March 20." (This note was dated March 20, 1899, and is payable in gold at the American National Bank, Dallas.)

By another deed of trust the Dallas Consolidated Electric Street Railway Co., by C. H. Alexander, President, conveyed to Royal A. Ferrie, Trustee, the Queen City Street Railway property "to secure P. H. Bousquet, I. M. Earle and G. Van Ginkel in the payment of one note for \$25,000, due Sept. 15, 1900, with interest at 10 per cent per annum, made subject to a note for \$365,000 in favor of J. B. Wilson." Until the first note is paid the company covenants to expend \$40,000 annually "in betterments as contradistinguished from repairs in, on and about the street railway."

**New Officers.**—G. Van Ginkel, late of Des Moines, Iowa, has been elected President, J. B. Wilson Vice-President and Edward T. Moore Secretary and Superintendent of the consolidated company.—V. 68, p. 618.

**Delaware & Hudson Canal Co.—Equipment Mortgage.**—The company has made a mortgage to the United States Mortgage & Trust Co., as trustee, to secure \$1,500,000 bonds for the purchase of locomotives and cars. The bonds bear 3½ per cent interest, and 10 per cent of them will be paid yearly, so as to retire the entire loan at the end of ten years.—V. 68, p. 565.

**Denver Gas & Electric.—Capitalization.**—This Colorado company, which has taken possession of the plants of the Denver consolidated gas and Denver consolidated electric companies, is capitalized as follows:

Capital stock of \$3,500,000, in shares of \$100 each; first consolidated mortgage or collateral trust 5 per cent fifty-year gold bonds, dated March 1, 1899, total authorized issue \$5,500,000. In effecting the union the entire capital stock and \$2,400,000 of the bonds were issued; \$2,445,000 of bonds will be retained to retire a like amount of present outstanding bonds, and \$655,000 bonds will be retained for future improvements. This loan also provides about \$250,000 cash working capital. About \$300,000 stock was to be returned to the treasury, and in addition a further amount of stock was to be set aside to induce the old bondholders to convert their bonds into new bonds.

The new securities were underwritten on the basis of a \$1,000 bond and \$500 stock for \$1,000 cash. See further particulars in CHRONICLE of Feb. 18, page 380.

**Detroit Street Citizens' Street Ry.—Detroit Electric Ry.—Negotiations to Purchase for City.**—The Michigan Legislature recently passed a bill empowering the Common Council of Detroit to create a self-perpetuating commission of three to buy the street railways of the city and to operate them, charging not more than the present fares, viz., six tickets for twenty-five cents on the Detroit Citizens' and eight for the same amount until 8 p. m. on the Detroit Electric Railway. The Act provides that the city shall incur no debt in acquiring the properties, but shall pledge the roads and their earnings for the purchase price, the roads to be returned to the companies if municipal control does not succeed.

Under this law the Common Council has appointed the following commissioners: Gov. Hazen S. Pingree, six years; Elliot G. Stevenson, lawyer, four years; Carl E. Schmidt, leather dealer, two years. This commission will report to the Council the proposed purchase price of the roads before closing the transaction. The Mayor vetoed the motion appointing the commission, but his veto was held out of order by the President of the Common Council.

The Detroit Metropolitan Street Ry. Co. has been incorporated with \$25,000 nominal capital stock, of which Bernard Clark holds \$24,600. The company, it is supposed, will act in some capacity in connection with the sale, if it be effected.—V. 64, p. 82; V. 65, p. 1219.

**Domestic Sewing Machine Co.—Sale.**—Vice-Chancellor Emery, in Chancery Chambers, at Newark, on Saturday last, authorized Judge Andrew Kirkpatrick, as receiver of the Domestic Manufacturing Co. and of the Domestic Sewing Machine Co., to sell the two properties for \$325,000 to the Reorganization Committee, consisting of Richard Delafield, Francis L. Hine and H. R. Kuhnhardt. The committee represents certain New York and other banks that were creditors of the companies.

**Easton (Pa.) Consolidated Electric Co.—On Philadelphia Unlisted.**—The stock of this company, recently incorporated, has been placed on the unlisted department of the Philadelphia Stock Exchange. There are 30,000 shares, par 50, \$5 paid. The company was organized to own the controlling interests in the stocks of the Easton Transit Co., and the Edison Illuminating Co., of Easton, lately purchased by Stern & Silverman of Philadelphia.

**Directors:** J. S. Rodenburg, Howard Rink, the late President of the Illuminating Company; William M. Davis of Phillipsburg, N. J.; George H. Colkett, William Hinkle Smith, George W. Norris, William Stern, Philadelphia.—V. 68, p. 524.
